Street Railway Supplement (Quarterly)  
State and City Supplement (Semi-Annually)

NO. 1,645.

\* Not included in totals.

⚡ We print to-day on subsequent pages our usual annual review, containing very extensive monthly summaries of the events and incidents of the year in the various financial markets. We likewise publish our customary elaborate tables of prices—stocks, bonds, Government securities, State securities and foreign exchange. Including these tables, the matter covers altogether 22 pages.

### THE FINANCIAL SITUATION.

As the year closes no doubt some industrial conditions are less gratifying than they were a year ago. But on the whole the business outlook is incomparably better. Of the less agreeable features a serious development has been the insolvency of many banks recently announced, the closing of which has been followed by numerous failures among other companies and individual traders. Light on the cause of that feature in the situation is gained when we remember that the list of fatalities has been growing ever since the first of July, and that up to that date both the number of casualties and the amount of the liabilities compared well with the previous two years; indeed the commercial liabilities the first six months were less than in 1894 and only 9 million dollars larger than in 1895, being, according to *Dan's Review* (first 6 months) \$97,869,688 in 1896 against \$88,839,944 in 1895 and \$101,733,306 in 1894. The increase in casualties since the first of July is wholly natural. A sudden, decided check to industrial activity at any time, such as happened at about the opening of the current fiscal year, must of itself have proved a severe test wherever financial weakness existed. Prolong that stoppage to business operations for four months—an experience traders had likewise to pass through the past summer—and the circle of those unable to endure the strain of course must widen.

Since the election a peculiar state of affairs has existed. In the Eastern and Middle sections decided relief has been felt, but the Southern and Western States, especially the latter, the trade of which is largely dependent upon Chicago, have suffered. The developments in that city the first week in August which led to the immediate closing (August 4) of the Stock Exchange there, are well remembered. The values of all securities mainly marketed through that center were naturally enough unsettled and depressed by the event, a condition well indicated by the circumstance that the Exchange did not find it convenient to open again until November 5th. What result other than occurred could be expected—that the banks at that center which employed risky business methods with their dependencies at home and elsewhere should be forced into liquidation? Nothing short of an old time boom could have prolonged the existence of the Bank of Illinois a sufficient time to permit its affairs to be put into a safe and conservative shape. At the same time, while it is true that these special events have had a wide unfavorable influence, they do not by any means wholly account for the existing situation even in the West. Current failures wherever they have occurred are due largely to the trials through which we have passed since the first of July and to the further fact that the West and South have shared but little in the relief which has followed the election. The agricultural sections always suffer most and longest from a wave of discredit. This

is true because their prosperity is so intimately connected with and dependent upon a free inflow of outside capital.

But the great question now relates to the future. A new year has opened—what has it in store for our industrial interests? We are not permitted to doubt that as the months pass an enlarged measure of activity will develop. Important conditions insure that much at least. At the same time it seems probable that the extent of this growth will depend to some considerable extent upon circumstances not fully developed. For instance, there seems to be a consensus of opinion that we are to have an extra session of Congress soon after the 4th of March. It would be untrue to say that there is no anxiety in business circles on that account. Could action at such a session be strictly confined to an increase of tariff rates and an improvement of the currency situation, the disturbance would be comparatively immaterial. But the suggestions made in high political circles with reference to silver legislation and legislation looking to an international convention in the interest of silver are becoming so frequent and prominent that the public feeling is not as restful as it was. Any agitation of that subject, and especially any exulting or appearance of a willingness to compromise with silver would endanger business interests and is very undesirable. These and other troublesome discussions possible to come up if the new Congress should be called together early, make mercantile and financial circles feel that if an extra session could be omitted it would be a blessed deliverance.

It is gratifying to hear that Judge Myers, in the District Court at Oskaloosa, Kansas, finds on consideration that the Alien Land Law of Kansas under which he appointed receivers for the Atchison, does not apply in the case of railroads, and has accordingly rescinded his former action and dismissed the receivers. While this is very satisfactory as far as it goes, it is a striking commentary on the practice of judges in granting applications of this kind on ex parte motions. In the present case the receivership order was issued without argument and without notice to the company, on no other ground than the allegation that the company was violating a State statute, which as it now appears, and appeared at the time even to laymen, does not apply at all. It is a serious matter to throw a great and perfectly solvent corporation into the hands of receivers, and the courts in acting on motions of that kind should proceed with the utmost deliberation. This is especially true when, as in this instance, the surrounding circumstances so clearly indicate that the motion is a wholly untenable one. The fact that the order has now been dismissed is of course an acknowledgment that it ought never to have been issued, and certainly had argument been heard in the first place it would not have been granted. The experience of Judge Myers should lead to a reform in court practice in this respect.

The feature in our financial markets this week has been a material fall in foreign exchange. Rates had already begun to weaken last week, but the decline since then has been much more marked. The movement is especially noteworthy because it has come at the close of the year at the period when we always have a large debt to pay the outside world for interest and dividends on capital invested here and also because European authorities have been looking to this occasion for a return flow of gold. The decline then

at this juncture tells us that the first of January payments have all been provided for and that no shipments of the metal are likely at present. An interesting fact is that the year (1896) closed with rates for actual business  $483\frac{1}{2} @ 484$  for long,  $486\frac{1}{2} @ 486\frac{1}{2}$  for short and  $487 @ 487\frac{1}{2}$  for cable transfers. Last year (1895) closed with rates for actual business  $487\frac{1}{2} @ 487\frac{1}{2}$  for long,  $488\frac{1}{2} @ 489$  for short and  $489\frac{1}{2} @ 489\frac{1}{2}$  for cable transfers. So long as our merchandise imports remain abnormally small and nothing is done at Washington to disturb credit, the merchandise exports will continue this year large enough to prevent any outflow of gold. Bankers look for a further drop in exchange in January.

The "Railway Age" of Chicago has published its usual yearly statement of new track laid in the United States, and the total of course is found to be very small—only about 1,800 miles for the whole country. According to the "Railroad Gazette" the total is even smaller—only 1,692 miles. The aggregate of new mileage built the previous year, according to Poor, was 1,922 miles. The amount is in either case the smallest for twenty years, and indeed if we except one year it is the smallest for thirty years. The maximum addition in any twelvemonth period was in 1887, when nearly 13,000 miles were constructed. For the whole of the five years from 1892 to 1896 inclusive the aggregate of new track laid has been but little more than this total for 1887. Nor are there at present any indications of greater activity in the immediate future.

The Pennsylvania Railroad in its November return again shows a very large falling off in earnings, reporting \$1,934,900 loss in gross and \$831,300 loss in net on the whole system east and west. But hardly any other result could have been looked for. The news of Mr. McKinley's election brought considerable revival in business, but the movement did not get sufficiently under way in that month to count in the month's results, and during the early part of the month our industries were more deeply depressed than at any previous time in the whole year. We furnish below a comparative statement of gross and net earnings for six years on the lines directly operated east of Pittsburgh—the only part of the system for which we can give such a comparison.

Lines East of Pittsburgh.	1896.	1895.	1894.	1893.	1892.	1891.
November.						
Gross earnings.....	\$ 5,316,424	\$ 5,877,421	\$ 5,465,857	\$ 5,393,162	\$ 6,017,282	\$ 5,694,725

What is true of the Pennsylvania Railroad is true also of the other roads that have this week submitted exhibits for November, with the further proviso that in the case of the Northwestern lines the spring wheat movement in 1896 fell much below the phenomenal movement of 1895. Following is a four year statement of the gross and net of a number of roads.

Name of Road—	1896.	1895.	1894.	1893.

Currency is again flowing to New York freely. One bank tells us that some currency sent to Chicago last week has been returned in the package sent, seal not broken. Money on call, representing bankers' balances, has loaned generally at 2 per cent this week, with some transactions at  $1\frac{1}{2}$  per cent, and a few yesterday at  $2\frac{1}{2}$  per cent, and the average has been a small fraction below 2 per cent. Banks and trust companies quote 2 per cent as the minimum. The business in time loans has been small and rates are firmly held at 3 per cent for sixty to ninety days,  $3\frac{1}{2}$  per cent for four and 4 per cent for five to seven months on good Stock Exchange collateral. Not much has been done in commercial paper. The supply is only fair, while the demand is limited to buyers other than banks, and rates are  $3\frac{1}{2} @ 4$  per cent for sixty to ninety day endorsed bills receivable,  $4 @ 4\frac{1}{2}$  per cent for first-class and  $4\frac{1}{2} @ 5\frac{1}{2}$  per cent for good four to six months' single names.

The amount of gold obligations turned over to the Sub-Treasury in New York during the week in exchange for legal tenders was about \$450,000. The net gold in the Treasury continues to increase. The amount officially reported from Washington Thursday of last week was \$134,725,781, while on Thursday of this week it was \$136,746,473. There have been reports from Washington this week that an arrangement was nearly perfected by which Spain would accept the good offices of this Government with a view to restoring peace in Cuba. It is possible that the basis for this report is that Spain has at last replied to the proposal of President Cleveland to mediate in the Cuban war. A Havana dispatch states that Prime Minister Castillo is satisfied to have the law passed by the Cortes February 17 1895, which was promulgated a few days before the revolution broke out, carried into execution, and it is said that this is the only possible scheme of reform that can be granted to Cuba. The dispatch says that this law is not entirely satisfactory to the American administration because its proposals cannot reasonably be expected to be favorably received by the Cubans in arms. It is possible that the Spanish Government has receded from its position, taken when presenting the law of February 1895, and that the report from Washington above noted is in the main correct and that mediation in a modified form has been accepted.

The Bank of England minimum rate of discount remains unchanged at 4 per cent. The cable reports discounts of sixty to ninety day bank bills in London  $3\frac{1}{2}$  per cent. The open market rate at Paris is 2 per cent and at Berlin and Frankfurt it is  $4\frac{1}{2}$  per cent. According to our special cable from London the Bank of England gained £349,172 bullion during the week and held £34,158,899 at the close of the week. Our correspondent further advises us that the gain was due to

receipts of £234,000 net from the interior of Great Britain and to the import of £25,000, of which £34,000 were from Australia, £3,000 from Portugal and £5,000 miscellaneous.

The foreign exchange market has been dull and easier this week in the absence of demand, and it is a remarkable fact that rarely at the end of the year has there been such a condition of the market; usually there is a good inquiry for bills to remit for January settlements, and particularly a demand for sight sterling and cable transfers, whereas now these bills are inclined to be weak. The indications point to lower rates next week and to a gradual fall towards the middle of January, when maturing long bills will be offered quite freely. The posted rates on Monday were 4 84½ for sixty day and 4 88 for sight. The market was steady for long and easy for short bills and cable transfers and rates for actual business were unchanged for the former at 4 83½@4 83½, while the latter were one-quarter of a cent lower compared with those at the close on Thursday of last week at 4 86½@4 87 for sight and 4 87½@4 87½ for cable transfers. On Tuesday a reduction of half a cent for long and of one cent for short by Brown Bros. and of half a cent for short by Heidelbach, Isckelheimer & Co. and Lazard Freres made the range for posted rates 4 84@4 84½ for sixty day and 4 87@4 88 for sight, and the market was weak for sight sterling and cable transfers. Rates for actual business in long sterling were one-quarter of a cent lower at 4 83½@4 83½, while short was half a cent lower at 4 86½@4 86½ and cables were off one-quarter at 4 87@4 87½. On Wednesday there was no change in posted rates and the tone was a shade steadier for long sterling at an advance of one-quarter of a cent for actual business to 4 83½@4 83½, while short sterling and cable transfers continued easy at unchanged figures. Yesterday there was a further advance of a quarter of a cent in the actual rates for long sterling.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

	THUR. Dec. 24	MON. Dec. 25	TUES. Dec. 26	WED. Dec. 27	THUR. Dec. 28	FRI. Jan. 1
Brown Bros. 60 days	84½	84½	84½	84	84	84

THE IMMIGRATION BILL.

With comparatively slight attention from the public, a measure of very considerable importance, industrial and political, has passed the House of Representatives, has been debated, amended and voted by the Senate, and is now in the hands of a conference committee. The immigration bill, which has reached this stage, introduces a somewhat novel theory into this country's legislation. Until a very recent date, encouragement of immigration was the single policy pursued by Congress. The industrial building-up of many districts of the West and South from wildernesses to populous communities has been the work almost entirely of newly-arrived citizens. There are States made up almost one-half of foreign-born population such as Minnesota, where nearly forty per cent of the citizens came originally as immigrants to this country, and as North Dakota, where the foreign-born percentage is forty-five. Increase in immigration under such conditions was assumed to be an essential factor in our national development.

We have, it is true, at intervals passed laws to exclude immigrants who were regarded as obviously undesirable. Paupers and criminals, for instance, are properly barred out. The Chinese Exclusion Act, whether right or wrong in principle, was based on a similar theory of self-protection. Even the Contract Labor Act made no discrimination against any class of immigrants, but only against the manner of their coming. But the bill now approaching its final vote in Congress is a much more radical measure. It applies a really rigid test of immigrant illiteracy. As passed originally in the House, the act provided that all male immigrants between the ages of sixteen and sixty, who cannot both read and write the English language or some other, shall be refused admission. The Senate, after rejecting several other suggestions of amendment, altered the bill so as to provide, first, that admission of all immigrants, male and female, shall be thus conditioned, except in the instance of a wife, parent, grandparent, or minor child or grandchild of an admissible immigrant; and, second, that the test shall be ability of the immigrant to read and to write out five lines taken at random from the Constitution of the United States. Some of the Senators also successfully insisted on a complete exception in the case of inhabitants of Cuba during the continuance of the insurrection.

It is obvious, at a glance, that the purpose of this act is restriction on general principles. It aims to reduce the present immigration movement. In the Congressional discussion, the theory that the measure is necessary to protect our institutions was hardly once advanced. The illiterate is certainly not to be barred out because he is a source of danger to the community nor because his ignorance destroys his usefulness. In the

debate of both houses on the bill, the obvious fact was remarked upon that foreign-born citizens who have proved in the past most dangerous to our society were usually educated, and sometimes highly trained. Nor will any one assert, after even a casual observation of a gang of day-laborers, that illiteracy is a bar to useful industry. Whether the principle of the bill is right or wrong, its purpose is to check the present movement. The measure abandons definitely the old idea, which has long guided American judgment on the question, that foreigners should be welcomed to this country when they are able to earn their living and should be welcomed for that cause alone.

The adoption of this new policy raises some serious questions of expediency; perhaps additionally so in that a considerable element in Congress declares its purpose of eventually making restriction even more severe. Doubt over the wisdom of the general policy of restriction chiefly relates to our more distant industrial and commercial future. The enactment of the law will very considerably decrease the annual additions to our productive population. Some of the senators described the measure as "a weak bill because it does not go far enough." But the Commissioner of Immigration's annual report for the fiscal year ending June 30 1896 shows that 23.63 per cent of the immigrants over the age of fourteen years could neither read nor write. Under the pending law, more than one-fourth of the year's total immigration would thus have been excluded. The 343,267 arrivals of the year would have been reduced by something like 100,000.

On the other hand, there is force in the argument advanced by Senator Nelson of Minnesota—himself a type of the most useful foreign-born citizen—that our government, being "based on the foundation of education and intelligence," has the moral right "to say to immigrants, when we admit them to fellowship among our own people, that they shall approximate the standard of the intelligence and culture of our own people." It is true, Senator Nelson's general argument applies more closely to restriction of the suffrage than to restriction of immigration; nevertheless, if any restrictive policy is to be adopted, the provisions of the pending bill are aimed in the right direction. The Bureau of Immigration's statement has some interesting figures on this point. The percentage of illiteracy in the immigrant arrivals of the last fiscal year was distributed by nationalities as follows: Sweden, 1.16 per cent; Germany, 2.96 per cent; Ireland, 7 per cent; Austria-Hungary, 38.92 per cent; Russia, 41.14 per cent; Italy, 54.59 per cent, and Portugal, 77.69 per cent. This comparison pretty clearly shows at exactly what class of immigration the proposed restriction law would strike. Out of the year's total arrivals, 151,823, or nearly 45 per cent, were people of the four nationalities last mentioned—the Austrians, Russians, Italians and Portuguese. Not only is the percentage of illiteracy, as shown by the above comparisons, highest by far in these four nationalities, but it is chiefly immigrants from these nations who have failed to assimilate with our people. Obviously, therefore, if we are to begin the policy of exclusion on general principles, the rule proposed by the pending law would cut off those who socially and politically add least to our community.

We are aware that the services of the "foreign vote" to the sound-money cause in the late Presidential canvass are urged in opposition to this theory. Mr. Bartholdt, of Missouri, made much of that point in the House de-

bate last week. We think it reasonably open to question, however, whether the wholly illiterate foreign-born citizens were of any definite service. In a "campaign of education," the voter who cannot read is poor material for intelligent appeal. The probability is that he will either defer to local prejudice or follow the noisiest demagogue. The foreign-born citizens who piled up the sound-money majorities in Illinois, Wisconsin and Minnesota were not illiterates; they were Germans and Swedes, who read and reflected on their reading.

Socially and politically, the nation will lose little by reducing thus the annual foreign immigration. Whether it will or will not suffer industrial injury is another question. It will no doubt be urged that our cities are already crowded with unemployed laborers; but so far as that is an incident of trade stagnation, it will disappear in time. Indeed, the annual movement of immigration adjusts itself mechanically to these ups and downs of industry. In 1882, for instance, our immigration record reached its maximum of 783,992. It had declined by 1885, after the panic of 1884, to 395,346. In 1892 the annual arrivals had increased again to 623,084. By the fiscal year 1895 they had sunk once more to 258,536, and only partially recovered in the twelve months ending last July, as a result of revived activity in trade. In short, the increase in our foreign population varies automatically, according to this country's demand for labor. Nor do even these figures by any means represent the actual net increase in our laboring population. Foreign-born citizens are going back to Europe every year, as well as coming; the Secretary of the Treasury, in his recent annual report expresses doubt, based on the Immigration Bureau's inquiries, whether any material increase in the country's foreign population has occurred since 1893.

#### *DIVISION OF MICHIGAN CENTRAL AND CANADA SOUTHERN PROFITS.*

The agreement made by these companies in December 1882, as altered by the apportionment in 1892, provides that the first million of their total net profits, after deducting all rentals and interest, shall be allotted four-tenths to the Canada Southern and the remainder to the Michigan Central. If the net profits exceed a million dollars the excess shall be divided in the ratio of one-third and two-thirds respectively. It has been pointed out that the division of last year is apparently not in accordance with this agreement; that while the statement for the year, which we published last week, shows a surplus of \$1,067,000 over charges, the Canada Southern's share was only \$296,000, or less even than three-tenths. As the discrepancy has provoked some discussion and is not easily understood unless fully explained, we have obtained from the company's reports the necessary data and now present them.

In the first place be it understood the "net profits" divided each year in the ratio named are not the profits over the present fixed charges but over the sum of the maximum annual charges as now or heretofore since 1882 severally paid by the two companies. That is to say, when the division is made, each company is credited with the total saving, if any, effected by it since 1882 through a reduction of its charges. As a matter of fact the Michigan Central has in the interval reduced its fixed charges largely, the Canada Southern

not at all, but has rather increased them. Consequently the Michigan Central receives apparently more than its share.

To make the matter clear and to place the reader in a position to work out for himself the calculation by which the division of profits is accomplished, we have prepared the following tables:

#### I. INTEREST AND RENTALS DEDUCTED YEARLY TO FIND "NET PROFITS."

<b>Michigan Central R.R. —</b>	
Maximum annual charge prior to 1891 for interest and rentals [this charge consisting of main line interest, \$400,000; interest on leased line bonds, \$471,120; rentals of leased lines, \$194,310, total, \$1,065,430, as shown in report for 1891, page 18]	\$1,715,430
Add interest on Bay City & Hattie Creek and Hattie Creek & Starke bonds, guaranteed in 1891	20,130
Total maximum charges on Michigan Central	\$1,735,560
<b>Canada Southern R.R. —</b>	
Total charges in 1891, \$925,172; increased since, and now amounting (approximately) to	980,000
Total maximum charges, both companies	\$2,721,560

#### II. REDUCTION IN MICHIGAN CENTRAL CHARGES SINCE 1892.

Total maximum charges per annum, as shown above	\$1,735,560
Present charges, 1896 (approximate)	1,410,000
Balance, annual saving through reduction of Michigan Central charges	\$325,560

By means of the above data we are able to ascertain the manner in which the net profits in 1896 were apportioned.

#### III. APPORTIONMENT OF SURPLUS IN 1896.

Net earnings of both companies in 1896	\$3,463,000
Total charges	2,398,000
Surplus to be divided	\$1,067,000
Net earnings as above	\$3,463,000
Maximum charges as in Table I, say	2,722,000
"Net profits"	\$741,000
Divided as follows:	
To Canada Southern four tenths, say	\$296,000
To Michigan Central the remainder	445,000
	\$741,000
Canada Southern's share, as above	\$296,000
Michigan Central's share, as above	\$445,000
Add to Michigan Central its saving in fixed charges, as shown in Table II	326,000 — 771,000
Total	\$1,067,000

From the division of the item "net profits," therefore, the Michigan Central receives \$445,000, contrasting with the \$296,000 to the Canada Southern, but in addition the credit on account of reduction in fixed charges affords the Michigan Central \$326,000 making its total share \$771,000, as above stated.

The full term under the agreement of 1882 is twenty one years from Jan. 1, 1883, divided into four periods, the first three of which consisted of five years each and the last of six years; either company two months before the expiration of each of the first three periods has the right to call for a readjustment of the percentages of net profits for the succeeding period and any dispute regarding the same to be settled by arbitration. The next apportionment, if one is desired, will therefore be made in November or December 1897 to date from Jan. 1 1898.

The contract with the Canada Southern has still seven years to run, and whether it will be extended, and if so on what terms, cannot of course be foretold, but it is not without value to know that within that period a further large reduction in fixed charges will be secured by the Michigan Central. We assume that the maturing bonds will be refunded at 4 per cent interest or less. The reduction in charges will therefore be as follows:

Loan	When due.	Present interest.	After refunding.
Consol 1st 7s, \$9,000,000	May 1, 1902	\$560,000	\$320,000
Consol 1st 5s, \$7,000,000	May 1, 1902	100,000	80,000
Detrol & Bay City 4s, \$4,400,000	1902 & 1903	33,920	16,960
Jack. Lam. & Sag. 5s, \$2,054,000	Sept. 1, 1901	122,700	82,160
Total		\$796,620	\$499,120

If the refunding is carried out as we have assumed, the reduction in the charges of the Michigan Central will aggregate nearly \$300,000, making the total saving about \$625,000 from the maximum charges.

#### RETROSPECT OF 1896.

We are stating a fact which will not be disputed by any one when we say that the year 1896 was not a prosperous one. It was a twelvemonth of great anxiety and trial, marked by intense and growing business depression, and by disturbing incidents and conditions which came in almost endless succession up to the very close of the year. Above all, it will be memorable in history for the great and momentous struggle which was carried on for the maintenance of our monetary standard against those who would have reduced the country to a silver basis—resulting in the triumph of the Sound Money cause.

The fruits of this victory—the lasting benefits which it must confer—will appear hereafter. To 1896 belong only the losses, the severe and protracted suffering incident to such a struggle. It may be said that in other respects, too, the foundations have been laid for a better state of things. We have been rolling up a trade balance in favor of the United States of unexampled dimensions; the Treasury gold balance has been fully restored and is now at a point far above the danger line; an unusual proportion of the railroads of the United States, in point of mileage and capital obligations, has been foreclosed and reorganized, and thereby put on a new and more enduring basis of solvency; and in various other ways great improvement has been effected in the situation. Hence while it is true on the one hand that during 1896 hardly any relief from the great depression in trade was obtained (the revival in business which came after the election not having made sufficient headway to count for much in the results for the year), on the other hand there can be no doubt that at the close of the year the outlook is more cheering than for a long while past, promising a sustained revival in business if only Congress by its action or inaction shall not again throw affairs into chaos and confusion.

The year has been distinctive in that the troubles from which the community has suffered have been so largely political in their nature. There was no great financial panic such as distinguished 1893, though once or twice the situation was highly critical, and a panic was averted only through the action of our financiers and banking institutions. Nor was the year marked by great strikes and labor troubles, and by floods and storms and other visitations of Nature, which were the characteristics of 1894, a year in which, as in 1896, all our industries were deeply prostrated. The disturbances in 1896 were of a wholly different kind; they were occasioned (taking them up in the order of their sequence) by the attitude of the Government and still more by the attitude of Congress in the matter of our relations with certain foreign countries; by the action of Congress on financial questions, and by the course of one of the great political parties in injecting as an issue in the campaign the question of the future monetary policy of the country and in championing other doctrines hardly less destructive in their tendency and effects.

Consider first the disturbances in our foreign relations. The year opened with the Venezuelan war cloud hanging over the country. It closed with a committee of the United States Senate suggesting action with regard to Cuba which if carried out must inevitably lead to a rupture of our relations with Spain. It is true that the Venezuela controversy did not long remain a disturbing factor, British statesmen and the

British public showing a conciliatory and very friendly attitude towards this country, so that by the end of January all talk of war had ceased. But in the meantime the event had done an enormous amount of mischief and injury—how much it will never be possible to calculate—and not till the latter part of the year was the incident definitely closed. The Cuban matter, if less violently harmful in its first effects, was yet extremely vexatious and disturbing through the whole twelve months. The Senate on the 28th of February and the House on the 2d of March passed resolutions recognizing Cuba as a belligerent, and some of the speeches preceding and following that action were anything but diplomatic and pacific in their nature, and at one time in March appeals were addressed to Congress to cease inviting foreign complications. Not till the 6th of April was the question finally disposed of in Congress by the acceptance by the House of the Senate resolutions. The President did not see fit to act in accordance with these resolutions. But even under this cautious policy on the part of the Executive, and while Congress was no longer in session, various troublesome incidents connected with the Cuban insurrection kept constantly cropping up through the fitting out of filibustering expeditions, the arrest of Cubans claiming American citizenship, etc. The re-assembling of Congress in December found our legislators (more particularly in the Senate) in a very bellicose mood, some going so far as to introduce bills directing the President to occupy Cuba by military force. It was on the 18th that the Senate Committee on Foreign Relations reported favorably a resolution offered by Senator Cameron recognizing the independence of the "Republic of Cuba," thereby precipitating a sharp break in the stock market and arousing the whole country to the dangers connected with a step of that nature. Fortunately the later developments made it evident that the proposed measure would be vigorously opposed and had no chance of success.

Not less disturbing were the developments in and out of Congress regarding the national finances. The earlier of these developments arose directly out of the complications threatened in our foreign affairs, and indeed when considering the part played by the financial troubles as an independent depressing agency and as affected and intensified by the other disturbing influences of the year—such as the foreign complications, the action and attitude of Congress, and the Presidential campaign fought out on an issue touching so vitally the material interests of the country—it is not always possible to separate cause from effect. In January the Government was forced to invite subscriptions to another Government loan for 100 million dollars to replenish the Treasury gold reserve, making 262 million dollars thus issued in the space of about two years. The panicky conditions arising out of the Venezuela troubles hastened, if they did not actually create, the necessity for this last loan. As on previous occasions, Congress did everything to thwart, and nothing to assist, the Government in its difficult task of maintaining gold payments. Not only did the Senate declare its opposition to another syndicate contract, but in place of the bill providing for a 3 per cent coin bond which the House had passed the previous December it substituted a free coinage bill. This, fortunately, was rejected by a very large majority in the House of Representatives, but the tariff bill was also treated to a free-silver amendment at the hands of the Senate Finance Committee. At the same

time the Silver Senators announced their determination to prevent all tariff legislation unless provision was made for silver, with the consequence that the tariff measure referred to has remained in the Senate to the present day.

The bond sale proved very successful, and the Treasury gold reserve from 44½ million dollars on February 10 was raised to over 123 million dollars before the close of February, and in March advanced to over 128 million dollars. But in April gold exports were again resumed. In June the United States Senate passed the Butler anti bond bill prohibiting further sales of Government bonds—which however did not find the necessary favor in the House. In July came the National Democratic Convention with its declaration for free silver and other dangerous doctrines. This created great alarm, and further increased the drain on the Treasury gold reserve, the gold exports having meanwhile continued. As a result the reserve again fell to below 90 million dollars. At this juncture very serious consequences must undoubtedly have ensued had not the banks and financial institutions of this and other cities turned over part of their gold to the Treasury, and had not this been followed by an agreement among the foreign exchange houses to stop the outflow of gold.

These last steps tended so far to restore confidence as to allow natural influences to exert their normal sway, and as our foreign trade situation was becoming very favorable by reason of large merchandise exports and small merchandise imports, the gold movement was quickly reversed, and in August imports of the metal began and were continued for a long time, reaching a large amount in the aggregate. From this time on the Treasury gold reserve was never again in danger, and concern regarding it ceased. But there were many other unsettling factors. Because of the fear produced by the action of the Democratic Convention, business became exceedingly depressed; money (both gold and currency) was hoarded; gold finally went to a premium again (it had been at a premium early in the year when there was a special demand for the metal to pay for the new Government loan); and merchants and other borrowers found it very difficult to obtain accommodations on any terms. The situation became acute as the time for the election approached, and only the election itself furnished relief. During the latter part of August and the first half of September a commission of two per cent (in addition to the regular interest rate) was frequently paid on time loans, while 9@10 per cent was offered for the very choicest grades of paper, and it was practically impossible to effect sales even at these figures. In some particulars the monetary situation improved a little during October, owing to the large gold imports, but normal conditions at no time prevailed. In Europe the large takings of gold for the United States led to a rapid rise in interest rate, the Bank of England advancing its minimum three times, first from 2 to 2½ per cent, then to 3 per cent and finally to 4 per cent.

Thus the effects were continuous and cumulative. And the same may be said of the silver agitation as a political factor. It was evident very early in the year that the silver movement was looming up as a powerful issue in party affairs. The attitude of the Ohio Republican Convention in March on the silver question was not at all regarded with satisfaction, and as a consequence some anxiety was felt as to whether even the

Republican Party could be depended on to oppose unequivocally the silver heresy. In May the silver advocates captured a great many of the State Democratic conventions in the South and West, and in June they made their victory complete in dominating the Democratic conventions in the important States of Ohio, Indiana and Illinois.

The intensity of the depression in business which resulted from these various causes may be judged from the monthly record of iron production. The output had declined even before the National Democratic Convention, the weekly product July 1 being reported only 180,332 tons against 217,306 November 1 1895; but by October 1 the amount had been reduced to only 112,763 tons per week, being a decrease as compared with 1895 at the rate of over five million tons a year. The large losses in earnings shown by the Pennsylvania Railroad afford equally striking testimony to the same effect. That company on its system entire reported \$1,717,400 decrease in gross in August, \$1,436,600 in September, \$1,849,800 in October and \$1,934,900 in November.

Among the favoring events of the year was the removal of a great many embarrassments in the railroad world. We have not the space to enumerate all the different railroads which have been restored to solvency through reorganization, but mention of the names of the larger companies will suffice to give an idea of the magnitude and importance of what has been accomplished in this direction. The list includes the Atchison, which came into possession of its property January 1; the Erie, and Central of Georgia, whose reorganizations date back into 1895; the Reading, the Northern Pacific, the Norfolk & Western, the Oregon Railway & Navigation, the Oregon Short Line, and the St. Louis & San Francisco, besides a large number of smaller companies.

The agricultural situation also is assuring. The wheat crop is not large, but the price is good, cash wheat selling here at about a dollar a bushel. Generally speaking we have abundance, while the world at large (by reason of the famine in India and the shortage in Australia and other countries) is in need of all we can spare. In the case of corn the result is particularly gratifying, as the yield for 1896 is estimated at 2,200 million bushels and for 1895 was estimated at 2,100 million bushels. The cotton crop is much larger than the poor crop of 1895, though we make no attempt to indicate the precise extent of the yield.

The foregoing is intended to furnish only a very brief outline of the influences and events of the year. Very full narratives for all the various financial markets—the money market, the foreign exchange market, and the stock market—will be found in our monthly reviews on subsequent pages. As to the money market, we intend, within succeeding weeks, to supplement the present review by a very comprehensive tabular statement, giving the record of quotations for each week of the year, in the form in which we published the figures for previous years in our issue of January 25, 1896.

Below we bring together some general statistics for 1896 and 1895, affording an interesting contrast between the two years. This table is always more or less incomplete, since many of the figures can not be obtained until a long while after the close of the year. The present time, however, the remark applies with special force since the table is issued several days earlier than usual, having been compiled on the closing day

of the year. But for the information of our readers we may say that the same table is incorporated in our "Financial Review," an annual issued about the middle of February, and in that publication the table will appear in its complete form fully revised.

## GENERAL SUMMARY FOR TWO YEARS.

	1896.	1895.
Coin and currency in U. S. Dec. 31..	\$ 11,897,744,541	\$ 11,833,409,410
Bank clearings in United States.....	\$ 51,183,004,950	\$ 53,282,278,527
Business failures.....	224,700,000	173,196,060
Sales at N. Y. Stock Exchange, shares.....	54,654,096	66,583,232
Grain and flour at Prod. Exch's bush..	1,284,971,000	1,899,353,400
Cotton at Cotton Exchange..... bales.	46,727,800	51,489,700
Imports of merchandise (11 mos.)..	\$ 622,593,680	\$ 739,468,300
Exports of merchandise (11 mos.)..	\$ 888,680,369	\$ 732,331,010
Net imports of gold (11 mos.).....	\$ 43,880,498	\$ 57,895,388
Gross earnings 121 roads (11 mos.)	\$ 430,969,499	\$ 422,813,362
Railroad constructed..... miles.	1,800	1,923
Wheat raised..... bushels.	*412,000,000	407,000,000
Corn raised..... bushels.	*2,211,000,000	2,151,000,000

\* Approximate; Agricultural Bureau figures not yet issued. † December 1. ‡ These are the old Pipe Line runs. The Buckeye runs were 21,069,464 bbls. in 1896 and 18,420,417 bbls. in 1895. § Net exports.

With reference to the stock market, the fluctuations from month to month have been more than ordinarily wide under the various disturbing influences which have marked the year. As a rule the lowest prices were made in August, before the Bryan meeting at the Madison Square Garden changed the whole aspect of things, while the highest figures were reached either early in the year or in November on the news of Mr. McKinley's election. In the break in August some very low figures were touched, the price for New York Central at 88 being the smallest since 1885, and that for Burlington & Quincy at 53 being the lowest since 1861. On the other hand, Lake Shore in December advanced to 156, which is a height never previously attained by the stock of the consolidated company.

**JANUARY.—Current Events.**—The year opened under conditions the reverse of promising. President Cleveland's Venezuelan message the previous month had deeply disturbed all interests and threatened our peaceful relations with Great Britain. The Treasury gold reserve, too, again needed replenishing, standing January 1 at only \$63,262,269, and a new bond issue had already been determined on when the month opened. To add to the uneasiness, it appeared that the issue was to be by public subscription instead of by syndicate arrangement, as supposed. Mr. J. P. Morgan had organized a new syndicate towards the close of December to furnish 11,500,000 ounces of gold to the Treasury and to take \$200,000,000 of bonds. But great opposition was being manifested to another syndicate contract; this appeared particularly in the action of the United States Senate on Friday, January 3, on a pending resolution offered by Mr. Elkins, of West Virginia, declaring it to be the sense of the Senate that bonds should not be sold under private contract and without advertisement; both the President and the syndicate were denounced in unmeasured terms, and a proposition to refer the resolution to the Finance Committee was lost by a vote of 48 to 6. Very early in the morning of January 6 Secretary Carlisle issued a notice inviting proposals for the purchase of 100 million dollars 4 per cent bonds, bids to be received until February 5—see CHRONICLE of January 11, page 68. This change of method was regarded with grave apprehension in financial circles. The announcement, too, operated at first to accelerate the export of gold, some gold previously withheld going out when the bond proposal appeared. Subsequent developments, however, were all favorable, and served to bring about a great change in tone and sentiment. On January 14 Mr. Morgan sent out a letter (made public on the 15th and published in the CHRONICLE of January 18, page 117,) to the syndicate subscribers announcing its dissolution and reiterating the determination expressed by him in a letter to President Cleveland on January 4 to co-operate in making a popular loan successful; on the 15th, also, Secretary Carlisle issued a notice extending the time of payment for the bonds (CHRONICLE of January 18, page 118,) over a much longer period—until June—thus relieving apprehensions of stringency in the money market. On February 1 the gold balance was \$49,845,507. During the month, too, the situation arising out of the Venezuelan difficulty changed surprisingly for the better. The President appointed the Boundary Commissioners on the 1st, and their action in requesting the Secretary of State to ask the Venezuelan and British governments to co-operate with them in their work produced a good impression. Besides this, during the Transvaal difficulties resulting from the filibustering expedition of Dr. Jameson, our Government asked the British Government to use its good offices in protection of United States citizens, and the request was granted. Various other circumstances (particularly very friendly speeches by several of the British Ministers) likewise operated to open the way for the settlement of the difficulties between the two countries, so that at the end of the month all talk of war had disappeared. Thus the outlook, both politically and financially, underwent a great change, and the beneficial effect was felt in all the markets. Among the other favorable incidents was a rise in the price of wheat, the May option advancing from 66½ January 2 to 71½ January 31. The anthracite coal companies reached an agreement on January 30, the Reading accepting 20½ per cent of the output instead of the 21 per cent claimed; and selling prices of coal January 31 were advanced about 35 cents a ton. The bill providing for a 3 per cent "coin" bond, which the House of Representatives had passed in such great haste in December was amended in the Senate by substituting for it a free-coinage bill, and this passed by a vote of 42 to 35 on the 1st of February. There was a premium on gold during the month—see our review of the foreign exchange market below. None of the New York banks availed of the privilege to issue Clearing House certificates authorized the previous month.

—**Railroad Events and Stock Exchange Matters.**—The stock market in January reflected the improvement in the situation by a large and general advance in prices. There had been during December a smart recovery after the panic caused by President Cleveland's Venezuelan message. The announcement that the new Government loan was to be offered at public subscription came on January 6, and the first effect was to weaken the market. Prices were also depressed once or twice during the month by unfavorable rumors regarding the Venezuelan controversy with Great Britain—notably on the 18th, when there were reports that the "flying squadron," which had been suddenly mobilized, would be sent to American waters. Generally speaking, however, prices steadily improved after the 7th or 8th, and closed on the 31st at or near the best figures of the month. Sales on European account gradually diminished and finally ceased to be an important factor. The latter part of the month the agreement among the anthracite coal companies for a division of tonnage was a favoring influence. St. Paul common advanced from 63½ to 72½, Burlington & Quincy from 71½ to 78½, Central of New Jersey from 94½ to 108½, Lake Shore from 134½ to 146½, etc. An effort was made to settle the conflict of jurisdiction between the several circuit courts regarding the Northern Pacific receivership—see CHRONICLE of Feb. 1, page 208. The Omaha & St. Louis was sold at foreclosure; also the St. Johns & Lake

Eustis to the Florida Southern; also at foreclosure, securities of the Hutchinson & Southern, giving control. Mr. John K. Cowen, formerly counsel of the company, was elected President of the Baltimore & Ohio to succeed Mr. Mayer. The Chester & Lenoir was placed in the hands of a receiver; also the East Shore Terminal of Charleston, the Cumberland & Ohio Northern Division and the Galveston La Porte & Houston. The Summit Branch RR. defaulted on its general mortgage interest due Jan. 1. The Pittsburg Cincinnati Chicago & St. Louis resumed dividends on its preferred stock. The Union Pacific Reorganization Committee, Gen. Louis Fitzgerald, Chairman, announced that it had received a majority of all Union Division main line and Kansas Division 1st mortgage bonds and nearly one-half the stock.

—**The Money Market.**—After the high rates reached in December, 1895, during the Venezuelan incident—call money at the Stock Exchange at that time having advanced to 100 per cent—the money market in January gradually returned to normal conditions. On December 31, 1895, 35 per cent had been paid for some loans at the Exchange; on January 2 the range for call loans was 5 to 10 per cent, and on January 3, 3 to 7 per cent. The early part of the next week the rate at one time was 8 per cent, but the rest of the month the fluctuations were within much narrower limits, and the figure did not again get above 6 per cent. At banks and trust companies the rate on call was firmly held at 6 per cent all through the month, loans by these institutions usually standing undisturbed for a long time. There were large shipments of currency from the interior to this centre, the ordinary return flow being augmented by remittances from those who wished to subscribe for the new bonds. Still there was little disposition to lend on time, in view of the prospective demand for money for the new bond issue. The ruling quotation was nominally 6 per cent for all periods, with some special transactions towards the end of January at 5½@6 per cent for three to four months. A few of the foreign bankers were willing to make engagements the latter part of the month for ninety days to four months at 5 per cent on a gold note. Commercial paper was bought more freely towards the close of the month. Choice double-named paper was quoted at 6 per cent the whole month and prime single names 6@7 per cent, while what is classed as good single-named paper ruled at 7@9 per cent and part of the time at 7@12 per cent. The Clearing House banks reported \$141,212,000 of specie and legal tenders and \$15,939,675 surplus reserve December 28, 1895, and \$162,235,200 specie and currency and \$39,623,400 surplus reserve February 1, 1896. No Clearing House certificates were applied for or issued during the month by the New York banks.

—**Foreign Exchange, Silver, Etc.**—The foreign exchange market was unsettled during January, and we had the anomaly of simultaneous gold imports and gold exports. The imports were due to the demand for gold for subscriptions to the new bonds (gold commanding a premium in the market), while the exports were caused by the high exchange rates ruling, which made shipments profitable on gold taken from the Treasury. Those who imported gold in this way had to buy bills of exchange to pay for it, and these purchases in turn tended to increase the exports of gold. Towards the end of the month the exchange market became more settled and rates declined, and then exports practically ceased. During the last few days of December the market had shown a weakening tendency under the influence of the high money rates here and the belief in an early bond issue, and rates for actual business December 31 were 487½@487¾ for sixty-day bills, 488¾@489 for sight sterling and 489½@489¾ for cable transfers. On January 2 the rates were ½@¾ cent higher, so that the year opened with actual business at 487¾@488 for sixty-day sterling, 489¼@489½ for sight and 490@490¼ for cable transfers. The premium on gold then was 1@1½ per cent, and gold was being shipped both to and from Europe. On the announcement on Monday-January 6, of a call for public subscriptions for the bonds, the premium on gold for the time being almost entirely disappeared, and where possible engagements for the importation of the metal were canceled. It was soon seen, however, that the demand continued, and thereafter the premium ruled at ½@¾ of 1 per cent until the last week, when the rate was ¾@⅝ of 1 per cent. A premium was also paid for legal tenders (over silver certificates) in some cases. After the issue of the bond proposal the exchange market became somewhat deranged, with the general tendency the rest of the month downwards; the lowest figures were reached on the 29th, when rates on actual business were 487¼@487½ for sixty-day bills, 488¼@488½ for sight and 488½@488¾ for cable transfers. On the 31st rates were one-quarter of a cent higher, at 487½@487¾ for long, 488½@488¾ for short and 488¾@489 for cable transfers. The gold exports during the month from the United States were \$10,566,526, while the imports were \$10,367,940. In Europe the Transvaal affair proved a very disturbing incident, but when it was seen that there would be no rupture of relations between Great Britain and Germany, English consols advanced sharply, and they closed at 107 15-16 on the 31st, against 106¾ on the 2d. The fluctuations in the price of silver were unimportant.

**FEBRUARY.—Current Events.**—The improvement in the general situation noted in January made further and very

decided progress in February. The controversy with Great Britain regarding the Venezuela boundary line assumed a still more pacific aspect. The event of greatest moment, however, was the opening of bids on the 3d of the month for the 1st million loan to replenish the gold reserve. This proved successful beyond all anticipations, 4,035 bids being received, disregarding altogether bonus offers for an aggregate of \$10,970,000. Of this amount \$37,915,500 went to J. P. Morgan & Co. at 110.6877, representing themselves and the National City Bank, the Deutsche Bank of Berlin, and Harvey Fish & Sons. The amount at first awarded to them was \$23,179,250, the increase to the figure given having been due to the default of several bidders at higher prices. Some facts relating to the subscription will be found in the CHRONICLE of February 15, page 303. The proceeds of the loan were \$111,166,232.65, making the average price a little less than 111.17. Payments began on the 8th, and by Friday night, the 14th, the New York Sub-Treasury had received \$37,733,391.95 on account of the sale. By the end of the month it was estimated \$95,000,000 had been paid in, most of the subscribers having paid in full instead of extending payment over the period fixed in the Treasury circular. The operation did not prove at all disturbing to the money market, as noted below. According to the daily report from Washington the reserve was at its lowest point on the 10th, at \$44,563,403, advanced to above one hundred million dollars on the 21st, and stood at \$123,962,979 on March 2. The affair proved very helpful in reviving confidence. Government 4 per cents of 1905 (being the same issue as that offered for sale) sold up from 115 before the sale to 118 after the sale. A very favorable event was the rejection on the 14th by the House of Representatives by a vote of 216 to 90 of the free silver bill which the United States Senate (as noted in the review of January) had on February 1 substituted for the bond bill passed by the House the previous December. The emergency tariff bill, which the House had also sent over to the Senate in December, was likewise treated to a free silver amendment by the Senate Finance Committee; and on the 25th the free silver men were successful in defeating consideration of the amended bill in the Senate, they having announced their determination not to allow any new tariff legislation unless provision was made at the same time for free silver. The price of silver advanced sharply, as stated below in our foreign exchange market. Gold continued to command a slight premium, as likewise stated in our exchange market. An unfavorable development towards the close of the month was the placing of the Baltimore & Ohio R.R. in the hands of receivers. The passage by the Senate on the 28th of a resolution favoring the granting of belligerent rights to Cuba caused a break in the stock market, and also proved somewhat unsettling in business circles.

**Railroad Events and Stock Exchange Matters.**—The improvement in our foreign relations and the great success of the Government bond sale had the effect of keeping the stock market strong in February, and during the first three weeks there was a further decided and pretty general rise in prices; in the fourth week a reaction occurred, helped by the developments connected with the Baltimore & Ohio and the action of the United States Senate in voting to grant belligerent rights to Cuba. Louisville & Nashville sold at 43½ on the 3d and at 55½ on the 24th, St. Paul common at 71½ and at 79¾, Rock Island at 69 and at 74¾. After the 24th there was two or three points reaction in these cases. In the break on the 28th, caused by knowledge of the intention of the Senate with reference to the Cuban resolutions, several stocks touched the lowest points of the month. Baltimore & Ohio sold at 41 on the 5th and at 21½ on the 29th, on which latter date it was placed in the hands of receivers. The Canadian Pacific announced the resumption of dividend payments. The Oregon Railway & Navigation reorganization plan was declared operative, and the collaterals under the collateral trust bonds of 1889 were sold and bought by the Reorganization Committee. A plan for the reorganization of the Detroit Lansing & Northern was issued, wiping out the common stock. The Lehigh Valley bought the Elmira Cortlandt & Northern. The Little Rock Hot Springs & Texas was placed in the hands of a receiver. The New York Pennsylvania & Ohio and the Georgia Midland & Gulf were sold at foreclosure, as also the Montgomery Tualooma & Memphis and the Port Edwards Centralia & Northern.

**The Money Market.**—The Government bond sale produced no disturbance in the money market. The Secretary allowed a part of the proceeds for the bonds to be paid into the depository banks designated for that purpose, and the amount which at the close of the month appears to have been about 22 to 23 million dollars. The market developed growing ease. During the first two weeks the rate for call loans at the Stock Exchange two or three times touched 7 or 8 per cent, but the last two weeks the highest figure was 5 per cent, with many loans at 3 per cent. There was at first little disposition to make time loans or to buy commercial paper, lenders waiting to see what the effect of the bond sale would be; but gradually the feeling changed and rates declined. At the beginning of the month the choicest grades of paper commanded 6 per cent, and that was also nominally the rate for time loans for all periods. At the close of the month sixty to ninety days double-named paper was bought freely at 5½ per cent and four months commission house names sold at 5½@6 per cent; some extra

choice endorsements were taken as low as 4½ per cent; time loans were made at 4 per cent for thirty to sixty days, 4½ per cent for ninety days and 4½@5 per cent for longer periods. The New York Clearing House banks reported \$162,285,200 of cash February 1 (\$76,845,000 being specie and \$85,389,300 legal tenders), and \$146,825,200 February 29th, \$60,304,000 being specie and \$86,521,200 legal tenders.

**Foreign Exchange, Silver, Etc.**—The foreign exchange market had a downward tendency in February. On Monday, the 3d, the market showed decided weakness, being deranged by the pending bond subscriptions, and rates on actual business for 60-day sterling and for commercial bills (both prime and documentary) declined a full cent per pound, while sight bills and cable transfers declined three-quarters of a cent. The figures then were 4 86¼@4 86¼ for 60-days, 4 87¼@4 88 for sight and 4 88@4 88¼ for cables. Contrary to expectations, there was no important upward reaction after the bids for the loan were opened, and the fluctuations the rest of the month in the rates for actual business were confined within comparatively narrow limits—usually a quarter of a cent up or down. The success of the bond sale led to some buying of our securities for European account. It is not believed that any considerable amount of the new Government bonds went abroad, though the Deutsche Bank of Berlin had a quarter interest in the bonds awarded to J. P. Morgan & Co. The fact that money ruled much higher here than abroad had a tendency to weaken exchange. Rates on actual business for sight bills and cable transfers closed at the same figures as those for the 3d of the month noted above; for 60-day bills the rate was one-quarter cent higher at 4 86¼@4 87. Gold exports to Europe were not possible at the ruling price for exchange. The demand for gold again led to considerable imports—\$9,375,389 net. The premium the end of the month was 7-16 of one per cent for gold guaranteed not to have been taken from the Treasury and ¼@5-16 of one per cent for other gold. The premium on greenbacks was nominally 1-16@¼ of one per cent. The silver market was very strong on an active demand for the metal for India; and the price in London advanced from 30¼ pence per ounce on the 1st to 31 8-16 pence on the 24th, closing on February 29th at 31 3-16 pence. In London English consols advanced to 110. Money rates tended downward at the European monetary centers and the Imperial Bank of Germany reduced its discount rate from 4 per cent to 3 per cent.

**MARCH.—Current Events.**—Affairs took a turn for the worse again in March. Bad weather affected trade very unfavorably. Quite a good many failures of prominent mercantile houses were also a feature of the month. At the same time the discussions in Congress regarding the question of recognizing the Cuban insurgents as belligerents proved very disturbing to business; so much so that appeals were addressed to Congress to cease inviting foreign complications. As stated above, the Senate passed its resolution in favor of granting belligerent rights on the 28th of February, and on the 2d of March the House also passed similar but independent resolutions. The conference committees appointed by the two houses at first agreed to accept the House resolutions, and the Senate conferees so reported to the Senate. In the debate which followed Senators Hale of Maine and Hoar of Massachusetts took strong grounds against the attitude of Congress. Subsequently the House resolutions were withdrawn from the Senate, and on the 6th of April the House accepted the Senate resolutions. In the interval riotous demonstrations against the United States had occurred in Spain. In financial circles the Baltimore & Ohio receivership, which occurred at the close of February, also operated as a depressing influence. The uncertain attitude on the silver question of the Ohio Republican Convention for the election of delegates to the National Presidential Convention likewise caused some uneasiness; but the subsequent declarations of the Republican conventions in New York, Massachusetts and Minnesota proved in every way satisfactory. Favorable developments were the increase in the semi-annual dividend of the Chicago Milwaukee & St. Paul R.R. from 1 per cent to 2 per cent, the agreement between the General Electric Company and the Westinghouse Electric & Manufacturing Company, the restoration by the Lehigh Valley of the 10 per cent reduction in wages made in 1893, and the submission of a reorganization plan for the Northern Pacific with a guaranty syndicate for \$15,000,000. It transpired that the anthracite coal roads had determined not to have the agreement entered into in January formally signed and executed presumably because of legislative hostility. Further payments were made on account of the subscriptions to the Government loan, and at the close of the month only about five million dollars remained to be paid for both principal and premiums. The Secretary of the Treasury called on the depository banks for a part of the moneys held on bond account, and \$5,890,000 was transferred to the Treasury during the month. The Treasury reserve was reported at \$123,962,979 on March 2 and at \$128,646,461 on April 1. The premium on gold ruling in the market practically disappeared. Abroad the Italians suffered a great reverse in Abyssinia in a battle on March 1 at Adowa, this leading to a change of ministry in Italy, and the British Government determined to send an expedition up the Nile against the Mahdists, who threatened to advance into Egypt from the Soudan.

—*Railroad Events and Stock Exchange Matters.*—The stock market was dull and irregular but with a weak tone, until towards the close of the month. Chicago Milwaukee & St. Paul common sold at 78½ on the 4th and at 73½ on the 24th, and Louisville & Nashville at 54¼ and 48¾ respectively on the same dates; these two stocks indicate the course of values for many other stocks. Towards the close the publication of the February statement of earnings of the Burlington & Quincy served as a stimulus to the whole market and part of the early decline was recovered. General Electric advanced sharply on the agreement with the Westinghouse Electric Company. The appearance of the reorganization plan of the Northern Pacific had the effect of advancing several of the bond issues of the road, while the stocks declined. Baltimore & Ohio stock sold down to 13 on the 6th. In the Northern Pacific receivership cases Judges Gilbert and Hanford, in the United States Circuit Court, at Seattle, refused to carry out the instructions of the Supreme Court Justices intended to settle the conflict of jurisdiction between the different circuit courts, and continued the separate receivers for the Western part of the system. The United States Supreme Court rendered a decision in favor of the estate of Leland Stanford in the attempt to make the estate as a stockholder of the Central Pacific responsible for the debt owing by the road to the United States Government. In the Houston & Texas Central foreclosure suit, the U. S. Supreme Court dismissed the appeal, thus establishing the validity of the foreclosure. Reorganization plans were issued for the Norfolk & Western, the Memphis & Charleston, the Oregon Short Line & Utah Northern and the Seattle Lake Shore & Eastern. A receiver was appointed for the Pittsburg & Western, this road being part of the Baltimore & Ohio system. A re-sale of the Marietta & North Georgia was ordered. Receivers were appointed for the Central Vermont; also for the South-western Arkansas & Indian Territory. The Kinderhook & Hudson, the Brigantine Beach, the Florida Midland and the Humeston & Shenandoah were sold in foreclosure. New receivers were appointed for the Louisville Evansville & St. Louis. The U. S. Supreme Court sustained the injunction forbidding the purchase of the Chesapeake Ohio & South-western by the Louisville & Nashville; the Court also sustained the suit to enjoin the Great Northern from entering into an agreement to control the Northern Pacific, as proposed last summer.

—*The Money Market.*—The money market continued easy during March, notwithstanding that both the money holdings and the surplus reserve of the New York Clearing House banks steadily diminished—in part because of the transfer of money to the U. S. Sub-Treasury from the depositary banks holding deposits on account of the bond payments, as noted above. The demand for call loans was not urgent, and rates ranged between 2½ and 4½ per cent, with the bulk of the business at 3@3½ per cent. At the banks and trust companies the rate was generally 3¼@4 per cent. In time loans thirty to sixty-day money was in the first week quoted at 3 per cent, but later the rate for these periods and also for ninety days was 4 per cent, while for four to five months the rate was 4½ per cent, and for longer dates 4½@5 per cent. For commercial paper the rate for sixty to ninety-day endorsed bills receivable the first week of the month dropped to 4¼@5 per cent, but the failure of some important houses in various parts of the country led to a rigid scrutiny of names and the rate was a little stiffer at the close at 5½ per cent.

—*Foreign Exchange, Silver, Etc.*—Foreign exchange developed a rising tendency the latter part of March and the indications pointed to an early renewal of the outflow of gold to Europe. A feature was the high price asked for cotton drafts, the figures ruling close to those for bankers' long sterling. At the beginning of the month the rates for actual business in bankers' sterling were 4 86¼@4 87 for sixty-day bills, 4 87¼@4 88 for sight and 4 88@4 88¼ for cable transfers. These rates remained unchanged until the 9th, when an advance of a quarter of a cent was made. On the 13th the advance was lost, and on the 18th there was a further reduction of a quarter of a cent, leaving the rates at 4 86¼@4 86¾ for sixty-day sterling, 4 87½@4 87¾ for sight and 4 87¾@4 88 for cable bills. Thereafter the market grew strong on rather a small volume of business and steadily advanced. The close was at 4 87¼@4 88 for actual business in long sterling, 4 88¾@4 89 for sight and 4 89@4 89¼ for cable transfers. The Treasury raised the charge for gold bars from 1-16 of 1 per cent to 3-16, and made this also the price for jewelers' bars, which are usually sold a little lower. In the market the fractional premium on gold previously ruling practically disappeared. In the European money markets the discount rate for sixty to ninety-day bank bills in London was much of the time only 1-16 of 1 per cent. The price of silver fluctuated between 31¼d. and 31 9-16d. per ounce.

**APRIL.**—*Current Events.*—Improved weather conditions caused business to start up a little during April. Besides this the action of some leading State conventions of the two political parties in taking a positive stand on the silver question had the effect of relieving the anxiety in that regard to an extent; then also discussions in Congress of irritating matters calculated to disturb our foreign relations in a measure ceased. Furthermore European capitalists for the first time since the disturbance the previous December

showed an inclination to buy some of our stocks and bonds. The better weather changed the aspect of the retail trade, and this in turn reacted favorably on the wholesale lines of business. The House of Representatives on the 6th, as noted in March, adopted the Senate resolutions recognizing the belligerency of Cuba in place of its own resolutions, and this ended that matter. The resolutions were "concurrent," not "joint," and were not sent to the President for approval, and he took no action in accordance with them. On the 22d the London "Times" published a despatch from its Washington correspondent saying that the negotiations between the United States and Great Britain regarding the Venezuela boundary dispute were at a standstill. This had a slight adverse effect on the Stock Exchange, but was otherwise without influence, as reassuring statements were made in Parliament. The gold outflow (the first since the February bond sale) began on the 7th, and the net shipments for the month from the United States aggregated \$2,662,498. The metal for the first two consignments was not taken from the United States Treasury but was furnished by one of the banks. The payments of gold into the Sub-Treasury on bond account were small, while there were some withdrawals from the Treasury every day. The gold reserve was reported at \$128,646,461 April and at \$125,393,900 May 1. On April 30 the Secretary of the Treasury made a call for another portion (about \$3,600,000) of the gold held on bond account, and previously in the month there had been voluntary transfers to amount of about 2½ million dollars. The average condition of winter wheat April 1 was only 77.1, but an improvement to 82.7 occurred by the 1st of May. New York City failed (CHRONICLE of April 4, page 612,) in an attempt to sell 3 per cent gold bonds, and the rate of interest was advanced to 3½ per cent, and the bonds were sold in May, the bids on this latter occasion aggregating \$37,702,017.

—*Railroad Events and Stock Exchange Matters.*—Under the improvement in conditions noted above the stock market showed a rising tendency and prices gradually advanced, in some cases touching the highest prices of the year up to this time. The dispatch in the London "Times" already referred to exercised some adverse effect, but only temporarily. In the closing days of the month the market reacted, though the advance was on the whole well maintained. St. Paul common sold at 74¼ on the 9th and at 79½ on the 28th, Burlington & Quincy at 77 on the 9th and at 82½ on the 24th, and Louisville & Nashville at 48¾ on the 7th and at 53¼ on the 21st. Decrees were issued towards the close of the month for the sale of the Reading, the Northern Pacific and the St. Louis & San Francisco. A decree was also issued for the sale of the Jacksonville Louisville & St. Louis. Default occurred in the payment of the coupons due April 1 on the 6 per cent bonds of the Ogdensburg & Lake Champlain, this road having formed part of the Central Vermont system. The Illinois Central acquired control of the St. Louis Alton & Terre Haute. The Detroit Lansing & Northern was placed in the hands of a receiver pending the carrying out of the reorganization plan. The Pittsburg Marion & Chicago was sold at foreclosure; also the Birmingham Powderly & Bessemer and the Norfolk Albemarle & Atlantic. A reorganization plan was issued for the St. Louis & San Francisco, providing for the separation of that system from the Atchison. A settlement between the Northern Pacific and the Chicago & Northern Pacific was agreed upon, and also between the Oregon Navigation and the Union Pacific. Receivers were appointed for the Excelsior Springs RR. Another plan for the reorganization of the Memphis & Charleston was issued.

—*The Money Market.*—In connection with the 1st of April settlements the rate for call loans at the Stock Exchange temporarily advanced to 4½ per cent, but afterwards the market again developed steadily growing ease, and at the close loans were freely made at 2@3 per cent. At banks and trust companies the rate dropped from 3½@4 per cent to 2½@3 per cent. For time money 3 per cent was the quoted figure at the close for all dates from thirty days to four months, 3½ per cent for five to six months and four per cent for seven to eight months. For choice double-named paper, running sixty to ninety days, the rate at the end of the month was only 4½@4¾ per cent, against 5¼@6 per cent at the opening. The return flow of money from the interior was very heavy, and notwithstanding the transfers to the Treasury and the gold exports, both the money holdings and the surplus reserve of the Clearing House banks largely increased.

—*Foreign Exchange, Silver, &c.*—There were few special features in the exchange market during April. The gold outflow foreshadowed in March did not reach large proportions. Towards the close of April the decline in interest rates here removed some of the inducement to loan foreign capital, and exchange again advanced, causing a renewed export of gold in May, but it was a question whether the export was justified as an exchange operation. On actual business the rates for sterling stood at precisely the same figures at the opening and close of the month, namely 4 87¼@4 88 for sixty-day bills, 4 88¾@4 89 for sight and 4 89@4 89¼ for cables. In the interval, however, the rates first rose a quarter of a cent (this was on the 6th), then (on the 10th) declined a quarter of a cent and on the 14th declined another quarter, thereafter moving up and down irregularly. In Europe there was a slight hardening in the money rates at the leading financial centres.

In London consols at one time sold up to 114, but realization caused a gradual fall, and on the intelligence that the leaders in the raid on Johannesburg at the end of 1895 had been sentenced to death, the price dropped to 111½, from which figure there was only a slight recovery when it was announced that President Kruger of the Transvaal Republic had commuted the sentences. A Cabinet crisis in France had no effect on the financial markets. The price of silver fluctuated within a narrow range.

**MAY.—Current Events.**—The political situation gave renewed cause for uneasiness during May. The silver advocates captured a great many of the State Democratic conventions in the South and West, and there were also doubts whether the Republican National Convention could be depended on to declare unequivocally for the gold standard. As a result business grew steadily worse. Gold exports were large, reaching 18½ million dollars net. Payments into the Treasury on account of the February bond sale were small, not a great amount remaining to be paid for. The Treasury gold reserve was reduced from \$125,393,900 May 1 to \$108,345,234 June 1. The CHRONICLE acreage report showed nearly 13 per cent increase in cotton area in the Southern States. The weather conditions were generally very favorable for the crops, but in the Northwest the planting of spring wheat was delayed by rains. Quite a number of violent storms occurred in the West, and St. Louis was visited on May 27 by a terrific tornado, causing the loss of several hundred lives and the destruction of property worth many millions.

**Railroad Events and Stock Exchange Matters.**—Under the depression in trade and the uncertainty regarding the financial outlook speculation on the Stock Exchange was very much restricted and business came almost to a standstill at times. The calamity at St. Louis towards the close of the month intensified the dullness. The share sales reached only 2,799,613 shares, which contrasts with 8,932,707 shares in May of last year. The general tendency of prices was downwards, though the decline was not large except in special instances. Manhattan Elevated stock fell off sharply, but subsequently, on the decision of the Appellate Division of the Supreme Court refusing to confirm the report of the Commissioners in favor of the Rapid Transit road, which was interpreted to mean the killing of the project, a decided recovery ensued, only to be followed by renewed weakness. Judge Wheeler in the United States Circuit Court for the Southern District of New York, denied the petition of the U. S. Government for an injunction against the Joint Traffic Association. The Norfolk & Western reorganization plan was declared effective. The receivers of the Baltimore & Ohio were authorized to issue \$5,000,000 receivers' certificates and \$3,400,000 car trusts. To avoid default the Columbus Sandusky & Hocking announced its intention of paying in advance in prior lien scrip the coupons due July, 1896, and January, 1897, on its general mortgage bonds. The Cincinnati Lebanon & Northern was purchased by the Pennsylvania Railroad. The Louisville St. Louis & Texas was sold at foreclosure sale; also the Green Bay Winona & St. Paul, the Meriden Waterbury & Connecticut and the Seattle Lake Shore & Eastern. A receiver was appointed for the Duluth Terminal Railway.

**The Money Market.**—The ease in money grew still more pronounced during May. The dullness of trade and absence of speculation accelerated the flow of currency to this centre from the interior, and at the same time diminished the demand for money here. Notwithstanding the exports of \$18,500,000 gold during the month, the New York Clearing House banks reported \$146,949,200 of specie and legal tenders May 26th, against \$146,695,800 May 2. At the close of the month call money loaned freely on the Stock Exchange at 1½@2 per cent and the rate at banks and trust companies was also only 2 per cent. Some reduction was also made in the rates for time contracts in the last week of the month, and quotations on good Stock Exchange collateral were 2½ per cent for thirty to sixty days, 3 per cent for ninety days to four months, 3½ per cent for five to six months, and 4@4½ per cent for seven to eight months. For commercial paper rates at the close were 4½ per cent for sixty to ninety day endorsed bills receivable and 4½@4¾ per cent for choice four months commission house names. The Secretary of the Treasury on the 15th made another call on the depository banks for a portion of the proceeds still held by them on account of the February bond sale, and \$2,000,000 under that call was transferred to the Sub-Treasury the last week of the month, the rest of the amount called being turned over the early part of June.

**Foreign Exchange, Silver, &c.**—In the rates for actual business in foreign exchange there were only five changes during May, each of one-quarter of a cent per pound sterling, the changes being alternately up and down, so the range for the month also was only one-quarter of a cent. The close was one-quarter lower than the opening, at 187½@187¾ for sixty-day bills, 489½@489¾ for sight and 489¾@489 for cable transfers. Commercial bills remained very scarce, and the supply of bankers' bills was limited chiefly to those made against the exports of gold. It was reported that four million dollars of New York City bonds and \$1,000,000 of State of Massachusetts bonds had been sold abroad, and also that some new issues of railroad bonds had been floated in Europe; but no bills against the same appeared in the market. The outflow of gold to Europe continued, the net ex-

ports being \$18,499,415. The Treasury on the 20th reduced the premium on gold bars from 3-16 to ½ of one per cent. In Europe an instalment of 8¼ millions sterling on account of the Japan indemnity was paid by China to Japan, two million pounds of the amount being left for the time being with the Imperial Bank of Germany instead of being transferred to the Bank of England. The coronation of the Czar of Russia occurred, and during the festivities an accident took place at which over a thousand persons were trampled to death. The fluctuations in silver were unimportant. In London English consols again advanced, and they closed at 113½, a recovery of over two points. At the German monetary centres interest rates showed a hardening tendency.

**JUNE.—Current Events.**—The political situation continued the dominant factor in affairs during June. The Republican National Convention was held on the 16th, 17th and 18th. The money plank in the platform was sharply contested both in committee and before the Convention; the silver advocates submitted a minority report and minority resolutions, but were overwhelmingly defeated. In the Convention the free-silver substitute offered by Senator Teller received only 105½ votes, while 818½ votes were cast against it, and the vote on the adoption of the financial plank was 812½ to 110½. Following this action, 21 of the silver delegates bolted from the Convention, comprising the entire delegation from Colorado (eight members, headed by Senator Teller, the entire delegation from Idaho (six men), headed by Senator Dubois, 2 delegates from Nevada, 3 from Utah, 1 from Montana and 1 from South Dakota. The effect in business circles was very beneficial; but this was counteracted later on by the unfavorable developments regarding the attitude of the Democratic Party. Ex-Secretary of the Navy William C. Whitney and other leaders initiated a vigorous movement in favor of sound money, and the New York State Democratic Convention adopted resolutions favoring bi-metallism by international agreement, but declaring that meanwhile the gold standard must be maintained. In Ohio, Indiana and Illinois, however, the Democratic Conventions all pronounced for silver, making it evident that the Democratic National Convention would be controlled by the silver element. The price of United States 4s of 1925 advanced from 116½ to 118½ on the action of the Republican Convention, but dropped back to 116½ again after the other events noted. Trade and business continued restricted. Several of the New England cotton mills shut down and the movement became quite general in July. Print cloths sold at 27-16 cents, the lowest price on record, and staple ginghams and bleached cottons also touched an unprecedentedly low figure. On the 2d of the month the United States Senate, by a vote of 32 to 25, passed the Butler Anti-Bond Bill, prohibiting further sales of Government bonds; when the bill reached the House of Representatives it was promptly rejected by the Committee on Ways and Means and would undoubtedly have been rejected by the House also had it come to a vote. The President on May 29 had vetoed the River and Harbor Bill because of its extravagance, but the bill was passed in June over the veto by a very large majority. He also vetoed on June 6 the General Deficiency Appropriation Bill because of the allowance in it for the payment of the old French spoliation claims dating back to the close of the last century. This veto was upheld and a new bill passed with that item omitted. Congress adjourned on the 11th. The final payment by the subscribers to the Government loan of February fell due, but little remained to be paid. The Secretary of the Treasury called on the depository banks for the remainder of the money held by them on bond account, estimated at \$4,500,000. Gold exports continued and about \$6,000,000 net went from the United States. The Treasury gold reserve was reduced from \$108,345,234 to \$101,699,605. The price of anthracite coal at tidewater was further advanced 25 cents a ton. The crop situation remained very favorable except for winter wheat, the condition of oats June 1 being reported 98-8, cotton 97-2 and spring wheat 99-9. In our foreign affairs a slight ripple was caused by the arrest by the Venezuela authorities of a Crown surveyor on territory in dispute between Venezuela and British Guiana; this was quickly followed, however, by his release.

**Railroad Events and Stock Exchange Matters.**—The stock market was depressed during June. The week before the Republican Convention the market for a time was almost panicky. But the next week when it became apparent that the Convention would declare its adherence to the gold standard, prices displayed much strength and quite a general advance occurred; the realizing sales soon caused a reaction and later the course of the Democratic State conventions in the West led to renewed weakness, resulting finally in a sharp break in the closing days of the month. Burlington & Quincy sold at 80½ on the 17th and at 72¾ on the 29th; Rock Island at 72½ on the 17th, 65¼ on the 29th; and St. Paul common at 79½ on the 17th, 73½ on the 9th. The industrial stocks were especially weak and American Sugar common dropped from 125 on the 6th to 109½ on the 29th. The Denver & Rio Grande declared a dividend of one per cent on its preferred stock. The Cedar Falls & Minnesota was sold at foreclosure and purchased in the interest of the Illinois Central. Austin Corbin was killed in an accident on June 4. The Central Pacific offered to extend its first mortgage bonds due July 1, 1896, until January 1, 1898, at 5 per cent. Messrs. Blair & Co. of New

York purchased a controlling interest in the Houston East & West Texas. The St. Louis & San Francisco was sold at foreclosure; also the New York & Sea Beach, the Grand Rapids & Indiana, the Frederick & Pennsylvania Line, the Jacksonville Louisville & St. Louis, the Cheraw & Chester and the Minnesota & Wisconsin. The Ohio Southern, which had previously defaulted on its general mortgage bonds, also defaulted in the interest due June 1 on the first mortgage bonds. A receiver was appointed for the Colorado Coal & Iron Development Co. The Green Bay & Western was formed to succeed the Green Bay Winona & St. Paul. The Georgia Midland was leased to the Southern Railway. The United States Circuit Court reversed the decision of the lower court and declared legal the guaranty of the Richmond Nicholasville Irvine & Beattyville RR. by the Louisville New Albany & Chicago.

**The Money Market.**—Money rates ruled very easy the first half of June, and call loans at the Stock Exchange continued to be made at  $1\frac{1}{2}$  to 2 per cent; but the payment into the Sub-Treasury by the depository banks on the 15th of \$4,000,000 of moneys held on bond account, (in addition to \$500,000 paid the previous week) on the final call by the Secretary of such moneys held, stiffened the market, so that the rate advanced to 2 to 3 per cent; from this there was a drop to  $1\frac{1}{2}$  to 2 per cent again, followed at the close of the month by a temporary advance to 3 to 4 per cent, due in part to the flurry in the stock market. At banks and trust companies the minimum rate on new contracts was first 2 per cent, then  $2\frac{1}{2}$  per cent, then 2 per cent again and then 3 per cent. Time loans after the middle of the month were quoted about half of one per cent higher, at 3 per cent for thirty to sixty days,  $3\frac{1}{2}$  per cent for ninety days to four months and 4 per cent for five to six months. Some business in Eastern city paper, made in anticipation of the collection of taxes in November, was done at  $3\frac{1}{4}$  to  $3\frac{1}{2}$  per cent the early part of the month and at  $3\frac{1}{2}$  to 4 per cent the latter part. Rates for commercial paper were firmer, but very little changed, at 4 to  $4\frac{1}{4}$  per cent for sixty to ninety-day endorsed bills receivable and  $4\frac{1}{4}$  to 5 per cent for choice four months commission house and first-class single names. In face of the transfers from the depository banks to the Sub-Treasury, and the gold exports, the money holdings of the New York Clearing House banks were only slightly reduced.

**—Foreign Exchange, Silver, Etc.**—Rates for actual business in exchange moved irregularly up and down during June within a narrow range; the close was one-half a cent lower than the opening at 487 to 487 $\frac{1}{4}$  for sixty day bills; 488 to 488 $\frac{1}{4}$  for sight and 488 $\frac{1}{4}$  to 488 $\frac{1}{2}$  for cable transfers. The supply of commercial bills was very small, and bills against purchases of stocks by the arbitrage houses were observed only during the week when the Republican Convention was in session. A good part of \$5,100,000 Milwaukee Electric Railway & Light Company 5 per cent gold bonds was placed abroad by Messrs. J. P. Morgan & Co., and foreign interests purchased for \$7,000,000 another block of Anaconda Copper mining stock. The offering of bills against these and other loan negotiations tended to supply a part of the inquiry for exchange, and in addition, as noted above, the net outflow of gold amounted to \$6,000,000. The silver market was firmer, and on the New York Stock Exchange there was quite a speculation in Silver Bullion certificates. In London the price was 31 s. 16d. June 1 and 31 $\frac{1}{4}$ d. June 30, the highest having been 31 s. 16d. In Japan a tidal wave destroyed from 25,000 to 30,000 lives.

**JULY.—Current Events.**—In July the situation became highly critical. The Democratic National Convention at Chicago, held July 7 to July 11, not only took a stand for the independent free coinage of silver by the United States at the ratio of 16 to 1, by the large vote of 628 to 301, but pronounced in favor of a number of other dangerous doctrines. Dominated by the Altgelds and Tillmans, the convention declared against any further issue of Government bonds; demanded that holders of obligations of the United States should no longer be allowed to choose the kind of money in which they would receive payment; denounced Federal interference in local affairs and "government by injunction," the reference being to the action of the General Government and the courts at the time of the Chicago riots in 1894; and hinted at a purpose to reorganize the U. S. Supreme Court. William J. Bryan, an ex-Congressman from Nebraska, who captured the convention by one of his speeches, was nominated for President and Arthur Sewall of Maine for Vice-President. The action of the convention caused great uneasiness in the public mind, and the next week (ending the 18th) the Stock Exchange showed great depression and a heavy decline in prices. On Monday, July 20, the situation reached an acute stage; the gold export movement had been resumed on a large scale; there were also considerable withdrawals from the Treasury for hoarding; the price of the new Government 4s was down to 112 $\frac{1}{4}$  for the coupon bonds (against 116 $\frac{1}{4}$  earlier in the month and 118 $\frac{1}{4}$  in June after the Republican Convention); in the stock market prices were declining at an alarming rate, and the Government gold reserve was down to below 90 million dollars, with the prospect of further large withdrawals. At this juncture the banks and trust companies of this city agreed to place part of their gold at the disposal of the Treasury, and Boston, Philadelphia and Chicago were also enlisted in the movement; altogether it is believed about

\$25,000,000 was contributed. In New York the transfers began on the 22d and by July 31 \$18,240,000 had been turned over. At the same time Mr. J. P. Morgan convened a meeting of the foreign exchange houses and gold shippers to devise plans for stopping further exports of gold. This proposal almost in itself sufficed to check the gold outflow, and the syndicate did not find it necessary to sell a large amount of bills in the aggregate. At the end of the month the Treasury gold balance stood at \$110,718,746, and the price of the new Government 4s had recovered to 114. There was no bolt from the Democratic Convention as in the case of the silver people at the Republican Convention, but the ticket and platform were repudiated by leading Democrats and newspapers all over the country, and at a gathering at Indianapolis on August 7th a call was issued for another Democratic National Convention to be held at Indianapolis September 2d. The Populist, or People's Party, also held their Convention on the 22d to the 25th inclusive. They nominated a candidate for Vice-President first, choosing Thomas E. Watson, and then endorsed Mr. Bryan for President. The National Silver Party held their Convention about the same time and endorsed both Bryan and Sewall. Owing to the generally unsettled condition of things, both New York City and Brooklyn failed to dispose of their offerings of 3 $\frac{1}{2}$  per cent bonds. The crop situation continued very favorable.

**—Railroad Events and Stock Exchange Matters.**—Great depression ruled on the Stock Exchange during July, as the result of the events above narrated. On Monday, the 20th, a panic was only averted by news of the contemplated action of the banks in giving up part of their gold to the Treasury. This movement and the action taken to prevent further gold exports led to a sharp recovery in prices. But subsequently the market weakened again, and many stocks touched lower figures than before. The sudden and severe sickness of Mr. Cornelius Vanderbilt was also used as a depressing influence the last half of the month. A rate war between the Seaboard Air Line and the Southern Railway had an adverse effect on the stocks of Southern roads; this war was arrested just as it threatened to involve all Southern roads, by an injunction granted by Judge Simonton in the United States Circuit Court at North Carolina. The extremes for the month for a few leading stocks were: Central of New Jersey 103 $\frac{1}{4}$  July 1, 87 $\frac{1}{4}$  July 22; Burlington & Quincy 73 $\frac{1}{2}$  on the 13th, 62 $\frac{1}{2}$  on the 20th; St. Paul common 76 on the 11th, 66 $\frac{1}{2}$  on the 20th; Rock Island 66 $\frac{1}{2}$  on the 1st, 52 $\frac{1}{2}$  on the 20th, and Lake Shore 148 $\frac{1}{4}$  on the 13th, 137 on the 20th. During the month the Canadian Pacific agreed to join the Joint Traffic Association under certain conditions. The Wabash declared a dividend on its debenture Class A bonds. The Sandusky Mansfield & Newark (part of the Baltimore & Ohio system) defaulted in the interest on its first mortgage bonds; the coupon was paid the following December. The dividend on Central Ohio stock was also passed. The Terre Haute & Logansport and the Bloomsburg & Sullivan likewise defaulted. A receiver was appointed for the Seaboard Railway, a small road in Alabama, and also for the Denver Lake-wood & Golden. The Columbus & Hocking Coal & Iron receivership suit was dismissed and the July interest was paid. The Northern Pacific was sold at foreclosure, also the Oregon Railway & Navigation (besides several of the branch lines), the Kansas City & Omaha, the San Antonio & Gulf Shore, the Carolina Knoxville & Western and the Duluth & Winnipeg. The Fourth Avenue Street railway line of the New York & Harlem was leased to the Metropolitan Street Railway. The Wheeling & Lake Erie increased its stock \$5,000,000. The Chesapeake Ohio & Southwestern was sold at foreclosure and purchased by the Illinois Central. The Great Northern arranged with a Japan line for steamship service between Seattle and Japan, China, etc.

**—The Money Market.**—The unsettled state of things in the financial world was not felt to any great extent in the call loan branch of the money market, where the rate did not get above 3 per cent, but in the market for time loans and commercial paper the effect was marked. Lenders showed unwillingness to put out their money for long periods, even on the best of collateral, and at the close of the month the ruling rates were 5 per cent for sixty days to four months and  $5\frac{1}{2}$  to 6 per cent for five to six months. The same conditions also affected the market for commercial paper and at the close of the month rates were firmly held at  $5\frac{1}{2}$  to 6 per cent for sixty to ninety day endorsed bills receivable and 6 to 7 per cent for four months commission-house and first-class single names.

**—Foreign Exchange, Silver, Etc.**—Foreign exchange was heavy early in July in consequence of the offering of bills against stocks bought for European account. London did not at first seem disturbed by the action of the Democratic Convention, but later, on the serious view of the matter taken in this country and the unfavorable developments resulting therefrom, that market too began to show uneasiness. About this time there was likewise some buying of long sterling for investment. Exchange consequently developed increasing strength, and by the 16th rates for actual business in sterling had advanced altogether about one cent per pound to 488 to 488 $\frac{1}{4}$  for sixty-day bills, 488 $\frac{1}{4}$  to 489 for sight and 489 to 489 $\frac{1}{4}$  for cable transfers. Gold exports to Europe for the week ending the 18th aggregated \$3,816,000 against only \$400,000 for the whole rest of the month previous to that time, and on the 20th \$3,033,000 was

engaged for shipment the next day. The meeting of foreign bankers at Mr. J. P. Morgan's office to check the further outflow of the metal was reflected in the weakening of the market on the 21st, with a reduction on that day of one-quarter of a cent in the rate for actual business for long sterling, but no change in either sight rates or cable transfers; this was followed by a further reduction of a quarter of a cent in the long rate on the 23d and a reduction also of one-quarter of a cent in the actual rates for sight and cable transfers. On this last-mentioned day \$2,012,000 gold previously engaged was shipped, but after that there were no exports of the metal. The market subsequently became firmer again, and on the 29th there was an advance of one-quarter of a cent, leaving actual rates at the close of the month at 487½@488 for sixty-day bills, 488½@489 for sight and 489½@490 for cable transfers, or at the highest figures for the month except for long sterling. On the 1st July the premium for gold bars at the United States Treasury was reduced from one-eighth of one per cent to one-tenth of one per cent. A feature in Europe was the offering of a Russian loan for 1,000 million francs, which it was reported was subscribed for in Paris twenty-five times over. Money rates at the European money centers continued to rule low—in London only about ½ of 1 per cent for sixty to ninety-day bank bills.

**AUGUST.—Current Events.**—The situation changed decidedly for the better in August. In the early part of the month the outlook continued gloomy. Foreign exchange rates ruled high; there were persistent withdrawals of gold from the Treasury on domestic account; the stock market hovered on the verge of a panic, with a continuous shrinkage in values, while the money market was disturbed and accommodations were difficult to obtain. The failure of the Moore Bros. in Chicago, who had been engaged in a heedless speculation in the stocks of the Diamond Match Company and New York Biscuit Company, and whose liabilities were estimated at fifteen millions, tended further to increase the feeling of uneasiness. As a result of this failure, the Chicago Stock Exchange was closed from August 4 till the following November. The closing of the Murray Hill Bank in this city on the 11th by the State Banking Department had less effect, as it was a small institution. Perhaps the most important factor of all was the nervous dread felt everywhere as to the effect of the meeting on the 12th at the Madison Square Garden, when Mr. Bryan was to receive notice of his nomination and make a speech, with the purpose, as announced, of taking possession of the "enemy's country." This meeting, as it happened, marked the turning point. It proved a failure, as the audience, though large, quickly dwindled away, and the speech also was regarded as weak. The stock market the next morning rose sharply and moved upward the rest of the month. The political outlook from that time on steadily improved. Mr. Bourke Cockran addressing a meeting in favor of sound money at the Madison Square Garden the next week, which proved an unqualified success, and Mr. McKinley's letter of acceptance, in its pronounced stand on the money question, also having a good effect. An equally notable change took place in the financial situation. Foreign exchange from the 7th of the month declined almost continuously, and, whereas in July an agreement to stop exporting gold was found necessary, at the close of August an import movement of large volume was in progress. The first engagement of gold for import was announced on the 19th and was by many looked upon as part of the relief work undertaken by the syndicate. But it soon became apparent that the movement was a wholly natural one. The deposits of imported gold did not come in time to count in the Treasury figures in August and the reserve stood at only \$100,957,561 September 1 against \$110,718,746 August 1. The failure of Hilton, Hughes & Co. the latter part of the month had no influence on affairs. New York City again failed to sell its bonds, the bids being sufficient but prices unsatisfactory. In Brooklyn the local banks took \$2,000,000 of 5 per cent gold tax certificates. Crop prospects continued good on the whole and for corn exceedingly bright; in spring wheat, however, some further decline in condition occurred, and the outlook for cotton was sufficiently impaired to induce an active speculation for a rise, under which the low middling upland grade here in New York advanced from 7 1-16 cents to 8½ cents per pound, the close, however, being at 7½ cents on more favorable advices as to the crop. A further advance of 25 cents a ton in the tidewater price of anthracite coal was announced, to go into effect September 1.

**Railroad Events and Stock Exchange Matters.**—Prices on the Stock Exchange the early part of July declined very heavily. But the failure of the Bryan meeting at the Madison Square Garden on the 12th and the subsequent favorable developments in the political world, with the contemporaneous influx of gold from abroad and the improvement in the financial situation, worked a wonderful and a complete change in the course of the market, so that a very great recovery in prices took place, and quite a number of stocks actually stood higher on the 31st than on the 1st. The lowest points as a rule were reached between the 7th and the 11th, these also being in most cases the lowest figures for the year. St. Paul common sold at 69½ on the 1st, at 59½ on the 10th, and closed at 69½ on the 31st. North West, common from 94½ August 1 sold down to 5½

August 10 and touched 96 on the 31st. Rock Island opened at 56½ and closed at 56½, the range having been from 49½ August 7 to 56½ August 31. Burlington & Quincy sold at 66 on the 1st and at 53 on the 7th, and closed at 61½ on the 31st. The railroad rate situation west of Chicago and St. Louis grew more unfavorable. In the South the injunction against the rate reductions of the Southern Railway and the Seaboard Air Line was dissolved on August 31. The Louisville New Albany & Chicago was placed in receiver's hands to escape liability for the guaranty by a former management of the bonds of the Richmond Nicholasville Irvine & Beattyville RR. A proposition to sell the Cincinnati Southern to the Southern Railway and the Cincinnati Hamilton & Dayton was rejected by a vote of 15,780 to 15,392 at a special election in Cincinnati. A receiver was appointed for the Kings County Elevated.

**The Money Market.**—Money rates ruled high during August for loans in any form. The banks were low in reserves and called in loans; credits were greatly curtailed; there was a very active demand for money from the interior, in part to move the crops, but in part also because of the generally disturbed condition of things; a disposition to hoard gold again became manifest, leading to withdrawals from the banks for exchange into gold at the Treasury, and merchants found it difficult to obtain needed accommodations. To relieve the strain suggestions for the issue of Clearing House loan certificates (under authority granted the previous December at the time of the panic caused by the Venezuelan incident) were made, and the Loan Committee met several times to consider applications, but none were received. The latter part of the month the sharp fall in foreign exchange and the resulting large engagements of gold in Europe for the United States gave promise of relief in the natural way, though the importations did not come in time to affect rates. The surplus reserve of the New York City Clearing House banks was only \$8,836,200 August 29, as against \$17,728,600 August 1, and the money holdings in the same interval were reduced from \$138,982,100 to \$121,819,900. On the Stock Exchange the call loan rate advanced to 15 per cent at one time towards the end of the month, and hardly any loans were made at less than 5@6 per cent. Banks and trust companies exacted full 6 per cent where they loaned at all. On time, loans could be obtained only on the payment of a commission amounting to one or two per cent in addition to the rate of 6 per cent. The foreign bankers in some instances loaned at plain 6 per cent, but on a good note. In commercial paper only the very choicest grades found buyers, and these commanded 9@10 per cent.

**Foreign Exchange, Silver, Etc.**—Seldom has there been such a decided change in the tone of the foreign exchange market, and such a great decline in rates within so short a time, as occurred during August. The month opened with the market strong and rates high and advancing, so that it seemed as if only the existence of the syndicate organized the previous month to stop the export movement of gold prevented an outflow of the metal. It closed with the exchange market weak and unsettled, with rates down to the gold-import point, and gold flowing this way in large amounts. The explanation is to be found in heavy merchandise exports, small imports, an early cotton crop (bringing a considerable supply of cotton bills on the market) and high interest rates here, leading to creation of loan bills. On the 3d rates for actual business in sight sterling and cable transfers were advanced one-quarter of a cent, bringing them up to 489@489½ for the former and to 489½@489½ for the latter. On the 7th they were reduced again a quarter cent; on the 10th there was a further reduction of three-quarters of a cent, and thereafter the decline was rapid to the end of the month. The first engagements of gold for importation were made on the 19th, when actual business in sight sterling was at 485@485½ and in cable transfers at 485½@486. Some were then inclined to consider the imports forced and as part of a scheme of the syndicate to relieve the situation here. But subsequently the rate for sight bills dropped to 483½@484 and for cable transfers to 484@484½, and the import movement assumed large dimensions. The decline for the month in sight and cables was 5½ cents per pound, and in long sterling 6¼ cents. On the closing day there was an upward reaction of half a cent. The actual arrivals of gold were only about 4 million dollars (gross), but about \$15,000,000 more was on the way at the close. In London the rate for sixty to ninety-day bank bills in the open market rose from ½ to 1½ per cent. Silver showed great weakness, and the price declined from 31¾d. per ounce to 30¾d., closing at 30 11-16d.

**SEPTEMBER.—Current Events**—Both the political and the financial situation continued to improve during September. The honest-money Democrats met in National Convention at Indianapolis and nominated Senator Palmer, of Illinois, for President, and General Buckner, of Kentucky, for Vice President. About the same time (on September 1) the Vermont State election was held and showed an unprecedented plurality for the Republican ticket. The Maine State election occurred on the 14th and also showed an unprecedented plurality for the Republican ticket. Both elections were fought on national issues, making the result significant. The gold import movement continued, the arrivals reaching 34 million dollars. Much of the gold was exchanged for currency at the Treasury, and the Treasury gold balance increased from \$100,957,561 to \$124,034,672. U. S. coupon 4s of

1925 advanced from 113½ on August 31 to 117 on September 30. The money market relaxed very decidedly and the stock market showed great strength. The wheat market was also strong, the price here rising from 63¾ Sept. 1 to 71¾ September 30. General business remained very restricted, but in New England many cotton mills resumed work. In the iron trade the production of iron was reported only 112,782 tons per week September 30, or rather October 1, against 180,532 tons July 1 and 217,303 tons in November of last year. Returns of railroad earnings were in many cases very unsatisfactory. The Pennsylvania Railroad for August reported 1¼ million dollars loss in gross earnings and 1¼ million dollars loss in net and the losses in succeeding months were equally heavy. The price of low middling uplands cotton advanced from 7½ cents per pound August 31 to 8½ cents Sept. 10, but more favorable crop advices caused a reaction to 8 cents. The crop situation showed a much smaller spring-wheat yield than in 1895, a total wheat crop of about 412 million bushels against 467 million bushels last year, a cotton crop above the small crop of 1895, a corn crop of unprecedented magnitude—over 2,200 million bushels—and an oats crop of about 670 million bushels, against 824 million bushels in 1895. The drain of gold to the United States induced the Bank of England to advance its discount rate twice—on the 10th from 2 to 2½ per cent and on the 24th from 2½ to 3 per cent. No change had been previously made since February 22, 1894.

—*Railroad Events and Stock Exchange Matters.*—Influenced by the favorable events noted above, the stock market manifested great strength, and a further large rise in prices occurred after the recovery in August. On realizing sales the market about the middle of the month evinced some hesitancy, but later the upward movement was resumed. Milwaukee & St. Paul common stock sold at 65¼ on the 1st and at 73¼ on the 28th; Rock Island at 55¾ on the 1st and at 63¾ on the 30th; and North West. common at 95 on the 1st and at 100 on the 9th. The rate war in the South between the Seaboard Air Line and the Southern Railway broke out afresh after the dissolution of Judge Simonton's injunction on August 31, but it was again checked by an injunction issued by Judge Emory Speer on the 10th. The Central of Georgia declared a dividend of 1½ per cent on the new 1st preference incomes, and the Georgia Southern & Florida declared a dividend on its 1st preferred stock. The Evansville & Terre Haute declared its 1st dividend on its preferred stock. The Port Royal & Augusta was sold at foreclosure. Default occurred on the interest on the Terre Haute & Peoria and Indiana & Lake Michigan bonds; also on the Union Pacific Sinking Fund 8s. The Norfolk & Western and Philadelphia & Reading were sold at foreclosure; also the Lynchburg & Durham and the Houston Belt & Magnolia Park. A receiver was appointed for the Duluth Transfer Railway; also for the Columbia & Maryland and the Altoona Clearfield & Northern. The New York Produce Exchange filed a complaint with the Interstate Commerce Commission against the Joint Traffic Association, charging discrimination against New York. The Gulf & Ship Island was released from receiver's control.

—*The Money Market.*—The shipments of currency to the interior continued heavy during September, and the money market remained in a more or less strained condition a good part of the month, but the large gold imports and the revival of confidence caused by the improved political outlook finally brought some relief. Bank failures at New Orleans caused an extra demand for money at that point. The surplus reserve of the New York City banks rose from \$3,836,200 August 29 to \$14,216,025 September 26. The deposit line of the banks ranged below the loans throughout the month. Money on call at the Stock Exchange after having touched 12 per cent on August 31 ruled as high as 8 per cent once or twice early in September, but after the 21st the rate did not get above 5 per cent, except that on the 30th, on the October settlements, 6 per cent was in some cases demanded. At banks and trust companies 6 per cent was the minimum figure all the month. On-time, loans were very difficult to obtain, and 6 per cent, plus a commission of one or two per cent, according to the length of time of the loan, had to be paid up to about the 20th of the month, when the commission was abandoned, and the rate dropped to 6½ per cent. The foreign bankers loaned at plain 6 per cent the whole time, but only on a gold note. Commercial paper was very hard to negotiate and only the very choicest grades found buyers at 9 per cent. Towards the close of the month the rate dropped to 7 per cent, with some little buying of prime single-named paper at 8½ per cent.

—*Foreign Exchange, Silver, Etc.*—The exports of grain and cotton were very heavy during September, and this brought an abundant supply of commercial bills on the exchange market. At the same time the high money rates here led merchants in many instances to defer remittances and also induced the making of some sterling loans. Gold imports hence were large, reaching 34 million dollars and several millions more were at hand at the close of the month. The Bank of England advanced its discount rate from 2 to 2½ per cent, and then to 3 per cent. At the close a sharp upward reaction in exchange rates occurred, making further gold engagements for the time being out of the question. The market opened on the 1st fractionally higher, with the rates for actual business 4 83¼@4 82¼ for sixty-day bills and 4 84¼@4 84½ and 4 84¼@4 85 for sight and cables respectively. From that time on the decline was almost uninterrupted, and on the 22d the rate for long

sterling was 4 81¼@4 81½ and for sight and cables 4 83¼@4 83½ and 4 84@4 84½. From these figures an advance of just one cent occurred by the close of the month in long sterling and 1¼ cent in sight and cables. Commercial bills got down on the 23d to 4 80¼@4 81 for prime and 4 80@4 80½ for documentary, subsequently advancing again. The Bank of Germany advanced its rate from 3 per cent to 4 per cent. The price of silver declined to 30 pence per ounce, but recovered to 30 5-16d. In the open market London the discount rate advanced at one time to 2¼ per cent and at Berlin and Frankfurt to 4 per cent. Under the higher interest rates and complications in European politics English consols declined from 112 9-16 August 31 to 109¾ Sept. 3.

OCTOBER.—*Current Events.*—With the near approach of the election the strain in financial affairs during October became intense. The indications unmistakably foreshadowed the defeat of the silver party, but nevertheless a feeling of great nervousness and anxiety developed. Hoarding of gold (and even of currency) again occurred, there were large withdrawals of the metal from the Treasury, and all through the month gold ruled at a premium in the market. At the same time savings banks felt obliged to increase the cash in their vaults (withdrawals by depositors being very heavy), and interior banks also found it incumbent to add to their holdings. In the money market great stringency developed notwithstanding imports of nearly 28 millions of gold, and on the 29th the rate for call loans on the Stock Exchange advanced to 100 per cent and on the 30th to 127 per cent. On the latter day a syndicate of New York banks placed 10 million dollars at the disposal of the Clearing House Loan Committee with which to relieve the stringency. None of the gold imported went into the Treasury, and the Government gold reserve fell from 124,034,672 to \$117,126,524. Advances from India told of impending famine there, and a feature of the month was shipments of wheat from California to India. There was a further sharp rise in the price of wheat, followed by a reaction on realizing sales and stringent money. The prices of other grains also advanced. The stock market was strong and higher on the prospect of McKinley's election. The Bank of England advanced its rate of discount from 3 to 4 per cent, but this did not check the outflow of gold to the United States. A favorable event here was the restoration of rates by Western roads, and the establishment of the Western Freight Association, described in the CHRONICLE of November 28, page 947. The premium on gold amounted to only a small fraction at first, but towards the close of the month one per cent was paid in some instances for spot gold, and contracts running to the end of the year commanded 1½ per cent. A large brokerage commission house advertised options on gold guaranteed by a surety company.

—*Railroad Events and Stock Exchange Mat'rs.*—The stock market reflected the growing confidence felt in the success of the sound money cause. Except some weakness the early part of the month, the tone was almost uniformly strong, and a further decided advance in prices was established. Stringent money led to occasional reactions. The restoration of freight rates by Western roads (the higher schedules in most cases going into effect November 2d), with the organization of the Western Freight Association, was a favoring factor. During the last half of the month the tone of the market was almost buoyant. St. Paul common advanced from 67½ October 12 to 74½ October 31, Burlington & Quincy from 66¾ on the 10th to 77 on the 31st, Northwest common from 96¾ on the 12th to 103¾ on the 31st, Rock Island from 57½ to 67½, Louisville & Nashville from 41¼ to 48½, &c. On Friday, the 30th, it was reported that bids had been made to pay two per cent the morning after election above the closing prices on the 31st in the event of the success of the McKinley ticket. The New Orleans & Southern was sold at foreclosure. The Columbus Sandusky & Hocking made a traffic contract with the Wheeling & Lake Erie for the use of the latter's tracks into Toledo. A plan for the reorganization of the Louisville New Albany & Chicago was submitted. A receiver was appointed for the Ogdensburg & Lake Champlain. The Mexican roads revived their old pooling agreement. The New York Court of Appeals rendered a decision reopening the foreclosure suit of the New York & Northern, now the New York & Putnam, and controlled by the New York Central. The Chicago & West Michigan announced that the November and December coupons would again have to be paid half in scrip. The dividend on Nashville Chattanooga & St. Louis stock was postponed.

—*The Money Market.*—During October the money market became very stringent. When the stringency reached an acute stage a syndicate of Clearing House Banks intervened in the way mentioned above. Up to the last week 12 per cent was the highest rate for call loans at the Stock Exchange, with transactions occasionally as low as 2@3 per cent. Several times when the rate got above 6 per cent Messrs. J. P. Morgan & Co. offered round amounts at that figure. In the last week 100 per cent (6 per cent plus a commission of ¼ of 1 per cent) was paid on the 29th and 127 per cent (6 per cent plus 1 per cent commission for three days, or until Monday,) on the 30th, but the action of the syndicate of banks caused a drop subsequently to 6 per cent. The ordinary rate at banks and trust companies that week was 12 per cent. For time loans some transactions were reported the last week at 12 per cent for 60 to 90 days on

chose collateral. In commercial paper classified rates were given in the week ending October 31 for the first time since August, but the situation quickly changed, and most of the month it was difficult to effect sales of paper, the nominal quotations at the close being  $7\frac{1}{2}$  to 10 per cent for the best names.

*Foreign Exchange, Silver, &c.*—The upward reaction in foreign exchange rates noted at the close of September continued during the first two days of October, and on the 31st rates for actual business in sterling were 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$  for long, 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$  for short and 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$  for cable transfers. After the second the market broke sharply under a pressure of commercial bills and the absence of any considerable demand. Dealer money here also contributed to the decline, which continued practically without interruption until the 19th when long was quoted at 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$  (a fall of 3 cents), short at 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$  and cables at 4 80 $\frac{1}{2}$  to 4 80 $\frac{1}{2}$ . Commercial bills were then 4 79 $\frac{1}{2}$  to 4 79 $\frac{1}{2}$  for prime and 4 78 $\frac{1}{2}$  to 4 79 $\frac{1}{2}$  for documentary. After that the market again developed strength. The supply of commercial bills was temporarily reduced by reason of the scarcity of freight room on ocean steamers, and at the same time there was a demand for long sterling by those who wished to protect themselves against a possible adverse result at the election; in addition the Bank of England on the 23d advanced its discount rate from 3 to 4 per cent. The extreme stringency in money which occurred the latter part of the month was without influence on exchange, the foreign bankers, like every one else, operating with extreme caution in view of the near approach of the election. Under the rise rates for actual business on the 31st were 4 81 $\frac{1}{2}$  to 4 82 for long, 4 81 $\frac{1}{2}$  to 4 82 $\frac{1}{2}$  for short and 4 81 $\frac{1}{2}$  to 4 81 $\frac{1}{2}$  for cable transfers. The imports of gold reached about 28 million dollars, the movement being aided by the premium on gold. Discounts in the open market London advanced to 3 $\frac{1}{2}$  per cent, and the rate at Berlin at one time was 4 $\frac{1}{2}$  per cent (the Bank of Germany having advanced its rate to 5 per cent), and at Frankfurt 4 $\frac{1}{2}$  per cent; at Paris the rate did not get above 2 per cent. The Bank of England between August 20th and October 29th lost over £11,000,000 gold. The price of English consols dropped from 110 $\frac{1}{2}$  to 107 $\frac{1}{2}$ , but recovered to 108 7-16. Silver ruled lower, but did not decline very much.

**NOVEMBER.**—*Current Events*—As expected, the election on November 3 worked a complete revolution in affairs. The victory for sound money was very decisive, Mr. McKinley receiving 272 electoral votes against 175 for Bryan; his popular plurality was about 600,000. The change which occurred on November 4 has seldom if ever been equalled in the country's history. On November 2d the desire to hoard gold seemed to be more intense than before and there was a long line of persons at the Sub-Treasury drawing out gold; the demand on bullion brokers and foreign exchange dealers was equally urgent, as high as one per cent premium being paid. November 4 the premium had vanished and gold became a drug; it was deposited in large amounts in banks and tendered at the various sub-treasuries, though at the Sub-Treasury here the offers were not accepted until the 16th, work at the office being in arrears. The Treasury gold reserve increased from \$117,126,524 October 31 to \$131,510,323 November 30, making it the largest since 1891. The latter part of the month gold was once more being received in some amounts for customs duties. In the foreign exchange market the demand for bills, to get a gold obligation, was so great that rates advanced about a cent a pound sterling on November 2. November 4 the market was demoralized, and rates dropped 20 to 3 cents. In the money market 96 per cent was paid for call loans at the Stock Exchange on November 2d; before the close on November 4 the rate was 4 per cent. The stock market had been strong November 2d in anticipation of the result of the election, but November 4 prices further jumped up 20 to 30 points. In our industries, mills, mines, furnaces, and factories all over the country started up; by November 20 fully 700 establishments had resumed work or enlarged their force, and the number kept steadily increasing. Hoarded money was returned to the banks in large amounts. Both the deposits and the loans of the New York Clearing House banks touched the lowest point of the year on November 7; from that date to November 28th deposits increased 52 million dollars, from \$138,437,000 to \$190,634,300, loans increased from \$142,179,700 to \$163,818,200, money holdings from \$134,419,800 to \$151,070,200, and surplus reserve from \$14,510,400 to \$31,411,025. The price of U. S. Government 4s of 1925 advanced from 116 $\frac{1}{2}$  to 120. Municipal bonds, which previously could not be disposed of, were sold in large amounts after the election, New York City selling 16 millions of 3 $\frac{1}{2}$  per cents. The large foreign trade balance was another favorable influence, the excess of the merchandise exports for the previous month (October) reaching 63 million dollars (the largest in the country's history) and for November 52 million dollars; the price of wheat also further advanced—from 80 cents to 90 $\frac{1}{2}$  for the December option. The Chicago Stock Exchange reopened November 5, after having been closed since August 4. At the Lord Mayor's banquet in London on November 9 Lord Salisbury announced that the Venezuelan controversy with the United States might be regarded at an end.

*Railroad Events and Stock Exchange Matters.*—The stock market which had been strong through October became

almost buoyant November 2, the day before election, so positive were the indications of the success of the McKinley ticket, and it was announced that one or two houses would open election night to enable any who wished to operate in the London market on the news of the election. On November 4 the market continued to show great activity and large transactions (European buying being a striking feature) and prices advanced 20 to 28 points. For a number of days further advances occurred. Later the advancing tendency was checked by realizing sales, while the large losses in earnings reported by the spring-wheat roads (which the previous year had a phenomenal crop of wheat along their lines) also induced selling and prices sharply declined—in some cases to the lowest figures of the month. Suggestions of complications with Spain on account of Cuba helped to produce an unsettled feeling. St. Paul common sold at 80 Nov. 4 and at 73 $\frac{1}{2}$  Nov. 30; North West common at 102 $\frac{1}{2}$  Nov. 2, 106 $\frac{1}{2}$  Nov. 11, and closed on the 30th at 104 $\frac{1}{2}$ ; Rock Island at 67 Nov. 2, at 74 $\frac{1}{2}$  on the 10th, closing at 68 $\frac{1}{2}$ ; and Burlington & Quincy at 76 on the 2nd, 83 $\frac{1}{2}$  on the 10th, closing at 77 $\frac{1}{2}$ . The railroad bond sales on the exchange aggregated \$46,625,350, the largest of any month of the year. The share sales were also the largest of any month of 1896, but reached only 5,899,298 shares. The effort of the Ryan party to gain control of the Seaboard Air Line miscarried. The Marietta & North Georgia, previously sold at foreclosure, was on Nov. 1 reorganized as the Atlanta Knoxville & Northern. Without notice to the company the Kansas lines of the new Atchison were placed in receivers' hands, the claim being that there was a State law which prohibited the holding of real estate by a corporation more than 20 per cent of whose stock is held by aliens, and that the Atchison came within that prohibition. The Chester & Lenoir narrow gauge was sold at foreclosure; also the following roads: Detroit Lansing & Northern, Chicago & Northern Pacific, Forest City & Sioux City, the Roanoke Southern and the Scioto Valley division of the Norfolk & Western. The Fort Worth & Denver City passed out of the hands of receivers. The Louisville New Albany & Chicago reorganization plan was modified. The Terre Haute & Indianapolis was placed in the hands of receivers; also the Middle Tennessee & Alabama, which was successor to the Decatur Chesapeake & New Orleans. The Ohio coal roads made an agreement for the restoration of rates. The Pacific Mail Steamship Company declared a dividend of one per cent. The United States Supreme Court rendered a decision sustaining the constitutionality of the Wright Irrigation District Law of California. The Central Pacific arranged to extend for one year its first mortgage bonds maturing January 1, 1897.

*The Money Market.*—In the money market the stringency noted in October continued on Monday, November 2d, when some call loans on the Stock Exchange were made at 96 per cent per annum. The day after the election there were renewals at 10 per cent, but the close was at 4 per cent. Thereafter the tendency was towards pronounced ease, and in the last week the range for call loans was 1 to 3 per cent, and even at banks and trust companies only 3 per cent was demanded. We have referred above to the great increase after the election in deposits and loans (both items having reached the lowest point of the year in the statement of November 7) and also in the money holdings and in surplus. Under this change the banks again loaned on time and bought commercial paper with great freedom, and at the close the quotations for time loans were down to 3 per cent for 30 to 60 days, 3 $\frac{1}{2}$  to 4 per cent for 90 days to 4 months and 4 per cent for 5 to 6 months. A feature was the lending of time money on investment purchases of sterling exchange. For commercial paper the rates dropped to 4 to 4 $\frac{1}{2}$  per cent for sixty to ninety day endorsed bills receivable and 4 $\frac{1}{2}$  to 5 per cent for four months commission house and first-class four to six months single names. With the return of normal conditions the deposit line of the Clearing-House banks again greatly exceeded the loans.

*Foreign Exchange, Silver, &c.*—In the foreign exchange market, as elsewhere, the immediate effect produced by the election was very striking. On November 2d, the day before election, the buying of sterling bills by those who considered this a convenient way of securing an obligation repayable in gold was very active, and for actual business there was an advance of a full cent for sixty-day bills and sight sterling and of about three-quarters of a cent for cable transfers. The day after the election there was an extreme break of two to three cents a pound, some sales of long sterling being reported at 4 80, against 4 82 $\frac{1}{2}$  to 4 83 on the 2d; of short sterling at 4 83 $\frac{1}{2}$ , against 4 85 $\frac{1}{2}$  to 4 86, and of cables at 4 81 $\frac{1}{2}$ , against 4 86 to 4 86 $\frac{1}{2}$ ; a recovery of about three-quarters of a cent to a cent occurred before the close of the day. The market the rest of the month was variable, with the tendency strongly upwards. As a result of the election there was at first quite extensive buying of our securities by foreign investors, but this soon ceased. Commercial bills were in plentiful supply; the drop, however, in money rates here and the continued high rates in London caused a steady hardening in exchange. Investment buying of sterling, by those who could in this way obtain a better return for their money on account of the difference in money rates, was one of the noteworthy features; and this further strengthened the market. An incident early in the month was the sale by the Bank of England of a block of \$4,000,000 of U. S. Govern-

ment 4s, which showed the Bank a profit. On November 30 exchange rates on actual business for long sterling were 4 83½ @ 4 83½; for sight 4 86¼ @ 4 87 and for cable transfers 4 87½ @ 4 87½. The premium on gold disappeared after the election as stated above. There were some gold imports, but on old orders. In Europe the open market rate of discount in London advanced to 3½ per cent in the third week, and the rate at Berlin and Frankfurt to 4½ per cent, but subsequently there was a decline to 3½ and 4½ per cent respectively. The price of silver tended downward, closing on November 30 at 29½d. English consols advanced to 112.

**DECEMBER.—Current Events.**—Congress proved a disturbing influence in December. The Cuban question occupied much attention, and the killing of General Maceo, one of the insurgent leaders, gave additional prominence to it. President Cleveland in his message maintained his previous conservative position but in the Senate very radical propositions were offered, one going so far as to direct the Government to take possession of Cuba by military force. Action finally crystallized around a resolution offered by Senator Cameron recognizing the independence of the "Republic of Cuba." Quite unexpectedly the Senate Committee on Foreign Relations reported this resolution favorably on Friday, December 18. A big break in prices on the Stock Exchange occurred immediately and the whole country was startled by the serious nature of the step proposed, involving the possibility of war with Spain. The next day Secretary of State Olney, in an interview, announced that the resolution if passed could only be regarded as an expression of opinion on the part of the Members of Congress and that that body could not bind the President in the matter of recognizing a foreign State, this being an Executive function alone. It quickly became apparent that public opinion did not sustain the Senate and when the resolution came up in that body on Monday, the 21st, action on it was deferred until after the holiday recess. Another depressing circumstance was the failure at Chicago of the National Bank of Illinois with liabilities of \$11,000,000, followed by the collapse of a number of concerns which had depended on the bank for assistance. There were also bank failures at St. Paul, Minneapolis, West Superior and other points in the Northwest, and likewise a failure of a large financial institution in the Southwest, besides bank failures in various other sections. There was desultory talk in the Senate with reference to the Dingley Tariff Bill, which remained undisposed of from the last session, but it was agreed that there was no likelihood of securing action thereon. The plan mapped out by the Republican leaders in Congress, it was understood, was to have an extra session of Congress immediately after the 4th of March, and in the meantime to prepare a new tariff bill for submission at that time. On Monday, the 28th, the Committee on Ways and Means of the House began tariff hearings with the view to framing a new bill. At a conference of commercial organizations of the Central Western cities on December 1 it was decided to call a formal convention early in January to consider the future of the currency. There was a further accumulation of money at this centre, and the New York Clearing House banks from having reported on November 7 the smallest total of deposits and loans of the year, on December 26th reported the highest of the year. The Treasury gold reserve kept gaining, and stood at \$136,746,473 December 30th. Secretary Carlisle was requested by the Boston banks to resume the issue of gold certificates, but replied, saying he deemed it inadvisable to do so. Foreign exchange rates the middle of the month advanced, and there were reports of a renewed outflow of gold; but subsequently the market weakened again and no shipments occurred. In the iron and steel trades a feature was the breaking up of a number of combinations in different branches for the maintenance of prices; iron production further increased and the capacity of the furnaces in blast December 1 was reported 142,278 tons per week, against 112,782 tons October 1. It was rumored that the price of steel rails at the Eastern mills for 1897 would be \$25 00 per ton, against the present price of \$28 00. The price of wheat after an early decline moved upward again, but in cotton there was a sharp break, the price of low middling upland December 31 being 6 13-16 cents, against 7 5-16 cents November 30. Besides the large sales of municipal bonds, quite a number of new railroad loans were also negotiated during the month.

**—Railroad Events and Stock Exchange Matters.**—The stock market declined most of the time in December. It was weak even before the action of the Senate Committee in agreeing to report favorably the Cameron resolution, but that event caused a further break of several points, the market becoming almost panicky. There was subsequently a recovery from the lowest figures reached in this decline, and the last few days the market showed a firmer tone, aided by the decline in foreign exchange. St. Paul common sold at 75½ on the 2d and at 70 on the 18th, Burlington & Quincy at 79½ on the 4th and at 68½ on the 18th and Rock Island at 70½ on the 4th and at 64 on the 18th. In the State District Court at Oskaloosa, Kansas, Judge Myers rescinded his action appointing receivers for the Atchison; he decided that the Alien Land Law did not apply to railroads. The Columbus & Hocking Coal & Iron Company was again placed in the hands of a receiver. The suit of the Toledo St. Louis & Kansas City against the Joint Traffic Association lines

to compel them to interchange traffic as formerly (relations with the road having been severed because of its practices regarding rates) was settled outside the courts. Commercial Cable and Postal Telegraph companies were virtually consolidated. Reductions in the rentals of several of the Reading's smaller leased lines were effected. The Attorney-General of Pennsylvania instituted an inquiry into the charter of the new Reading Company. The Southern Railway declared its first dividend on the preferred stock. The Columbus Southern was sold at foreclosure and bought in the interest of the Georgia & Alabama. The Mobile & Ohio authorized the issue of \$1,000,000 bonds to build an extension to Montgomery. A plan was issued for the reorganization of the Union Pacific collateral trust note 6s, but opposed by Messrs. J. P. Morgan & Co., the trustees, and by the Committee under the indenture. The U. S. Government sold \$2,780,000 of Union Pacific, Central Pacific and Kansas Pacific 1st mortgage bonds held in the sinking funds of the Pacific Railways, the proceeds to be used to meet maturing U. S. currency 6s. The Chicago & Eastern Illinois took possession of the Chicago Paducah & Memphis. A suit to restrain the Manhattan Elevated from paying dividends failed. The Court of Appeals denied a motion for a re-argument in the matter of its decision re-opening the New York & Northern foreclosure suit. The St. Joseph & Grand Island was sold at foreclosure; also the Kansas City & South Western branch of the St. Louis & San Francisco; also the Seaboard Railway of Alabama. A decision was rendered sustaining the validity of the reorganization of the Indiana Decatur & Western.

**—The Money Market.**—The money market developed growing ease during December, and lenders sought borrowers. There was a further decided increase in the money holdings of the New York Clearing House banks and a still more striking increase in their deposits and loans. We noted in November a rise in the deposits from \$438,437,600 to \$490,634,300; in December they rose to \$525,837,200 on the 26th. The loans after having increased from \$442,179,700 to \$463,818,200 in November, increased in December to \$487,673,300. In both cases the amounts November 7 were the lowest of the year; those December 26th the highest. The money holdings from \$124,419,800 November 7 and \$154,070,200 November 28 advanced to \$165,764,200 December 26. The surplus reserve stood at \$34,309,900 December 26, against \$31,411,625 November 28 and \$14,810,400 November 7. In the week ending the 12th rates were about as low as in some cases lower than—at any time during the year. Call loans at the Stock Exchange were then 1½ @ 2 per cent, the minimum at banks was 1½ per cent, while time contracts on good mixed collateral were freely offered at 2 per cent for thirty days, 2½ for sixty days, 3 per cent for ninety days to four months and 3½ per cent for five to seven months; paper was quoted at 3½ per cent for sixty to ninety-day endorsed bills and 3½ @ 4 per cent for first-class and 4½ @ 5½ for good four to six months single names. Loans upon sterling bills, running from 75 to 100 days, were reported at 3½ per cent. The next week the market was a little firmer for paper, and the week ending the 26th, on a demand for money from the West in connection with the bank failures at Chicago and other Western points, rates for time loans also stiffened. The advance, however, was only about one-half of one per cent. On call at the Stock Exchange the rate remained 1½ @ 2 per cent and the minimum at banks was 2 per cent. There was no quotation for time loans at thirty days, but for sixty to ninety days the rate was 3 per cent, for four months 3½ per cent and for five to seven months 4 per cent. Paper was quoted at 3½ @ 4 per cent for sixty to ninety-day endorsed bills and 3½ @ 4½ for first-class and 4½ @ 5½ for good single names running from four to six months.

**Foreign Exchange, Silver, &c.**—Foreign exchange showed considerable irregularity during December. Up to the 8th the tendency was in the main downward, and rates for actual business were then 4 83½ @ 4 83½ for sixty days, 4 86¼ @ 4 86¼ for sight and 4 86¼ @ 4 87 for cables; after that the market advanced pretty steadily, and on the 18th the rates for actual business were 4 84 @ 4 84¼ for sixty days, 4 87½ @ 4 87½ for sight and 4 88 @ 4 88¼ for cables. It was then expected that gold would be sent to Germany the following week. The country's foreign trade continued to show a very large balance in our favor, and the high rates were due mainly to dearer money abroad and the decline in interest rates here with the train of influences that this set in motion; there was also a renewal of the investment demand for sterling, and there were likewise extensive remittances by bankers and corporations for interest due in January on American securities held in Europe. After the 18th exchange again weakened, and the expected gold exports did not occur. On the 31st rates for actual business were 4 83½ @ 4 84 for long, 4 86¼ @ 4 86¼ for short and 4 87 @ 4 87¼ for cable transfers. The open market discount rate in London declined to 3 per cent early in December, but later advanced again to 3¼ per cent, while the rate at Berlin and Frankfurt rose to 4½ per cent. The open market rates December 31 were: at London 3½ per cent, at Paris 2; at Berlin 4½ and at Frankfurt 4½. Silver fluctuated very little during the month, the price in London December 31 being 29 13-16d. English consols again declined, but closed at 111½. In India money was stringent, and as a measure of relief the India Council released two crores of rupees (20,000,000 rupees) from the Presidency treasuries.

COURSE OF PRICES OF GOVERNMENT SECURITIES FOR THE YEAR 1896.

For the time being rates in the money market are stiff, but certainly not more stiff than is usual at this season of the year. In spite of the considerable sums which have gone into the country to meet the needs of the approaching holidays, the Bank of England reserve still amounts to over 26 millions sterling. Day-to-day money commands in some cases as much as  $3\frac{1}{4}$  per cent, while the discount rate for three months' bills is about  $3\frac{1}{2}$  per cent. Long-dated paper, however, can be readily discounted at fully a point below Bank rate—which, as the reader is of course aware, is 4 per cent. According to cabled reports from your side the holdings of financiers in New York of bills on London amount to about 10 millions sterling, and consequently, it is argued, gold is not likely to come from the United States as soon as was expected, but inasmuch as the market supplies here in London are about equal to the demand, the delay can hardly be regarded as a matter of very serious importance. It is felt that as there has been no active speculation in American securities, the large sums due from your side in the form of interest and dividends upon British investments will more than balance the amount owed by this country for the purchase of produce and the like.

The stringency of the Indian money market has been so great that open market rates have in some cases been as high as 10 and 12 per cent, even to borrowers in excellent credit; while the official rate of discount both for the Bank of Bombay and the Bank of Bengal is 9 per cent. To relieve this state of stringency the India Council decided at their meeting on Thursday to release two crores of rupees from the Presidency Treasuries. The effect of this is not expected to materially alter the price of silver, but it will enable the Council to draw more freely upon London, and will postpone at any rate the loan of 4 millions sterling which it was reported from Calcutta some weeks ago would be raised in London early in the new year.

A report has been issued this week by the Board of Trade, showing the state of the skilled labor market throughout the United Kingdom. These returns only relate to members of trade unions and skilled workmen, unskilled labor being wholly left out of account. But the facts are sufficiently remarkable to justify the conclusion that employment is exceptionally good at the present time. The returns show that in 111 unions sending reports to the Board of Trade about 2 per cent were out of employment, as against over 4 per cent at the same time last year, of the total number of workmen affected. The report adds that the increase in the amount of wages is estimated at 1s. 9d. per week. Forty five thousand coal miners in West Scotland have secured an advance of 6d. and 9,000 an advance of 4d. per day. Nearly 4,000 work-people in the engineering and shipbuilding industries and over 3,500 nail-makers have secured increases. During November about 7,000 work-people in the tin-plate trade have obtained advances of 5, 10 or 15 per cent. Other increases, involving 64,000 work-people, were settled by negotiations, mutual arrangement, or were voluntarily conceded by the employers. This shows that the steady improvement in trade which has been going on all through this year is well maintained, as the figures come down as late as November last.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1896. Dec. 10.	1895. Dec. 18.	1894. Dec. 10.	1893. Dec. 20.

\* December 20.

Messrs. Pixley & Abell write as follows under date of December 17:

Gold.—There has been no decrease in the demand for gold, and some small amounts have been taken from the Bank in addition to the amounts on offer in the open market. The Bank has sold £23,000. No further sums have been withdrawn for the East. Arrivals: West India, £32,000; River Plate, £112,000; New Zealand, £5,000; Bombay, £43,000; Natal, £149,000; Chili, £1,000; total, £247,000. Shipments: Bombay, £60,500; Egypt, £323,000; total, £383,500.

Silver.—Following our report of last week, silver hardened to 30d., and has since then remained unchanged. The market closes to-day with perhaps a slightly weaker outlook. Arrivals: New York, £184,000; West India, £21,000; Chili, £69,000; total, £273,000. Shipments: Bombay, £46,000; Japan, £15,000; total, £61,000.

Mexican Dollars.—Although still inquired for, the price is hardly as good as recently, and 29 $\frac{1}{4}$ d. is about the best to be had. About 239,000 came from New York and £14,300 has been sent to China and the Straits per P. & O. of 11th inst.

The following shows the imports of cereal produce into the United Kingdom during the first fifteen weeks of the new season compared with previous seasons:

	1896.	1895.	1894.	1893.
Imports of wheat, cwt. 20,272,730	21,447,060	19,368,233	19,235,166	19,235,166
Barley .....	9,033,470	9,739,830	11,061,100	10,714,952
Oats .....	6,491,280	4,334,240	4,699,384	4,277,139
Peas .....	1,380,145	935,900	845,424	823,006
Beans .....	1,014,730	1,223,540	1,288,600	1,463,751
Indian corn .....	18,519,800	12,503,150	6,442,344	8,059,363
Flour .....	6,499,410	5,778,780	5,905,486	6,292,646
Supplies available for consumption (exclusive of stocks on September 1):				
Wheat imported, cwt. 20,272,730	21,447,060	19,368,233	19,235,166	19,235,166
Imports of flour .....	6,499,410	5,778,780	5,905,486	6,292,646
Sales of home-grown .....	9,013,591	4,799,585	6,318,365	7,673,655
Total .....	35,785,734	32,025,425	31,592,084	33,201,467

—Messrs. Zimmerman & Forsyth offer in another column City of Boston Rapid Transit 3½ per cent bonds. These bonds are recommended as a first class investment for savings banks, trust funds and the most conservative investors. They are a direct obligation of the City of Boston.

—Messrs. Harvey Fish & Sons offer at 92½ and interest \$1,000,000 Central of Georgia counsel, 3 per cent bonds. The facts regarding these bonds, together with the status of the company, its earnings, fixed charges, etc., were given at length in our last issue, page 1160.

—"Market Dictionary and Statistics" is a valuable book of reference issued by Messrs. J. R. Willard & Co., 55 Broadway. The daily range of prices for grain and provisions and the yearly range for a series of years are features of the pamphlet.

—Among the changes in Stock Exchange firms announced at the end of the year is the retirement of Mr. William H. Duff from the firm of Moore & Schley and the admission of Mr. George F. Cassleau to membership in the same firm.

—Mr. F. J. Linsen announces in another column that he is prepared to trade in the various scrips of properties that have recently undergone reorganization, as well as all other inactive railroad securities.

—Messrs. Redmond, Kerr & Co. offer January investors a choice of steam railroad, traction company and county and city bonds. A detailed list of selected securities will be found on page viii.

—Messrs. Parson, Leach & Co.'s January list is ready and can be had on application at their offices, 2 Wall Street, New York, and 115 Dearborn Street, Chicago.

—Messrs. Winslow, Lanier & Co. will pay dividends on a number of securities, list of which will be found in another column.

—The coupons and dividends payable at the office of the Farmers' Loan and Trust Company are advertised in this issue.

—Messrs. N. W. Harris & Co. will pay dividends on a number of securities, list of which will be found in another column.

**Brussels Figures Brought From Page 48.**—The statements below are prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Dec. 26, 1896, and since August 1, for each of the last three years:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.
Since 1895	Since 1895	Since 1895	Since 1895	Since 1895	Since 1895	Since 1895

WALL STREET, THURSDAY, DEC. 31, 1896-3 P. M.

**The Money Market and Financial Situation.**—Business in Wall Street has been on a limited scale even for the closing week of the year. Investors seem disposed to wait until after the January first settlements have been completed before commencing new operations. More bank failures have been announced in the South and West, but they are chiefly of small concerns which have been for some time regarded as weak and doubtful because of the character of their business and methods, and therefore do not reflect general business conditions.

The European money markets are easier. Foreign exchange has been weak and rates for bills are lower than our last report. There is doubtless a large amount of bills still held by investors here and there is no apparent evidence of a limited supply of exchange for some time to come.

Railroad earnings continue in many cases unsatisfactory, and are not an incentive to activity in railway securities. Notwithstanding the present dullness in all departments, there are reasonable grounds for the hope that during the year now opening better results will be realized in all business circles than have been experienced in 1896.

The bank reserve has been augmented this week by the flow of currency towards this centre, although interest rates are practically unchanged.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2½ per cent. To-day's rates on call were 2 to 2½ per cent. Prime commercial paper is quoted at 3¼ to 4½ per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £349,172, and the percentage of reserve to liabilities was 44.29, against 43.30 last week; the discount rate remains unchanged at 4 per cent. The Bank of France shows a decrease of 13,611,000 francs in gold and 5,314,000 francs in silver.

The New York City Clearing-House banks in their statement of Dec. 26 showed an increase in the reserve held of \$1,597,000 and a surplus over the required reserve of \$24,309,900, against \$33,274,725 the previous week.

	1896. Dec. 26.	Differen' from Prev. week.	1895. Dec. 23.	1894. Dec. 29.
Capital.....	60,772,700		61,122,700	61,622,700

Surplus reserve	24,309,900	Inc. 1,035,175	15,939,075	35,268,950

**Foreign Exchange.**—The foreign exchange market has been weak under the influence of easier money markets abroad and a limited demand. The supply of commercial bills has been fair and some investment bills have been offered.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4 83¼ @ 4 84; demand, 4 86¼ @ 4 86½; cables, 4 87 @ 4 87¼.

Posted rates of leading bankers follow:

	December 31.	Sixty Days.	Demand.
Prime bankers' sterling bills on London..	1 84 @ 2 84½	1 87 @ 1 88	
Prime commercial.....	4 83 @ 4 83½		
Documentary commercial.....	4 82½ @ 4 83		
Paris bankers' (franco).....	5 20 @ 5 19½	5 18½ @ 5 18¾	
Amsterdam (guilders) bankers.....	39½ @ 40	40½ @ 40¼	
Frankfort or Bremen (reichmarks) b'kers	95½ @ 94½	95½ @ 95½	

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1½ discount, selling 1½ premium; New Orleans, bank, par; commercial, \$1 50 discount; Chicago, 40c. @ 60c. per \$1,000 premium; St. Louis, par @ 25c. per \$1,000 premium.

**United States Bonds.**—Government bonds have been strong on limited sales, which at the Board include \$93,000 4s, coup., 1925, at 119¾ to 120¾; \$27,500 4s, coup., 1907, at 111½ to 112½; \$23,000 4s, reg., 1907, at 109¾ to 110½; \$5,000 5s, coup., at 114; \$1,500 5s, reg., at 113½ to 114, and \$10,000 2s, reg., at 95½. The following are closing quotations:

Jan. 1					
Total	17,031,041	13,640,986			

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	\$4 85 @ \$4 88	Fine silver bars....	64½ @ 66
Napoleons.....	3 85 @ 3 88	Five francs.....	93 @ 95¼
X 1 Reichmarks.	4 74 @ 4 74	Mexican dollars....	50½ @ 51½
25 Pesetas.....	4 77 @ 4 83	Do uncom'cial....	— @ —
Span. Doubloons.	15 55 @ 15 75	Peruvian sola.....	45½ @ 46½
Mex. Doubloons.	15 50 @ 15 75	English silver....	4 80 @ 4 86
Fine gold bars... par	@ ¼ prem.	U. S. trade dollars	— 65 @ 75

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$5,000 Tenn. settlement 3s at 81 to 81½; \$24,500 Virginia fund. debt 2-3s of 1891 at 62 to 62½; and \$26,000 Virginia 6s deferred trust receipts, stamped, at 61½ to 7.

The railway bond market has been relatively active and strong. The more active issues on the list have advanced an average of 1 per cent or more.

Of those which have advanced more than the average Atchison adjustment 4s, Mo. Kan. & Texas 2ds and some of the Northern Pacifics are conspicuous. The active list includes Ches. & Ohio, Burlington & Quincy, Rock Island, Mil. & St. Paul, Chicago & No. Pacific, Erie, Louisville & Nashville, Mo. Kan. & Texas, New York Central, Northern Pacific, Ore. Ry. & Nav., Ore. Short Line, Reading, St. Louis & S. F., St. Paul M. & M., San Ant. & A. Pass, Southern Ry., Texas & Pacific, Union Pacific, Wabash and West Shore bonds.

**Railroad and Miscellaneous Stocks.**—The market for stocks as a whole has been dull and narrow. Stocks with an international market have been generally well sustained as the result of more activity and the tendency to a firmer tone for Americans in the London market. The principal features were Burlington & Quincy, which lost 2½ points on reports of a poor showing for November, a part of which it has regained; Delaware & Hudson, which has declined 5 points on rumors of a reduction of the dividend; Manhattan Elevated, which fluctuated over a range of nearly 3 points, closing with a net gain of 2 points, and Reading, which was strong on the expectation that the proposed new charter will be pronounced legal. Other stocks of the railway list have been steady on limited transactions.

The miscellaneous list has been relatively strong. American Tobacco advanced on the declaration of a dividend. American Sugar gained 2½ points and lost it; Western Union and Chicago Gas gained about 1 point each. Consolidated Gas has continued weak on rumors of possible adverse legislation in the near future.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Net operating income.....	\$696,226	\$2,819,281
Miscel. income not includ'g land sales.....	20,373	55,026

Total net income.....	\$716,599	\$2,874,307
-----------------------	-----------	-------------

The operating expenses from September 1, 1896, include a proportionate part of the estimated taxes and rail and tie renewals for the current fiscal year of the new company, being ten months to July 1, 1897.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of December 19, 1896. The next will appear in the issue of January 23, 1897.

## Cleveland Lorain &amp; Wheeling Railway.

(Report for the year ending June 30, 1896.)

**President M. D. Woodford says in part:**  
**Development of Business.**—The new industries put into successful operation during the year include the mammoth steel works of the Johnson Co. at Lorain, the blast furnace of the Penn Iron & Coal Co. and the tin plate mill of the Reeves Iron Co. at Canal Dover, while the various sewer pipe and fire brick works contiguous to the line have added largely to their capacity. There has been extensive development of coal lands in what are known as the Tuscarawas and Massillon districts. The development in these districts not only adds greatly to the company's coal tonnage but, on account of the quality of the coal and the short haul to the lakes and to Cleveland, places the company in a very strong competitive position. These new industries and developments have necessitated increased facilities in the way of spur tracks and sidings on the part of the railway company, and other improvements requiring heavy expenditures; but it is gratifying to be able to report that the earnings of the company, both gross and net, have been the largest in its history, notwithstanding the low rates that have prevailed, and that the full benefit of many of the improvements above cited did not accrue during the period under consideration.

The physical condition of the property has been improved, and the roadway and equipment are in good condition for the economical carrying of a large tonnage. Strong efforts are being made, with every probability of success, to establish equitable rates for carrying coal, and with a general revival of business the future prospects of the company are very bright.

**Improvements.**—The extensive improvements in progress for the past two years have now been practically completed. The following are specified:

The modern ore hoisting plant has been finished at Lorain, in connection with which additional land has been purchased for the storage of ore and 300 feet of dock has been reconstructed. Our storage ca-

4. Winchester & Potomac bonds .....	4,418.      Baltimore, Treasurer.
5. Winchester & Hiram's stock .....	1,402.      do.      do.
<b>V. 63, p. 1125</b>	

**Purchase of Car Trust Bonds.**—The Finance Company of Pennsylvania at its office in Philadelphia will purchase at par on presentation the \$250,000 B. & O. car trust bonds, series "K," due Jan. 1, 1897.—V. 63, p. 1114.

**Boston & Lowell RR.—Refunding Bonds.**—As \$200,000 Lowell & Lawrence bonds will mature Oct. 1, 1897, the stockholders will be asked at the annual meeting to approve an issue of \$200,000 twenty year 4s for refunding.—V. 62, p. 1033.

**Brooklyn City RR.—New Williamsburg & Flatbush Bonds Maturing.**—The \$200,000 of New Williamsburg & Flatbush 7 per cent bonds due Feb. 1, 1897, will be purchased at par and interest to maturity on presentation at the Long Island Loan & Trust Co. or the First National Bank of Brooklyn.—V. 62, p. 68.

**Burlington (Is.) Electric Ry.—Foreclosure Suit.**—The American Loan & Trust Co. of Boston, as mortgage trustee, has brought suit to foreclose the first mortgage for \$300,000, interest on which went to default Jan. 1, 1896.—V. 62, p. 232.

**Cape Fear & Yadkin Valley RR.—Decree of Sale Expected Jan. 14.**—A press dispatch from Winston, N. C., says that Judge Simonton has directed the receiver of the North State Improvement Co. to appear before him in Wilmington, N. C., on Jan. 14, at which time he proposes to issue a decree for the sale of the road.—V. 63, p. 1009.

**Central Car Trust Co.—Payment of Bonds.**—All bonds and coupons due Jan. 1, 1897, will be paid on Jan. 2 at the office of E. W. Clark & Co., Philadelphia.

**Central Vermont RR.—Default.—Notice to Bondholders.**—In anticipation of default Jan. 1, 1897, on the coupons of the Consolidated RR. of Vermont 5 per cent bonds, and in order to protect the bondholders' interests, the bondholders' committee, B. P. Cheney, Chairman, calls for the deposit of these bonds with the American Loan & Trust Company on or before Jan. 5, after which date bonds will be received only on such terms as the committee may fix.—V. 63, p. 1116.

**Chicago & South Side Rapid Transit.—South Side Elevated RR.—Transfer of Property.—Name of New Company.**—As stated in the CHRONICLE of Oct. 3, page 601, the sale of the Chicago & South Side Rapid Transit Company's property to the bondholders' committee was confirmed, with the provision that if within ninety days an offer of at least \$250,000 in excess of the price bid by the committee should be made, another sale should take place. The ninety days having elapsed and no such bid having been made, the property has been, or is about to be, transferred to the committee. The title of the reorganized company to be formed under the plan published last week will, it is said, be the South Side Elevated Railroad Company.—V. 63 p. 1158.

**Cincinnati Jackson & Mackinaw Ry.—Plan Modified.**—In pursuance of the power conferred by the agreement and plan of reorganization dated Dec. 10, 1895 (in V. 61, p. 1106), said agreement and plan have been modified. By the modification Frederic P. Olcott, Calvin S. Brice and George R. Sheldon are constituted a reorganization committee to carry out the plan as amended. The amended plan provides substantially as follows:

**Property may be divided into two Divisions.**—The committee shall have power and authority to divide the property when purchased into two divisions: one including the railway from Addison Junction, Michigan, south, and the other including the railway extending from Toledo in a westerly direction. In case more than one corporation shall be created, the committee shall make proper provision to vest in such one of said corporations the title to the capital stock of the other corporation or corporations.

**New Securities.**—The main corporation holding such title shall issue Common stock \$5,000,000 [The plan of Dec. 10, 1895, provides that of this there shall be used to retire \$16,300,000 old stock at 20 per cent. .... 3,260,000]

**Preferred stock, entitled to annual dividends (if earned) at the rate of 5 per cent per annum, non-cumulative, the certificates to be subject to be retired by the company issuing the same on ninety days' notice by advertisement, at par or at such price less than par as the holders thereof may consent to receive. .... 5,000,000**

[The plan of Dec. 10, 1895, provides that of this amount there shall be used to retire old first mortgage bonds ... 4,235,000]

The plan of Dec. 10, 1895, provides for the issue also of the following bonds:

**First mortgage 5 per cent 50-year gold bonds at \$10,000 per mile. For improvements, betterments and rolling stock on present line ..... 3,240,000**  
For extensions to Cincinnati, O., Jackson, Mich., or elsewhere, as deemed advisable, additional amounts ..... 10,000 p.m.

As to these bonds the amended plan provides:

The committee or the board of directors of the new company may, with the assent of holders of two-thirds in amount of the preferred capital stock of said main corporation, make such changes as they may deem proper with respect to the amount of the proposed new first mortgage, and as to the property whereon the same shall constitute a lien, and also with respect to the purposes to which the bonds secured thereby may be applied.

**Right to Sell.**—The amended plan, in substantially the following terms, authorizes the sale of either division:

The committee or the board of directors of the main corporation shall have full power and authority to sell or dispose of such one of said divisions as they may deem proper, or the stock representing the same, for such consideration as it or they may deem reasonable, approved by holders of preferred capital stock of said main corporation to the amount of two-thirds of the par value thereof. The proceeds of any such sale may be applied to retire preferred stock of said main corporation or may be used for the general purposes of said main corporation as the reorganization committee while it is in existence, and afterward as the board of directors of said main corporation, may determine, subject, however, to ratification by holders of two-thirds in amount of the preferred stock.

**Exchange of Securities.**—Under the plan of Dec. 10, 1895, the holders of old securities are to be treated as follows:

Each holder of—	Pays as assessment.	—And receives for— principal & assessment.
First mortgage 4s for \$1,000.....	\$1	..... \$1,000
Common stock for \$100 .....	23 cents.	..... \$20

Holders of certificates of deposit are requested to present their certificates to be stamped with an assent to the modification. See notice in another column.—V. 63, p. 1062:

**Cincinnati Newport & Covington Ry.—Bonds Sold.—New Directors.**—On Thursday, Dec. 24th, 1896, the company sold to a strong syndicate \$500,000 of the second mortgage 5 per cent bonds at 70 and interest, the condition being that the control of the property must be given to the syndicate for two years. This has been accomplished and the new board elected as follows:

Ohas. Fleischmann, President of Market National Bank, Cincinnati; Henry Feltman, President of Citizens Nat. Bank, Covington, Ky.; J. C. Ernst, President of German Nat. Bank, Covington Ky.; Samuel Pogue, of H. & S. Pogue Co., Chas. E. Orr, Pittsburgh; H. P. Ellis, Cleveland; J. B. Foraker, Cincinnati.—V. 63, p. 1158.

**Columbus & Hocking Coal & Iron.—Receiver and Default.**—On the application of the Baltimore & Ohio RR., a creditor of the Columbus & Hocking Coal & Iron Co., Judge D. C. Badger, at Columbus, Ohio, on Saturday appointed Mr. Jay O. Moss, the President of the company, to be its receiver. Default on the first mortgage bonds was made on January 1. It is understood that the company will take advantage of the receivership to reorganize on a lower basis of charges, giving the bondholders for concession in interest additional property under the mortgage.—V. 63, p. 968.

**Commercial Cable.—New Bonds.**—Referring to the item published in last week's CHRONICLE regarding the authorized issue of \$20,000,000 of 4 per cent bonds, we have now been favored with the following additional particulars. The present issue is to be \$15,000,000, and is to be secured by a first mortgage on the \$15,000,000 capital stock of the Postal Telegraph-Cable Company and of its subsidiary companies, which stock will be deposited with the Farmers' Loan & Trust Co., the mortgage trustee, and cannot be withdrawn. The bonds are to be dated Jan. 1, 1897, and will mature 500 years hence, or Jan. 1, 2397. The coupon bonds will be \$1,000 each and the registered bonds \$100, \$500, \$1,000, \$5,000 and \$10,000. Their interest will be payable quarterly from Jan. 1, when the virtual consolidation takes effect.—V. 63, p. 1158.

**Indianapolis Decatur & Western Ry.—Decision Sustaining Validity of Reorganization.**—Judge Vail, of the United States Circuit Court, in the quo warranto proceedings of the People vs. the organization of the present Indiana Decatur & Western Ry. Co., handed down this week a decision overruling all the points of the plaintiffs and sustaining the pleas of the reorganized company that the consolidation of the two corporations in Indiana and Illinois made in 1895 was legal.

**Validity of Consolidations Under the Illinois Law.**—The above-mentioned decision is of much interest as touching the validity of railroad consolidations in Illinois. We therefore give the following statement regarding it, furnished us by the company's counsel:

The quo warranto suit brought by the State of Illinois against the Decatur & Eastern Railway Company was decided on Tuesday of this week in favor of the defendant and against the State. The Decatur & Eastern was one of the constituent companies out of which was formed in 1895 the Indiana Decatur & Western Railway Company, which is now a part of the Cincinnati Hamilton & Dayton system. This quo warranto suit was brought upon several grounds, but the principal was that the consolidation was void, and the Court was asked to revoke the charter of the Illinois constituent company, the Decatur & Eastern, for having, among other things, entered into an illegal and unauthorized consolidation.

A recent decision of the Supreme Court of Illinois in the American Loan & Trust case, in the 157th Illinois reports, decided that for a number of years prior to 1883 there was no provision of Illinois law authorizing inter-State railway consolidation; and that an attempted consolidation had in that period was void; and that the mortgage bonds issued by the company so formed were void. Our consolidation was had under an act passed in 1883, which is an act of very limited scope. This act authorizes inter-State railway properties previously consolidated to become again consolidated after foreclosure on certain terms. The State's attorney attempted to have this act so construed as to make it practically impossible for any railroad property to fulfill the conditions precedent to a consolidation thereunder; but after five days' trial and an exhaustive argument, the Court decided that our consolidation of 1895 was valid. As regards the consolidation of the I. D. & E. Ry. Co. had in 1875—the Court holds that its validity or invalidity is immaterial to the validity of the consolidation of 1895.

It is probable that nearly all consolidations that have been had since 1883, involving Illinois railroad properties, have been had under this act (of 1883), and consequently this decision of some general importance. I may remark that this act of limited scope is substantially the only authority now in Illinois for the consolidation of inter-State railways, and that there exists no provision of law for the consolidation of railways built since 1883.—V. 62, p. 502.

**Iron Steamboat Co.—Reduction of Capital Stock.**—At the annual meeting President A. C. Washington explained that the proposed reduction in the capital stock from \$2,000,000 to \$500,000 (the par value of the shares to be \$25 instead of \$100) had been rendered necessary by competition, which has so reduced profits that on the present capitalization only very small dividends are possible. The project was fully discussed. A majority of the stockholders, it is said, favor the plan.—V. 63, p. 1115.

**Lehigh Coal & Navigation.—Extension at 4 Per Cent of \$2,000,000 Bonds Due Feb. 1, 1897.**—The company gives notice that it has arranged for the extension till April 1, 1914, at 4 per cent interest, of the \$2,000,000 six per cent bonds due Feb. 1, 1897, known as the railroad loan. Both principal and interest of the extended bonds will be payable in gold coin of the United States of the present standard of weight and fineness, free from all taxes imposed by the United States or the State of Pennsylvania under present or future laws.

Referring to this notice, Brown Bros. & Co., of Philadelphia, announce that they will be prepared on Feb. 1, 1897, to purchase at par, on presentation, the aforesaid bonds, and that each holder as may desire to do so will have the privilege of obtaining an extension of their bonds at 4 per cent, upon their payment of a premium of 4 1/2 per cent, provided application is made and the bonds deposited with them not later than January 11th, 1897. The trustee under the mortgage securing the bonds to be extended is the Fidelity Insurance Trust & Safe Deposit Co. of Philadelphia.—V. 63, p. 1039.

**Long Island RR.—Stock Securing Mr. Corbin's Loans Protected.**—Mr. Corbin has turned over to Edward King, President of the Union Trust Co., real estate said to be worth nearly \$500,000 which will be held to protect the banking institutions to whom Mr. Corbin was owing when he died between \$1,000,000 and \$1,500,000 largely secured by pledge of stock in the Long Island RR. This act was rendered necessary by the heavy fall in the price of the stock and removes any danger that may have existed of the stock being thrown on the market. Mr. Austin Corbin, Jr., denies that there has been impairment in the stock holdings of the Corbin estate.

The "Evening Post" says:

Mr. Corbin held \$3,000,000 of the stock of the Long Island RR. Co., which is now held in bonds which Charles Pratt holds \$1,500,000, none of which is likely to come on the market. The two holdings comprise a majority of the total of \$10,000,000 stock of the company. Mr. Pratt bought his stock at par from the Messrs. Maxwell when they left the Long Island Company to go into the Jersey Central.

There have been rumors that the February dividend would be passed, but at the company's office this week it was stated that action on the dividend was not usually taken until the second week of January.—V. 63, p. 1116.

**Louisville Evansville & St. Louis Consolidated RR.—Coupon Payment.**—Evansville Rockport & Eastern first mortgage interest due July 1, 1896, was paid at the New York Security & Trust Co., N. Y. City, on and after Dec. 31, 1896.

**Branch of 22 Miles to be Abandoned.**—The receiver has applied for permission to turn over to the bondholders the branch, 22 miles in length, which extends from Lincoln City to Cannellton, Ind., and on which are outstanding \$300,000 first mortgage bonds of the old Huntingburg Tell City & Cannellton RR. Co.—V. 62, p. 1177.

**Louisville New Albany & Chicago Ry.—Coupon Payment.**—Coupons due Jan. 1, 1897, on the first mortgage bonds are being paid at the Chase National Bank, 83 Cedar Street, New York.—V. 63, p. 1115.

**Manhattan RR.—Dividend Injunction Denied.**—The injunction sought to be obtained by Mortimer Hendricks restraining the company from paying the quarterly dividend due Jan. 2 was denied by Judge Truax on Thursday. Mr. Hendricks's application to the Attorney-General will come up on Saturday.—V. 63, p. 1152.

**Memphis & Charleston RR.—Coupon Payment.**—The receiver gives notice that the coupons due July 1, 1894, from the following-named bonds will be paid on and after Jan. 2, 1897, at the Chase National Bank, New York, with interest thereon at 6 per cent per annum from date of maturity:

First and second extension 7 per cents, dated 1884, extended 1890.  
Second mortgage 7 per cent bonds, due Jan. 1, 1895, renewed.  
First mortgage Tennessee Division 10-year 7 per cent bonds.  
Consolidated mortgage 40 year 7 per cent bonds.

**Payment of Interest on 7 Per Cent Bonds Deposited.**—The Loan Committee out of the moneys to be received by it from the aforementioned payment on account of the 7 per cent bonds deposited under its agreement will, on and after Jan. 2, 1897, at the Guaranty Trust Company, 65 Cedar Street, New York, make payment to the depositors as follows, the sums indicated being the amounts to which said depositors would be entitled for six months' interest due Jan. 1, 1897, on bonds to be delivered to them respectively under the plan:

To the Depositors of—  
Tennessee lien bonds .....  
Second mortgage extended bonds ..... \$14  
First and second mortgage extended bonds .....  
Consolidated mortgage 7 per cent bonds ..... 16  
—V. 63, p. 554.

**Mobile & Ohio RR.—Bonds for Extension.**—The stockholders on Dec. 30, authorized the \$4,000,000 bonds for the construction of the proposed extension from Columbus, Miss., to Montgomery, Ala. The bondholders took similar action last week. Details regarding the project were given in our last issue. The new line, it is believed, will give the Mobile & Ohio a largely increased tonnage and place the company in a much more favorable position with its competitors.—V. 63, p. 1159.

**Ohio Southern RR.—Foreclosure Sale Indefinitely Postponed.**—The foreclosure sale set for Dec. 31 has been postponed indefinitely.—V. 63, p. 1040.

**Ohio Valley RR.—Illinois Central RR.—Sale Ordered.**—Judge Barr, at Louisville, has ordered the sale of the Ohio Valley RR. under foreclosure of the first mortgage. The upset price is \$1,050,000.

**Action of Bondholders.**—A meeting of the bondholders of the Ohio Valley RR. was held on Dec. 21 at the office of Russak Bros., 46 Exchange Place, to take action regarding the reported sale by S. S. Brown of Pittsburgh of his holdings of Ohio Valley bonds, constituting a majority of the issue, to parties in the interest of the Illinois Central Ry. The following committee was appointed to protect the minority interest: Messrs. Frank Russak, R. L. Edwards and Marcus Mayer. The committee were empowered to add two to their number; also to delay the foreclosure proceedings, and if an uppe-

price was fixed to see that it was a proper one. Mr. Frank Russak, representing the estate of Benj. Russak and as chairman of the committee, appeared at the hearing this week at Louisville. The Court granted a delay in this sale so that it shall not occur until after June 1, and the upset price was fixed, as above stated, at \$1,050,000. The decree further provides that the purchaser shall assume any possible prior lien. This provision has reference to pending litigation with Chesapeake Ohio & Southwestern regarding a claim of \$160,000.—Vol. 60, p. 431; V. 63, p. 1061.

**Old Colony RR.—\$200,000 Stock Sold.**—This new stock was sold at auction on Wednesday at prices ranging from 175 to 177.—V. 63, p. 1159.

**Omaha & St. Louis Ry.—Interest on Bond Certificates.**—On and after Jan. 21, 1897, the Guaranty Trust Co. of New York will pay \$15 on each certificate issued by it for the first mortgage bonds deposited under the bondholders' agreement (see V. 62, p. 41) with W. Emlen Roosevelt, Cornelius B. Gold and Francis Smith, committee. The payment represents the interest on the 75 per cent in the new bonds to which each certificate is entitled. Before the next coupon comes due, in July, 1897, it is expected the new securities will be distributed.—V. 63, p. 190.

**Oregon Short Line & Utah Northern Ry.—Reorganization Notice.**—The foreclosure sale having been fixed for Jan. 9, 1895, the reorganization committee offers until that date to receive additional deposits under the plan of reorganization on payment of a penalty of \$100 per bond and \$1 per share of stock in addition to the regular assessment. This offer applies to the following:

Oregon Short Line & Utah Northern Ry. stock, consol. 5s and collateral trust 3s; Utah Southern general mort. 7s and extension 7s.—V. 63, p. 1010.

**Application to Pay Interest.**—The trustees of the Utah Northern sevens have asked the Court to direct the payment of coupon due Jan. 1, 1897. It is thought the order for the payment will be given without delay and that it will also direct the payment of the January coupon on the consol fives.—V. 63, p. 1010.

**Peoria Decatur & Evansville RR.—Coupon Payment.**—The coupons due July 1, 1893, from Peoria Division first mortgage bonds were paid at the Central Trust Co. on and after Dec. 24.—V. 63, p. 358.

**Philadelphia & Reading RR.—Payment of Interest on New Bonds Jan. 2, 1897.**—Holders of receipts for general mortgage bonds who have assented to the agreement of reorganization dated Dec. 14, 1891, will receive Jan. 2, 1897, pending delivery of the new securities, 2 per cent in cash on the amount of bonds specified in such receipts. This payment represents the interest due Jan. 1, 1897, on the new bonds, and is made with funds advanced by the reorganization managers. See official notice in our advertising columns.

**Payment of Coal and Iron Company's bonds.**—The following bonds maturing Jan. 1, 1897, secured upon coal lands, will be paid at maturity at the office of J. P. Morgan & Co., 23 Wall Street, New York; Catharine Groh, \$55,000; St. Clair, \$273,000; Lee Lands, \$343,000; Eagle Hill, \$40,000; Eagle Hill, etc., \$136,000; Grady and Wetherill, \$187,000; Locust Mountain Summit Improvement Co., \$232,000; and Tamaqua Lands, \$1,431,000; total, \$2,687,000.—V. 63, p. 1159.

**San Diego Electric Ry.—Mortgage for \$400,000 Proposed.**—A meeting will be held Jan. 15 to authorize the making of a mortgage for \$400,000.

**Terre Haute & Logansport RR.—Foreclosure Suit Filed.**—At Indianapolis, Ind., Dec. 30, ex President Harrison, as trustee under both mortgages, brought suit in the Federal Court to foreclose the mortgages and collect \$1,500,000 due thereon.—V. 63, p. 1065.

**Toledo St. Louis & Kansas City RR.—Dispute with Joint Traffic Association Settled out of Court.**—The suit of this company against its connections for refusing to interchange traffic with it has been settled outside of the United States Circuit Court of Illinois, the boycott being removed on Monday. All lines are therefore as free to exchange business with the company as before the order interdicting the same was published by the Joint Traffic Association in October last. (See V. 63, p. 756)—V. 63, p. 970.

**Union Pacific Ry.—Coupon Payment.**—Coupons due Jan. 1, 1897, on the Union Pacific RR. Co.'s collateral trust 6 per cent bonds of 1879 are being paid at the office of the Union Trust Co. of New York, No. 80 Broadway.—V. 63, p. 1168.

**United States Express—Adams Express.—Transfer of Business over New England RR.**—When the New York & New England RR. was foreclosed in 1895, the contract with the United States Express Co. was canceled, but under a temporary arrangement the Express Company continued doing business over the road on substantially the same terms as before. It is now announced that from Jan. 1, 1897, all the officers of the Express Company on the line of the New England Company will be closed, and that the Adams Express Company, which does the Boston express business over the rest of the New York New Haven & Hartford system, will handle all matter destined for points on the New England RR.—V. 61, p. 710.

**United States Leather.—Death of President.**—President Mark H. Stetson died on Wednesday.—V. 63, p. 970.

# The Commercial Times.

## COMMERCIAL EPITOME.

THURSDAY NIGHT, Dec. 31, 1896.

It has been a quiet week in mercantile circles, as merchants generally have given their attention to liquidating their accounts for the past year. The prospects for trade, however, with the beginning of the new year are considered, as a rule, favorable. Large buyers in a number of lines of merchandise have latterly been showing increased interest, and it is thought that they will open negotiations for supplies following the turn of the year. There have been further reports of troubles in banking circles at the West and also at the South, and while they have been the cause of much unfavorable comment they have not been an especially disturbing feature. More amicable relations have been reported between the United States and Spain, and the nature of the advices received from Washington foreshadow an agreement between these countries regarding the condition of affairs in Cuba. The tariff question has become a topic of much interest, and a hearing by the Ways and Means Committee has been given to several trades during the past week.

Only a very limited amount of business has been transacted in the market for lard on the spot, but there has been no pressure to sell and values have held steady, closing at 4'07½¢. for prime Western, 3'62½¢. for prime City and 4'30¢. for refined for the Continent. No business has been transacted in the local market for lard futures, and trading at the West has been quiet with the changes in prices unimportant. The close was steady.

### DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
December .....	4'10	4'05	4'05	4'05	4'10	4'10
January .....	4'10	4'05	4'05	4'05	4'10	4'10

The demand for pork has been quiet, but prices have been unchanged and steady, closing at \$5 25@\$8 75 for mess, \$10@ \$10 75 for family and \$9 25@\$10 25 for short clear. Cut meats have sold slowly and values have weakened slightly, closing at 4½¢@4½¢. for pickled bellies, 12@10 lbs. average, 4@1½¢. for pickled shoulders and 8½¢@9¢. for pickled hams. Beef has been wanted by shippers at full values, closing at \$7@8 for mess, \$8@9 50 for packet, \$9@10 50 for family and \$13 50@\$14 50 for extra India mess. Beef hams have been steady, closing at \$18@18 50. Tallow has been in better demand for export and prices have advanced, closing with sales at 3½¢. Oleo stearine has had a moderate sale at steady prices, closing at 4½¢. Lard stearine has been quiet and unchanged at 4½¢@4½¢. Cotton seed oil has been quiet and without change, closing at 20¢. for prime crude and 23¢. for prime yellow. Butter has been quiet but steady at 14@21¢. for creamery. Cheese has been firm but quiet at 7½¢@10½¢. for State factory, full cream. Fresh eggs have declined, closing at 20¢. for choice Western.

The Brazil growths of coffee have had only a limited call, but on advices from primal markets prices have advanced, closing steady at 10½¢@10½¢. for Rio No. 7. The mild grades have been in demand and have sold at steady prices, closing at 15½¢@15½¢. for good Cucuta and 22½¢@23½¢. for standard Java. The trading in the market for contracts has been quiet, but prices have advanced slightly on a demand from shorts to cover contracts, stimulated by unfavorable crop accounts. The close was steady.

The following were the closing prices:

Jan. ....	9'70c.	April .....	9'80c.	July .....	9'90
Feb. ....	9'75c.	May .....	9'80c.	Aug .....	9'80c.
March .....	9'80c.	June .....	9'85c.		

Raw sugars have been quiet, as refiners have been slow buyers, but values have held steady at 3 13-16c. for centrifugals, 96-deg. test, and 2 13-16c. for muscovado, 89 deg. test. Refined sugars have had a limited sale at steady prices, closing at 4½¢. for granulated. Teas and other staple groceries have been steady.

The market for Kentucky tobacco has been quiet, but values have been unchanged and firm. Seed leaf tobacco has had a moderate sale at unchanged prices. Sales for the week were 2,720 cases, including 200 cases 1895 crop, New England Havana, 16@30c.; 300 cases 1895 crop, State Havana, 10½¢@15c.; 300 cases 1894 crop, Pennsylvania Havana, 9½¢@10½¢.; 120 cases 1893 crop, Pennsylvania Havana, 12½¢.; 100 cases 1893 crop, Pennsylvania seed leaf, 9½¢@10c.; 800 1,000 bales Havana at 55c. to \$1 15 in bond and 200 bales Sumatra at 60c. to \$1 75 in bond.

There has continued a quiet market for Straits tin, but there has been no pressure to sell, and values have held about steady, closing at 13c. Ingot copper has had a limited sale at full prices, and the close was firm at 11'50c. for lake. Lead has been quiet but firmly held, closing at 3@3'05c. for domestic. Spelter has been dull and weaker, closing at 4@4'10c. for domestic. Pig iron has been quiet and easy, although there have been a few contracts placed for next year's delivery, closing at \$11@13 for domestic.

Refined petroleum has been easier, closing at 6'20c. in bbls., 3'70c. in bulk and 6'90c. in cases; naphtha dull at 6½¢. Crude certificates have been neglected. Credit balances have declined to 90c. Spirits turpentine has been quiet and unchanged, closing steady at 26½¢@27½¢. Rums have been dull and easy at \$1 75 for common and good strained. Wool has sold slowly but values have held steady. Hops have been steady and shippers have been buyers.

## COTTON.

THURSDAY NIGHT, December 31, 1896.

THE MOVEMENT OF THE CROP, as indicated by our telegram, from the South to-night, is given below. For the week ending this evening the total receipts have reached 219,122 bales, against 277,615 bales the previous six days and 327,175 bales two weeks ago, making the total receipts since the 1st of Sept., 1896, 4,923,253 bales, against 3,544,666 bales for the same period of 1895, showing an increase since Sept. 1, 1896, of 1,378,587 bales.

Speculation in cotton for future delivery has been slightly more active. The course of prices has been somewhat irregular, but at the close the net changes for this week were unimportant. Monday the market was lower. Selling was general, prompted by heavy receipts at the ports and a fairly large crop movement reported from interior towns. The close was at a decline of 14 to 15 points for the day. Tuesday there was a stronger turn to the market. Foreign advices were decidedly more favorable than expected, and this, together with decreased port receipts, stimulated a demand from shorts to cover contracts on which prices advanced 11 to 17 points. On Wednesday, however, the market again turned easier. Late foreign advices were disappointing and longs sold to realize profits resulting in a decline in prices for the day of 2 to 7 points. To-day the market opened without important changes from Wednesday's closing prices. During the day, however, prices steadily advanced. The South was buying and there was a demand from local shorts to cover contracts, stimulated by a smaller movement of the crop for the week than expected and advices from the South stating that exporters were more active buyers of cotton. The close was firm at an advance of 13 to 15 points for the day. Cotton on the spot has been in slightly better request, but on Monday prices were lowered 1-16c. To-day the market was 1/8c. higher, middling uplands closing at 7 3-16c.

The total sales for forward delivery for the week are 523,101 bales. For immediate delivery the total sales foot up this week 3,234 bales, including 853 for export, 1,531 for consumption, — for speculation and 900 on contract. The following are the official quotations for each day of the past week—December 23 to January 1.

Rates on and off middling, as established Nov. 22, 1893, and revised Dec. 11, 1895, by the Revision Committee at which grades other than middling may be delivered on contract:

Fair.....	6 1/4	on.	Good Ordinary.....	6 1/4	off.
Middling Fair.....	7 1/4	on.	Good Middling Tinged.....	Even.	
Strict Good Middling.....	7 1/2	on.	Strict Middling Stained.....	7 3/4	off.
Good Middling.....	7 1/2	on.	Middling Stained.....	7 1/2	off.
Strict Low Middling.....	7 1/4	off.	Strict Low Mid. Stained.....	26 3/4	off.
Low Middling.....	7 1/4	off.	Low Middling Stained.....	1 1/4	off.
Strict Good Ordinary.....	11 1/2	off.			

On this basis the prices for a few of the grades would be as follows.

UPLANDS.	Sat.	Mon	Tues	Wed	Th.	Fri.
Good Ordinary.....	Holiday	6 1/4	6 1/4	6 1/4	6 1/4	Holiday

Friday, Jan. 1— Sales, total..... Prices paid (range)..... Closing.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....
Total sales this week Average price, week Closing.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....
Sales since Dec. 1, '96	17,139,600	2,290,000	7,093,600	373,300	4,631,200	161,000	1,363,300	260,900	113,700	73,000	500	2,300

\* Includes sales in September, for September, 15,100; September-October, for October, 334,800; September-November, for November, 372,000.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "A.V.G." The average for each month of the week is also given at bottom of table.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the float are this week's returns, and consequently all the European figures are brought down to Wednesday evening. But to make the totals the complete figures for to-night (Dec. 31), we add the item of exports more the United States, including in it the exports of Thursday only.

The imports into Continental ports the past week have been 125,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 150,813 bales as compared with the same date of 1895, a falling off of 686,939 bales from the corresponding date of 1894 and a decrease of 571,009 bales from 1893.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895—is set out in detail below.

\* This year's figures estimated.

\* Last year's figures are for Newberry, S. C.

The above totals show that the interior stocks have decreased during the week 2,273 bales and are now 5,183 bales less than at same period last year. The receipts at all the towns have been 41,935 bales more than same week last year and since Sept. 1 they are 733,100 bales more than for same time in 1895.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below are closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week.

Week ending Dec. 31.	CLOSING QUOTATIONS FOR MIDDLING COTTON ON—

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
	1896.	1895.	1894.	1896.	1895.	1894.	1896.	1895.	1894.
Nov. 27.....	313,536	109,538	365,220	530,031	491,115	413,014	341,073	221,737	309,706
Dec. 4.....	265,902	227,001	351,451	568,918	532,688	484,024	291,789	285,571	392,460
" 11.....	278,468	234,050	349,136	509,782	550,372	501,609	288,332	257,743	380,719
" 18.....	327,175	222,783	350,098	575,781	585,332	568,829	334,174	251,743	426,921
" 24.....	277,615	223,919	312,797	580,718	596,822	609,004	292,582	235,459	352,972
" 31.....	319,122	176,824	251,851	578,475	583,648	600,956	216,849	163,165	243,806

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1893, are 5,341,131 bales; in 1895 were 4,095,620 bales; in 1894 were 5,931,573 bales.

2.—That although the receipts at the outports the past week were 219,123 bales, the actual movement from plantations was 216,849 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the week were 163,165 bales and for 1894 they were 243,806 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Dec. 31 and since Sept. 1 in the last two years are as follows.

December 31	1896.		1895.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<b>Shipped—</b>				
Via St. Louis.....	18,799	332,503	16,604	344,055

\* Decrease during week.

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph from the South to-night indicate that in the Southwest rain has been quite general during the week, but elsewhere the weather has been dry as a rule. The movement of the crop, however, has been quite free.

Galveston, Texas.—The weather has as a rule been very favorable for farming operations; late rains have retarded work slightly, but otherwise have been beneficial. The week's rainfall has been one inch and twenty hundredths, or

three days. The thermometer has averaged 51, ranging from 41 to 61.

**Palestine, Texas.**—We have had rain on three days during the week, the precipitation reaching one inch and twenty-four hundredths. The thermometer has ranged from 34 to 68, averaging 51.

**Huntsville, Texas.**—Rain has fallen heavily on two days of the week, to the extent of one inch and thirty hundredths. Average thermometer 52, highest 68, lowest 35.

**Dallas, Texas.**—It official rain has fallen, but more is needed. There has been rain on three days during the week, the precipitation reaching two inches. The thermometer has averaged 45, the highest being 68 and the lowest 22.

**San Antonio, Texas.**—There has been rain on two days of the week to the extent of sixty-six hundredths of an inch. The thermometer has averaged 51, ranging from 34 to 68.

**Luling, Texas.**—We have had rain on two days during the week, the rainfall being seventy-five hundredths of an inch. The thermometer has ranged from 32 to 68, averaging 50.

**Columbia, Texas.**—Rain has fallen on two days of the week, to the extent of one inch. Average thermometer 51, highest 69 and lowest 40.

**Cuero, Texas.**—There has been light rain on three days during the week, the rainfall being eighty-five hundredths of an inch. The thermometer has averaged 53, the highest being 74 and the lowest 32.

**Fort Worth, Texas.**—Rain has fallen on three days of the week, to the extent of two inches. Average thermometer 43, highest 68 and lowest 28.

**Weatherford, Texas.**—We have had heavy rain on three days during the week, the precipitation reaching two inches. The thermometer has averaged 48, the highest being 66 and the lowest 30.

**New Orleans, Louisiana.**—It has rained on one day of the week, to the extent of one inch and one hundredth. The thermometer has averaged 50.

**Shreveport, Louisiana.**—Rain has fallen on three days of the week to the extent of fifty-five hundredths of an inch. Average thermometer 51, highest 73, lowest 27.

**Leland, Mississippi.**—We have had no rain during the week. The thermometer has averaged 46.3, the highest being 63 and the lowest 22.

**Little Rock, Arkansas.**—There has been no rain during the week. The thermometer has ranged from 23 to 64, averaging 44.

**Helena, Arkansas.**—We have had no rain during the week. Average thermometer 40.5, highest 55 and lowest 22. December rainfall, twenty-eight hundredths of an inch.

**Memphis, Tennessee.**—Dry weather has prevailed all the week. The thermometer has averaged 40.9, the highest being 56.6 and the lowest 21.5.

**Nashville, Tennessee.**—There has been no rain the past week. The thermometer has averaged 40, ranging from 19 to 60.

**Mobile, Alabama.**—We have had no rain during the week. The thermometer has ranged from 31 to 69, averaging 48. Rainfall for December three inches and thirty-two hundredths.

**Montgomery, Alabama.**—We have had no rain the past week. Average thermometer 44, highest 54 and lowest 35. Rainfall for month of December, two inches and twenty hundredths.

**Savannah, Georgia.**—Rain has fallen on two days of the week, to the extent of forty-three hundredths of an inch. Average thermometer 49, highest 63 and lowest 28.

**Augusta, Georgia.**—We have had only a trace of rain the past week. The thermometer has averaged 43, the highest being 63 and the lowest 21.

**Charleston, South Carolina.**—Rain has fallen on two days of the week, the rainfall reaching twenty-one hundredths of an inch. The thermometer has ranged from 29 to 59, averaging 46.

**Staufburg, South Carolina.**—We have had rain on two days of the week, to the extent of forty-five hundredths of an inch. Average thermometer 41.8, highest 62 and low at 22. December rainfall three inches and nineteen hundredths.

**Wilson, North Carolina.**—Rain has fallen on one day of the week, the rainfall reaching ten hundredths of an inch. The thermometer has ranged from 20 to 56, averaging 37.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Dec. 31.

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.

Quotations Dec. 31 at Savannah, for Floridas, common, 10c.; medium fine, 12 1/2c.; choice, 16c.

Charleston, Carolinas, medium fine, 18c.; fine, 21c.; fully fine, 23@24c.

**JUTE BUTTS, BAGGING, &C.**—The market for jute bagging has been featureless during the week under review, but prices are as last quoted, viz.: 45c. for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c. for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4 1/2c. for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c. for 2 1/2 lbs. f. o. b. at New York. Jute butts continue dull at 13 1/2c. for paper quality, 13 1/2c. for mixing and 2c. nominal for spinning butts, all to arrive.

**SHIPPING NEWS.**—The exports of cotton from the United States the past week, as per latest mail returns, have reached 232,477 bales. So far as the Southern ports are concerned these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

## BREADSTUFFS.

THURSDAY, December 31, 1896.

Only a very moderate volume of business has been transacted in the market for wheat flour during the past week. The home trade has limited its purchases to immediate wants and the export business has also been quiet. Values, however, have ruled firm and for trade brands they have been advanced 5 to 10c. per bbl. in sympathy with a stronger market for the grain. At the close the market was firm but quiet. Rye flour has been freely offered and prices have weakened slightly. Buckwheat flour has received slightly increased attention at about steady values. Corn meal has had a limited sale at unchanged prices.

There has been a moderate amount of activity to the speculative dealings in the market for wheat futures and prices advanced early in the week. There was fairly free buying for investment account. Foreign advices reported advancing markets and also brought buying orders. There was also a fairly large decrease in the supply of wheat on passage to Europe and the American visible supply showed a decrease. Crop accounts, both from Russia and Argentine, were also of a nature to stimulate buying. Later in the week, however, there was selling by longs to realize profits and part of the improvement was lost. In the spot market business has been quiet. To-day the market was dull and without changes of importance. The spot market was quiet but steady. The sales were limited to 8,000 bushels spring wheat on private terms. No. 2 red winter was quoted at \$1 00 3/4 f. o. b. afloat, No. 1 hard Duluth at 93 3/4 c. f. o. b. afloat and No. 1 Northern Duluth at 93 3/4 c. f. o. b. afloat.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
December delivery.....	.....	90 1/2	92 1/2	91 3/4	.....	.....
January delivery.....	.....	90 1/2	91 3/4	90 3/4	.....	.....

May delivery.....	.....	89 1/4	89 3/4	88 3/4	.....	.....
July delivery.....	.....	87 3/4	88 1/4	85 3/4	.....	.....

There has continued a very quiet market for Indian corn futures, and in the absence of new features changes in prices have been unimportant. Early in the week there was a fractional advance, in sympathy with the improvement in

wheat and on an active export trade. Subsequently, however, the market turned easier and most of the improvement was lost. In the spot market shippers have been buyers and large sales have been made here and at outports. The sales yesterday included No. 2 mixed at 30½c. delivered. To day the market was dull and unchanged. The spot market was steady. The sales included No. 2 mixed at 30½c. delivered and No. 2 yellow at about 31½c. delivered.

#### DAILY CLOSING PRICES OF NO. 2 MIXED CORN

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
December delivery.....	29½	29½	29½	29½	29½	29½
January delivery.....	29½	29½	29½	29½	29½	29½
February delivery.....	31½	31½	31½	31½	31½	31½
May delivery.....	32½	32½	32½	32½	32½	32½

Data for future delivery have been quiet. During the first half of the week prices held steady with wheat and corn. Subsequently, however, there was a weaker drift to values under free offerings by tired holders. In the spot market a moderate business has been transacted, as both shippers and the home trade have been buyers. The business transacted yesterday included mixed clipped at 2½c. f.o.b. all sat; No. 2 mixed at 22½c. in elevator and No. 2 white at 21½c. in elevator. To-day the market was dull and unchanged. The spot market was moderately active and steady. The sales included mixed clipped to exporters at about 2½c. f.o.b. all sat. No. 2 mixed was at 22½c. in elevator and No. 2 white at 21½c. in elevator.

## THE DRY GOODS TRADE.

NEW YORK, THURSDAY, P. M., Dec. 31, 1896.

The primary market during the past week has presented an unbroken aspect of extreme dullness in all departments. There has been a poor attendance of buyers and but a very moderate amount of business coming to hand through the mails. With the jobbing trade there has been more business doing, the leading general jobbers making special prices to clean up their stocks before the end of the year. The condition of the market at first hands is not encouraging at the close of the year. Buyers have shown no disposition to depart from their policy of extreme reserve in either cotton or woolen goods. In the former stocks of staples are undoubtedly accumulating and in the latter the display of new heavy-weights for next fall is abnormally backward. There is no temptation to sellers to endeavor to force business either by making lower prices in the one nor by a fuller display of samples in the other. The tendency of the market is to favor buyers in cotton goods, whilst there seems to be a relinquishing of hopes of an advance in woollens. The continued financial troubles in the West are a source of disquietude, and so far as collections are concerned they have had little or no effect.

**DOMESTIC COTTON GOODS.**—The exports of cotton goods from this port for the week ending Dec. 28 were 896 packages, valued at \$42,608, their destination being to the points specified in the tables below:

NEW YORK TO DECEMBER 28	1896.		1895.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	10	3,516	141	4,831

China, via Vancouver.....	.....	35,505	.....	22,870
Total.....	899	281,662	2,583	226,399

From New England mill points direct.

The value of the New York exports for the year to date has been \$10,748,188 in 1896 against \$9,280,019 in 1895.

The export demand for brown sheetings and drills has fallen to limited dimensions this week, whilst sales to home buyers have again been on a small scale. Export grades are firm in price, but outside of these the tendency is still in favor of buyers, although the market is not quotably lower. Bleached cottons have sold slowly and in limited quantities only, nor is the movement likely to be a free one until leading agents make some definite announcement on prices. Low-grade bleached are weak under print cloth influences. Denims continue inactive and irregular. Ticks, plaids and other coarse-colored cottons slow and featureless. Kid-finished cambrics in light demand and easy to buy. Wide sheetings, cotton flannels and blankets, quilts and white goods, inactive and featureless. Business in fancy calicoes and finer specialties has been quiet and there has been but an indifferent demand for such regular calicoes as indigo blues, shirtings, Turkey reds, staples, etc. Gloghams, inactive throughout. There has been no business in regular print cloths, which are nominally 2½c. per yard, and odds have been in light demand only at easy prices.

**WOOLEN GOODS.**—There has been no general disposition on the part of agents to show further new lines of heavy-weight woollens and worsteds for men's wear during the week. An occasional impatient seller has made efforts to interest buyers but has met with poor success, even though some prices named have been lower than expected. This indication of lack of strength is not calculated to encourage buyers to action until they see what other agents who have not yet shown their hands are likely to do. For light-weights for quick delivery there has been a limited reorder demand, without special feature. The demand for overcoatings has been moderate and as before mostly for \$1 to \$1 25 kerseys. Cloakings are slow of sale throughout and featureless. Satinets, doeskin jeans, etc., are inactive. Flannels dull and blankets quiet at previous prices. Carpets in moderate request. Business in dress goods has been quiet throughout for both plain and fancy lines, without material change in prices.

**FOREIGN DRY GOODS.**—The market has been very quiet outside of forced cleaning up business at very irregular prices, regular merchandise being in slim request. For spring goods a moderate number of small orders have been recorded without special feature.

#### Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending December 31, 1896, and since January 1, 1896, and for the corresponding periods of last year are as follows:

Imports entered for consumption for the week and since January 1, 1896 and 1895.	Week ending Dec. 31, 1896.		Since Jan. 1, 1896.		Week ending Jan. 2, 1896.		Since Jan. 1, 1895.

## STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the CHRONICLE.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

TERMS for the CHRONICLE with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—Per inch space.)

One time .....	\$3 50	Thr Months (13 times)...	\$25 00
One Month (4 times)...	11 00	Six months (26 times)...	43 00
Two Months (8 times)...	18 00	Twelve Months (52 times)...	58 00

(The above terms for one month and upward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

**Arkansas Non-Holford Bonds.**—*Effort to Obtain an Adjustment.*—Holders of Arkansas Non-Holford bonds who desire to participate in the adjustment of their bonds are invited to communicate with Popper & Stern, 17 New Street, New York.

As these bonds can only be designated by the number on the bond, it will be necessary for holders to have their bonds enumerated in the negotiation; otherwise they will not be represented.

The proposition is for the bondholders to unite in an effort to secure action at the approaching session of the State Legislature looking to an adjustment of the bonds and to effect a settlement with the State. While the bonds are recognized as valid, no interest has been paid since 1873.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Allegheny, Pa.**—*Bond Sale.*—This city has authorized the issuance of a bond for \$5,795 17, and it is the intention of City Comptroller James Brown to place the same in the sinking fund. The loan will bear interest at the rate of 5 per cent and mature in five years from date of issue.

**Allentown, Pa.**—*Bond Sale.*—It is reported that Allentown has sold \$36,500 of 4 per cent 5 to 30 year bonds at 101.50.

**Athens, Ala.**—*Bond Offering.*—Proposals will be received until Feb. 1, 1897, by Thomas C. McClellan, Mayor, for the purchase of water-works bonds to the amount of \$15,000. The securities are to bear interest at a rate not exceeding 6 per cent and are to mature in not less than 10 years nor more than 30 years from date of issue. The denomination of the bonds will be not less than \$100 nor more than \$1,000.

The official advertisement of this sale will be found elsewhere in this Department.

**Bloomington, Ill.**—*Bonds Defeated.*—City Treasurer Mathew C. Smith reports to the CHRONICLE that at the special election on December 21, 1896, the people of Bloomington voted 423 for and 935 against the issuance of \$75,000 of 5 per cent refunding bonds.

**Boston, Mass.**—*Bond Sale.*—On December 28, 1896, the following loans of the city of Boston were awarded to R. L. Day & Co. and Blake Bros. & Co. at 102.8277:

NAME AND PURPOSE.	Interest.		Principal.		Amount.
	P. Cl. Payable.	When Due.			
Construction of highways.	3½ J & J	Jan. 1, 1917			\$500,000
Public parks.	3½ J & J	Jan. 1, 1927			500,000
School improvement.	4 J & J	Jan. 1, 1917			300,000
Various municipal.	4 J & J	Jan. 1, 1907			590,000

Other bids received were: Lee, Higginson & Co. \$200,000 at 108.03.

E. C. Stanwood & Co., all or none at 102.  
Eatabrook & Co., \$500,000 at 100.29; \$500,000 at 100.51; \$300,000 at 107.56, and \$591,000 at 104.26.

Blodgett, Merritt & Co., \$1,000,000 of 3½s at 100.05.  
E. H. Rollins & Sons, \$300,000 at 107.061 and \$390,000 at 103.569.

Leland, Towle & Co., \$300,000 at 108.157.  
The bonds will be issued in registered certificates of \$1,000 or any multiple of this sum, and interest will be payable semi-annually at the office of the City Treasurer. The certificates will be ready for delivery January 1, 1897.

The above loans will be secured by sinking funds providing for the payment of the same at maturity.

**Brockton, Mass.**—*Bond Sale.*—On December 29, 1896, this city sold \$20,000 of street improvement bonds at 101.35 and \$8,000 of school bonds at 101.07. The denomination of the securities will be \$1,000 and they will bear interest at the rate of 4 per cent, payable semi-annually on the first days of January and July. The street improvement bonds will mature in ten years from January 1, 1897, at the rate of \$3,000 annually, and the school bonds in eight years from the same date at the rate of \$1,000 each year.

**Brooklyn, N. Y.**—*Bond Sale.*—Eight bids were received on December 23, 1896, when \$700,000 of 3½ per cent registered gold bonds were offered by the city of Brooklyn. The bids received were as follows: Harvey Fisk & Sons, for the entire issue, 102.47; Title Guarantee & Trust Co., \$100,000 at 103.19, \$100,000 at 102.19 and \$500,000 at par; Vermilye & Co., for the entire issue, 101.12; D. A. Moran & Co., for the entire issue in lots of \$1,000, at prices ranging from 100.19 to 101.27 inclusive; C. H. White & Co., for the entire issue in lots of \$50,000 up to \$500,000 at prices ranging from 100.10 to 101.23 and \$200,000 at par; Hamilton Trust Co., \$100,000 at par; Manufacturers' Trust Co., \$100,000 in lots of \$25,000 at prices ranging from 100.10 to 101 inclusive; Joseph L. Breitenstein, \$350,000 at 100.03 and \$15,000 at 101.01. The loan has been awarded to Harvey Fisk & Sons. The securities will be dated Dec. 30, 1896. Interest will be payable semi-annually on Jan. 1 and July 1, and the principal will mature Jan. 1, 1936. These bonds, except for State purposes, are exempt from taxation.

**Chippewa County, Wis.**—*Bond Sale.*—It is reported that the \$12,500 of 5 per cent bonds which were offered by this county on December 8, 1896, have been sold at 102.10. The securities will be issued in denominations of \$1,000 each, with the exception of one bond for \$700. Interest will be payable semi-annually at the First National Bank of Chippewa Falls and the principal will mature in five years from date of issue.

**Claiborne County, Miss.**—*Bond Sale.*—It is reported that Claiborne County has disposed of \$13,000 of 6 per cent twenty-year bridge bonds.

**Cleveland, Ohio.**—*Bond Sale.*—On Dec. 24, 1896, \$200,000 of 4 per cent city of Cleveland coupon water works bonds were awarded to Dietz, Dennison & Prior for \$210,450. The securities are dated Sept. 1, 1896, and the interest will be payable semi-annually at the American Exchange National Bank, New York City. The principal also will be payable at the above bank and will mature Oct. 1, 1926.

**College Hill, Ohio.**—*Bond Sale.*—The \$3,212 88 of avenue-improvement bonds offered by this village on December 26, 1896, have been sold to S. Kuhn & Sons, of Cincinnati, Ohio, at 4½ per cent premium. The denomination of the securities will be \$320, with the exception of one bond, which will be for the sum of \$332 88. They will be dated December 26, 1896; 8 per cent annual interest will be payable at the Citizens' National Bank, Cincinnati, Ohio, and the principal will mature part yearly from December 26, 1897, to December 26, 1906, inclusive.

**Columbus, Ga.**—*Bond Sale.*—On Dec. 26, 1896, \$60,000 of 4½ per cent redemption bonds of this city were awarded to the Third National Bank of Columbus at par. The securities will be dated Jan. 1, 1897, interest will be payable semi-annually on January 1 and July 1, and the principal will mature Jan. 1, 1927. The coupons will be free from city tax and receivable for all dues to the city.

**Fargo, N. Dak.**—*Bond Sale.*—It is reported that \$40,000 of 6 per cent 29-year bonds have been sold by this city at 101.

**Far Rockaway, N. Y.**—*Bonds Authorized.*—At the election held in the village on December 29, 1896, the \$85,000 of street-improvement bonds and \$35,000 of sewer bonds were voted. The improvement bonds will bear interest at the rate of 5 per cent, payable semi-annually on the first days of January and July, and \$24,000 of the principal will mature from January 1, 1898, to January 1, 1921, inclusive, at the rate of \$1,000 each year. The remaining \$61,000 will mature January 1, 1922.

**Galveston, Tex.**—*Bonds Proposed.*—City Auditor Theo. K. Thompson reports that the city of Galveston may petition the Legislature this month for authority to issue 5 per cent twenty to forty-year bonds. The amount of the loan has not yet been determined.

**Gothenburg, Neb.—Bond Offering.**—It is reported that this town will receive proposals until January 15, 1897, for the purchase of \$300,000 of 6 per cent bonds, to mature in from eleven to twenty years from date of issue.

**Hillsborough Bridge Fire District, N. H.**—On December 25, 1896, the following bids were received by this district for \$45,000 of water bonds:

K. H. Mallins & Sons	100-269
Geo. A. Fernald & Co	99-54
R. C. Stanwood & Co	100-
J. W. Longstreet & Co	100-

The securities are to be coupon bonds of the denomination of \$1,000. They will be dated January 1, 1897, 4 per cent interest will be payable semi-annually on January 1 and July 1 at the First National Bank of Hillsborough Village, N. H., and the principal will mature January 1, 1917.

**Holyoke, Mass.—Note Sale.**—The Boston News Bureau reports that the city of Holyoke, Mass., has awarded a three-months note for \$50,000 to Bond & Goodwin at 3½ per cent discount and \$3 premium. Nine other bids were received for the loan.

**Bond Sale.**—On December 29, 1896, City Treasurer Pierre Honvouloir received the following list of proposals for the \$350,000 of water bonds:

R. C. Stanwood & Co	108-32
Relbrook & Co	108-319
R. L. Day & Co	108-187
Cushman, Fisher & Phelps	107-939
Geo. A. Fernald & Co	107-750
James W. Longstreet & Co	107-477
Tower, Giddings & Co	107-177
Blake Bros. & Co	107-340
Ridgely, Merrill & Co	107-199
C. H. White & Co., N. Y.	107-150
E. H. Rollins & Sons	108-939
R. A. Keen, Chicago	102-50

The securities will be coupon gold bonds of the denomination of \$1,000, dated Jan. 1, 1897, and payable Jan. 1, 1927. Interest at the rate of 4 per cent will be payable semi-annually on January 1 and July 1. Both principal and interest will be payable in gold at the National Trust & Leather Bank of Boston.

**Kingston, N. C.—Bond Sale.**—It is reported that this city has sold electric-light bonds to the amount of \$8,000. The securities will bear 6 per cent interest.

**Laurens, S. C.—Bond Sale.**—It is reported that this city has disposed of electric-light bonds to the amount of \$31,000.

**Los Angeles County, Cal.—Bond Sale.**—It is reported that this county has sold \$7,500 of school bonds. The loan will bear interest at the rate of 7 per cent and mature in from one to ten years from date of issue.

**Lynchburg, Va.—Bond Call.**—Notice is given by N. C. Monson, Jr., Chairman of the Finance Committee, to holders of bonds of this city, that \$14,000 of 5 per cent bonds, issue of May 5, 1892, will be redeemed on January 1, 1897. The numbers of the bonds called run from 108 to 135, omitting numbers 112, 114, 115, 123, 126, and 128 to 131.

**Mount Vernon, N. Y.—Bond Offering.**—Proposals will be received until 8 o'clock P. M. January 11, 1897, by the Board of Education, Ferguson Building, 33 West First Street, Mount Vernon, N. Y., for the purchase of \$65,000 of school loan bonds. The securities will bear interest at a rate not exceeding 6 per cent, payable semi-annually at the office of the City Treasurer. They will be dated July 1, 1896, and the principal will mature from July 1, 1918, to July 1, 1930, inclusive, at the rate of \$5,000 each year. The denomination of the bonds will be \$1,000 and they will be ready for delivery January 21, 1897. A certified check for the sum of \$1,300 must accompany each bid.

Proposals will be received until 8 o'clock P. M., Jan. 5, 1897, by the Common Council of the city for the purchase of \$30,000 of 5 per cent assessment bonds. The securities will be dated Dec. 15, 1896. Interest will be payable semi-annually at the office of the City Treasurer, and the principal will mature Dec. 15, 1902. The denomination of the bonds will be \$1,000, and they will be ready for delivery on or before Jan. 15, 1897. A certified check for the sum of \$500 must accompany each bid.

**Nashua, N. H.—Bond Sale.**—It is reported that this city has sold \$25,000 of school bonds at 106 07. The securities will bear interest at the rate of 4 per cent and the principal will mature in twenty years from date of issue.

## NEW LOANS.

### State of New York.

COMPTROLLER'S OFFICE,  
BUREAU OF CANAL AFFAIRS,  
ALBANY, December 19th, 1896.

Pursuant to the provisions of Chapter 79 of the Laws of 1895, proposals will be received at this office until Tuesday, the 15th day of January, 1897, at 12 o'clock noon of that day for a loan of

### FOUR MILLION DOLLARS

for which transferable certificates of stock, registered or coupon bonds at the option of the proposer.

### Principal and Interest Payable in Gold.

Will be issued in the name of the People of the State of New York, on the credit of the Sinking Fund established by said act, bearing interest at the rate of three per centum per annum, payable semi-annually on the first days of January and July, and the principal repayable on the first day of January, 1912.

Proposals may be for the whole or any part of the loan not less than \$1,000, and should state whether registered or coupon bonds are desired.

Payments for the loan will be required to be made on the acceptance of the proposal by deposit in the bank of the Manhattan Co. in the City of New York on account of "Treasurer of the State of New York on account of Canal Fund" of the amount of the award, together with premium and accrued interest from January 1, 1897.

The Comptroller reserves the right to reject all bids which are not in his option advantageous to the interests of the State.

Interest on the loan will commence on the first day of January next, and will be payable at the Bank of the Manhattan Co. in the City of New York.

All proposals must be sealed and endorsed "Loan for Canal Improvements," and directed to the Comptroller of the State of New York, Albany, N. Y. JAMES A. ROBERTS, Comptroller.

Commissioners of Public Works,  
Newberry, S. C.

### \$15,000

### ATHENS, ALA.,

### Water-Works Bonds.

MAYOR'S OFFICE,  
ATHENS, Ala., Dec. 26th, 1896.

The Legislature recently authorized the Mayor and Council of Athens, Alabama, to issue \$15,000 of commercial bonds, lawful money, for the establishment of water works. The bonds are to be sold at par in denominations of not less than \$100 nor more than \$1,000; are to run not less than ten nor more than thirty years, at the option of the bidder, drawing not over six per cent interest, payable semi-annually at this office.

Sealed bids for these bonds, in whole or in part, in such denominations and running each time, within the limits, as the bidder may prefer, will be received at this office till 1st day of February, 1897, when they will be opened. The right to accept or reject any or all of such propositions is reserved.

THOS. C. MCLELLAN,  
Mayor.

Circular Letter, including list of selected Bonds,  
Mailed Free.

**Natick, Mass.—Bond Sale.**—Sewer bonds of this town to the amount of \$17,000 have been sold at 106½. The securities will bear interest at the rate of 4 per cent, payable semi-annually in January and July in Boston. They are dated July 15, 1896, and the principal will mature July 15, 1926. The denomination of the bonds is \$1,000.

**Newburg, N. Y.—Bond Sale.**—It is reported that this city has sold refunding bonds to the amount of \$147,537 19. The securities will bear interest at the rate of 3½ per cent and mature in 20 years from date of issue.

**New Haven, Conn.—Bond Offering.**—Proposals will be received until 11 A. M. January 5, 1897, by City Auditor Benj. E. Brown for the purchase of \$250,000 of 4 per cent permanent pavement bonds. The securities will be dated October 1, 1896, and the principal will mature in four equal instalments on October 1, 1901, 1906, 1911 and 1916.

Bids will also be received on the same date for \$65,000 of 4 per cent bridge bonds, to be dated October 1, 1896, and mature as follows: \$25,000 on October 1, 1914; \$20,000 on October 1, 1915; \$20,000 on October 1, 1916. Interest on both loans will be payable semi-annually at the office of the City Treasurer. A certified check for 5 per cent of the amount of bonds bid for must accompany each proposal. These bonds will be coupon bonds and registered with the Union Trust Company of New Haven.

**Newtown Union Free School Dist. No. 14 (L. I.), N. Y.—Bond Sale.**—The following bids were received on Dec. 30, 1896, at the First National Bank, Brooklyn, for \$7,000 of school bonds of this district:

George M. Hahn.....	103-297
L. Morrison.....	103-24
I. W. Sherrill.....	103-17
Parson, Leach & Co.....	102-64
Benwell & Everitt.....	112-25
Street, Wykes & Co.....	102-08
Walter Stanton & Co.....	102-07
People's Savings Bank, Yonkers.....	102-04
Bertron & Storrs.....	101-80
Oswego County Savings Bank, Oswego.....	101-36
D. A. Moran & Co.....	103-169

The loan was awarded to Geo. M. Hahn. The bid from D. A. Moran & Co. was rejected as being conditional. The securities will bear interest at the rate of 4½ per cent and mature

from January 1, 1899 to 1912 inclusive, at the rate of \$500 annually.

**New York.—Bond Offering.**—Proposals will be received at the office of Comptroller James A. Roberts, at Albany, N. Y., until January 12th, 1897, at 12 o'clock noon, for the purchase of \$4,000,000 of canal bonds. The securities will be dated Jan. 1, 1897, and the principal will mature Jan. 1, 1912. Interest at the rate of 3 per cent will be payable semi-annually at the Bank of the Manhattan Co. in New York City on Jan. 1 and July 1. Both principal and interest will be payable in gold.

The official advertisement of this bond offering will be found elsewhere in this Department.

**Norwood, Ohio.—Bond Sale.**—The \$2,000 of 5 per cent side-walk bonds offered by this village on December 21, 1896, have been sold to the Western German Bank of Cincinnati, Ohio, at a premium of 3 per cent and accrued interest. Two other bids were received, those of the Centerville National Bank and the Atlas National Bank, which offered 102½ and 100½ respectively. The securities will be dated Sept. 1, 1896; interest will be payable semi-annually and the principal will mature September 1, 1906.

**Omaha, Neb.—Bond Offering.**—Proposals will be received until January 15, 1897, by this city for the purchase of bonds to the amount of \$316,000. The securities will bear interest at the rate of 4½ per cent, and the principal will mature in ten years from date of issue.

**Phelps, N. Y.—Bond Sale.**—Water bonds of this municipality to the amount of \$28,000 have been disposed of at a premium of \$500. The loan will bear interest at the rate of 4 per cent and mature in twenty years from date of issue.

**Pleasant Ridge, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon, January 21, 1897, by J. B. Hayden, Village Clerk, for the purchase of \$193,113 of village bonds, to be dated December 1, 1896. The denomination of the securities will be \$500, with the exception of one bond, which will be for the sum of \$481.13. They will bear interest at the rate of 6 p. c., and the principal will mature Dec. 1, 1906.

**Rome, N. Y.—Bond Sale.**—On December 24, 1896, City Chamberlain H. S. Putnam awarded \$12,600 of city bonds to the Oneida Savings Bank, of Rome, at a premium of \$80. Seven bids in all were received. The securities will be dated January 1, 1897, and will mature as follows: January 1, 1898, \$4,000; on January 1, 1899, \$4,000, and the balance on January 1, 1900. Interest at the rate of 4 per cent will be payable semi-annually on January 1 and July 1 at the Farmers' National Bank of Rome. The bonds will be registered and will be of the denomination of \$500, except one bond, which will be for \$100. This issue is for the purpose of paying off relief bonds which fall due January 1, 1897.

The city's bonded indebtedness, not including this issue, is \$286,655, of which \$165,000 is water debt. The assessed valuation for 1896 was \$5,011,673 and the population in 1890 was 14,991.

**Searsdale, N. Y.—Bond Sale.**—This town has sold \$23,000 of 5 per cent bonds at 110 1-16. The loan will mature part yearly from 1902 to 1923 inclusive.

**Halloran County, Ind.—Bond Offering.**—Proposals will be received by this county until January 4, 1897, for the purchase of \$43,999 of 5 per cent one to ten-year bonds.

**Waco, Tex.—Bond Call.**—Notice is given to holders of street improvement bonds of this city dated Jan. 15, 1887, and subject to call 10 years after date of issue, that bonds numbered 1, 2, 3, 4, 5, 6, 7, 8, 9 and 10 will be redeemed on presentation to the Waco State Bank. Interest on these bonds will cease on Jan. 15, 1897.

The official notification of this call will be found among the advertisements elsewhere in this Department.

**Waterbury, Conn.—Bond Offering.**—Proposals will be received until February 8, 1897, by this city for the purchase of \$25,000 of 4 per cent bonds. The loan will mature in ten years from date of issue.

**Wilkes-Barre, Pa.—Bond Election.**—At the municipal election to be held in February next the electors of this city will decide the question of increasing the city debt by an issue of bonds to the amount of \$100,000. Should the elec-

tion authorize the issue, the money will be used as follows: Seventy thousand dollars for construction of sewers, twenty thousand dollars for street improvements and ten thousand dollars for the fire department.

**Wise County, Va.—Bond Sale.**—It is reported that R. A. Ayers & Co., of Big Stone Gap, have purchased \$30,000 of 6 per cent court house bonds of this county at par and accrued interest.

**Worcester, Mass.—Bond Sale.**—It is reported that this city has disposed of \$100,000 of registered coupon bonds to Blodges, Merritt & Co., of Boston, at 112-177. The securities bear interest at the rate of 4 per cent and mature in 29½ years from date of issue.

**Denison, Tex.—Louis Lebrecht, Mayor.** Below is a statement of the financial condition of this city corrected to Dec. 1, 1896, by means of a special report to the CHRONICLE from Will J. Scott, City Secretary. The city is about to purchase for investment in the sinking fund, \$15,000 of school bonds of the issue of 1888, and at the end of the fiscal year, April 15th, will have retired the floating debt and will have a cash balance in every fund. The corporation owns property valued at \$450,000. Denison has no water debt but pays a hydrant rental of \$2,456-25 per quarter.

This city is in Grayson County:

### The United States Life Insurance Co.

### IN THE CITY OF NEW YORK.

This old and reliable Company now has the experience of forty-six years of practical life insurance, which has taught it that the sure way of success is the adoption of good plans of insurance, and the pursuit of a liberal policy towards both its insured and its Agents. These essentials it possesses in an eminent degree, but judiciously tempered by that conservatism which is the best possible safeguard of the policy-holder. Its contracts are incontestable after two years. The are non-forfeiting, providing generally for either paid-up policy or extended insurance, at the option of the policy-holder. It gives ten days of grace in payment of all premiums. Its course during the past forty-five years abundantly demonstrates its absolute security.

Active and Successful Agents, wishing to represent this Company, may communicate with the President, at the Home Office, 261 Broadway, New York.

### THE FINANCIAL SITUATION.

The public mind has been freed this week in large measure from a source of anxiety which has caused irritation ever since early in December. We refer to the circumstance that the evidence favors the belief that those members of the Senate who have heretofore been instrumental in exciting a fear of war with Spain have lost, in good part, their power for doing harm. It has been stated that the Cameron resolution is not to be pushed further, opinion having so far changed in the Senate that it could not pass that body now even if it was brought to a vote. Yet in face of this belief it appears that more tiresome speeches are in prospect. We notice, too, that the animus of this Cuban agitation has become further evident, another of the silver Senators having on Thursday offered some more resolutions on the subject. This time it was Mr. Mills of Texas, a member of the Committee on Foreign Relations. His resolutions differ materially from Mr. Cameron's, the change probably being made to contravene or get the better of Secretary Olney's position. The second of these resolutions, after stating that the independence of the republic of Cuba ought to be and hereby is recognised, appropriates "the sum of \$10,000 for salary and expenses of a minister to that Government whenever such minister shall be appointed by the President." Mr. Mills's thought probably is that Congress having established an office and provided the money to pay the officer, the President is obliged to fill the office. The Senator in offering his resolutions proposed to speak upon them yesterday. As the Senate subsequently adjourned until Monday the speech had to be deferred. The chief prerogative of Senators is to make addresses with the frequency and length on all subjects that each member may desire and wills to do. So long as that continues to be the rule the public will have to endure the infliction. At the same time it is consoling to know that the Silver Senators have for this session at least worked the Cuban affair until its possible yield is talk, but nothing else.

Prominence has been given this week to the situation of the print cloth manufacturers by the reports published with reference to some action about to be taken for the purpose of relieving the market from the burden of the large stocks of cloths now being carried. We have several times referred to this feature at length. The extent of the accumulation is phenomenal and is a direct result of the silver agitation. What is of more interest perhaps is, that it shows the silver agitation to have been in large measure responsible for the severe decline in raw cotton during the last few months. It will be remembered that we called the attention of the South to this latter feature months ago, warning planters that their course in advocating free silver would depress price and cause that section large losses. Had it not been for the influence the cotton States lent to the proposal it would never have gained any prominence; in that case the consumption of cotton goods would not have been arrested in America, and the American trade with foreign countries would have also been active and have stimulated the consumption of cotton in Europe too. It is not often that people's errors under the laws of trade are followed so quickly and plainly with the resulting penalties. In September 1895 the stocks of print cloths were merely nominal, less than 200,000 pieces; now they are 2,198,000 pieces. We see it

reported that a suggestion has been made at Fall River to run only four days a week, and at the same time to put a considerable portion of the current stock in the hands of trustees to hold until 64x64s can be sold at 2½ cents. Another proposal has been to dispose of a large part of the stock in Europe at any price the goods would fetch. This latter course has nothing to recommend it. It would be much like putting the load on the other shoulder. Such a stock would be a burden, whether held here or in Liverpool, and if sold in Europe would depress foreign markets as well as our home markets. There can be no natural way out of this difficulty except through a decrease in the production of goods.

The reduction in the dividend on the stock of the Delaware & Hudson Canal Company from 7 per cent per annum to 5 per cent cannot be treated the same as an ordinary dividend reduction. We have passed through a long term of business depression in which the revenues of our transportation companies have been very much reduced, making it necessary in many cases to draw upon accumulated surplus to maintain the old rate of distribution. This has led to some criticism of this policy in the newspapers, and latterly it has become quite the fashion to declaim against all dividends which could not be shown to have been fully earned in the year against which they were charged, such dividends being indiscriminately termed "unearned dividends." Railroad managers are of course sensitive to criticisms of this nature, and there is danger that they may in consequence be led in some instances into action which is not wholly conservative. We say not conservative, for there may be a lack of conservatism in unwisely reducing dividends as well as in paying them when they are not justified. It all depends upon the circumstances of the case. No intelligent person would for a moment argue in favor of the making of dividends when there was not a revenue fund of some kind, past or present, out of which to pay them. But if in prosperous years a company has refrained from giving stockholders the full amount earned, there seems no reason inconsistent with sound business policy why the surplus so set aside may not be drawn on to make up a temporary deficiency in a poor year. It should also be remembered that the failure of a company to earn its usual dividend in a twelvemonth of such abnormal depression in trade as the last, argues nothing as to its permanent earning capacity.

In the Delaware & Hudson case we have not all the facts needed to form a definite opinion. No figures regarding the year's results are to be given out in advance of the publication of the company's annual statement on January 27. But if there has been any considerable shortage in the amount needed for the dividend, it will be the first year that this has happened; the year 1895 was not a good one either, but according to the annual report for that year the company earned only a small fraction less than the 7 per cent distributed. Moreover, the property has in recent periods frequently earned as much as 10 per cent while giving shareholders only 7 per cent. Again, the company has an accumulated surplus of over seven million dollars, and it has always been the pride of the management that this was a real, tangible surplus—not a mere fiction. It seems to be a fact, too, that the general belief has been that there would be no hesitation to use this fund, if necessary, to tide the company over temporary periods of depression, and that invest-

ors have bought the stock at high prices on that idea. Furthermore, the company has been steadily strengthening its position by retiring its bond issues as they matured, and replacing them with stock, so that now it has a funded debt of only \$5,000,000, against \$35,000,000 of stock. Finally, if current indications can be relied on, we are on the eve of a great improvement in business, so that whatever the results for 1896 those for 1897 promise to be much better. Altogether it would appear that there were strong arguments in favor of continuing the old rate of payment, and it remains for the future to determine whether the action of the board in making a reduction was not more radical than the circumstances of the case called for.

Another noteworthy event this week has been the announcement by the Attorney General of Pennsylvania that he has reached "the conclusion, most reluctantly, that the Commonwealth of Pennsylvania can not now successfully attack the chartered rights of the Reading Company." This decision is important as removing the last obstacle to the successful carrying out of the plan for the reorganization of the old Reading properties and also as confirming the opinion of learned counsel obtained by the Reorganization Committee. The legality of this old charter was of course a matter of considerable moment in the reorganization, and as showing the careful way in which the Reorganization Committee went ahead, we hear that before deciding to proceed under the charter they consulted no less than twelve high legal authorities, all of whom agreed that the charter was valid. It is well that the question has been raised and passed upon at this stage. We are informed by the managers that their plans, which were interrupted by the proceedings before the Attorney-General, will now be speedily carried forward, and that the new securities will be issued inside of sixty days.

It seems likely, too, that the question as to what action Congress will take regarding the debt of the Pacific railroads will soon be settled. The funding bill has been under discussion in the House of Representatives this week, and a vote on the bill is to be taken next Monday. At the same time the announcement comes from Washington that the Republican Senatorial "steering" committee has decided that when the Oklahoma Free Homestead bill shall have been disposed of the Pacific Railroad refunding bill shall be made the unfinished business and maintained as such until final action is had. It looks probable therefore that some kind of a conclusion will be reached before long, though just what that conclusion is to be it would be hazardous to predict, since there are so many political factors involved in the problem. After a vote has been taken in both houses, it will be possible to form a better idea of the future of the properties and to decide what steps to take to place them on their feet.

Returns of railroad earnings for current weeks appear to be improving. For the fourth week of December our statement covering 57 roads shows 11.06 per cent gain over the same week in 1895. It is proper to say, however, that there was only one Sunday in that week in 1896 against two Sundays in the previous year. The following is a four-year comparison of gross and net for November for a number of roads that have this week furnished their returns for that month.

Our foreign exchange market has grown firmer again. It continued easy on Monday but on the following day and on Wednesday it grew stronger in response to a good demand. Bankers say that some of the long sterling which was bought for investment early in November and which is now maturing has been exchanged for new bills, thus extending the investment. The few long bills which are now running to sight and which are being offered for sale are promptly absorbed and consequently the market is but indifferently supplied. One reason for the re-investment of the proceeds of maturing long bills and for the extension of the investment for another period of sixty days or longer probably is that money is likely to continue low in our market, while discounts in London will probably rise, and indeed there has already this week been an advance in the open market discount rate in London to  $3\frac{1}{2}$  @  $3\frac{1}{2}$  per cent from about  $2\frac{1}{2}$  per cent at the beginning of the year. Moreover the cable reports that a new Russian loan for 600 millions of marks—\$150,000,000—is being negotiated in Paris, and that this loan, if obtained soon after April, will be the prelude to the resumption of specie payments by Russia. With this negotiation pending it is not surprising that the prospects for the maintenance of comparatively high discounts should be good. If so, that would naturally encourage continued investment in long sterling.

The amount of gold and of gold obligations received at the Sub-Treasury during the week for which legal tenders were exchanged was \$500,000. The net gold in the Treasury, officially reported from Washington on Thursday of last week, was \$136,746,473, while the amount so reported to-day was \$138,624,814.

There is evidence this week of growing ease in the money market, resulting from the disbursements of January dividends and interest, and this is shown in the easier rates on call and in greater activity in the time loan branch of the market and in a broader market for commercial paper. Money on call, representing bankers' balances, loaned generally at 2 per cent until Wednesday, when there were transactions at  $1\frac{1}{2}$ , at  $1\frac{1}{2}$  and at 2 per cent, with the bulk of the business at the last-named rates. The average for the week has been at a fraction below 2 per cent. Banks and trust companies quote 2 per cent as the minimum, and it is reported that the larger banks have agreed to maintain 2 per cent as the uniform minimum rate, and not, under any circumstances, to loan below that figure. Time loans have been more freely offered this week, and there is a desire among capitalists, banks and other institutions to place their funds for four months or for longer periods. Quotations

are 3 per cent. for sixty days to four months and 3½ per cent. for five to six months on good mixed Stock Exchange collateral. There is a broader market for commercial paper and a fair amount is offering, some coming from the East, and four months' mill paper has sold at 3½ per cent. The demand is quite general among the banks and other buyers, and rates are 3½@4 per cent. for sixty to ninety day endorsed bills receivable, 4@4½ for first class and 4½@5½ for good four to six months' single names.

The Bank of England minimum rate of discount remains unchanged at 4 per cent. The cable reports discounts of sixty to ninety day bank bills in London 3½@3½ per cent, an advance from 2 15-16 on Saturday; the open market rate at Paris is 2 per cent, at Berlin it is 3½ per cent and at Frankfurt 3½ per cent. According to our special cable from London the Bank of England gained £359,193 bullion during the week and held £34,518,092 at the close of the week. Our correspondent further advises us that the gain was due to the export of £15,000 to the Argentine Republic, to receipts from the interior of Great Britain of £341,000 net and imports of £33,000, of which £22,000 were from Portugal and £11,000 other Continental.

Foreign exchange, as already stated, has been firmer and higher this week. The range for nominal rates on Monday was 4 84 to 4 84½ for sixty day and 4 87 to 4 87½ for sight. Rates for actual business were unchanged, compared with the close on Thursday of last week, for long and short sterling, while cable transfers were one-quarter of a cent lower at 4 86½@4 87. The tone was weak early in the day for short sterling as well as for cables, but later the former reacted. On the following day nominal rates remained unchanged. There was no change in those for actual business for long sterling, but short sterling and cable transfers were one-quarter of a cent higher at 4 86½@4 86½ for the former and 4 87@4 87½ for the latter. On Wednesday Brown Bros. and Heidelbach, Ickelheimer & Co. advanced their posted figures half a cent, making the range for nominal rates 4 84½ to 4 85 for sixty day and 4 87½ to 4 88 for sight. Rates for actual business were advanced one quarter of a cent all around to 4 84@4 84½ for long, 4 86½@4 87 for short and 4 87½@4 87½ for cable transfers. On Thursday Brown Bros. advanced the short rate, while Lazard Freres moved both long and short upward half a cent, but these changes made no alteration in the range, which stood as on the previous day. Rates for actual business in long sterling remained unchanged, while those for short sterling and cable transfers were one quarter of a cent higher at 4 87@4 87½ for the former and 4 87½@4 87½ for the latter, and the market closed dull but firm. Yesterday there was no change in either actual or nominal quotations, the market closing steady. The following table shows the daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

		FRI. Jan. 1	MON. Jan. 4	TUES. Jan. 5	WED. Jan. 6	THUR. Jan. 7	FRI. Jan. 8

### SOME REFLECTIONS SUGGESTED BY THE FAILURES OF 1896.

The least interesting work we have to do is reviewing the year's failures in a year when all business has been greatly depressed. Under such circumstances it cannot be a cheerful work and no encouraging inference can be drawn from the tables. We say this is the case in a year when business has been greatly depressed; in a year of industrial activity and rising prices such a review may of course become an exhilarating occupation. Insolvents are bred in favorable business surroundings, but they are not disclosed. It is a truism to say that adversity is a weeding process and trial is a test of the strength and soundness of business methods: until the trial comes the weakest and the strongest may alike continue to exist together. Hence one may study with some pleasure the results of a good year, for one finds few disasters and therefore only added proof of the prosperity the body of traders is enjoying.

All any one can suggest to soften or tone down the unfavorable inference the figures for 1896 leave is that a bad record of this kind does not always presage but it always precedes recovery. Liquidation is often a natural incident in the process of convalescence. As it is apt to be darkest just before dawn, so the largest total of failures and liabilities not infrequently foreshadows a new term of prosperity. There have been only five years during the last forty, that is beginning with 1857, when the liabilities have been larger than they have been in 1896. It will be of interest perhaps to observe the figures at those periods, and we consequently present them.

FAILURES.			FAILURES.		
Year.	Number.	Amount of Liabilities.	Year.	Number.	Amount of Liabilities.
1896 .....	15,088	\$226,090,834	1878 .....	10,478	\$231,383,132
1893 .....	15,242	346,779,889	1873 .....	5,193	228,499,900
1894 .....	10,068	226,343,427	1857 .....	4,932	291,750,000

Of course as to the number of failures there has been only one year (1893) when the number was larger than in 1896. That, though, is not a point in the foregoing of much significance. The number of traders included must be always increasing as population increases, and hence the number of disasters might be much larger and yet not represent any larger percentage of the whole. Besides that, the work of gathering the returns is far more thoroughly done now than it used to be. We might almost say that the machinery improves in efficiency every succeeding year. Remembering this and remembering also that the lack of completeness, so far as it existed at any time, would always be in overlooking the vast number of small traders dropping out of the ranks, we see that the variation in number of disasters given is not of itself especially important.

Studying the liabilities it will be noted that the earliest of the six years included in the above was long ago in 1857, and that the total liabilities was at that date the largest of any in R. G. Dun & Company's compilations except in 1893. What did they foreshadow at that time? Starting with the following year (1858) we find that in that year a cycle of small failures and of prosperity began which was only temporarily interrupted during 1861 by the breaking out of the war with the South; in 1862 these favorable tendencies reacted again and continued with moderate variations until the crisis of 1873. Passing, for the time being, the 1873 crisis, we reach next 1878, which year, as all our readers remember, marked the end of the liquidation that began in 1873. Here again the conditions that followed were very similar to those which arose in 1858 and prevailed in subsequent years. That is to say, in 1879 as in 1858 a term of decided prosperity and very limited failures began, which continued until the last half of 1883; then there was a temporary setback followed by renewed prosperity, but of a more fitful character, and by moderately large failures until 1893, when the present depression assumed its more serious phase.

We do not propose to speak here at any length in explanation of the nature of these crises and of the inferences to be drawn therefrom. To understand the lesson they inculcate it would be necessary to review the facts which made 1873 and the liquidation that followed (lasting until 1879) exceptional; it would likewise be needful to inquire into the reasons why the buoyancy which began in 1879 and was checked in 1883 and 1884 was never thereafter wholly regained, and why the failures, that were large in 1883 and continued to be so conspicuous a feature in 1884, have never returned to their normal proportions but have been large to the present day, the destructive work of the disorder breaking out with re-enforced virulence in 1893. If examined critically, the conditions ruling in and following 1857 and 1878 will be found to have points of marked similarity, and again those of 1873 and 1893 will be seen also to have features common to both. Note also that the crisis which culminated in 1873 was a currency derangement and was only cured by the establishment of gold payments January 1 1879. Time will likewise prove that only through a like method—the removal of the unsoundness left in our currency system in 1879 and the reinstatement of monetary affairs upon a gold standard pure and simple—can the country be given complete rest from the influences at work, which developed first the crisis in 1883 and 1884, produced another setback in 1887 and again caused the break-up in 1893, from which we are still

suffering so severely. Until our legislators have placed the country beyond the power a mere rumor that a dicker with silver is in progress now has to send a chill through the entire industrial organization—until our legislators have done that, the country can never again enjoy full prosperity. Whatever of business activity comes before that is secured must be made up of short cycles, fitful in character.

Another interesting feature of Dun's statement of failures and a very obvious peculiarity is the increase in number and liabilities the last half of 1896, although the results during the first half of the year were large and although there was no panic anywhere. This feature also further illustrates the nature of the business dislocation and the nature of the industrial situation. Mr. Depew said in an interview last week that the country was never before so nearly on a cash basis. That statement is particularly true of the Eastern and Middle States and in considerable measure is true also of the other sections of the country. Comptroller Fitch of New York City is reported to have stated that receipts for taxes the last three months of 1896 were larger than they had ever before been in the same three months within the history of the city. The point we wish to enforce is that the long depression and ever present possibility of a catastrophe (through a change in our currency basis) has led to the payment of obligations and to a curtailment in operations until business houses have out very few notes; furthermore, that there is an abundance of idle capital, but that the people would rather get their affairs into snug shape, keep a large balance, than to put the money out of sight. Mercantile failures have occurred consequently not at all because business was extended, but they are rather evidence of an opposite condition, the existence of a kind of dry rot which a cessation in business operations has produced and is developing. Not only the weak, the financially unsound, but those who have always conducted their affairs conservatively, are subject to infection now.

That this state of affairs should have produced a large crop of disasters during the period since the first of July is likewise reasonable. As we said a week ago, a sudden decided check to industrial operations, such as happened at about the opening of the current fiscal year following months and in fact years of contracted business, and followed by four months of a stoppage seldom if ever equaled in completeness and severity for that length of time, must have proved a very trying test of endurance to all traders. The concern that has only a limited supply of quick assets, the rest being inconvertible, could not of course stand against the strain such conditions produce. Nor could many others, who were conducting business in sections where little or no relief has followed the election, or where there has been the added embarrassment of banks failing and locking up balances small and large. It is no surprise then to find an unusual number of failures with a corresponding aggregate of liabilities a continuing feature of the last six months of 1896. That is just what should be expected. The disasters do not prove at all widespread insolvency; they are simply a record of the results of the extreme depression the discredit that has prevailed has produced, and again point us to the cause of this discredit and therefore to the relief now demanded.

We subjoin the following exhibit. It is made up from R. G. Dun & Company's compilations and gives the figures of failures, both number and liabilities,

every quarter of each year since 1878. It covers the most of the facts which we have referred to above. On subsequent pages will be found a detailed exhibit of the failures for the late year, with some comparisons with the year preceding.

### LIMITING THE CONSTRUCTION OF NEW ROADS.

The State Board of Railroad Commissioners has this week submitted its annual report to the Legislature, and in it the Board renews its recommendation of the previous year asking that Section 59 of the Railroad Law be amended so as to widen somewhat the Board's discretion in cases where application is made to it for permission to build new roads. The proposition will perhaps attract more attention than the similar recommendation of last year because the Commission has just been overruled by the Appellate Division of the Supreme Court in a case where it had refused to certify to the necessity for the construction of a new road.

We think the decision in the case referred to furnishes no valid argument against the section of the law vesting the Board with power to prevent the construction of unnecessary new road or against the wisdom and propriety of the amendment to that section proposed by the Commission. On the contrary, the fact that there is a proviso in the law giving to the courts authority to review the acts of the Board in that particular, shows that the statute in question was conceived in a broad spirit, and that there is little danger of any interest suffering harm through its workings. It has been urged against the law that the right to say whether a road should or should not be built is a tremendous power to put in the hands of a board of three men. And so it is, but in the clause permitting an appeal to a Division of the Supreme Court safeguards have been provided against arbitrary or ill-advised action. Some have thought that this clause might in practice prove a dead letter, the theory being that the courts would be disinclined to reverse the decision of a body supposed to possess special qualifications for discriminating between necessary and unnecessary projects. Experi-

ence certainly has shown that the courts in such cases will act with great circumspection, but it has also shown, as evidenced by the present case, that they will not hesitate to exercise their independent judgment when they think the occasion calls for it.

The merits of the application in this instance are not entirely clear. There are some exceptional features about it, leaving considerable room for differences of opinion. Under the circumstances it is not so very surprising that the Court should not have taken quite the same view of the matter as the Commission. The road is not an important one in any sense of the word. It is known as the Long Lake Railroad, and it proposes to build a road from Axton, Franklin County, in the Adirondack forest, southerly about 10 miles to Long Lake. The application was opposed by the New York Central and by certain parties seeking to protect the State forest preserve, though not by the Forest Preserve Commission. There was some question whether the policy of the State in aiming to preserve the Adirondack forests called for the exclusion of the road; also whether the line would have to cross lands owned by the State; and furthermore, there was some question whether the promoters were acting in all respects in entire good faith. It was claimed in favor of the project that land owners would donate the right of way, but it was proved that this did not mean much since these owners consisted merely of a lumber company and of two private individuals. An outsider gets the impression that there was more or less conflict as to some of the facts, with the evidence not absolutely conclusive on either side. The Commissioners, however, failed to convince the Court, or rather a majority of the Judges sitting to hear the case, that the Board's refusal to issue a certificate was based on adequate grounds, and hence the appeal was decided in favor of the appellants. We say the majority of the Court, because out of five judges who heard the appeal three, namely Justices Parker, Landon and Putnam, voted in favor of reversal, while two (Justices Herrick and Merwin) voted in favor of sustaining the Commissioners, and filed a dissenting opinion. The fact that the Court itself was divided demonstrates that the merits of the case are not easy to determine.

One result we may expect will follow from the decision. The Commissioners will see the necessity not only of being convinced in their own minds of the soundness of their position but of presenting their reasons, when refusing an application, with sufficient strength and force to convince the judicial mind. At this late day it is unnecessary of course to argue in favor of the wisdom of a restraining provision against the construction of unnecessary new mileage. The experience of the last fifteen years has made the propriety of such restraint obvious to every one. The only point worth discussing at all is whether the existing provision of law on that point in this State is satisfactory.

On the whole it must be said that the law has worked well. As far as our observations have extended the Commissioners have not acted arbitrarily in considering propositions for new roads or abused the discretion lodged in them. They have barred out a number of objectionable schemes, and in that have accomplished the purpose of the law. On the other hand they have issued the necessary certificate of authorization in various other cases where there

appeared good grounds for doing so. In both instances, it seems to us they have carried out the spirit and intent of the law. The Long Lake Railroad is not the only project where an appeal was taken from the decision of the Board, but we believe it is the first instance where the ruling of the Commission has been reversed. In the case of the Amsterdam Johnstown & Gloversville road, where a certificate was refused, the Board was on appeal sustained.

The law, too, seems to have been wisely framed. It provides that before a new road can be built the Commissioners must certify that public convenience and necessity require its construction. If the certificate is refused then the application may be renewed after the lapse of a year. Or, as we have seen, an appeal may be taken to a General Term of the Supreme Court of the department within which said road is proposed in whole or in part to be constructed, and said General Term (under the new Constitution the name of the tribunal is the Appellate Division of the Supreme Court) has the power in its discretion to order the Commissioners, for reasons stated, to issue the required certificate of authorization.

The law has been on the statute books only since 1892 and it did not at first apply to street railways, but in 1895 it was amended to include these as well as the steam roads. The further amendment which the Commission now suggests is that in the case of the street surface roads the Board shall have power "to certify to the whole or a part of the route proposed by a new corporation, or to compel an existing corporation to build such additional lines as are deemed to be required by public convenience and necessity." We suppose that the reference here to compelling existing roads to build additional lines means that the option shall be offered them to build such lines as an alternative to giving the authority to another company asking permission to build a whole system of new lines. With no right reserved to the State under the general law or by the charters of the roads, it may well be questioned whether the old companies could be "compelled" to build additional lines. Hence, except on the supposition mentioned, the amendment proposed would seem to be open to objection. Nothing can be said against the first part of the proposal, namely the suggestion that the Commissioners be allowed to decide whether it might not be wise to permit a part of a projected new route to be built where there appeared to be no justification for allowing the whole to be constructed. We can see that oftentimes public interests might be promoted through the possession of such a right on the part of the Commissioners.

#### GREATER NEW YORK.

Last Saturday, the 2d of January, a very important series of public hearings was begun at the New York City Hall. The charter committee of the Greater New York Commission, consisting of Messrs. William C. DeWitt, John F. Dillon, Thomas F. Gilroy, Seth Low, George M. Pinney, Jr., and Benjamin F. Tracy, formally submitted to the full commission their draft of the proposed new charter, and a programme for public discussion of the various chapters in the new charter was laid down, to continue daily until next Saturday.

The origin of the plan for a Greater New York, and of the commission whose report is now before the public, is familiar to our readers. The project of uniting into one great municipality New York City, Brooklyn,

Staten Island and other districts north of New York and east and northeast of Brooklyn, has been urged for many years, chiefly by Mr. Andrew H. Green. The plan was approved by various local organizations and commercial bodies, and by legislative act of 1890 a commission was appointed to inquire into the expediency of such consolidation. In 1893 this commission reported, advising submission of the question to public vote in the several municipalities and towns concerned. After a year's delay such public vote was ordered by the legislature, and was made a separate issue in the elections of November 1894.

The result of this public vote was somewhat curious. A very large percentage of the voters did not express their judgment either way. Taking the ballots as actually polled, however, all the municipalities concerned, with the exception of two smaller towns, voted in favor of consolidation. New York City was expected to sustain the plan. It did so by a vote of 96,938 to 59,959. In Brooklyn there had been vigorous opposition, largely based upon local pride. Kings County nevertheless cast 64,744 ballots for consolidation, 64,467 against it, thus approving by a close majority. Taking the whole vote cast in all localities whose judgment was invited the majority in favor of consolidation was 43,734 out of a total poll of 310,352. This vote, under the legislative act, was not final on the question; it had, however, the effect of settling the judgment of the lawmakers. In January of last year (1896) a bill was introduced at Albany arranging for a commission to make the necessary preliminary provisions, and extending the term of the present municipal officers until 1897, when the election under the Greater New York charter should take place. The bill was passed. Under provisions of the new State Constitution it was submitted for approval or disapproval to the mayors of the municipalities concerned. It was vetoed by the mayors of New York and Brooklyn but approved by the Mayor of Long Island City, and was thereupon passed over the vetoes by a vote of 34 to 14 in the Senate and 78 to 69 in the Assembly. The act became a law by Gov. Morton's signature on May 11; the commission was filled out by appointment as provided, and the charter this week formally submitted represents the outcome of their labors.

This brief review of the history of the movement will serve to show what the actual present situation is. The consolidation act can hardly be described as the fruit of an overwhelming public demand. As we have seen, the Legislature itself was slow in acting on the bill and displayed no special interest in the matter. The popular vote of 1894 was small in the aggregate, and, except in Brooklyn, was probably affected by the familiar principle that the voter will as a rule support a formal proposition to which he has given no great thought. The two veto messages of the mayors and such adverse judgment as was elsewhere expressed last spring were based on a very obvious objection—the fact that the bill committed municipalities to a radical change in government before it could possibly be known what the nature of the new government should be. Although, therefore, the bill is now a law, these facts lend particular interest to the scheme of government actually proposed. We shall undertake to sum up briefly the chief provisions as they at present stand.

The most striking feature of the charter as submitted is its provision for a city legislature. The somewhat shadowy powers enjoyed by the present New York Board of Aldermen are transferred, with a much

larger scope, to a "municipal assembly." This body, like our State and Federal legislatures, is to contain two houses. In the charter as originally submitted there was to be a lower house with a membership of 104, elected by senatorial districts, and an upper house of 37, elected from larger geographical divisions designated by the commission. On Thursday of the present week, however, the committee altered this provision, reducing the stipulated membership to 60 in the lower house, and 29 in the upper—a total of 89; the lower house to be chosen, not from senatorial but from assembly districts. The municipal assembly, in addition to existing aldermanic functions, is entrusted with general powers in the construction of bridges, streets, sewers, and other public works. Its authority in these directions is, however, to be neither original nor final. In all such public works, it is provided that the Board of Public Improvements shall take the initiative, and that the municipal assembly's action shall require, before it passes into formal ordinance, the concurrence of the Board of Estimate and Apportionment. Finally, in this scheme of municipal legislature, all of the members of both houses are elected for two years, and all retire at once.

It will be seen that there is much of novelty in this general plan, and some provisions which in their way are startling. The number of legislators in this double city council—141 as at first proposed, and 89 under this week's revised arrangement—will probably surprise a good many American observers. European citizens, however, would take this feature as a matter of course. Mr. Albert Shaw has lately pointed out, in his comprehensive books upon the subject, that the London County Council contains 138 members, the Vienna Council 138, the Berlin Council 126, the governing bodies of Paris and Manchester 80 and 104 respectively, while nearly all the German and British cities of the second rank are governed by councils of 40 or more. In most of these foreign municipalities the results of such large membership have been favorable, chiefly because of the thorough committee work made thereby possible. The question has been pertinently raised, however, whether the multiplication of offices under New York's peculiar political conditions would not defeat the very purpose of the charter.

The division of the Assembly into two houses is, however, a rather startling innovation in city government, and the provision for election and retirement of the entire membership at once has already become a focus of controversy. In their own report, the charter committee defend the double chamber proposition as a check on hasty legislation, and a plan which "will attract to every ordinance the most extensive scrutiny and discussion, both from the membership and from the public press." Mr. Dorman B. Eaton, at the commission's hearing of last Wednesday, took very positive ground against the plan, instancing the fact that a similar experiment with two houses had failed entirely in the District of Columbia, and had been rejected, after thorough study of the matter, by London and other European cities. The most reasonable objection advanced against the plan was the argument that a double legislature divides responsibility, and that election by small districts gives free scope to what New York already knows familiarly as "ward politics." Of the plan for retirement of the whole municipal assembly at once, the committee itself speaks in only negative endorsement. It is their theory that unless the charter opens the possibility of changing the poli-

tical complexion of the entire body at one stroke, the party normally dominant in New York City politics would always retain a considerable majority. This is one out of several instances where the peculiar record and situation of New York have disposed the committee to look closer to safeguards than to theoretical opportunities. It is worth while to keep in mind, however, that both in London and in Paris, all the members of the municipal government retire at once.

The charter as drafted by the Greater New York Committee follows a precedent now well established by American experience, though by no means equally well recognized abroad, in conferring very large powers and responsibility upon the Mayor. He is to appoint all the administrative officers excepting the Comptroller; he may remove during the first six months of his administration any such officer. This power is absolute, during the remainder of his term the removal power continues, though in more restricted form, and subject to the approval of the Governor. His veto power is at the same time enlarged; the committee in fact describes the officer clothed with this very wide authority as "a dignitary second only in importance to the Governor of the State or the President of the United States."

Naturally, the commission's plan largely concerns itself with the departments of administration. The present Department of Public Works is to be superseded by a general Board of Public Improvements, made up of six distinct departments—Water Supply; Highways; Street-Cleaning; Sewers; Public Buildings, Lighting and Supplies; and Bridges. A single commissioner is to preside independently over each department. All these commissioners are to be appointed. The work of the fire department, of parks, charities, corrections, education, law, civil service and municipal statistics is to be similarly distributed, the Mayor having in these departments also the appointing power. The Comptroller, on the other hand, as the financial agent of the people, is to be chosen every four years on a popular vote. For local improvements the provisions are interesting. The Greater New York is to be divided into five boroughs, fairly representing municipal divisions as they now exist. Each borough is to elect its president, under whose general authority public improvements are to be first considered, with the co-operation, in the case of each proposed improvement, of the municipal assemblymen from the senatorial district or districts which the projected public work would immediately affect. There are twenty-two such districts in the area covered by the proposed Greater New York; the scheme therefore proposes twenty-two local boards of public works, from whom, in a given case, any approved undertaking will be submitted to the central board of public improvements as appointed by the Mayor. Approved by them, the project goes to the municipal assembly.

The final and in some respects the most important feature of the Greater New York committee's charter affects the police department. On this point there is certain to be a struggle. The report frankly confesses a difference of opinion in the committee as between a single police commissioner and a board of commissioners. The plan of such a board—"bi-partisan" in its membership under the requirements of the State Constitution—is the system now in use; the majority of the charter committee has favored its continuance. In Monday's public hearing on the police department clauses of the charter, three of the present police commissioners made emphatic protest against this provi-

sion. All of them favored a single head to the department, with individual responsibility, and they have been supported by a very considerable body of intelligent opinion, by the expert judgment of our chiefs of police, and by the example of the most successful police organizations of European cities.

This necessarily brief review will serve to show the nature of the problems to be settled by the full commission. We have made no attempt, at the present time, to do anything more than summarize the plan as now officially submitted; subject, of course, to later alteration and amendment. That full opportunity should be provided for such alterations is a prime necessity; the resolution of the Chamber of Commerce Thursday afternoon, calling for more complete consideration of the charter, was therefore very timely. Whether the referendum plan would prove to be of any special value is perhaps more doubtful. But no more serious mistake could possibly be made than to assume that the matter is virtually concluded with the charter committee's report. We have already noticed that the committee was not unanimous in all its propositions—the police department chapter is a notable instance. The commissioners have, moreover, by their change this week in the provisions for the municipal assembly, shown that they do not themselves regard their plan as final. It is possible that changes much more radical than these will be so urged as to appeal to the good judgment of the commission and the Legislature.

Apparently, the city is at present only at the opening of the discussion. It has been very generally admitted by students of contemporary politics that city government is peculiarly the field where this generation is breaking new ground and fixing precedents for the future. In many parts of the United States, particularly, our cities have expanded to enormous size under systems of local government hardly more than suited to a township. The importance of a proper settlement of the problem at New York, not for the interests of that community alone, but for those of the entire nation, is therefore obvious. It is true, the legislation under which this charter has been drawn up and submitted is in many respects anomalous and peculiar. It has, however, created a practical situation whose outcome, for good or ill, can hardly fail to be of very great importance. The details of the plan deserve the careful and continuous attention of all public spirited citizens.

#### CLEARINGS AND SPECULATION IN 1896.

Like other records of trade movements, bank clearings for 1896 make an unfavorable comparison with the year preceding. At the same time, the falling off, though large in amount (we are dealing of course with figures of great magnitude) is proportionately quite small. In the country at large the decrease is only 4.00 per cent. At New York the decrease is even less than this, or but 3.3 per cent, while outside of this centre the shrinkage is not quite five per cent, the exact figure being 4.8 per cent. Of course such small ratios of decline do not indicate the extent of the depression in trade or the degree of suffering which mercantile classes experienced during the twelve months.

Bank clearings are never a perfect guide to trade results or the course of business. This follows from the fact that the exchanges of the banks necessarily represent to an extent past transactions. A

check passing to-day may be in completion of a transaction initiated in 1895, during the period when in many of our industries a very buoyant tone prevailed.

It should also be remembered that in any critical analysis the results for 1896 can hardly be treated as a whole. A distinction must be made between the first part of the year and the latter part. The trade situation was unsatisfactory even during the early months, the Venezuela complications, the trouble regarding the Government finances, and the renewed agitation for free silver, having operated as a check upon enterprise. As the year progressed, conditions kept growing less favorable, and in May and June, with the silver movement making steady headway, the shrinkage in the volume of business became quite marked. But it was not until the second half of the year—not till the declaration of the Democratic Party for free silver in July—that the depression assumed really large dimensions.

The monthly figures of pig iron production afford a fairly accurate idea of the course of business. These figures show that with one exception there was a falling off each month in the weekly output of iron from November 1 1895 to October 1 1896. But up to the 1st of July the falling off had been comparatively small, the decline in the whole of the eight months up to that date having been only from 217,306 tons to 180,532 tons, and this was from the largest total ever reached in the country's history. But in the three months from July 1 to October 1 there was a further drop from 180,532 tons to 112,732 tons per week, this latter reduction being at the rate of about 3½ million tons a year. It is to be said, too, that up to and including July the weekly product was each month above that for the corresponding date in 1895, whereas after that the product was each month below that in 1895. The meaning and significance of such conditions when applied to the exhibits of bank clearings is of course obvious. The very poor results for the later months were in part offset by the more favorable results in the early portion of the year. The following gives the record of the clearings by months. It will be observed that the decline began in May and continued through the rest of the year. For the first quarter there was 8.4 per cent increase, for the second quarter 5.2 per cent decrease; but this still left for the half-year a small increase—1.2 per cent. In the third quarter the decrease reached 9.8 per cent and in the fourth quarter 7.6 per cent. The showing without New York is much the same as with New York included.

It is furthermore to be remembered in interpreting the clearings for the year that the conditions were not all unfavorable. We had very good grain crops in 1895, the effect of which extended into 1896, and then also we had good grain crops again in 1896. It is true these large yields were not accompanied by high prices, but rather by extremely low prices, except in the case of wheat the latter part of the year. Nevertheless the grain movement was heavy, and necessarily this made a large volume of exchanges at a number of Western points. Thus we find an increase in clearings for the twelve months at Minneapolis, at St. Paul and at Omaha, all in the territory where there was such a phenomenal movement of spring wheat from the crop of 1895; again, we have an increase at Baltimore, through which port the export movement of grain was so heavy. At a great many other points also, even where the clearings do not show an increase, the expansion in the grain movement was an important factor in offsetting losses from other causes. Below we furnish a comparison of the clearings for four years at the leading cities, both for the twelve months and for December.

Among these leading cities, as will be seen, the points already mentioned—namely, St. Paul, Minneapolis, Omaha and Baltimore, are the only ones recording increased clearings for the twelve months, but among the minor points there are a number of others in various parts of the country distinguished in the same way. The complete statement showing the clearings separately for all the points having clearing houses will be found on the page preceding our article on the Financial Situation in this issue of THE CHRONICLE. For December it will be observed from the above comparison neither St. Paul, Omaha nor Minneapolis records an increase, the first two indeed having suffered important decreases; this shows that the situation in that part of the country had changed at the end of the year, one important reason being that the spring-wheat crop of 1896 in the Northwest was smaller than that of 1895. On the other hand, Baltimore still has a gain, and St. Louis, Kansas City and Louisville are also found ranged on that side. In part the improvement at these latter points may be ascribed to the continued large grain movement (they not being affected by the smaller spring-wheat yield), in part also no doubt it must be ascribed to the larger cotton crop, this crop in 1895 having been very small.

It is rather noteworthy that if we compare the clearings for the twelve months by geographical divisions, the percentages of decrease do not differ very much for most of the leading groups, notwithstanding the varying conditions prevailing in each. We know of course that the depression in trade was most intense in the great manufacturing and industrial districts. Possibly at this centre the effect of this was somewhat modified by the large railroad reorganizations which marked the year, and in the carrying out of which many checks must have passed through the banks. The falling off at New York, as already stated, proves to have been only 3.3 per cent; in the whole of the Middle States, however, including New York, the shrinkage has not been much larger than this, being 3.8 per cent. In the New England section the decrease has been 5.2 per cent, in the Middle Western States 4.8 per cent, and in the South (where for eight months of the year the small cotton crop of 1895 was a factor in the results) the decrease has been 4.5 per cent. It will be seen that in all these cases the percentages of decline approximate each other very closely. Only in the case of the "other Western" and the Pacific section do the ratios vary greatly from the general average. The "other Western" embraces St. Paul, Minneapolis, Omaha and other points in the same part of the country, and there the decrease is but a fraction of 1 per cent (0.6) on account of the larger grain movement, as already indicated. The Pacific section also has only a fractional decrease, namely 0.1 per cent.

In these last two instances, the better showing also follows in part from the fact that these two sections in 1895 had proportionately much smaller gains than the other sections. It is interesting to have the figures for the different geographical divisions, and in the following we furnish a comparison in that way, by quarters and for the twelve months, for the past five years.

It will be observed that barring one group, namely the Southern, the 1896 aggregate is in each case above the very small aggregate for 1894, but with that exception the smallest of any of the years given. In the Southern group the 1896 total is larger than that for 1893 as well as that for 1894. To carry these comparisons with past years further back, we present the following. In this case we give only New York and the totals for the country with and without New York.

## CLEARINGS.

Year.	New York Clearings.	Per Ct. Inc. or Dec.	Clear- ings Outside New York.	Per Ct. Inc. or Dec.	Total Clearings.	Per Ct. Inc. or Dec.
1896.....	\$28,870,776,056	-8.3	\$22,304,477,717	-4.8	\$51,175,253,773	-4.0
1895.....	29,811,799,924	+22.8	23,440,775,559	+10.1	53,252,575,483	+16.6

1878.....	19,858,871,307	-6.7	7,950,190,000	-7.3	27,808,971,307	-6.6

Here it becomes apparent that the 1896 results make after all a pretty poor showing in contrast with most other years. For New York the 1896 total is the smallest, with only two exceptions (1894 and 1885), since 1878. In this instance, however, it is possible to give an exaggerated importance to the fact mentioned. The greater part of the share sales of the New York Stock Exchange is now cleared through the Stock Exchange Clearing House instead of through the bank clearing house, and this of course means an important reduction as compared with the years when the old methods were still in force; and the change dates from the inauguration of the new system in May 1892. In 1896 the Cotton Exchange also (beginning with March 5) commenced clearing its own transactions. On the other hand, if we take the clearings outside of New York, where the number of clearing houses has greatly increased in recent years, the comparison is also quite unfavorable to 1896; with the exception of 1894, when every leading condition was unfavorable, the total is the smallest since 1889.

On the various Exchanges, stock and mercantile, the year was not one of great speculation; and this follows of course from the conditions prevailing. Of cotton, the future sales were only 46,727,800 bales in 1896 against 51,489,700 bales in 1895, of grain only 1,285 million bushels against 1,899 million, and of stocks only 54,654,096 shares against 66,583,232 shares. On the Stock Exchange, indeed, the volume of business was small even when prices fluctuated widely. Take July, when Bryan's nomination precipitated almost a panic, or November, when Mr. McKinley's election caused a very buoyant feeling. In neither month did the share sales reach six million shares. The following is the record by months.

## SALES OF STOCKS AT THE NEW YORK STOCK EXCHANGE.

Month.	Number of Shares.	1896.		1895.	
		Values.		Values.	
		Par.	Actual.	Par.	Actual.
Jan ..	4,535,612	\$417,301,560	\$250,446,666	\$324,905	\$318,422,500

June...	4,370,766	417,371,550	295,650,013	6,030,415	579,442,850
2d qr.	11,228,992	1,053,124,258	740,082,390	19,999,832	1,921,074,155
3d qr.	11,228,992	1,053,124,258	740,082,390	19,999,832	1,921,074,155
4th qr.	11,228,992	1,053,124,258	740,082,390	19,999,832	1,921,074,155
Year.	51,654,096	\$5,110,643,553	\$3,329,661,947	66,583,232	\$6,312,593,105

The railroad bond sales for the two years furnish an equally striking contrast. In 1896 the aggregate was \$363,158,820; in 1895 \$499,758,080. In 1896 the largest monthly total was \$46,625,350 in November; in 1895 there was one month (May) when the total reached \$78,556,700. The following compares the yearly aggregates of the stock sales back to 1877. It will be seen that, barring 1894, the 1896 total is the smallest since 1878:

## NUMBER AND VALUE OF SHARES SOLD AT NEW YORK STOCK EXCHANGE

Year.	Stocks, Shares.	Av'ge Price (approximate)	Value (approximate)	Year.	Stocks, Shares.	Av'ge Price (approximate)	Value (approximate)
1896....	51,654,096	65.2	\$3,329,661,947	1886....	100,802,050	65.8	\$6,583,862,900

1890....	71,282,835	60.2	\$4,277,664,108	1880....	97,919,099	60.60	\$5,919,066,054
1889....	72,014,600	61.0	\$4,392,231,891	1879....	72,765,762	58.85	\$4,286,539,570
1888....	65,179,109	62.5	\$4,069,519,143	1878....	39,975,569	54.10	\$2,157,269,681
1887....	54,014,916	61.1	\$3,292,778,890	1877....	40,832,960	52.20	\$2,140,280,510

\* The shares of stocks we take from the record kept by the *Journal of Commerce* for the years 1877 to 1884, inclusive; since 1885 the totals are our own compilation.

† The values of sales for the years 1877 to 1882, inclusive, are the figures made up by *The Public*; the totals for the remaining years are our own compilations.

We also add the record of the dealings on the Produce Exchange. In this case the 1896 total is smaller than in any year since 1882.

SALES OF FLOUR, WHEAT, &c., AT NEW YORK PRODUCE EXCHANGE  
(Two elphers (00) omitted from the figure for Wheat, Corn, Oats, Barley and Rye.)

# MR. LITTLE AND THE BALTIMORE & OHIO CAR ACCOUNTS.

After the appearance of our latest article on the Baltimore & Ohio, in the issue of December 26th, Mr. Little expressed a desire to make a further reply to our review and criticism of his report on that property. We gave him permission to do so as fully as he wished, at the same time stating that we would publish what he wrote, and as we had already covered the subject so far as we thought it useful, it was not our intention to reply to it. He has accordingly written the following letter. Every statement Mr. Little now makes we believe we have in some one or more of our three articles clearly and positively refuted, and we simply repeat what we said in closing the last one of them, that our figures are in need of no qualification, modification or revision:

47 WILLIAM STREET. }  
NEW YORK, December 28th, 1895. }

Editor of the Commercial and Financial Chronicle:

MY DEAR SIR—In your effort to set me right by your article of the 26th instant on the Baltimore & Ohio car accounts you have, I regret to see, only intensified the wrong. First of all, you overlook the important fact that it was not the company's deceptive and misleading reports that I examined, but its books. You, in your analysis, pin your faith to the former while I appeal to the latter for the verification of my figures throughout. That the actual additions to the company's equipment for the period covered by my examination were, as I stated in my letter to you of the 22d instant, \$3,044,658 61—no more and no less—is absolutely incontrovertible, your contention to the contrary notwithstanding. Next you accused me of ignoring this altogether, and then while eventually admitting that each and every item thereof is to be found in the balance sheet, you find fault because I did not call special attention to it in the text. There was, from my standpoint, no more necessity for this than that I should call attention to the large acquisitions of stocks and bonds of other companies in the same period. I can conceive of no reason why I should call attention to matters about which there was no possible question. The balance sheet speaks for itself and reflects accurately the condition of the accounts on the books. "Remote" from the subject, as you term it, it is nevertheless a very vital part of my report. The real difference between us on this particular point is that you erroneously compile your figures from the payments purporting to have been made according to the company's official reports, while I have taken the actual debits from the company's books, independent of such payments, and also irrespective of whether these payments were made from capital or revenue, or partly from one and partly from the other. To undertake, as you do, to fix the exact amounts that were paid from each fund I regard as impossible, especially where these funds were commingled and the capital and revenue accounts kept in one set of books, as was the case in the Baltimore & Ohio Company. I neither assumed nor said that "all the car trust payments had been charged to revenue account" for the simple reason that they could not be so treated and still appear in the balance sheet as assets. The quotation in my letter of the 22d instant, from which you drew this inference, is your language, not mine.

You also accuse me of omitting all mention of the \$1,750,000 reduction in the car trust of 1897, but here again let me appeal to the books and the balance sheet. On the debit side that car trust (No. 1) was carried at \$2,500,000 September 30, 1893, and November 30, 1895, respectively, there being no change whatever between these dates. On the credit or liability side the amount unpaid was given September 30, 1888, at \$2,250,000 and November 30, 1895, \$500,000, showing a reduction in the interim of \$1,750,000. Could there be anything plainer than this? How, then, can you say or maintain that I overlooked it?

Respecting the income account on the opening page of the company's official reports, from which you quote, it ought not to be necessary to tell you that beyond the balance brought down after charging operating expenses, interest, rentals and dividends, it is not an income account at all. The remaining figures are a mere statement in the abstract arbitrarily accounting for certain amounts as having been paid out of income without any proof whatever that the sums set forth came from income. Take the 1894 report for illustration, where, to the unwary reader, the balance was \$511,967 23 said to have been applicable to further dividends on the common stock. Turn now to the profit and loss account, page 18, and you will find that it was not this \$511,967 23 that was carried to its credit, but \$1,272 813 75. The so called application of the remaining \$509,844 55 in the manner described was, as I have said, purely arbitrary and conjectural.

Finally, let me add that it is not a question of accounting, but of facts, that is involved, and there is nothing so mysterious, "remarkable and extraordinary" about these facts that they cannot be understood by your readers.

Yours very truly,

STEPHEN LITTLE.

# COTTON CONSUMPTION AND OVERLAND MOVEMENT TO JANUARY 1.

Meeting with no special hindrances the marketing of cotton in December has been quite liberal. Our statements indicate that there has come into sight through the ports, interior towns and the rail movement overland 1,549,705 bales, or 213,675 bales more than in December of 1895, but 422,283 bales less than in the month of 1894. For the four months the aggregate is 6,297,764 bales, against 4,921,643 bales for the similar period of 1895, and 6,949,488 bales in 1894. Spinners' takings have been less free during the month than in either 1895 or 1894, and their total takings for the four months fall below those for the same months of last year by 44,291 bales, and contrasted with 1894 the decline is very heavy.

## OVERLAND MOVEMENT TO JANUARY 1.

The gross movement overland in December this year, while slightly greater than in 1895, has been much less than in 1894, reaching 227,925 bales, against 215,025 and 359,477 bales respectively. The season's total is now 84,645 bales more than in 1895 but 338,095 bales less than for 1894. The net overland for December is less than for the month of 1895, having been only 151,824 bales, against 165,131 bales, and there is a decrease of 62,283 bales compared with 1894, when the aggregate was 214,107 bales. For the four months the aggregate net is 549,630 bales, an increase over 1895 of 21,991 bales, and compared with two years ago the loss is 277,210 bales. Presented in our usual form the results for the past three seasons are as follows:

## OVERLAND FROM SEPTEMBER 1 TO DECEMBER 31.

\* This total includes shipments to Canada, by rail, which since September 1 in 1896 amounted to 40,277 bales; in 1895 were 33,287 bales and in 1894 were 44,731 bales.

## RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

The port movement—the net receipts at the ports—has been but little less than in November but much in excess of December of last year. The total for the month has been 1,256,000 bales, which compares with 987,899 bales last year and 1,497,560 bales two years ago. The aggregate for the four months is therefore 1,436,249 bales greater than for the corresponding period in 1895, although 323,395 bales less than for two years ago. Foreign exports have been on a liberal scale, reaching during the month 1,078,102 bales, against 726,415 bales a year ago and 1,220,609 bales in 1894, and for the season to date the aggregate exports have been 3,427,842 bales, or 1,265,043 more than for the corresponding period of 1895. Contrasted with

1894 there is a loss of 71,662 bales. Port stocks have increased 101,120 bales during December, and are now 166,504 bales greater than on December 31 1895. Our usual table of receipts, exports and stocks is as follows :

Movement from Sept. 1, 1896, to Dec. 31 1896.	Receipts since Sept. 1, 1896.	Receipts since Sept. 1, 1895.	EXPORTS SINCE SEPT. 1, 1896 TO—				Stocks Dec. 31.

\* Great Britain exports include to the Channel.

Using the facts disclosed by the foregoing statements, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption, since September 1 this year and the two previous years, is as follows.

	1896	1895.	1894
Receipts at the ports to Dec. 31....bales.	4,923,253	3,467,001	5,246,648
Shipmentsoverland during same time	549,630	527,639	826,840
Total receipts.....bales.	5,472,883	4,014,643	6,073,488
Southern consumption since September 1	382,000	351,000	318,000
Total to Dec. 31.....bales.	5,834,883	4,368,643	6,391,488

The amount of cotton marketed since September 1 in 1896 is thus seen to be 1,466,240 bales greater than in 1895 and 556,605 bales below the total for 1894. To determine the portion which has gone into the hands of Northern spinners during the same period we have prepared the following:

Total receipts to December 31, 1896, as above.....bales.	5,834,883
Stock on hand commencement of year (Sept. 1, 1896) —	
At Northern ports.....	70,990
At Southern ports.....	151,688
At Northern interior markets.....	4,056
Total supply to December 31, 1896 .....	6,061,817
Of this supply there has been exported	
to foreign ports since Sept. 1, 1896.....	3,427,842
Less foreign cotton included .....	13,703
Sent to Canada direct from West.....	40,277
Born North and South.....	2,133
Stock on hand end of month (Dec. 31, 1896) —	
At Northern ports.....	353,638
At Southern ports .....	941,478
At Northern interior markets.....	5,639
Total takings by spinners since September 1, 1896.....	1,304,308
Taken by Southern spinners.....	362,000
Taken by Northern spinners since September 1, 1896.....	942,308
Taken by Northern spinners same time in 1895.....	946,599
Decrease in takings by Northern spinners this year .....	44,291

The above indicates that Northern spinners had up to Jan. 1 taken 942,308 bales, a decrease from the corresponding period of 1895 of 44,291 bales and a loss from the same time of 1894 of 434,846 bales.

#### AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which has already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on January 1 compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns less stock held by them at the beginning of the season. In this manner we find the result for three years on Jan. 1 to be as follows :

	1896.	1895.	1894.
Total marketed, as above.....bales.	5,834,883	4,368,643	6,391,488
Interior stocks in excess of Sept. 1.	462,581	553,000	559,000
Total in sight.....bales.	6,297,464	4,921,643	6,949,488

This indicates that the movement up to January 1 of the present year is 1,376,121 bales more than in 1895 and 651,724 bales less than in 1894.

As it will interest the reader to see what has come into sight each month of the season during this and previous years, we have prepared the following, which shows the movement for the last four seasons.

Months.	1896.	1895.	1894.	1893.
September.....	1,222,237	542,394	663,703	511,273
October.....	1,891,562	1,722,122	2,116,630	1,637,555
November.....	1,634,216	1,321,097	2,197,167	1,704,608
December.....	1,543,705	1,336,030	1,971,988	1,613,603
Total 4 months.....	6,297,764	4,921,643	6,949,488	5,467,039
Balance season.....	.....	2,240,830	2,943,278	2,060,172
Total crop.....	.....	7,162,473	9,892,766	7,527,211

#### WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to January 1 we give below our usual table of the weight of bales. We give for comparison the figures for the same time in the two previous years.

	Four months ending Dec. 31, 1896.			Same period in 1895.	Same period in 1894.
	Number of Bales.	Weight in Pounds.	Average Weight.	Average Weight.	Average Weight.
Texas .....	1,114,572	589,374,528	528.79	526.92	538.00
Louisiana.....	1,484,742	756,898,760	509.65	512.81	515.92
Alabama .....	199,512	100,753,560	505.03	499.00	512.00
Georgia.....	787,075	382,164,156	485.19	484.13	493.71
South Carolina.....	370,587	180,268,340	486.44	483.27	493.26
Virginia.....	572,978	275,630,105	481.05	484.63	493.33
North Carolina.....	205,798	100,841,020	490.00	490.37	495.54
Tennessee, &c.....	1,093,021	548,081,773	498.70	500.00	498.80
Total.....	5,834,883	2,933,812,242	502.81	503.25	509.81

\* Including Florida.

It will be noticed that the movement up to December 31 shows a decrease in the average weight as compared with the same period of last year, the average this year being 502.81 lbs. per bale, against 503.25 lbs. per bale for the same time in 1895 and 509.81 lbs. in 1894.

#### DRY GOODS TRADE DURING DECEMBER.

The market during December proved thoroughly disappointing. The demand which failed to make its appearance in November, as the outcome of the election, was expected to materialize before the end of the year, but business instead of improving shrunk within even smaller dimensions so far as home trade was concerned, and a decidedly poor month's returns have been recorded. The course of the cotton market has been a hindrance rather than a help, the print cloth situation has hung like a cloud over all departments, and serious financial troubles in the West have caused disquietude and extreme caution. A good export demand has been a redeeming feature and brown goods affected by it have ruled firm, while other brown goods, bleached cottons and coarse colored cottons have been very easy to buy, although not quotably lower. Printed fabrics have sold moderately; fancy prints opened at 5c. for spring—same price as last season. The gingham market has been dull throughout with dress styles in all grades in very indifferent request. Print cloths declined 1/4c. for regulars, with a very small business passing, and odds fully as much, with moderate sales. The month closed with enormous stocks of cloths on hand and the market, so far as regulars were concerned, purely nominal. Print cloth manufacturers are endeavoring to sell a large quantity of cloths abroad, and failing that, may adopt a pooling arrangement to

Another table, our usual monthly detailed statement of transactions on the various New York Exchanges, has also been crowded off of the first page. The results for the twelve months of the current year are, however, given below and for purposes of comparison the figures for the corresponding period of 1893 are also presented.

Description	Twelve Months, 1894.			Twelve Months, 1893.		
	Per Value or Quantity	Actual Value	Average Price	Per Value or Quantity	Actual Value	Average Price
Stocks	1,000,000	100,000,000	100	1,000,000	100,000,000	100
Bonds	1,000,000	100,000,000	100	1,000,000	100,000,000	100
Gold	1,000,000	100,000,000	100	1,000,000	100,000,000	100
Silver	1,000,000	100,000,000	100	1,000,000	100,000,000	100
Foreign	1,000,000	100,000,000	100	1,000,000	100,000,000	100
Total	1,000,000	100,000,000	100	1,000,000	100,000,000	100

The transactions of the Stock Exchange Clearing-House from December 31, down to and including Friday, January 5, also the aggregates for January to December, inclusive, in 1893 and 1894 are given in tabular form below.

STOCK EXCHANGE CLEARING HOUSE TRANSACTIONS.									
— cleared, both sides —					— Balance, one side —				
	Cleared.	Total Value.	Shares.	Value Shares.	Cash.	Cleared.	Shares.	Value Shares.	Cash.

NOTE.—Iron, wooden and other erections include all the branches of these manufacturers; machinery includes implements and tools; lumber includes saw, planing and shingle mills, car wheels and car parts; clothing includes millinery and haberdashery; hats include fur and straw hats; shoes include leather, rubber and cloth shoes; furniture includes chairs, tables, beds, etc.; hardware includes tools, stoves, etc.; jewelry includes watches, etc.; books and papers include all books and papers; hats, gloves and shoes include all hats, gloves and shoes; all other includes all other branches of business not included in the foregoing.

## Monetary and Commercial English News

[From our own correspondent.]

LONDON, THURSDAY, December 24th, 1896.

The week, which has consisted of but four working days, has been a quiet one in all the great wholesale markets throughout the country. Members of the Stock Exchange have spent their time very largely in playing practical jokes upon one another, and the general aspect of markets is of a purely holiday character.

The day following Christmas Day is observed throughout England as a public holiday, all the stock exchanges and banks and the principal business houses being closed; but as the settlement will commence on Monday next, members will have to come back to town to arrange the contingencies. The account, however, has been a very light one, and the settlement is not expected to offer any difficulty.

With the near approach of the turn of the year there has been a good demand for money, and borrowers even with the highest credit have had in some cases to go to the Bank of England and pay the full official rate of 4 per cent. Open market rates varied from 3½ to 3¾ per cent for day-to-day accommodation, while the rate of discount for three months bills is about equal to the latter figure. For long-dated paper, however, the rate asked is a full point below Bank rate, provided that the paper bears a name of unquestionable standing. Although it is now seen that we cannot expect gold from your side as soon as had been until recently looked for, nevertheless it is generally felt that the gold will come early in the ensuing year. The only serious demand likely to come upon the London market in the near future is that from India, and it is not thought that this demand will be very large. Consequently cheaper money is looked for all through the early months of next year.

Surprisingly little effect was produced by the action of the Senatorial Committee in the Cuba affair. Prices fell heavily, it is true, on Saturday morning, when the decision of the committee became known, but they recovered during the same morning, the general impression being that inasmuch as President Cleveland's Administration terminates on March 4, no action will be taken until the new Administration comes into power. Moreover, although of course immense quantities of bonds and American securities of one kind and another are held in this country, there has not been for some years past now any active speculation in these securities, and consequently there is practically no account of importance open.

The prospects for the new year in the stock markets are regarded as exceedingly good, but, as I said last week, the impression grows that we must have a real recovery in the South African department before business on the Stock Exchange can become really active. The attitude of the Transvaal Government toward the mining industry is growing increasingly benevolent, President Kruger apparently being inclined to do every thing in his power to improve the relations between the two white races in the Transvaal. It is a notable fact, moreover, that the arrival this week of Mr. Robinson and Mr. Barnato at the Cape has been followed by buying of South African securities in London upon colonial account. The argument, therefore, is that early in the new year we may look for improved business in this section; and once this market becomes active the general impression is that the activity will spread. During the year now closing activity has practically been confined to home industrial securities, including of course the issues of the great railway companies.

Motor cars owned by private individuals and driven as private carriages are to be seen every day in the principal thoroughfares, especially in the West End. Experiments have been made with a motor-car omnibus, and the trial trip was very successful; but no vehicle of this kind has yet started to run regularly between any two given points. Great interest is felt here as to the possible developments of this means of locomotion. To prevent noise the principal streets in London are paved either with asphalt or wood, and in wet weather these roads become very slippery for the horses; the mortality consequently is very great. On humanitarian principles, therefore, many people would be glad to see the London omnibus driven by motor-car power, as the horses which draw these vehicles at present are worn out in a little over three years. A company has been formed for the con-

struction of the machines, but as yet they can hardly be regarded as outside the experimental stage.

The traffic returns of the Manchester Ship Canal show an increase of somewhat over 35,000 tons in the sea-going traffic for the month of November last as compared with November of 1895. The total traffic for the eleven months shows the sea-going tonnage of 1,357,000 tons, and it is anticipated that by the end of the year the traffic will amount to 1½ million tons. Unfortunately this traffic is obtained at so low a rate of freight that the undertaking during the three years of its existence has been financially a ghastly failure. It was estimated when the canal was built that the tonnage during the first year would amount to 3 millions; at the end of the third year's working, however, it will be seen that the result is only half that amount. For some time past there has been very considerable dissatisfaction with the management of the canal, and it is hoped that very material changes in the personnel will be made when the present managing director retires in January.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1896. Dec. 23.	1895. Dec. 21.	1894. Dec. 20.	1893. Dec. 27.
Circulation	20,541,980	20,274,490	25,476,490	26,451,216
Public deposits	8,118,851	9,451,244	4,237,250	4,433,079

Messrs. Pixley & Abell write as follows under date of December 23:

Gold—There is practically no diminution in the demand, and all arrivals have met with ready sale for the Continent and India. The Bank has received £25,000 in sovereigns. Arrivals: South Africa, £289,000; Silver Plate, £76,000. Shipments: Bombay, £25,000; Madras, £1,500; Calcutta, £12,000; total, £48,500.

Silver—Silver receded to 29½d. on the 18th, and after remaining without alteration until to-day has again hardened to 30d. Supplies have not been large. Arrivals: New York, £67,000. Shipments: Bombay, £158,300; Hong Kong, £25,000; Calcutta, £10,300; total, £193,600.

Mexican Dollars—The market has hardly been so good for these coins and 29½d. is the nearest price. Arrivals: New York, £34,000. Shipments: Penang, £10,200; Singapore, £5,300; Hong Kong, £2,000; total, £41,500.

The following shows the imports of cereal produce into the United Kingdom during the first sixteen weeks of the new season compared with previous seasons:

	1896.	1895.	1894.	1893.
Imports of wheat, owt.	21,795,030	22,384,560	20,827,128	20,365,909

**CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO JAN. 1.**—The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes December 1, together with the amounts outstanding January 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to January 1.

National Bank Notes—		
Amount outstanding December 1, 1896	\$1,161,460	\$235,312,103
Amount issued during December	900,182	964,278
Amount retired during December		
Amount outstanding Jan. 1, 1897		\$235,376,381
Legal Tender Notes—		
Amount on deposit to redeem national bank notes December 1, 1896		\$18,702,419
Amount deposited during December	\$1,923,937	
Amount retired and bank notes retired in Dec	900,182	1,023,655
Amount on deposit to redeem national bank notes Jan. 1, 1897		\$18,726,074

\* Circulation of National Gold Banks, not included in above, \$66,737.

According to the above the amount of legal tenders on deposit Jan. 1 with the Treasurer of the United States to redeem national bank notes was \$18,726,074. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks reducing or retiring their circulation, was as follows on the first of each of the last five months:

Deposits by—	Sept. 1.	Oct. 1.	Nov. 1.	Dec. 1.	Jan. 1.
Insolvent banks	704,365	664,309	647,905	704,583	895,497
Liquidating banks	3,080,000	3,013,937	4,888,737	4,884,017	4,786,793
Voluntary liquidation	12,444,310	13,197,070	12,851,001	13,143,817	14,043,782
Total	16,228,675	16,875,316	18,387,643	18,732,417	19,726,074

\* Act of June 20, 1874, and July 12, 1892.

**COINAGE BY UNITED STATES MINTS.**—The following statement, kindly furnished us by the Director of the Mint, shows the coinage at the mints of the United States during the month of December and for the calendar year 1896.

Denomination	December.		Year 1896.	
	Pieces.	Value.	Pieces.	Value.

**IMPORTS AND EXPORTS FOR THE WEEK.**—The following are the imports at New York for the week ending for dry goods Dec. 31 and for the week ending for general merchandise Jan. 1; also totals since the beginning of the first week in January.

#### FOREIGN IMPORTS AT NEW YORK.

For week.	1897.	1896.	1895.	1894.
Dry goods	\$2,018,943	\$2,793,927	\$2,831,767	\$1,608,630
Gen'l merchandise	6,057,302	6,104,302	6,663,768	6,732,845
Total	\$8,076,245	\$8,898,229	\$9,495,535	\$8,341,475
Since Jan. 1.				
Dry goods	\$106,785,050	\$144,015,459	\$91,612,330	\$117,474,874
Gen'l merchandise	336,010,303	374,872,953	349,860,227	414,309,545
Total 52 weeks	\$442,795,353	\$517,888,412	\$441,472,557	\$532,184,419

NOTE.—Totals since Jan. 1 cover years 1896, 1895, 1894 and 1893.

The imports of dry goods for one week later will be found in our report of the dry goods trade.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Jan. 4 and from January 1 to date:

#### EXPORTS FROM NEW YORK FOR THE WEEK.

	1897.	1896.	1895.	1894.
For the week	\$8,047,099	\$7,227,728	\$7,846,560	\$8,037,207
Prev. reported	\$2,658,541	\$2,109,268	\$52,739,770	\$71,004,616
Total 52 weeks	\$300,745,640	\$349,336,996	\$360,086,330	\$379,041,823

NOTE.—Totals since Jan. 1 cover years 1896, 1895, 1894 and 1893.

The following table shows the exports and imports of specie at the port of New York for the week ending Jan. 2 and since January 1, 1896, and for the corresponding periods in 1895 and 1894:

#### EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Gold.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.

**WALL STREET, FRIDAY, JAN. 8, 1897—5 P. M.**

**The Money Market and Financial Situation.**—Business in Wall Street during the week now closing is somewhat different from that which preceded it in that it has been less speculative and more of an investment character. Naturally the large amount of funds distributed in the shape of interest and dividends is seeking profitable investment and the bond and stock markets are evidence that such is the fact. Moreover it seems to be generally believed that the worst results of bad legislation and bad bank management are past for the time being, and therefore the future is more promising.

There is also a better feeling in regard to investments abroad, and the disposition to regard American securities with more favor is undoubtedly increasing there. A larger demand for foreign exchange has caused an advance in rates, but the supply which is known to be available is so large that little or no attention is paid to the movement.

Among the most hopeful features of the week are the reports of railway earnings from the West, and especially the Southwest, showing, as they do, a considerable increase in traffic. Announcements of bank suspensions early in the week caused only momentary uneasiness. Reports from the cities where important failures have occurred indicate that the weak institutions are now well weeded out and that no further trouble is expected.

The money market continues easy and without new feature.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 2 per cent. Prime commercial paper is quoted at 3½ to 4½ per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £354,193, and the percentage of reserve to liabilities was 44.98, against 44.28 last week; the discount rate remains unchanged at 4 per cent. The Bank of France shows a decrease of 6,275,000 francs in gold and 2,150,000 francs in silver.

The New York City Clearing-House banks in their statement of Jan. 2 showed an increase in the reserve held of \$214,000 and a surplus over the required reserve of \$33,236,950, against \$31,309,900 the previous week.

**Foreign Exchange.**—The foreign exchange market has hardened as the week advanced, on a better demand for bills. Rates are higher, and it is reported that some investment exchange has been brought out.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4.84@4.84½; demand, 4.87@4.87½; cables, 4.87½@4.87½.

**Posted rates of leading bankers follow:**

January 8.	Sixty Days.	Demand.
Prime bankers' sterling bills on London.	1 8 1/2 @ 8 1/2	4 87 1/2 @ 88
Prime commercial.	4 83 1/2 @ 83 1/2	.....
Elementary commercial.	5 20 @ 84 1/2	.....
Paris bankers' (france).	5 20 @ 5 1/2 1/8	5 18 1/2 @ 5 17 1/8
Amsterdam (builders) bankers.	4 20 @ 40 1/2	4 0 1/2 @ 40 1/2
Frankfort or Bremen (reichmarks) b'krs	9 7 1/2 @ 95 1/8	95 7 1/2 @ 95 1/8

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1 16 premium, selling 1-16 discount; New Orleans, bank, par; commercial, \$1 25 discount; Chicago, 10c. per \$1,000 premium; St. Louis, par@25c. per \$1,000 premium.

**United States Bonds.**—Sales of Government bonds at the Board include \$37,000 4s, coup., 1925, at 121½ to 120¾; \$5,000 4s, coup., 1907, at 111½ to 111¼; \$12,000 4s, reg., 1907, at 110½ to 111, and \$1,000 currency 6s at 109¾. The following are closing quotations:

\* This is the price bid at the morning board, no sale was made.

**United States Sub-Treasury.**—The following table shows the daily receipts and payments at the Sub-Treasury during the week.

Date.	Receipts.	Payments.	Balances.		
			Coin.	Coin Cert's.	Currency.
Jan. 2	3,079,587	4,279,063	122,207,547	1,342,526	56,295,554
" 4	3,680,875	7,015,440	122,261,431	2,459,116	54,790,512
" 5	3,609,030	4,310,600	122,279,477	1,302,911	51,806,777
" 6	3,825,298	4,500,423	122,442,119	1,98,127	50,873,487
" 7	3,254,659	3,135,401	122,544,985	1,42,209	50,860,046
" 8	4,167,799	3,338,556	122,552,016	1,677,767	51,434,748
Total	21,617,220	26,997,911	-----	-----	-----

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	34 85½	34 88	Fine silver bars...	- 64½	- 65½
Napoleons.....	3 85	3 88	Five francs.....	- 93	- 95½
X & Reichmarks.	4 74	4 78	Mexican dollars....	50½	51½
25 Pesetas.....	4 77	4 83	Do unconv'tal....	- 2	- 2½
Span. Doubloons.	15 55	15 75	Peruvian sols.....	- 45½	- 46
Mex. Doubloons.	15 50	15 75	English silver....	4 80	4 88
Fine gold bars... par	24 prem.		U. S. trade dollars	- 65½	- 76

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$35,000 Virginia fund debt 2-3s of 1991 at 61 to 61½, \$18,000 Virginia 6s deferred trust receipts, stamped, at 6 and \$15,000 Tenn. settlement 3s at 80.

The market for railway bonds has been strong on a fairly good volume of business, which was generally well distributed. The active list has advanced an average of about 1 per cent. Atchison adjustment 4s, Chic. & East. Ills. 5s, Chic. & No. Pac., Mo. K. & Tex. 1sts and some of the Reading issues have advanced more than the average. The active list includes Atchison, Ches. & Ohio, Burl. & Q., Rock Island, Chic. & No. Pacific, Chic. & Eastern Ill., Erie, Kansas Pacific, Mil. & St. Paul, Mo. Kan. & Texas, New York Central, Northern Pacific, Oregon R. & N., Oregon Short Line, Reading, St. Louis & S. Fr., San A. & A. Pass., Southern Ry., Texas & Pacific, Union Pacific and Wabash bonds.

**Railroad and Miscellaneous Stocks.**—The stock market has been better sustained since the opening of the year than for some time previous. There is a sentiment more or less general that the depressing influences which recently prevailed have lost their force and that new and better conditions in all departments of activity are before us. The earnings of some important Western railway systems are relatively better than of late, and the granger stocks have advanced an average of about 1½ per cent within the week.

The anthracite coal shares have been depressed in sympathy with Delaware & Hudson Canal, which has further declined on the reduction of the dividend from 7 to 5 per cent. Delaware & Hudson, which sold on Dec. 19th at 125, declined to 110 $\frac{1}{2}$  on Thursday and closes at 111 $\frac{1}{2}$ . Reading has been relatively strong on the announcement that opposition to the completion of the reorganization had been withdrawn. Manhattan Elevated has been unsteady, closing with a net loss of 1 $\frac{1}{2}$ .

The miscellaneous list has been strong in most cases. Consolidated Gas has fluctuated between 137 and 145½, closing at 141, against 138¾ last week. U. S. Leather preferred has lost 1½ per cent, American Tobacco has fractionally declined while other active stocks of this list have generally advanced.

### HIGHEST AND LOWEST PRICES.

\* These are bid and asked; no sale made. † Less than 100 shares.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Latest Gross Earnings.				Jan. 1 to Latest Date.

\* Figures given do not include Oregon Ry. & Nav., Un. Pac. Denver & Gulf, Denver Leadville & Gunnison, Montana Union and Leavenworth Topeka & Southwestern. These figures include results on leased lines.  
 † Includes earnings from ferries, etc., not given separately. ‡ Mexican currency. § Includes only half of lines in which Union Pacific has a half interest.  
 ¶ Includes operations of the Ohio, Burlington & Northern in both years.  
 †† Covers results for lines directly operated east of Pittsburgh.  
 ‡‡ Includes results on affiliated lines.  
 §§ Covers besides the Atlantic System the Houston & Texas Central, Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:  
 For the fourth week of December our preliminary statement covers 57 roads, and shows 11.06 per cent increase in the aggregate over the same week last year.

Total (57 roads)	8,944,575	7,963,728	1,017,405	136,558
Net Increase (11.06 p.c.)			880,847	

For the third week of December our final statement covers 79 roads, and shows 0.48 per cent loss in the aggregate over the same week last year.

3d week of December.	1896.	1895.	Increase.	Decrease.
Prev'lly reported 67 rds.	6,728,630	6,915,974	275,694	363,038
Des Moines & Kan. City	2,188	1,855	333	
Via. Cent. & Pennsylvania	44,218	38,300	5,918	
Grand Trunk of Canada				
Chic. & Gr. Trunk	65,239	62,762	2,537	
Det. Gr. Haven & Mil.	19,327	16,024	3,303	
Cin. Bag. & Mackinaw	2,179	2,601		422
Tol. Bag. & Muskegon	1,511	873	638	
Indiana Decatur & West.	10,061	11,239		1,178

3d week of December	1896.	1895.	Increase.	Decrease.
Interoceanic (Mex.)	43,407	40,061	3,346	
Kookuk & Western	6,818	7,701		978
Mexican Railway	80,495	67,992	12,503	
Mexican Southern	12,245	10,661	1,584	
St. Joseph & Gd. Island	36,311	18,296	18,015	
Total (79 roads)	7,053,329	7,087,432	331,511	365,814
Net decrease 0.48 p.c.				34,103

For the month of December 79 roads (all that have furnished statements for the full month as yet) show aggregate results as follows:

Month of December.	1896.	1895.	Decrease.	Per Cent.
Gross earnings (79 roads)	35,932,312	36,377,497	445,185	1.22

It will be seen there is a loss on the roads reporting in the amount of \$445,185, or 1.22 per cent.

**Net Earnings Monthly to Latest Dates.**—The table following shows the net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of December 19, 1896. The next will appear in the issue of January 23, 1897.

a Net earnings here given are after deducting taxes.  
 b Net earnings here given are before deducting taxes.  
 c Deducting other expenditures for repairs, replacements and general expenses, net income applicable to interest on bonds in November was \$125,143, against \$101,052 last year, and from January 1 to November 30 \$1,223,139, against \$978,751. This is the result in Mexican dollars treated (according to the company's method of keeping its accounts) as equivalent to 80 cents in United States money—that is, all depreciation beyond 20 per cent has already been allowed for.  
 \* After allowing for other income received net from January 1 to November 30 was \$508,402, against \$379,012, and from July 1 to November 30 \$289,436, against \$252,967.

**Interest Charges and Surplus.**—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges.

## STREET RAILWAYS AND TRACTION COMPANIES

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of December 19, 1896. The next will appear in the issue of January 23, 1897.

### Florida Central & Peninsular Railroad.

(Results for year ending June 30, 1896.)

Earnings for the late fiscal year have been furnished to the CHRONICLE and compare as follows with previous years. It will be noted that the deficit for the year (\$111,834) occurred entirely on the leased line, the South Bound RR., the Florida Central proper showing a surplus of \$17,491.

## Brooklyn Elevated Railroad.

(Report for the year ending Dec. 31, 1896.)

President Volman in the report says in part:

**Reduction of Expenses.**—Notwithstanding the great shrinkage in earnings and the economy practiced, no expense has been spared in maintaining the property. Further reduction in operating expenses could only have been effected by reducing train service or wages. Your management deemed it unwise to do either.

**Competition.**—The large falling off in the passenger receipts of the company is to be ascribed to two causes: The hard times of 1896 and the competition of the surface roads. One of the features of the struggle between the surface railroads is the giving by each company of transfers over all its lines. The Brooklyn Heights controls and operates over 100 miles of double-track surface electric railroad. The Nassau controls and operates about 70 miles. By means of unlimited transfers a passenger by paying 5 cents becomes entitled to an almost perpetual ride. The effect of this in reducing the earnings of your company is demonstrated by this report.

**Suit as to Traffic Agreement.**—As an incident to this intense competition, the Nassau Company, without slightest pretense of an excuse, abrogated the traffic agreement which the Atlantic Avenue and West End companies entered into with this company in 1893, by which act the receipts of the latter at the Union depot, at thirty-sixth Street and Fifth Avenue were largely reduced. A suit has been begun to restrain this violation, in which a preliminary injunction is granted. This litigation should result in the payment of a considerable amount of damages to your company.

**Prospects.**—The prospects for future increase in the earnings depend generally upon the increase in the population and prosperity of Brooklyn. This, it is generally considered, will be assured as soon as Greater New York takes practical shape. In addition to this, however, it is to be expected that other events will tend to restore the earnings of the company above former figures. It is believed that the financial results of the past year will cause the surface railroad companies to settle their differences and operate their lines with a view of maintaining their valuable properties at a profit instead of at a loss.

**Merger with Kings County Elevated RR.**—Negotiations are also pending and should be completed whereby the railroads of the Kings County and Brooklyn Elevated companies would be operated under one management by traffic agreement or merger on a fair basis. This would immediately result in considerable reduction in operating expenses of the combined companies, give better service to the traveling public and result in increased receipts. New capital, however, will be essential to enable the combined companies to change their motive power, so that without increasing operating expenses cars could be operated at more frequent intervals, which of itself would add materially to earnings.

**Proposition to Run Trains Over the Bridge.**—As to this project the report says in part:

Of the greatest importance, however, is the matter of through traffic without change of cars over the New York and Brooklyn bridge. According to bridge statistics about one-half of all passengers using the railroad of the bridge arrive at and depart from the Brooklyn terminus in the elevated cars of the Brooklyn and Kings County systems. (About two-thirds of these via Brooklyn Co. one-third via Kings County Co.) In January, 1896, your officers submitted a comprehensive proposition contemplating through transportation across the bridge in the cars of the elevated railroads of Brooklyn, and which opened the way of connecting the elevated systems of both cities so that passenger transportation from Harlem to the limits of Kings County could be had without change of cars. The proposition received the approval of the mayors of both cities, and with their endorsement an enabling act was introduced in the Legislature of 1896, but it was never reported out of the Senate Committee to which it had been referred. On Oct. 28, on motion of the Mayor of Brooklyn, a resolution was passed by the bridge trustees appointing a board of three experts, who are now considering the question of the "feasibility and the practicability" of elevated cars crossing the bridge. Should through transportation without change of cars result, it is self-evident that the population of Brooklyn would rapidly increase. All railroad transportation companies, including the bridge, would share in the accompanying prosperity, and the future value of your property would be firmly established.

**Taxation.**—The State taxes have been paid at maturity. Municipal taxes on the structure have not been paid. The amount assessed by the city of Brooklyn being excessive, your officers were advised by counsel to contest the amount imposed by the courts, and these legal proceedings are now pending. The recent decision of the Appellate Division of the Supreme Court does not directly affect the contest pending as to the taxes on structure for 1895 and 1896, but decides that full taxes as assessed must be paid for 1893 and 1894.

**Financial Condition.**—The report gives no balance sheet, but the loans (bills payable) Dec. 31, 1896 (accrued by \$1,210,000 Seaside & B. B. firsts) were \$605,000, having been increased \$195,000 during the year; there was due "operating fund" \$166,172, and the total profit and loss deficiency Dec. 31, 1896, was \$182,783. Of the \$3,000,000 Seaside & Brooklyn Bridge first mortgage bonds issued, \$1,366,000 were sold to subscribers; \$1,210,000 (as above) were out as collateral; \$374,000 were held by the Central Trust Co. as trustee for account of the Brooklyn Elevated, and \$50,000 were deposited as surety in appeal cases.

**General Finances.**—The report states that after paying all interest maturing in 1896, also coupons of the Seaside & B. B. firsts and Brooklyn Elevated secondas maturing Jan. 1, 1897, the cash on hand Dec. 31, 1896, was \$62,074. The company, however, was compelled to increase its liabilities during the year 1896 \$195,000, so that the floating indebtedness Dec. 31, 1896, was \$605,000, besides local taxes in litigation. "This

seeming large indebtedness has not accrued from operation. On the contrary the company has expended for real estate, right of way and construction of the Seaside & B. B. Elevated, including the loop, \$771,172 in excess of amount realized from the sale of mortgage bonds, of which amount \$118,082 was expended in 1896."

**Statistics.**—The results for a series of years were as below:

EARNINGS, EXPENSES, CHARGES, ETC.				
	1896.	1895.	1894.	1893.
Passengers carried	32,608,587	40,068,719	33,560,462	25,392,508
Gross earnings	1,719,988	2,082,937	1,730,848	1,939,230
Oper. expenses—				
Motive power (eng.)	542,272	621,510	580,932	
Trains and station expenses	331,387	389,673	337,558	
Maint. of cars	45,744	39,036	28,433	1,096,913
Maint. of way	49,239	42,189	38,805	
Damages paid	5,834	9,143	7,540	
Gen'l & misc. ex.	59,332	56,582	49,221	
Total oper. exp.	1,029,949	1,158,233	1,041,094	1,096,913
Net earnings	692,699	924,699	689,754	742,367
Fixed charges—				
Int' on B'k'n and Union lat 6s.	570,000			
Int' on B'k'n 2d 5s.	62,450			
Int' on Sea'et' 1st 6s.	63,250	959,423	831,093	764,997
Taxes, other interest, etc.	172,384			
Tot. fixed charg.	868,084	959,423	831,093	764,997
Balance	def. 193,385	sur. 65,271	def. 141,339	def. 24,580

\* "Fixed charges" include all State and municipal taxes; but the municipal taxes on the structure have not been paid. Excluding local taxes on structure the deficiency for 1896 would be \$75,235.  
† Increase due to strike on trolley roads.—V. 63, p. 350.

## Brooklyn Rapid Transit—Brooklyn Heights Railroad.

(Statement for 12 months ending Dec. 31, 1896.)

The Brooklyn Heights RR. Co., which is controlled by the Brooklyn Rapid Transit Co., reports earnings for the calendar year (December partly estimated) as follows:

	1896.	1895.	Increase.
Gross earnings	4,548,761	3,987,296	561,465
Operating expenses	2,838,153	2,821,501	118,548
Net earnings	1,912,608	1,165,795	746,813
Other income	184,421	184,163	258
Gross income	2,097,029	1,349,958	747,070
Fixed charges and taxes	2,007,423	2,056,716	119,293
Surplus	99,506	def. 708,758	798,363

† Decrease.

The Brooklyn Queens County & Suburban RR., also controlled by the Rapid Transit Co., reports as follows for the same twelve months:

	1896.	1895.	Increase.
Gross earnings	720,300	615,264	105,036
Operating expenses	450,700	433,674	16,926
Net earnings	269,600	181,380	88,210
Other income	4,900	23,467	118,567
Gross income	274,500	204,857	69,643
Fixed charges and taxes	354,714	339,013	15,701
Deficit	79,214	134,156	154,942

† Decrease.—V. 63, p. 837.

## Montreal Street Railway Company.

(Report for the year ended September 30, 1896.)

President L. J. Forget in the report says:

The past year's business shows a net profit of \$462,107, as against \$351,349 the previous year. Out of this amount two dividends of four per cent each and a bonus of one per cent have been declared, amounting in all to \$360,000, the balance of \$102,107 being added to the surplus. The cost of operating during the entire year was 56.48 per cent of the receipts, as compared with 59.20 per cent for the previous year. The good results obtained from the conversion of the system to electricity are very apparent.

As the rapid growth of traffic and the extensions of the track required additional power and increased rolling stock, your directors are now having built an additional boiler house to supply steam to a new 2,500 horse-power direct-connected engine and generator. This will add 50 per cent more power. Fifty open motor cars were constructed in the spring and 24 closed motor cars are now under construction at the company's shops. The office buildings have been completed and have been occupied since May; the rooms not used by the company are being rented to good advantage.

Throughout the year the whole system, power plant and rolling stock have been maintained in first-class order and all necessary renewals made, and as usual the cost of this has been charged to operating expenses.

The following tables show the earnings for five years past, the income account for the year 1895-96 and the balance sheet of Sept. 30, 1896:

	1896.	1895.	1894.	1893.	1892.

## Atlantic &amp; Danville Railway.

(Report for the year ending June 30, 1896.)

The report says in part:

In the face of the unfavorable conditions, the management feel that they have reason to be gratified at the results attained, which to a considerable extent are attributable to the continuance of the policy of economy, and particularly to the improved condition of the bridges and roadbed and the acquisition of additional equipment. The reduction in the working expenses has not been effected at the expense of the condition of the road, equipment, etc.

The expenditures upon the various improvements aggregate \$129,001. The improvements projected two years ago are now completed, and the expenditure for betterments, etc., will henceforward be considerably less.

The means at the disposal of the management are ample—the current cash assets in excess of current liabilities being over \$70,000—for the acquisition of additional equipment and the carrying out of further improvements. The advisability of declaring a moderate dividend upon the preference shares has been under consideration, but the views of some of the largest shareholders are that all earnings in excess of fixed charges should for the present be so utilized as to further solidify your property, which policy will be adopted.

In the last report it was stated that "it is essential for the real prosperity of the road to extend it beyond its present Western terminus." It may in time become necessary to adopt such a course; the present intention, however, is to undertake nothing beyond probably the building of some branches, if a profitable revenue can be thereby insured.

Statistics.—Results for four years past have been as follows:

	1895-96.	1894-95.	1893-94.	1892-93.

**Altoona Clearfield & Northern R.R.—Foreclosure Sale Feb. 26.**—This narrow-gauge road is advertised to be sold at auction Feb. 26 at Altoona, Pa., under foreclosure of the mortgage of Oct. 1, 1891. The Pennsylvania Trust Co. of Reading is the mortgage trustee. The road is 13½ miles long, extending from Altoona northwesterly.—V. 63, p. 601.

**American Spirits Manufacturing—Old Leases Void.**—A press dispatch from Chicago, Jan. 7, 1897, says that the United States Court of Appeals has decided that the leases made by the old Distilling & Cattle Feeding Co. cannot be enforced and are void.—V. 63, p. 152.

**American Tobacco.—Dividends.**—As stated last week, this company has declared a dividend of 3 per cent on its common stock payable Feb. 1, 1897. The dividends on this stock in 1894 were as follows: In May, 2 per cent in cash and 20 per cent in scrip; on Dec. 1, 4 per cent in cash, making 6 per cent in cash and 20 per cent in scrip for the year.—V. 61, p. 41.

**Atchison Topeka & Santa Fe R.R.—Reinhart Case Fails.**—At Chicago, Jan. 6, a *nolle prosequi* was entered in the case of Joseph W. Reinhart, ex-President of the company, charged with giving rebates on freight rates. The Government failed to prove that Mr. Reinhart knew anything of the alleged transactions.—V. 64, p. 40.

**Bay State Gas.—Suit Involving Buchanan Settlement.**—Lawson, Weidenfeld & Co. obtained this week an order from Judge Lawrence, restraining the sale of \$250,000 of the company's capital stock and \$103,000 of its income bonds, which were pledged to secure a note for \$50,000 made in connection with the Buchanan settlement of October last. The note and securities, it is alleged, were delivered to Receiver Braman on the condition that he deliver them to Mr. Buchanan, the income bondholder, who secured the receivership of the company, if he should carry out an agreement to have the receivers discharged on Oct. 31. Mr. Weidenfeld claims that the receivers were not removed as agreed and that Mr. Braman wrongfully delivered this note to Buchanan instead of cash, and that the note and securities were to be returned if the receivers were not discharged before Oct. 31. The case will be heard Jan. 11. While Mr. Braman is not in actual possession of the property, he has not made his report to the court and therefore, as we are informed, he has not been formally discharged.—V. 63, p. 1008.

**Boston Terminal Co.—Sale of Bonds.**—A Boston paper says that the company has sold \$6,000,000 of its short-term bonds, of which \$5,000,000 are in the hands of investors. Another issue of \$2,000,000, possibly long term, will be made in the spring. The limit of the issue is the cost of the Terminal less \$500,000, which is the capital stock. The cost is expected to come under \$10,000,000.—V. 63, p. 1114.

**Brooklyn Elevated R.R.—Directors.**—At the annual meeting on Wednesday the Board of Directors elected was the same as last year, with the exception that Henry W. Putnam, Jr., takes the place made vacant by the resignation of Elbert Snedeker. The board is as follows: Ernst Thalmann, Edward Lauterbach, Leonard Lewisohn, Simon Rothschild, Jacob Scholle, Henry Sidenberg, Henry W. Putnam, Simon Thalmann, George W. Wingate, Elisha Dyer, Jr., Wm. Halls, Jr., Emil Schaefer. The annual report is given in another column.—V. 63, p. 356.

**Carolina Cumberland Gap & Chicago Ry.—Carolina & Cumberland Gap Ry.—Reorganized Company.**—The Carolina

**Cumberland Gap & Chicago Ry.** has been bought by the Carolinas & Cumberland Gap Ry., and since January 1, 1897, has been operated under that name.—V. 62, p. 1176.

**Central of Georgia Ry.—Middle Georgia & Atlantic Ry.—Purchase of Road.**—The Central of Georgia Ry. Co took possession Jan. 1 of the Middle Georgia & Atlantic Ry., which was purchased at private sale on or about Dec. 25. The new acquisition extends from Milledgeville, Ga., to Covington, Ga., 65 miles. On January 5 the stockholders of the Central of Georgia confirmed the purchase, which was made by President Comer. It is said the Central paid \$9,000 a mile for the property, but this is not confirmed.

**New Directors. Etc.**—Also at the meeting Jan. 5 the stockholders unanimously confirmed the appointment of Mr. C. W. Haskins of New York as Controller of the system and adopted the amendment to the charter increasing the directors from thirteen to fifteen. Those elected were President Samuel Spencer of the Southern Railway and Mr. A. R. Lawton, Jr.—V. 63, p. 1160.

**Central Ohio RR.—Baltimore & Ohio RR.—Conference as to Monies Due.**—At Baltimore Jan. 4 a committee of the directors of the Central Ohio appointed for the purpose had a conference with the receivers of the Baltimore & Ohio RR. Co. regarding the monies (said to aggregate \$75,000) which are due the Central Ohio under its lease. The directors it is stated were satisfied with the explanation given them by the receivers. Under the orders of court the earnings of the Central Ohio it is stated are being applied to the payment of its operating expenses and the interest on its bonds, and any surplus remaining thereafter will be turned over to the officers of the Central Ohio. For the time being the lease of the road is suspended, the receivers not being allowed to pay the rental for the road from money earned on other portions of the B. & O. system.—V. 63, p. 1007; V. 64, p. 40.

**Central RR. of Vermont.—Default Jan. 1.**—As expected, the coupons due Jan. 1, 1897, on the \$7,000,000 first mortgage bonds of the Consolidated R. R. of Vermont went to default. It is reported from Boston that the Bondholders' Committee now represents \$3,650,000 of these bonds, or a majority of the \$7,000,000 issue.—V. 64, p. 41.

**Chattanooga Rome & Columbus RR.—Reorganization Notice.**—Simon Borg & Co., committee, notified holders of the first mortgage 5s early this week that those desiring to participate in the purchase of the property should deposit their bonds with the Central Trust Co. of New York on or before the seventh day of January, 1897, after which date no bonds would be received on deposit.—V. 63, p. 1114.

**Chester County Central Electric Ry.—Mortgage for \$600,000 Filed.**—This company has filed a mortgage for \$600,000 to the Fidelity Insurance Trust & Safe Deposit Company of Philadelphia, as trustee, to secure 5 per cent gold bonds. Over \$100,000 of the bonds, it is stated, have been sold and construction will be commenced in a short time. The line is to extend from Philadelphia to West Chester, 23 miles.

**Cincinnati Hamilton & Dayton Traction Co.—Cincinnati Hamilton & Dayton Ry.—Electric Lines for a Steam Road.**—The Cincinnati Hamilton & Dayton Traction Co. has been incorporated at Columbus to build and operate rapid transit lines in connection with the Cincinnati Hamilton & Dayton Railway. The incorporators of the new company are D. G. Edwards, C. G. Waldo, George R. Balch, R. P. Rifenberck and C. A. Wilson. They are all in the employ of the C. H. & D. Ry. Co.

As explaining this move, the following special dispatch to the Cincinnati "Commercial Tribune" from Middletown, Ohio, under date of Nov. 19, 1896, is quoted:

Captain R. P. Rifenberck, of the C. H. & D. Railway, to day consummated a deal with F. H. Douglass whereby the Middletown & Miami Street Ry. Co. passes into his possession as trustee for the C. H. & D. Captain Rifenberck states that the C. H. & D. proposes operating an electric road over the present line of the Cincinnati & Dayton RR., a small branch of the C. H. & D., connecting Middletown and Hamilton, and needs the M. & M. as an adjunct thereto. This, Captain Rifenberck contends, will enable the C. H. & D. to take passengers from the centre of Middletown to Hamilton by electric road. He further states that the C. H. & D. proposes extending an electric line through to Cincinnati in a short while. This will be done in order to meet the competition that seems to be coming, and as a means of self preservation, as he puts it. He explains that with an electric line the C. H. & D. can compete with the Miami Valley Traction Co. without furnishing passenger agents of other lines a basis for settlement of transportation accounts detrimental to the C. H. & D. interests.

It is thought the electric line into Cincinnati will be additional to the main tracks of the C. H. & D., which are already crowded.—V. 63, p. 504.

**Cincinnati Jackson & Mackinaw Ry.—Sold in Foreclosure.**—This road was purchased at foreclosure Jan. 5 for \$1,000,000 by Calvin S. Brice, representing the Reorganization Committee.—V. 64, p. 41.

**Commercial Cable.—Mortgage Filed.**—The company has filed a mortgage on all its property, including the Postal Telegraph Co., to secure the \$20,000,000 bonds recently described in these columns.—V. 64, p. 41.

**Consolidation Coal.—Bonds Subscribed.**—President C. K. Lord reports that the new 4½ per cent bonds issued to take up the 6 per cents on Jan. 1 were largely over-subscribed at par.—V. 63, p. 1162.

**Continental Match.—National Match.—Factories Purchased.**—A press dispatch from Camden, N. J., Dec. 30, says that two of Camden's three match factories have changed

hands. Henceforth the Keynote Match Company will be operated by the Continental Match Company, and the New Jersey Match Company by a syndicate to be called the National Match Company. Both factories have been idle for the past two years.

**Delaware & Hudson Canal.—Dividend for 1897 Reduced to 5 Per Cent.**—The directors on Wednesday voted to reduce the dividends to be paid this year from 7 per cent per annum, which has been the rate since 1899, to 5 per cent. While the company has a large surplus from the operations of previous years, it was decided not to draw upon it in order to maintain dividends at the old rate.—V. 63, p. 410.

**Detroit Electric Ry.—Detroit Citizens' Street Ry.—Fort Wayne & Belle Isle Ry.—Purchase of Securities.**—Most of the stock and bonds of the Fort Wayne & Belle Isle Ry., it is announced, have been purchased by Tom L. Johnson and Albert Pack, in the interest of the Detroit Citizens' Street Ry. and Detroit Electric Ry., of which companies they are respectively the presidents. The purchase price is said in the daily press to be about \$1,100,000.—V. 62, p. 635; V. 63, p. 116, 922.

**Detroit Grand Rapids & Western RR.—Detroit Lansing & Northern RR.—Reorganized Company.**—The reorganized company, the Detroit Grand Rapids & Western, on January 1 took possession of the former Detroit Lansing & Northern RR., Saginaw & Western RR., Saginaw Valley & St. Louis RR., Grand Rapids Lansing & Detroit RR., Saginaw & Grand Rapids RR. Its officers are Charles M. Heald, President and General Manager, office, Grand Rapids, Mich.; E. V. R. Thayer, Vice-President, Charles Merriam, Secretary and Treasurer, offices, Boston, Mass. The new securities will be ready about Feb. 15, 1897.—V. 63, p. 1063.

**Fort Worth & Denver City RR.—Officers Elected.**—At a meeting of the directors recently in Fort Worth, Tex., K. M. Van Zandt resigned as a director and Morgan Jones was elected in his stead. The officers elected are: G. M. Dodge of New York, President; Morgan Jones, Vice-President; K. M. Van Zandt, Treasurer, and George Strong, Secretary, all of Fort Worth. Morgan Jones is General Manager and J. V. Goode General Superintendent.—V. 63, p. 1063.

**Georgia & Alabama Ry.—Merger of Columbus Southern New Bonds.**—As already stated in this column the Columbus & Southern RR. from Columbus, Ga., to Albany, Ga., has been merged with the Georgia & Alabama Ry., the merger being completely effective on Dec. 31 at midnight, since when the Columbus & Southern RR. has lost its identity by consolidation with the Georgia & Alabama Ry. That portion of the Columbus & Southern RR. extending from Richland to Columbus will hereafter be known as the Columbus Division of the G. & A. Ry. and that portion from Richland to Albany as the Albany Division. The Georgia & Alabama Ry. will extend its first mortgage over the newly acquired property, issuing first mortgage preference bonds at the rate of \$6,500 per mile and first mortgage consolidated bonds at the rate of \$9,000 per mile. Some of these bonds have been sold by the company to pay for the Columbus Southern property, but the majority of them will be turned into the company's treasury as treasury assets.—V. 63, p. 1062.

**Gettysburg & Harrisburg Ry.—Reorganization.**—This company is successor of the Gettysburg & Harrisburg Railroad, whose line extended from Carlisle, Pa., to Round Top, Pa. The company is operated as a separate organization but in close connection with the Pennsylvania R. R., its officers being Jos. S. Harris, President; W. R. Taylor, Secretary; W. A. Church, Treasurer; Daniel Jones, Comptroller.

**Gloucester Essex & Beverley Street Ry.—New Mortgage.**—This company has made a mortgage to the American Loan & Trust Co. of Boston, as trustee, to secure \$125,000 of 5 per cent gold bonds.

**Greenwood Anderson & Western Ry.—South Carolina Midland RR.—Temporary Receivers Appointed.**—At Charleston, S. C., Jan. 5, in the United States Circuit Court, Judge Simonton issued an order appointing Mike Brown and T. B. Lee temporary receivers of these companies. The order is made returnable on Feb. 1.—V. 63, p. 1115.

**Iowa Water Co.—Consols Subject to Penalty after Jan. 15.**—Of the \$349,000 consols outstanding, \$292,000 have been deposited with the Farmers Loan & Trust Co., pursuant to the bondholders' agreement. The foreclosure case has been argued and early in January a decree of foreclosure and sale is expected. After Jan. 15 no bonds will be received except upon a deposit for expenses of \$50 per bond.

**Kentucky & Indiana Bridge.—Foreclosure Decree Entered.**—The decree of sale in conformation with the rulings of Judge Barr has been formally entered in the United States Court. The demurrer of W. T. Grant and others concerning about \$300,000 first mortgage bonds was submitted. The upset price is fixed at \$700,000, subject to the first mortgage of \$1,000,000, which the purchasers must assume. The first mortgage has a lien on the entire structure with the exception of a small piece of property over which the mortgage to the Columbia Trust Company is given priority. The second mortgage bondholders have a second mortgage on the bridge and a third mortgage on the terminals, and the terminal bondholders have a second mortgage on the terminals.—V. 63, p. 1009.

**Kentucky Midland.—Sold in Foreclosure.**—This property was sold under foreclosure at Frankfort, Ky., Jan. 4, for \$150,000 (the upset price and the only bid) to Attila Cox,

representing, it is said, the Columbia Finance & Trust Co. of Louisville, which is acting on behalf of the creditors. Col Cox is quoted as saying that a meeting of the bondholders will be held in about two weeks to consider reorganization. The road extends from Frankfort to Paris, Ky., 40 miles, and for the year ending June 30, 1895, had gross earnings of \$56,915; net \$3,241.—V. 63, p. 754.

**Kings County Elevated RR.—Brooklyn Elevated RR.—Default.—Negotiations for Merger.**—Default occurred Jan. 1, 1897, on the first mortgage bonds of the Kings County Elevated RR. The default was expected, the road being in receiver's hands.

The report of the Brooklyn Elevated RR., issued this week, says: "Negotiations are pending and should be completed whereby the railroads of the Kings County and Brooklyn Elevated companies would be operated under one management by traffic agreement or merger, on a fair basis. This would immediately result in considerable reduction in operating expenses of the combined companies, give better service to the traveling public and result in increased receipts. New capital, however, will be essential to enable the combined companies to change their motive power, so that without increasing operating expenses cars could be operated at more frequent intervals, which of itself would add materially to earnings."

**Notice to Bondholders.**—August Belmont, Wm. A. Read and Walter G. Oakman inform holders of Kings County Elevated RR. Co. first mortgage bonds and Fulton Elevated RR. Co. first mortgage bonds that, at the request of holders of a large amount of above bonds, they have consented to act as a committee for the protection of their interests. Bondholders are requested to send to any member of the committee their names and addresses and the amount of their holdings, in order to be duly advised of any action that may be taken looking to their protection.—V. 63, p. 754.

**Kings County Traction Co.—First Dividend.**—This company, which, as successor to the Brooklyn Traction Co., is owner of the stock of the Atlantic Avenue RR. (leased to the Nassau Electric RR. Co.), has declared its first dividend, namely, 1 per cent, payable at the Central Trust Co. of New York on Jan. 25.—V. 62, p. 890.

**Lehigh & Hudson River Ry.—New General Mortgage.**—The stockholders will vote Jan. 13 on the proposition to sell \$500,000 general mortgage bonds to pay the floating debt and other indebtedness.—V. 63, p. 1011.

**Long Island Bank.—Sixty Per Cent Dividend from Assets.**—The Brooklyn "Eagle" says:

The Long Island Bank directors have declared a dividend of 60 per cent payable on Jan. 5. This bank since it decided to wind up its affairs has paid out about \$1,250,000 to depositors. The dividends will amount to \$240,000. Some time during the next three months another dividend will be paid and stockholders will eventually receive considerably more than par for their holdings. Crowell Hadden is President of the bank.—V. 63, p. 269.

**Long Island RR.—Sale of Control.**—Negotiations were concluded Thursday for the sale of the \$3,000,000 stock belonging to the Corbin estate to a syndicate. The price paid is reported as between 40 and 45. The stock purchased, together with the \$3,500,000 owned by Mr. Pratt, gives an absolute majority of the \$12,000,000 of capital stock.

George W. Young, President of the United States Mortgage & Trust Co., has given the following facts to the New York News Bureau:

"The Corbin interest has been purchased by the United States Mortgage & Trust Co. for the account of a syndicate which will act in conjunction with Mr. Pratt in the future development of the interests of the railroad. Among the members of the syndicate are August Belmont, William A. Read, of Vermilye & Co.; Brown Bros. & Co., Charles D. Dickey, Jr., Theodore A. Havemeyer, Strong, Sturgis & Co., Kessler & Co., Frederic G. Bourne, George F. Baker, and others.

"The syndicate, in co-operating with the Pratt interest in the development and improvement of the property as it now exists, will also take prompt steps towards providing more satisfactory New York and Brooklyn terminal facilities. In the formation of the syndicate especial care has been taken to select members who are experienced in the management of railroad properties, and who, at the same time, as residents or property owners, are interested in the future development of Long Island."

**Rapid Transit into New York City.**—The company has extensive plans for furnishing rapid transit direct from New York City to all points east of Jamaica, covering the distance from New York to Jamaica in twenty minutes. Electricity for motive power and a roadway partly elevated and partly tunnel are to be utilized between the two points named. The object of the plan is to extend the company's zone of heavy business to a distance outside the reach of trolley competition.

The report of the Atlantic Avenue Commission embodies the following plan, which has received "the practical acceptance" of the company, provided the city will bear its share of the expense as to the Atlantic Avenue improvement:

The Long Island RR. shall build a subway eastward from Flatbush Avenue to Bedford and Nostrand Avenues, whence an elevated way will be built to Howard Avenue; from there an underground section is proposed, coming to the surface at East New York. From East New York an elevated section will be built to Atkins Ave., from which point the present surface tracks of the road are to be used.

The plan proposed for the company is to construct a tunnel from the junction of Flatbush and Atlantic avenues, Brooklyn, to New York City, where the surface entrance is to be at the corner of Church and Cortlandt streets. At Walla Lane and Pearl Street, connections are proposed with the Manhattan Elevated RR. system by means of an elevator. The tunnel is to pass under the East River and under Fulton Street, Brooklyn, with a station near the Brooklyn City Hall, terminating with a surface entrance at the Long Island RR. station at Flatbush and Atlantic avenues. A company has been organized to build the tunnel.

A double-track surface trolley line to be built on Atlantic Avenue from Flatbush Avenue to East New York for the accommodation of local travel.

**New York & Long Island Bridge.**—The building of the bridge at Long Island City, it is stated, will be deferred until the above plans can be carried out. Representative McCormick has therefore introduced a bill at Washington to extend the time for the completion of the bridge until Jan. 1, 1902.—V. 64, p. 42.

**Mahoning Valley Electric Ry., Youngstown, O.—New Mortgage.**—This company, of Youngstown, O., has made a mortgage for \$1,200,000 to the Central Trust Company of New York, as trustee, to provide for refunding and the making of extensive improvements on the lines through that city and extending to Niles. The company was formed Dec. 1 by the consolidation of the Youngstown Street Ry. and the Mahoning Valley Ry.—V. 63, p. 931.

**Manhattan Ry.—Dividend Suit Denied.**—Attorney-General Hancock on Saturday refused the petition of Mortimer Hendricks, who asked that the Attorney-General bring an action in the name of the people of the State of New York to remove the directors of the Manhattan Railway Company and to compel them to pay back to the company dividends paid out in 1895 and 1896, which, he alleges, were illegally paid.—V. 64, p. 42.

**Memphis & Charleston RR.—Foreclosure Proceedings.**—The hearing in the foreclosure suit came up last week at Nashville. Counsel were directed to submit briefs.—V. 64, p. 42.

**New Orleans & Southern RR.—Sale Confirmed.**—The sale of this road to E. A. Hopkins has been confirmed by the Federal Court at New Orleans, La., and the road will be transferred to the purchaser upon the expiration of the lease to the New Orleans & Western in February. The receiver, it is stated, is ordered to complete the tearing up of the 20 miles of track from Belaire to Bohemia and deposit the rails at Poydras Junction.—V. 63, p. 880.

**New York & Brooklyn RR.—Progress of Plan for East River Tunnel.**—The State Railroad Commissioners having given their consent to the construction of the tunnel, the following facts as to the status of the enterprise are pertinent:

The New York terminal will be in a building to be erected for the purpose at the corner of Ann Street and Park Row. The Brooklyn terminal will be on the west side of Furman Street, probably opposite Fulton Street. The company has been unable to get a franchise from the Brooklyn Aldermen, and that which it holds from the New York Board only gives rights as far as the Brooklyn water front. The tunnel will be entirely in rock, the maximum grade at the New York end being 4 per cent and at the Brooklyn end 4½ per cent. The contract has been given to the Columbia Construction Co., of which Mr. Frederick B. Esler is President. Borings will be begun within a few days to determine accurately the conditions of the river bottom. It is expected that the electric surface roads of Brooklyn will run through to New York without transferring the passengers. It is hoped to have the tunnel in operation by Jan. 1, 1898.—V. 63, p. 794.

**Norwich & Worcester RR.—New England RR.—Amended Lease.—New Securities.**—At the annual meeting Jan. 18 the stockholders of the Norwich & Worcester will act on an amended lease to the New England RR., and on propositions to issue stock or bonds in order to retire \$400,000 6 per cent bonds due March 1, 1897, and to pay the floating debt of the railroad; also that of the Norwich & New York Transportation Co.; and to build an extension from Allyn's Point to Groton, Ct., about 6½ miles. The amended lease provides, it is said, that the lessee shall operate the property in place of the lessor, and that the dividends shall be paid quarterly instead of half yearly at the same rate per annum as now, or 8 per cent.—V. 63, p. 968.

**Northern Pacific Ry.—Old Securities Struck from List.**—The New York Stock Exchange has struck from its list the following securities, all of which have been superseded by securities of the new company: The J. P. Morgan & Co. certificates of deposits for common and preferred stock for the general first mortgage 6s, general second mortgage 6s and the collateral trust notes.

**Payment on Duluth & Manitoba Certificates.**—The Guaranty Trust Company began paying on Jan. 4 to the holders of the trust certificates for Duluth & Manitoba RR. 1st mortgage bonds, Minnesota Division, the sum of \$32 74 with respect to each \$1,000 bond represented by such certificate, being six months' interest at 5 per cent less the proportional rebate of interest on the ten per centum paid in cash on account of the purchase price of the bonds.

**Lands Under Old Preferred Stock.**—As already stated in the CHRONICLE (V. 63, p. 1070), the new company has all along had in view the taking of the necessary legal measures to acquire title to the lands covered by the old company's preferred stock, and to make them subject to its mortgages, these lands not having been included in the foreclosure sale. This week, accordingly, the Northern Pacific Railway Co. as holder of deficiency judgments and of 95 per cent of the preferred shares filed claims at Milwaukee upon the lands in order to secure possession.—V. 63, p. 1116.

**Ohio Southern RR.—Notice to Bondholders.—Receivers' Certificates.**—The first mortgage bondholders' committee is

informed that application is about to be made to the Court for authority to issue receivers' certificates, which shall rank ahead of the first mortgage. The committee, therefore, urges bondholders who have not already deposited their bonds with the Central Trust Company under the agreement to do so at once. Foreclosure proceedings will be commenced in case the coupons of December, 1896, now in default, are not paid within the required time, that is before March 1, 1897. The time for deposit of bonds is limited to Jan. 23, after which no bonds will be received except on terms to be fixed later by the committee.—V. 64, p. 42.

**Oregon Ry. & Navigation—Sinking Fund Payments.**—Of the first mortgage of the Farmers' Loan & Trust Co. has drawn \$33,000 for redemption at par, and has accepted offers for \$103,000 at 110 for the sinking fund.—V. 63, p. 963.

**Oregon Short Line & Utah Northern Railway Co.—Coupon Payment.**—The coupons due Jan. 1, 1897, \$45 each, from Utah & Northern first mortgage, were paid Jan. 6, 1897, at the Union Trust Co. or at the office of James G. Harris, No. 92 Ames Building, Boston.—V. 64, p. 12.

**Owensboro Falls of Rough & Green River RR.—Foreclosure Sale.**—This sale is advertised for April 9 at Owensboro, Kentucky.—V. 63, p. 1064.

**Philadelphia Reading & New England RR.—Reorganization Notice.**—The committee, consisting of John S. Wilson, John Sailer, William H. Jenks, Joseph Moore, Jr., and Harry A. B. Wind, having its office at 230, Ballitt Building, Philadelphia, gives the following notice:

Under an agreement dated Dec. 23, 1895, between this Committee and the Girard Life Insurance, Annuity & Trust Co. of Philadelphia, a large number of first mortgage bonds have been deposited with the Trust Company. At a meeting of depositing bondholders held Dec. 19, 1896, the committee was authorized to press for a foreclosure of the property in case a sale of the bonds could not be made within a short time at a satisfactory price. The committee invites all holders of first mortgage bonds to deposit their bonds immediately with the Girard Life Insurance, Annuity & Trust Co., for which its negotiable receipts will be issued.—V. 63, p. 1159.

**Pittsburg & Western RR.—Provision for Car Trusts.**—Receiver King has made an arrangement with the Finance Company of Philadelphia by which the car trust payments are extended over a series of years. The amount of the Pittsburg & Western car trusts was given in March, 1896, as \$577,435.—V. 63, p. 1011.

**Quincy Omaha & Kansas City Ry.—Omaha & St. Louis RR.—Omaha Kansas City & Eastern Ry.—Reorganization Plan—Lease.**—As stated in the CHRONICLE of Dec. 25, 1896, p. 1159, the non-preferred bondholders of the Quincy Omaha & Kansas City Ry. are requested to deposit their holdings with the Guaranty Trust Co. of this city, subject to the terms of the amended agreement of Nov. 10, 1896, receiving engraved certificates therefor and "the payment of the first year's interest under the proposed lease."

The agreement amending that of May 26, 1892, was adopted as of Nov. 10, 1896, at a meeting of the bondholders on Dec. 2, but its terms have not heretofore been published. They are contained in the pamphlet issued under date of Sept. 12, 1896, by the bondholders' committee, consisting of Charles H. Bull and Ward W. Jacobs. The amendment authorized the carrying out of a contract of sale and lease with a syndicate represented by Gilman, Son & Co., of this city, Mr. Gilman having resigned from the committee to join the syndicate. The Q. O. & K. C. Railway when purchased at foreclosure sale is to be leased to the syndicate until Sept. 12, 1900, unless purchased earlier by the syndicate in the manner below indicated. Under the terms of the lease the syndicate agrees to pay the interest of \$12,500 yearly on the preferred bonds and to pay on account of the non-preferred bonds interest at the following rates from the time that possession of the road is delivered, the trustees of the Q. O. & K. C. also agreeing from funds on hand to pay the interest at the rates here shown from Sept. 12, 1895, until the delivery is made: to Sept. 12, 1897, \$16 per \$1,000 bond; there after \$21, together with all taxes and charges.

On or before Sept. 12, 1900, the syndicate will give the holders of certificates representing the non-preferred bonds of the Q. O. & K. C. the option of receiving either 70 per cent in cash for the face value of their securities, or securities of the Omaha Kansas City & Eastern RR. (see INVESTORS' SUPPLEMENT) to the amount of \$400 first mortgage and \$100 second mortgage income bonds for each \$1,000 bond surrendered.

The syndicate has also contracted to purchase the Omaha & St. Louis RR., as stated in V. 62, p. 822, agreeing within five years to pay for its first mortgage bonds 75 per cent in the first mortgage 4 per cent bonds and 25 per cent in the income bonds of the Omaha Kansas City & Eastern. Pending completion of the purchase interest is paid, as stated last week, at the rate of 4 per cent per annum (2 per cent semi-annually) on the 75 per cent to which the bonds are entitled in the new first mortgage bonds.

The Omaha Kansas City & Eastern Ry. has been incorporated and is building the line from Trenton to Pattonsburg, Mo., 30 miles to connect the Omaha & St. Louis and the Quincy Omaha & Kansas City. The syndicate agrees that its line as completed (and including the lines above mentioned and the Kansas City & Northern Connecting RR.; all of which it is proposed to merge into the O. K. C. & E.) shall extend from some competitive point east of the Mississippi (Hards-town on the Baltimore & Ohio Southwestern has been talked off to some points on the Missouri River, the points in view being Omaha and Kansas City, forming a northerly outlet for

the Kansas City Pittsburg & Gulf, shortly to be completed to the Gulf of Mexico. See maps of the Kansas City & Northern Connecting and the Kansas City Pittsburg & Gulf roads in the INVESTORS' SUPPLEMENT and official statement in v. 62, p. 1176.—V. 63, p. 1159; V. 64, p. 42.

**Railroad Building in 1896.—New Mileage Built.**—The new construction during 1896, as reported by the "Railway Age" and the "Railroad Gazette," is as follows:

States.	Lines.	Miles.	States.	Lines.	Miles.

**Rapid Transit in New York City.**—The Rapid Transit Commissioners have held public hearings this week regarding the new route adopted provisionally at their meeting Dec. 31. The new route is as follows:

A two-track underground road from South Ferry along Broadway and Park Row to Chambers street. A four-track underground road from Chambers street along Elm street, Fourth avenue, Forty-second street, Broadway and the Boulevard, to One Hundred and Fourth street. A two-track road from One Hundred and Fourth Street, running northerly along the Boulevard, Eleventh avenue, Elwood street, and Broadway to a point in Kingsbridge north of the Harlem River, the road to be underground except across the Manhattan valley and the Harlem River, which will be bridged by the road.

A two-track road from 104th Street, running northeasterly under private property, 106th Street and Central Park to Lenox Avenue, and then northerly along Lenox Avenue to the north side of the Harlem River, and then to B o x Park, the road to be underground, with a tunnel under the Harlem River, to a point east of Third Avenue, beyond which there will be no elevated road.

Loops will be constructed at South Ferry and in City Hall Park, underground.

Something less than \$35,000,000, it is said, would build the road.—V. 63, p. 1116.

**Reading Company.—Philadelphia & Reading Ry.—Charter Upheld.**—Attorney General McCormick, of Pennsylvania, on Jan. 2, rendered an opinion confirming the validity of the charter of "the Reading Company." The opinion requires fully the history of the charter, which was granted by an act approved May 24, 1871, to the Excelsior Enterprise Co. The Excelsior Co. changed its name March 31, 1873, to the National Company and the latter its name on Nov. 9, 1896, to "the Reading Company."

The minutes of the meetings are quoted, showing the business done in their early days. For instance, in 1893, the Excelsior Enterprise Company (or its successor, the National Co.), purchased the capital stock of the National Railway [now the Delaware & Bound Brook RR.], agreed to guarantee its bonds, as also those of the Philadelphia & Yardleyville RR., and made contracts for the construction of their roads. On Dec. 26, 1873, a proposal for the rebuilding of the National Railway from Bound Brook to the Delaware River was received and referred to the executive committee, and details were perfected for settling the floating debt of the National Railway Co. Other meetings were held in 1874; and in 1875 and since, except in 1881 and 1882, annual meetings were held for the election of officers.

The opinion concludes as follows:

The powers written into the charter of the corporation, while, in my opinion, identical to the best interests of the Commonwealth, are nevertheless powers granted by the State, accepted by the corporation, and acted upon by them, and those dealing with the company. Nor do I think the non-use of the corporate franchises after 1875 for a long period is ground of forfeiture. The organization, as we have noticed, has been constantly kept up. The corporation is a private one, and the public had no interest in the use of the powers granted. The franchise to be a corporation was expressly retained by the annual elections of officers and appears never to have been abandoned.

After due consideration, I reach the conclusion, most reluctantly, that the Commonwealth of Pennsylvania cannot now successfully attack the chartered rights of the Reading Company, at least, the rights of such a nature and character as had been exercised by the corporation prior to January 1, 1874. It had power to do the business in which it was engaged prior to the adoption of the new constitution. Whether the other grants of special privileges, of the varied kinds set forth in the charter, continued after January 1, 1874, is a question that may be determined hereafter or when the occasion arises. [Here follows a quotation from Justice Williams, in Crothers appeal, 118 P. S. 48; then the opinion proceeds.—Eds.] My view of the whole matter is that the charter of the company authorized it to do the kind of business in which it engaged prior to January 1, 1874, which business was of the same general character as that in which it proposes to engage for the purpose of consolidating the stocks of the Railway Company and the Coal & Iron Company.

The act conferring the charter to the Excelsior Enterprise Co. was quoted in the CHRONICLE of Nov. 21, 1896, page 938.

**Operation of Phila. Newtown & New York RR. and Stony Creek RR.**—The Philadelphia & Reading Ry. on Jan. 1 took over the operation of these roads, which have long been allied to the Reading system.

**New Securities.**—Joseph S. Harris, President of the Reading Company, announces that the Reading Company has acquired and now holds the capital stock and the 20,000,000 bonds issued by the Philadelphia & Reading Railway Company and the capital stock of the Philadelphia & Reading

Coal & Iron Company; also all the equipment, real estate and miscellaneous stocks and bonds formerly owned but separately pledged by the old railroad company. The Reading Company has increased its capital stock to \$23,000,000 first preferred, \$42,000,000 second preferred and \$70,000,000 common, as proposed by the plan of reorganization and jointly with the Coal & Iron Company has authorized a joint mortgage to secure bonds up to a possible amount of \$135,000,000, to be secured on the property of both companies, including the stock and bonds of the railway company. The new bonds thus have the security of the entire Reading system, railways, equipment, real estate, coal lands and miscellaneous stocks and bonds of great value. The new stocks and bonds are expected to be ready for delivery to the public inside of sixty days.

**Securities Listed in Philadelphia.**—The Reading Terminal bonds of 1891 due May 1, 1941, for \$3,500,000, have been listed on the Philadelphia Stock Exchange. The statement to the Exchange says in part:

Both principal and interest are payable in gold coin, free of tax. The bonds were issued by the Philadelphia & Reading RR. in payment for the stock of the Philadelphia & Reading Terminal RR. Co., and the proceeds used for the construction of the Terminal RR., including the terminal station and building at Twelfth and Market streets, Philadelphia. The bonds are secured by the deposit in pledge of 168,950 shares of the capital stock of the Philadelphia & Reading Terminal RR. Co. with the Provident Life & Trust Co., trustee, and by the guaranty of the Philadelphia & Reading Terminal RR. Co., which guaranty is secured by a mortgage delivered by the Philadelphia & Reading Terminal RR. Co. to the Provident Life & Trust Co., trustee, conveying all the company's railroad, real estate, rights, privileges, franchises, etc., now owned or to be hereafter acquired, as described in said mortgage. They are further secured by a traffic agreement dated May 1st, 1891. The Terminal RR. extends from Ninth Street and Fairmount Avenue to Twelfth and Market streets, with a branch from Broad and Noble streets, to a connection with the main line near Twelfth and Callowhill streets, Philadelphia. Length of road, 1.3 miles; total single track, 5.7 miles; steel rails, gauge, 4 feet 8½ inches; no equipment; capital stock, \$4,500,000; par value of shares, \$50; full paid. Floating debt, \$2,357,505, balance of advances for construction in excess of proceeds of bonds.

**Equitable Interest Certificates.**—These certificates have been paid at 105 at the Central Trust Co., interest ceasing Jan. 5, 1897.

**Delaware River Terminal Extension Bonds Adjustment.**—The coupons due January 1, 1897, were paid at maturity to the holders of the Delaware River Terminal Extension 5s who have assented to an agreement which can be had upon application to the trustee [the Guarantee Trust Co. of Philadelphia]. Interest on the Delaware River Terminal bonds due Nov. 20, 1896, was paid by the receivers. We are informed that it is not proposed to scale either principal or interest of either issue, but if the agreement with the Delaware River Terminal Extension bondholders does not go through unanimously there may be a default on both issues. Of the total issue of Delaware River Terminal Extension bonds of \$1,222,000, holders of all but 19 bonds have either deposited their holdings under the agreement or announced their intention to do so.—V. 63, p. 1159; V. 64, p. 42.

**Rutland RR.—Dividend—Earnings.**—A dividend of 1 per cent on the preferred stock was announced last week. For the four and three-fourths months from May 8, when the company took possession of its property, till Sept. 31, 1896, the gross earnings were \$129,899 and net \$143,464. The interest charge for the same period being about \$36,000, a surplus of about \$82,000 was available for other purposes (taxes, etc.). The dividend calls for \$42,000. The earnings cover the best part of the year. President Clement is quoted as saying that the floating debt has been paid and many improvements made.—V. 63, p. 754.

**St. Joseph & Grand Island Ry.—Successor Company.**—The St. Joseph & Grand Island RR. having been foreclosed, the Grand Island Hastings & Southeastern has been incorporated in Nebraska, and a new company has also been chartered in Kansas, and the two companies will be consolidated as the St. Joseph & Grand Island Ry., the only change in the name being the substitution of the word railway for railroad. Mr. William L. Bull will be the President of the new company.—V. 63, p. 1159.

**St. Louis Salem & Arkansas RR.—St. Louis & San Francisco RR.—Foreclosure Suit Filed.**—At St. Louis, Jan. 6, the Mercantile Trust Co., as mortgage trustee, filed a bill for foreclosure against the St. Louis Salem & Arkansas RR. The St. Louis & San Francisco RR. owns nearly all the bonds, having obtained them under the offer in V. 63, p. 1140; V. 63, p. 1160.

**Savannah (Ga.) Electric Ry.—Sold in Foreclosure.**—This property was sold under foreclosure Jan. 5 for \$210,000 to Herman Myers of Savannah and J. H. Fall of Nashville, representing a majority of the bonds. The "Savannah News" says:

Mr. Van Lear Kirk, of Nashville, states that a meeting for reorganization will be held in Savannah in about two weeks. There are about fifteen persons in Nashville interested in the electric railway. The form of reorganization has not been agreed upon nor the officers selected. It is likely, however, that those who have taken an active interest in the property heretofore will continue on the Board of Directors. Between \$75,000 and \$100,000 will be spent at once to put the property in good running condition, of which amount about \$50,000 will be spent in a new power house.

The minority bonds were deposited with the Southern Bank of Savannah.—V. 60, p. 1011.

**Scranton Ry.—Scranton Traction.—Consolidation Approved.**—On December 18 the stockholders of the Scranton Traction Co. approved the proposed consolidation of its subsidiary properties under the title of the Scranton Railway Co. Beginning Jan. 1 the Scranton Railway Co. will operate the

different lines heretofore operated by the Scranton Traction Co. Its directors are: Clarence M. Clark, President; J. P. Ilsley, Vice-President; C. Ford Stevens, Secretary and Treasurer; E. W. Clark, Jr., all of Philadelphia; Timothy Burke, Frank Silliman, Jr., and Horace E. Hand, Scranton. The authorized capital stock of the new company is \$6,000,000, of which \$3,500,000 is full paid. Par value of shares \$50. The capital stock of the old companies which form this consolidation was as follows: Scranton Traction Co., \$2,000,000; People's Street Ry., \$600,000; Scranton Passenger Ry., \$100,000; Dunmore Street Ry., \$30,000; Scranton Suburban Ry., \$100,000; Valley Passenger Ry., \$400,000. See also V. 63, p. 1064.

**Superior Consolidated Land Co.—Mortgage for \$1,000,000 Filed.**—A press dispatch from Superior, Wis., says that this company has placed on record a trust deed covering all of its property holdings in the county to secure a new bond issue of \$1,000,000 of 5 per cent bonds, due in 1905. The new loan, it is stated, will be used in part to refund indebtedness, estimated at \$625,000, of which over \$300,000 is principal and interest on first mortgage bonds, \$280,000 notes now due, \$138,000 taxes in litigation and \$10,000 floating indebtedness.

**Terre Haute & Logansport R. R.—Reorganization Notice.**—Seventy per cent of the outstanding bonds having been deposited, the bondholders' committee, Moses L. Scudder, Chairman, announces that it has extended the limit for receiving deposits of bonds without penalty to Jan. 20, 1897. Bonds received subsequent to that date will be subject to a penalty of \$10 per bond. The Depository is the New York Security & Trust Co., 46 Wall Street, New York.—V. 64, p. 42.

**Union Pacific Ry.—Coupon Payment.**—The coupons due ec. 1, 1896, on the 5 per cent collateral trust bonds will be paid on and after Jan. 11 by the New England Trust Company of Boston.—V. 64, p. 42.

**Wheeling & Lake Erie Ry.—Official Circular as to Improvements, Trackage and Business Outlook.**—President A. G. Blair, in transmitting the notice of the annual meeting of stockholders, calls attention to the following facts:

While business has been greatly depressed, it has been our policy to improve the physical condition of the property, add to its equipment, and in every way increase its facilities for handling a largely increased traffic. During 1896 1,000 new 30 ton gondola cars and 12 new engines have been added to the equipment. Nine new steel bridges have been erected and 10 miles of sidings have been constructed.

Arrangements are being made for opening a new mine of large capacity upon the property which your company controls, and to introduce electrical machinery for mining, which in the opinion of the General Manager of the Coal Company will make a saving of at least 13½ cents per ton on the coal produced, equal to \$30,000 per annum on the 600,000 tons, which is about the average annual product of the mines controlled.

An arrangement has been made with the Columbus Sandusky & Hoeking Ry. Co. whereby that company is accorded certain joint running rights over the 51 miles of your line from Bellevue to Toledo at a rental of \$29,225 per annum, together with a proportionate part of the cost of maintenance, and sundry additional payments, based upon the proportion of business done. The agreement is for 99 years from January 1, 1897, with provision for renewal; and its effect will, it is believed, be to add upwards of \$50,000 per annum to the income of this company.

Looking forward to the year 1897, your management anticipates a greatly increased traffic, and shares in the general belief that we have before us a period of prosperity which will be all the more pronounced when compared with the past three years of depression.—V. 63, p. 1117.

—Mr. C. W. Haskins, of the firm of Haskins & Sells, certified public accountants, located at No. 30 Broad Street in this city, has been elected Comptroller of the Central of Georgia Railway Company. The office of Comptroller of this company is a new one, and has been created especially to provide for the engagement of a firm, or an individual in a firm, of public accountants, to supervise the reorganization of the entire accounting system.

—The New England Loan & Trust Company are advertising the prepayment of \$100,000 of their debentures maturing August 1 next. Also the payment of a like amount of debentures of series No. 3. Their advertisement will be found in to-day's CHRONICLE.

—Messrs. Rogers & Gould, 7 Wall Street, have compiled in convenient calendar form the daily rates for money during 1896, the weekly condition of the bank reserve and the weekly gold movement.

—Messrs. Simon Borg & Co. offer for January investment a list of bonds and guaranteed stocks. Their advertisement will be found on the last page of the QUOTATION SUPPLEMENT of this date.

—Mr. F. J. Lisman announces in another column that he is prepared to trade in the various issues of the Southern Pacific system, as well as all other inactive steam railway bonds.

—Messrs. Farson, Leach & Co. offer a list of State, county and city securities for January investment. Their advertisement appears in the State and City Department.

—City of Boston and District of Columbia bonds are offered for sale by Messrs. Dunscomb & Jennison. Their advertisement will be found in the QUOTATION SUPPLEMENT.

—The John B. Stetson Company announces a semi-annual dividend of 4 per cent on its preferred stock and an annual dividend of 4 per cent on its common stock.

—Messrs. E. C. Stanwood & Co. offer for sale \$250,000 city of Holyoke bonds. See their advertisement in our State and City Department.

## The Commercial Times.

## COMMERCIAL EPITOME

FRIDAY NIGHT, Jan. 8, 1897.

The business world has hardly gotten fairly under way for the new year. Merchants have not as a rule completed their inventories; they do not know definitely the results of business for the year just closed and have not as yet shown a disposition to open new trades. In many respects, however, prospects for business for the coming year are marked by better conditions than have been prevalent for some time past, and the general disposition is to take a cheerful view of the outlook. The uneasiness over the Cuban situation is gradually sinking into the background. The Ways and Means Committee has continued its hearings of the various trades on the revision of the tariff law. Quite a diversity of opinion has been shown, particularly between growers and manufacturers of wool and tobacco. Wheat crop prospects at the West have been much improved by more favorable weather conditions.

Following is a comparative statement of leading articles.

	Dec. 1, 1896.	Jan. 1, 1897.	Jan. 1, 1896.

There has been a slight improvement in the demand for lard on the spot and at the close there was a stronger turn to the market, with final sales at 4-12½c. for prime Western, 3-7½c. for prime City and 4-40c. for refined for the Continent. The local market for lard futures has been neglected, and at the West trading was quiet up to to-day, when there was a fair demand from shorts to cover contracts, stimulated by a decreasing movement of swine. The close was quoted fairly firm.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
January.....a.	4.10	4.07	4.05	4.05	4.07	4.12	.....	.....	.....	.....	.....	.....

Pork has been in increased export demand and the close was firm at \$8.25@8.75 for mess. Cut meats have been quiet but steady. Tallow has sold slowly and the market has weakened slightly, closing at 3½c. bid and 3½c. asked. Cotton-seed oil has been quiet but about steady, closing at 20c. for prime crude and 23c. for prime yellow. Butter has been quiet but steady. Cheese has had a fair sale at full values. Fresh eggs have been dull.

Coffee of Brazil growth has had only a limited sale, but offerings have been only moderate and values have held steady, closing at 10½c. for Rio No. 7. The mild grades closed in fairly good demand at steady prices, with good Cucuta at 15½c. and standard Java at 22½c. The trading in the market for contracts has been quiet and no important changes have occurred in values, closing steady.

The following were the closing prices:

Jan.....	9.70c.	April.....	9.85c.	July.....	10.05c.
Feb.....	9.80c.	May.....	9.90c.	Aug.....	11.10c.
March.....	9.90c.	June.....	10.00c.	Sept.....	10.10c.

Raw sugars have been quiet. Refiners have been slightly under importers in their views, and sales made have been unimportant, closing at 3-16c. bid for centrifugal 96-deg. test and 2-13-16c. bid for muscovado 89-deg. test. Refined sugars have had a moderate sale at steady prices, closing at 4½c. for granulated. Teas have received slightly increased attention and values have held steady.

The desirable grades of Kentucky tobacco have had a fair sale at firm prices. Seed leaf tobacco has been in fairly active demand at steady values. Sales for the week, 2,475 cases.

Early in the week the market for Straits tin was higher. Subsequently, however, the improvement was lost, as foreign advices turned weaker. The close was firm at 13c. Ingot copper has been in increased demand and higher, closing firm at 11 60@11 75c. for Lake. Lead has also advanced, closing at 8 02½@8 07½c. for domestic. Spelter has been dull and easier, closing at 3-9@4c. for domestic. Pig iron has continued quiet and easy at unchanged prices, closing at \$11.00@11.13 for domestic.

Refined petroleum has been unchanged, closing at 6.20c. in bbls., 3-70c. in bulk and 6.90c. in cases; naphtha dull at 6½c. Crude certificates have been neglected. Credit balances have been steady at 90c. Spirits turpentine has been in increased demand and higher, closing at 27½@28½c. Rosins have been easier at \$1.70 for common and good strained. Wool has been neglected and quotations have been nominal. Hops have been quiet but steady.

## COTTON.

FRIDAY NIGHT, January 8, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the eight days ending this evening the total receipts have reached 196,537 bales, against 219,123 bales last week and 277,615 bales the previous six days, making the total receipts since the 1st of Sept., 1896, 5,119,790 bales, against 3,679,988 bales for the same period of 1895-96, showing an increase since Sept. 1, 1896, of 1,439,802 bales.

Speculation in cotton for future delivery has been quiet. The trading has been confined almost exclusively to professional operators and the course of prices has continued irregular. Monday there was a lower market. There was an absence of outside interest, and under liquidating sales by a few tired "longs," prompted by the port receipts running slightly in excess of the estimates, prices declined 12 to 14 points for the day. Tuesday the speculation continued slow, and under further liquidating sales by longs, prices weakened 1 to 2 points. Wednesday, however, there was a stronger turn to the market. Foreign advices came unexpectedly higher, and the port receipts showed a material shrinkage which stimulated something of a demand from "shorts" to cover contracts, and prices closed at an advance of 7 to 11 points. Thursday the market was easier during early 'Change under disappointing foreign advices, accompanied with selling orders. Subsequently, however, a light interior movement of the crop stimulated moderate buying and prices advanced, closing 3 to 7 points higher for the day. To-day the market was fairly active and higher on a report that the movement of cotton in Texas up to January 1st was 1,675,000 bales, which was below general expectations, and is taken as an indication that the yield of that State for 1896-97 will be below the average estimate. The close was firm at an advance of 11 to 13 points for the day. Cotton on the spot has been quiet. Monday and Tuesday prices were lowered 1-16c. but on Wednesday and Thursday the loss was recovered. To-day the market was quiet and unchanged, middling uplands closing at 7 3-16c.

The total sales for forward delivery for the week are 617,400 bales. For immediate delivery the total sales foot up this week 23,578 bales, including 300 for export, 178 for consumption, — for speculation and 23,100 on contract. The following are the official quotations for each day of the past week—January 2 to January 8.

Rates on and off middling, as established Nov. 22, 1893, and revised Dec. 11, 1895, by the Revision Committee at which grades other than middling may be delivered on contract:

Fair.....	6 1/4	on.	Good Ordinary.....	6 1/4	off.
Middling Fair.....	7 1/4	on.	Good Middling Tinged... Even.		
Strict Good Middling.....	7 1/2	on.	Strict Middling Stained... 7 1/2	off.	
Good Middling.....	7 1/4	on.	Middling Stained.....	7 1/4	off.

Tuesday, Jan. 5— Sales total..... Prices paid (range)..... Closing.....													
Wednesday, Jan. 6— Sales total..... Prices paid (range)..... Closing.....													
Thursday, Jan. 7— Sales total..... Prices paid (range)..... Closing.....													
Friday, Jan. 8— Sales total..... Prices paid (range)..... Closing.....													
Total sales this week	617,400	8,800	16,100	321,700	13,800	208,200	15,800	5,000	21,500	1,400	800	3,800	.....
Total sales since Sep. 1, '96*	17,757,000	7,103,400	389,400	4,953,900	174,800	1,571,500	276,700	116,700	94,500	1,800	2,700	5,800	.....

\* Includes sales in September, for September, 15,100; September-October, for October, 344,800; September-November, for November, 372,000; September-December, for December, 2,200,000.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "Av'ge." The average for each month for the week is also given at bottom of table.

For exchanges see page 90.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the float are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 8), we add the item of exports from the United States, including in it the exports of Friday only.

**WEATHER REPORTS BY TELEGRAPH.**—Our advices by telegraph from the South this evening denote that rain has been quite general the past week and that in some sections of Arkansas, Tennessee, Louisiana, Texas and Mississippi the precipitation has been rather heavy. The temperature has been a little lower. The movement of the crop continues fairly liberal. Farm work is making good progress in Texas.

**Galveston, Texas.**—General rain at the opening of the week put the ground, as a rule, in good condition for ploughing, and work has been rushed the latter part of the week. Some reports are that the preparation of the land is better advanced than usual at this time of the year. There has been rain on three days, the precipitation being forty-five hundredths of an inch. The thermometer has ranged from 39 to 68, averaging 54. December rainfall two inches and thirty-three hundredths.

**Paletine, Texas.**—We have had rain on two days of the past week, the rainfall being one inch and eighteen hundredths. Average thermometer 51, highest 76, lowest 26. December rainfall two inches and fifteen hundredths.

**Huntsville, Texas.**—It has rained on two days during the week, with rainfall to the extent of one inch and eighty-four hundredths. The thermometer has averaged 52, the highest being 76 and the lowest 23. Rainfall for December, one inch and fifty hundredths.

**Dallas, Texas.**—The rain has been very beneficial to farming interests. We have had rain on two days of the past week, the precipitation reaching seventy-two hundredths of an inch. The thermometer has averaged 47, ranging from 22 to 72. December rainfall, one inch and eighty-six hundredths.

**San Antonio, Texas.**—The weather has been favorable for farm work and the ground is in good condition for plowing. We have had rain on one day during the week, the rainfall being four hundredths of an inch. The thermometer has ranged from 30 to 76, averaging 52. December rainfall seventy-four hundredths of an inch.

**Luling, Texas.**—It has rained on one day of the week, the rainfall reaching ten hundredths of an inch. Average thermometer 53, highest 76, lowest 30. Rainfall during December eighty-five hundredths of an inch.

**Columna, Texas.**—There has been heavy rain on two days of the week, the rainfall reaching two inches and twenty-five hundredths. The thermometer has averaged 52, the highest being 75 and the lowest 29. Month's rainfall, four inches and six hundredths.

**Merio, Texas.**—We have had rain on two days of the week, to the extent of seventy-two hundredths of an inch. The thermometer has averaged 52, ranging from 28 to 76. During the month of December the rainfall reached one inch and fifty-five hundredths.

**Greensm, Texas.**—Rain has fallen on two days of the week, to the extent of one inch and fourteen hundredths. The thermometer has ranged from 28 to 74, averaging 51. December rainfall one inch and ninety-four hundredths.

**Fort Worth, Texas.**—We have had rain on two days during the week, the precipitation being eighty-three hundredths of an inch. The thermometer has averaged 49, the highest being 74 and the lowest 24. December rainfall two inches and a-half.

**Weatherford, Texas.**—There has been rain on two days during the week, the precipitation being seventy-two hundredths of an inch. The thermometer has averaged 51, ranging from 27 to 74. December rainfall two inches and forty-two hundredths.

**New Orleans, Louisiana.**—Rain has fallen on three days of the week. Average thermometer 55. Rainfall in December three inches and seventy-seven hundredths.

**Shreveport, Louisiana.**—We have had rain on three days of the week, to the extent of two inches and eighty-nine hundredths. The thermometer has ranged from 30 to 73, averaging 49. December rainfall seventy-five hundredths of an inch.

**Columbus, Mississippi.**—December rainfall one inch and six hundredths.

**Merio, Mississippi.**—We have had rain on three days of the week to the extent of two inches and fifty-eight hundredths. The thermometer has averaged 39.6, ranging from 24 to 67. Rainfall for month of December ten hundredths of an inch.

**Vicksburg, Mississippi.**—It has rained on three days during the past week, to the extent of two inches and seven hundredths. The thermometer has ranged from 29 to 71, averaging 48.

**Little Rock, Arkansas.**—We have had rain on three days of the week, the rainfall reaching five inches and ninety-six hundredths. Average thermometer 46, highest 70 and lowest 24.

**Helena, Arkansas.**—There has been rain on three days of the past week, on two of which heavy, the precipitation reaching two inches and ninety-nine hundredths. The thermometer has averaged 44, the highest being 64 and the lowest 21.

**Memphis, Tennessee.**—We have had rain on three days of the week, the rainfall reaching three inches and sixteen hundredths. The thermometer has averaged 46.3, ranging from 21 to 68.

**Nashville, Tennessee.**—It has rained during the week to the extent of seventy-seven hundredths of an inch. The thermometer has ranged from 19 to 67, averaging 42. December rainfall one inch and seventy-nine hundredths.

**Mobile, Alabama.**—The week's rainfall has been eighty-two hundredths of an inch, on three days. Average thermometer 50, highest 69, lowest 28. Rainfall for month of December three inches and fifty-six hundredths.

**Montgomery, Alabama.**—We have had rain on three days during the week. The thermometer has averaged 46, the highest being 56 and the lowest 42.

**Maitson, Florida.**—Rain has fallen on one day of the week, the rainfall reaching twenty hundredths of an inch. The thermometer has ranged from 31 to 68, averaging 50.

**Savannah, Georgia.**—Rain has fallen on four days of the week, the precipitation reaching two hundredths of an inch. The thermometer has averaged 53, the highest being 71 and the lowest 32. Month's rainfall six inches and eighty-six hundredths.

**Augusta, Georgia.**—It has rained on two days during the past week, the rainfall being seven hundredths of an inch. The thermometer has averaged 49, ranging from 29 to 69. December rainfall three inches and twenty-three hundredths.

**Charleston, South Carolina.**—There has been rain on three days during the week, the precipitation reaching one hundredth of an inch. Average thermometer 53, highest 71 and lowest 34.

**Wetburg, South Carolina.**—We have had light rain on one day of the week, the precipitation being fourteen hundredths of an inch. The thermometer has averaged 48.1, the highest being 68 and the lowest 26. Rainfall for month of December, three inches and nineteen hundredths.

**Wilson, North Carolina.**—Telegram not received.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 9 o'clock January 7, 1897, and January 9, 1896.

**NOTE.**—The 1,370 bales reported to us as Sea Island shipped from Brunswick last week was upland cotton. The amount is therefore deducted from above statements of receipts and exports.

**Quotations Jan. 8 at Savannah, for Floridas, common, 10c.; medium fine, 13 1/2c.; choice, 16c.**

**Charleston, Carolinas, medium fine, 18c.; fine, 21c.; fully fine, 23 1/2c.**

**EXCHANGES.**—The following exchanges have been made during the week:

29 pd. to exch. 100 Jan. for Mar.	12 pd. to exch. 200 Jan. for May.
15 pd. to exch. 200 Mar. for May.	25 pd. to exch. 500 Nov. for July.
13 pd. to exch. 600 Jan. for May.	27 pd. to exch. 300 Feb. for June.
12 pd. to exch. 200 May for Aug.	27 pd. to exch. 100 Apr. for July.
11 pd. to exch. 100 May for Aug.	13 pd. to exch. 250 May for Aug.
10 pd. to exch. 100 May for Aug.	21 pd. to exch. 300 May for July.
25 pd. to exch. 500 Oct. for Aug.	19 pd. to exch. 500 Feb. for May.
25 pd. to exch. 100 May for Aug.	

**JUTE BUTTS, BIGGINS, & CO.**—The market for jute bagging has been quiet during the week under review at unchanged prices, viz., 4 1/2c. for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c. for standard grades to a jobbing way. Car-load lots of standard brands are quoted at 4 1/2c. for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c. for 2 1/2 lbs. f. o. b. at New York. Jute butts are slow of sale at 1 1/2c. for paper quality, 1 1/2c. for mixing and bagging and 1 1/2c. for spinning butts, all to arrive. From Messrs. I. A. Kie & Co.'s circular we learn that the deliveries of jute butts and rejections at New York and Boston during December were only 2,530 bales, against 355 bales for the same month last year, but for the calendar year 1896 the deliveries reached only 313,633 bales, against 411,723 bales in 1895. Importers and speculators at New York and Boston on December 31 held no stock, against 21,010 bales at the corresponding date in 1895; the amount shipped for the United States reaches 137,153 bales against 214,333 bales last year.

**SHIPPING NEWS.**—The exports of cotton from the United States the past week, as per latest mail returns, have reached 216,373 bales. So far as the Southern ports are concerned these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

New York—To Liverpool, per steamers Kelsow, 3,258		Total bales.

## BREADSTUFFS.

FRIDAY, JANUARY 8, 1897.

There has continued a quiet market for wheat flour. The home trade has limited its purchases almost exclusively to actual requirements, and the export demand has also been light. Supplies in sellers' hands, however, have been very moderate, and values have been fairly well maintained, although at the close a weaker market for the grain caused an easier undertone. Rye flour has had a limited sale at unchanged values. Buckwheat flour has sold slowly and prices have weakened 10c. per bag. Corn meal has been in fair request at steady values. To-day the market for wheat flour was quiet and without change.

The speculative dealings in the market for wheat futures have been moderately active. Early in the week the course of prices was upward, as unfavorable weather conditions at the West for the growing crop and stronger foreign advices stimulated a demand from shorts to cover contracts and also induced some buying for investment account. Subsequently, however, the market turned easier and the improvement was more than lost under liquidating sales by longs, prompted by later advices from the West reporting weather conditions from the West as decidedly favorable. Yesterday the market again turned stronger on a continued active export demand. In the spot market shippers have been fairly large buyers, their purchases for the week here and at out ports amounting to about 750,000 bushels. To-day the market was depressed. Quiet and easier foreign advices prompted liquidating sales on "longs" and prices for the day showed a decline of 1½¢@1¾¢. The spot market was moderately active, but at lower prices. The business transacted was on private terms. No. 2 red winter was quoted at 98c. f. o. b. afloat, No. 1 Northern Duluth at 92½¢ f. o. b. afloat, and No. 1 hard Duluth at 95½¢ f. o. b. afloat.

DAILY CLOSING PRICES OF NO. 2 AND WINTER WHEAT.

	Jan.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	91½	92	91½	89½	90½	89½
March delivery.....c.	93½	93½	92½	91½	92	90½
May delivery.....c.	90	89½	89½	87½	88½	87
July delivery.....c.	86½	86	85½	83½	84½	83½

The trading in the market for Indian corn futures has been quiet and changes in prices have been unimportant. The West has been selling, prompted by a free movement of the crop, but there has been an active export trade, and this has served to hold values about steady. In the spot market business has been active. Shippers have been large buyers, their purchases amounting to about 1,500,000 bushels, with the deliveries ranging from prompt up to May. To-day the market was quiet and easier in sympathy with a decline in wheat. The spot market was fairly active, as shippers con-

tinued buyers. The sales included No. 2 mixed at about 30½¢ f. o. b. afloat and No. 2 yellow at 31c. delivered.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Jan.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	29½	29½	29½	29½	29½	29½
May delivery.....c.	31½	31½	31½	31½	31½	31½
July delivery.....c.	32½	32½	32½	32½	32½	32½

Oats for future delivery have continued quiet and there has been a gradual sagging of values under free offerings from the West prompted by a full movement of the crop. A material decline in prices, however, has been checked by an active export demand, the purchases by shippers in the spot market during the past week amounting to 1,000,000 bushels. To-day the market was quiet and easier. The spot market was fairly active but at slightly lower prices. The sales included white clipped for export on private terms; No. 3 mixed at 22½¢ in elevator and No. 2 white at 24½¢ in elevator.

DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

	Jan.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	22½	22½	22½	22½	22½	22½
February delivery.....c.	23½	23½	23½	23½	23½	23½
May delivery.....c.	23½	23½	23½	23½	23½	23½

Rye and barley have been in better export demand and steady.

The following are closing quotations:

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Jan. 8, 1897.

The situation in print cloths and the several projects under consideration by cloth manufacturers have drawn the attention of the general cotton goods trade largely towards them during the past week. The stock of cloths is very much in excess of what any previous year has opened with, the mills are running up to normal production, the demand is sluggish, and there are no indications of improvement. To relieve the situation it has been proposed to sell in England contracts for 1,000,000 pieces or more, or, failing that, "pool" some 1,800,000 pieces, peg the price of these at 2½¢. for regulars and odds on that basis, and run the mills two-thirds time only. The market is anxiously awaiting the outcome of these efforts to solve the difficulty which Fall River manufacturers themselves have been instrumental in creating. Meanwhile business here has again been on a limited scale in all departments, and so far the year has disclosed nothing of an encouraging character. The tone throughout the cotton goods division is decidedly dull and the tendency of prices in most directions in favor of buyers. Woolen goods also have ruled dull generally with unexpected weakness in some quarters. Collections are fairly regular and the financial troubles in the West and Northwest do not appear to have affected them.

**DOMESTIC COTTON GOODS**—The exports of cotton goods from this port for the week ending Jan. 4 were 5,036 packages, valued at \$231,587, their destination being to the points specified in the tables below:

NEW YORK TO JANUARY 4	1897.		1896.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	4	4	8	8
Other European.....	120	120	12	12
China.....				
India.....			351	351
Arabia.....	106	106

South America.....	3,404	3,808	698	698
Other Countries.....	66	66	71	71
Total.....	5,036	5,036	2,227	2,227
China, via Vancouver.....	3,070	3,070		
Total.....	8,080	8,080	2,227	2,227

From New England mill points direct.

The value of the New York exports for the year to date has been \$231,587 in 1897 against \$133,072 in 1896.

Sellers are making no special efforts to move brown sheetings or drills, but with a sluggish home demand prices are

easy and favor buyers in most weights, about the only exception to this being leading export grades in heavy-weight goods, which are well sold and firm. There is little demand for either brown ducks or Osnaburghs and prices are irregular. Bleached cottons continue inactive throughout, only small lots being in request. The market is easy and irregular, but beyond an incidental reduction of ¼¢. per yard in one 4-4 make prices are unchanged. Print cloth yarn, bleached, are slow of sale and irregular. There is little doing in wide sheetings or cotton flannels or blankets, and prices are without change. Sales of denims are small and the market is an easy one to buy in and other coarse colored cottons are inactive and featureless. White goods, quilts, etc., are slow. Kid-finished cambrics inactive and easy. Fancy calicoes have been in quiet demand but prices are steady. Specialties sell moderately. Regular prints dull, with an easier tendency. Staple ginghams quietly steady. Dress styles slow. Print cloths inactive; no sales reported of regulars this week; nominal prices 3¼¢. Olds in light request and irregular.

Stock of Print Cloths—	1897.	1896.	1895.	1894.
At Providence, 64 squares.	417,000	124,000	40,000	147,000
At Fall River, 84 squares.	831,000	197,000	78,000	142,000
At Fall River, odd sizes.	830,000	157,000	88,000	37,000
<b>Total stock (pieces)</b> .....	<b>2,198,000</b>	<b>450,000</b>	<b>204,000</b>	<b>326,000</b>

**WOOLEN GOODS.**—The market for all descriptions of men's-wear fabrics has ruled dull throughout the week. The weather has been against business and there has been no new influence to counteract its effect. Re-orders for light-weights are small and show that wholesale clothiers have not been making much headway with their sales of spring garments to the retailers, and under such conditions no material expansion in business can be looked for in new heavy-weights, even though the business is now several weeks behind an ordinary season. Slow progress is being made in opening new lines of heavy-weights, and the situation has been disturbed by the unexpected reduction of 5 to 10 per cent in the quotations of a leading line of Clay worsteds. Some low prices have also been made on new overcoatings, and the men's-wear market generally appears to have lost all promise of better prices than last season. Cloakings are slow. Flannels and blankets dull and unchanged. Carpets occasionally 2½¢. per yard higher for tapestries. Dress goods quiet throughout and irregular in low grades.

**FOREIGN DRY GOODS.**—New business for spring has been on a limited scale in all divisions of the market, but importations are coming to hand on early orders. In dress goods, silk fabrics and linens a generally steady market is reported. Laces, hosiery and underwear and men's-wear woolen and worsted goods irregular. Seasonable business light and featureless.

## Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending January 7, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

## STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the CHRONICLE.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the CHRONICLE.

TERMS for the CHRONICLE with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—(Per inch space.)

One time..... \$3 50  
One Month (4 times)..... 11 00  
Two Months (8 times)..... 18 00  
Three Months (12 times)..... 25 00  
Six Months (24 times)..... 43 00  
Twelve Months (52 times)..... 58 00  
(The above terms for one month and upward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

## REVIEW OF MUNICIPAL BOND SALES IN DECEMBER AND FOR THE LAST FOUR YEARS.

Our record of municipal bond sales shows that the total of these securities marketed during the month of December was over 10½ million dollars. This amount contrasts with about 8½ millions in December 1895, 13½ millions in December 1894 and 17½ millions in 1893.

Compared with the 35 millions of bonds sold in November 1896, the sales for the late month may appear small, but it will be remembered that the restoration of credit which took place early in November produced a market for all classes of good bonds and an outpouring of the new loans, which for four months had been practically unsalable, on a scale never before witnessed. Barring November as altogether exceptional, only two months, May and June, have totals at all in excess of December, and only one of these (June) exceeds that of December by as much as two million dollars. Of the aggregate sales for the year, over 42 per cent occurred in the last two months of the year, indicating how powerfully our municipalities were affected by the distrust which accompanied the campaign for free silver.

Among the noteworthy sales in December 1896 was that of \$800,000 of Hartford 3½ per cents of 1922 at 103·219, to refund a portion of the \$1,000,000 Capitol 6 per cent bonds due Jan. 1 1897, these last constituting a third of the city's entire funded debt. Other large sales are: Queens County, N. Y., 4s of 1916, \$270,000 at 107·125; New Bedford 4s of 1927 for \$400,000 at 108·857; Buffalo 3½s of 1901, \$527,765 at 100·815; Boston 3½s and 4s of 1907-1917, \$1,890,000 at 102·8277; Brooklyn 3½s of 1936, \$700,000 at 102·47.

In the following table we give the prices which were paid for December loans to the amount of \$8,937,875, issued by no less than 88 municipalities. The aggregate of sales for which no price was reported is \$1,696,212 and the total sales for the month \$10,634,087. In the case of each loan reference is made to the page of the CHRONICLE where a full account of the sale is given.

Grand totals \$106,465,860 \$114,021,633 \$117,167,225 \$77,421,273

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Allegheny, Pa.—Bond Sale.**—On Jan. 5, 1897, the following bids were received for the \$400,000 of water bonds offered by this city.

E. Morrison, New York	103 3/4	and interest
George M. Hahn	103 07	and interest
Street, White & Co., New York	103 53	and interest
German National Bank, Pittsburgh	104-177	and interest
Mason, Lewis & Co., Chicago	102-59	and interest
New York Security & Trust Co.	103 26 1/2	and interest
Lamprecht Bros. Co., Cleveland, O.	102-618	and interest
S. W. Harris & Co., Chicago, Ill.	102-625	and interest
Edward T. Jones Co.	103	and interest
James W. Sherrill, Poughkeepsie, N. Y.	102-55	and interest
Whelan & Schlessinger, New York	103-29	and interest
E. D. Sheppard & Co.	103 18	and interest
Vermilye & Co., New York	105-78	and interest
R. L. Day & Co., New York	102-869	and interest

The loan was awarded to Vermilye & Co. The bonds will be dated December 1, 1896. Semi-annual interest will be payable on the first days of June and December at the office of the City Treasurer, and the principal will mature as follows: \$66,000, December 1, 1901; \$66,000, December 1, 1906; \$66,000, December 1, 1911; \$66,000, December 1, 1916; \$66,000, December 1, 1921, and \$66,000, December 1, 1926.

**Ann Arbor, Mich.—Bond Sale.**—It is reported that 5 per cent sewer bonds of this city amounting to \$10,800 have been purchased by the Farmers & Mechanics' Bank at 100-23.

**Athens, Ohio.—Bond Sale.**—On January 4, 1897, \$4,800 of street improvement bonds of this city were awarded to J. D. Brown, of Athens, for \$4,936 89. Other bids received for the loan were as follows:

S. Kuhn & Sons, Cincinnati	\$4,980.
Lamprecht Bros. Co., Cleveland	\$4,925.
Seamsgood & Mayer, Cincinnati	\$4,913 75.
D. H. Moore, Athens	\$4,900.
W. J. Hayes & Sons, Cleveland	\$4,841.

The securities will bear interest at the rate of 6 per cent and the principal will mature in ten years from date of issue.

**Barnesville, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon January 25, 1897, by Village Clerk H. E. Dement, for the purchase of \$13,936 of 6 per cent street improvement bonds. The securities will be dated January 11, 1897, interest will be payable semi-annually at the office of the Village Treasurer, and the principal will mature as follows: \$934, January 11, 1899; \$500, January 11, 1899; \$500, January 11, 1900, and the remaining \$12,000 at the rate of \$1,000 each year thereafter. The bonds are special assessment bonds. Each bid must be accompanied by a certified check for the sum of \$300.

The total bonded indebtedness of Barnesville is \$12,436 49; the floating debt is \$1,500, and the assessed valuation \$1,093,650. The population in 1890 was 3,207 and at present it is estimated at 3,800.

**Boston, Mass.—Mayor's Address.**—In his recent annual address Mayor Quincy makes the following statements regarding the financial condition of Boston.

"The gross debt of the city and county amounted Dec. 31, 1896, to the sum of \$69,440,810 48, against a gross debt of \$64 5 3,340 77 on Dec. 31, 1895, showing an increase of \$1,967,439 71 during the year.

"The total amount of debt issued, both inside and outside of the debt limit, during the year, was \$7,321,000; but funded debt was paid during the year to the amount of \$2,353,540 29,

making the increase in the gross debt during the year \$4,967,439 71.

"The net debt December 31, 1896, was \$43,727,721 47, against \$39,445,039 55 on December 31, 1895, showing an increase, accounted for as below stated, of \$4,282,681 92.

"The difference between the increase in the gross debt and that in the net debt shows that the sinking and other redemption funds have increased \$704,777 79 during the year."

**Butler, Pa.—Bond Election.**—An election will be held in the spring to vote on the proposition to issue \$30,000 of bonds for paving and other purposes.

**Caldwell Co., Ky.—Bond Call.**—R. B. Ralliff, Treasurer of the sinking fund, announces that 6 per cent bonds of this county, dated March 1, 1892, to the amount of \$22,000 are to be redeemed at the Treasurer's office in Princeton, Ky., on March 1, 1897. The numbers of the bonds called are as follows: One thousand dollar bonds, numbers 72, 187, 63, 125, 1, 191, 176, 175, 195, 52, 145, 123, 139, 78, 118, 144, 139, 68 and 157; five hundred dollar bonds, numbers 44, 27, 20, 8, 12 and 30. Interest on these bonds will cease on the above date.

**Canton, Ohio.—Bonds Defeated.**—On December 28, 1896, the citizens of Canton voted against the proposition to issue \$70,000 of sewer bonds.

**Cincinnati, O.—Bond Offering.**—Proposals will be received until 12 o'clock noon Jan. 23, 1897, at the office of D. W. Brown, City Auditor, for the purchase of \$ 3 372 60 of bonds of the city of Cincinnati. The securities will be dated Dec. 20, 1896, and will mature one-tenth yearly from Dec. 20, 1897. Interest at the rate of 5 per cent will be payable semi-annually at the office of the City Treasurer. A certified check for 5 per cent of the amount bid for must accompany each proposal. The proceeds of this sale will be applied to the improvement of Delta Avenue.

**Cleveland, Ohio.—Bond Sale.**—It is reported that the \$250,000 of 4 per cent coupon park bonds offered on Jan. 6, 1897, by the city of Cleveland have been sold to N. W. Harris & Co., of Chicago, at a premium of \$19,101. These bonds draw interest from July 1, 1893, both principal and interest being payable at the American Exchange National Bank, in New York City, interest payable semi-annually. The denomination of the securities is \$1,000 and the principal will mature April 1, 1927.

**Bond Offering.**—Proposals will be received at the office of City Auditor H. L. Rosier, Cleveland, O., until 12 o'clock noon on Jan. 20, 1897, for the purchase of \$250,000 4 per cent city of Cleveland river and harbor coupon bonds, maturing Oct. 1, 1926.

These bonds are dated Oct. 1, 1896, both principal and interest being payable at the American Exchange National Bank, in New York City, interest payable semi-annually. A certified check drawn on a national bank for 5 per cent of the amount of bonds bid for, and payable to the order of the Treasurer of the City of Cleveland, must accompany each bid.

All bonds are \$1,000 denomination. No bids will be entertained unless made on a blank form, which can be obtained on application to the City Auditor, and bids for less than par and accrued interest will not be considered.

**Corasopolis, Pa.—Bond Offering.**—Proposals will be received until 6 o'clock P. M., Jan. 25, 1897, by the Finance Committee of this borough, for the purchase of \$23,000 of water bonds. The securities will be dated Jan. 1, 1896, and will mature in 30 years, redeemable at the option of the borough after five years from date. Interest at the rate of 4 1/2 per cent will be payable semi-annually and the bonds will be of the denomination of \$500. A certified check for \$250 must accompany each bid.

**Cumberland, Md.—Bond Election.**—City Clerk Waller B. Clark reports that the proposition to issue \$31,000 of bonds for the purpose of erecting an electric-light plant will be put to a vote of the people on May 17, 1897. The securities, if authorized, will bear interest at the rate of 4 per cent.

**Defiance, Ohio.—Bond Sale.**—It is reported that this city has sold \$30,000 of refunding bonds at 102 1/16. The securities will bear interest at the rate of 5 per cent, and mature in from one to fifteen and a-half years from date of issue.

**Dubuque, Iowa.—Bond Sale.**—The \$360,000 of refunding bonds of this city have been disposed of at private sale. W. L. Bradley, of Dubuque, was awarded \$120,000 at par and Spitzer & Co., of Toledo, Ohio, \$240,000 at a small premium. The securities will bear interest at the rate of 4 per cent, payable semi-annually, and the principal will mature on the first days of January and February, 1917.

**Elizabethtown, Cal.—Bond Election.**—The question of issuing water-works bonds to the amount of \$20,000 will soon be put to a vote of the people of this municipality.

**Fall River, Mass.—Bond Offering.**—Proposals will be received until 10 o'clock A. M., Thursday, Jan. 14, 1897, by Charles P. Brightman, City Treasurer, for the purchase of \$75,000 of library bonds of the city of Fall River. The securities will be registered bonds of the denomination of \$1,000 or multiples of this sum, and will be dated Jan. 1, 1897, becoming due Jan. 1, 1927. Interest at the rate of 4 per cent will be payable semi-annually. These bonds will be secured by sinking fund. A certified check for \$2,000 on a national bank, payable to the order of the city must accompany each bid.

**Galen, N. Y.—Bond Offering.**—Proposals will be received until 12 o'clock noon, Saturday, January 16, 1897, by Charles H. Ford, Supervisor, for the purchase of \$6,000 of town bonds. The securities will be of the denomination of \$500. Interest at the rate of 6 per cent will be payable annually on April 1, at the Briggs National Bank, Clyde, N. Y., and the principal will mature at the rate of \$1,000 yearly on April 1, from 1899 to 1904 inclusive.

**Gallia County, Ohio.—Bond Offering.**—Proposals will be received until 3 o'clock P. M., Friday, January 15, 1897, at the office of J. W. Jones, County Auditor, Gallipolis, Ohio, for the purchase of \$75,000 of Gallia County turnpike bonds.

The securities will bear interest at the rate of 5 per cent, payable semi-annually at the office of the County Treasurer.

The bonds will be of the denomination of \$500, will be dated January 15, 1897, and will mature as follows: January 15, 1905, \$10,000; January 15, 1909, \$10,000; January 15, 1911, \$10,000; January 15, 1913, \$5,000; January 15, 1914, \$15,000; January 15, 1915, \$10,000, and on January 15, 1916, \$15,000.

A certified check for 5 per cent of the amount bid for, payable to the order of H. W. R-sener, County Treasurer, must accompany each proposal. Blank forms for the bids may be obtained on application to the County Auditor.

**Harrisburg, Pa.—Bond Election.**—An election will soon be held in this city to vote on the proposition to issue bonds to the amount of \$20,000 for the purpose of erecting a new city hall.

**Herkimer County, N. Y.—Bond Offering.**—Proposals will be received until January 15, 1897, for the purchase of \$31,000 of road bonds of this county. The securities are to bear interest at the rate of 6 per cent.

**Jamaica, N. Y.—Bonds Proposed.**—Street-improvement bonds of this village to the amount of \$150,000 are under consideration.

**Louisville, Ky.—Bonds Authorized.**—The General Council of the city of Louisville has authorized the refunding of \$588,000 of 4 per cent gold bonds. The new securities will be dated April 1, 1897, and mature April 1, 1937. The date of sale has not yet been determined.

**Middle Loup Valley Irrigation Dist., Sargent, Neb.—Bond Offering.**—Proposals will be received until 2 P. M.,

January 19, 1897, for the purchase of bonds of this district to the amount of \$100,000.

**Moline, Ill.—Bond Sale.**—It is reported that street improvement bonds of this city to the amount of \$10,000, bearing interest at 4½ per cent, and maturing in from 15 to 20 years from date of issue, have been purchased by the First National Bank at 103-91.

**Morgantown, W. Va.—Bond Election.**—Town Treasurer F. B. Williams reports to the CHRONICLE that on Jan. 7, 1897, an election will be held in Morgantown to vote on the question of issuing street-paving bonds to the amount of \$15,000.

**Mount Vernon, N. Y.—Bond Sale.**—The \$30,000 of 5 per cent assessment bonds offered by the Common Council of Mount Vernon on January 5 1897, have been awarded to Daniel A. Moran & Co. at 104-80. Other bids received for the loan were:

Deltz, Deulson & Prior	104-997
Whann & Schlesinger	103-28
J. W. Longstreet & Co	102-758
S. A. Kean	par and interest
The Lumprecht Bros. Co.	\$30,720

The securities will be dated Dec. 15, 1896. Interest will be payable semi-annually at the office of the City Treasurer and the principal will mature Dec. 15, 1902. The denomination of the bonds will be \$1,000, and they will be ready for delivery on or before Jan. 15, 1897.

**New Haven, Conn.—Bond Sale.**—On January 5, 1897, City Auditor Benj. E. Brown received the following proposals for the purchase of \$250,000 of 4 per cent permanent paving bonds and \$65,000 of 4 per cent bridge bonds of the City of New Haven:

Bidder.	Pavement.	Bridge.
Farson, Leach & Co., New York	106-13	104-09
R. L. Day & Co., Boston	106-189	106-189
C. H. White & Co., New York	106-17	108-82
Lee, Higginson & Co., Boston	105-41	108-11
Street, Wykes & Co., New York	105-35	107-97
N. W. Harris & Co., New York	105-03	107-59
Cushman, Fisher & Phelps, Boston		107-93
Blodgett, Merritt & Co., Boston		106-60
H. C. Warren & Co., New Haven		105-53

Both loans have been awarded to Farson, Leach & Co. The pavement bonds will be dated October 1, 1896, and the princi-

## NEW LOANS.

### State of New York.

COMPTROLLER'S OFFICE,  
BUREAU OF CANAL AFFAIRS,  
ALBANY, December 19th, 1896.

Pursuant to the provisions of Chapter 79 of the Laws of 1896, proposals will be received at this office until Tuesday, the 12th day of January, 1897, at 12 o'clock noon of that day for a loan of

### FOUR MILLION DOLLARS

for which transferable certificates of stock, registered or coupon bonds at the option of the proposer.

Principal and Interest Payable in Gold.

Will be issued in the name of the People of the State of New York, on the credit of the Sinking Fund established by said act, bearing interest at the rate of three per centum per annum, payable semi-annually on the first days of January and July, and the principal reimbursable on the first day of January, 1912.

Proposals may be for the whole or any part of the loan not less than \$1,000, and should state whether registered or coupon bonds are desired.

Payments for the loan will be required to be made on the acceptance of the proposal by deposit in the bank of the Manhattan Co. in the City of New York to the credit of "Treasurer of the State of New York on account of Canal Fund" of the amount of the award, together with premium and accrued interest from January 1, 1897.

The Comptroller reserves the right to reject all bids which are not in his opinion advantageous to the interests of the State.

Interest on the loan will commence on the first day of January next, and will be payable at the Bank of the Manhattan Co. in the City of New York.

All proposals must be sealed and endorsed "Loan for Canal Improvements" and directed to the Comptroller of the State of New York, Albany, N. Y.

JAMES A. ROBERTS,  
Comptroller.

#### 6% Water and Electric-Light Bonds.

Sealed proposals will be received by the Commissioners of Public Works of the City of Newberry, S. C., until Monday, the 25th day of January, 1897, for Six Per Cent Water and Electric-Light Bonds to the amount of Forty-two Thousand Dollars in denominations of \$500 each; running forty years from date, and interest payable annually at the National City Bank of New York. Bonds bearing date of January 1st, 1897, and coupons payable on January 1st of each succeeding year. Payment of purchase money to be made one half on February 1st, 1897, and other half April 1st, 1897. The right to reject any or all bids reserved by the Commissioners. Parties desiring to offer bids, or asking further information, will address

JAMES MCINTOSH,  
B. C. JONES,  
JAS. K. GILDER,  
Commissioners of Public Works,  
Newberry, S. C.

### \$15,000

### ATHENS, ALA.,

#### Water-Works Bonds.

MAYOR'S OFFICE,  
ATHENS, Ala., Dec. 26th, 1896.

The Legislature recently authorized the Mayor and Council of Athens, Alabama, to issue \$15,000 of commercial bonds, lawful money, for the establishment of water works. The bonds are to be sold at par in denominations of not less than \$100 nor more than \$1,000, or are to run not less than ten nor more than thirty years, at the option of the bidder, drawing not over six per cent interest, payable semi-annually at this office.

Sealed bids for these bonds, in whole or in part, in such denominations and running such time, within the limits, as the bidder may prefer, will be received at this office till 1st day of February, 1897, when they will be opened. The right to accept or reject any or all of such propositions is reserved.

THOS. C. MCCLELLAN,  
Mayor.

### Village of Proctor, Vt.,

#### 4% Water and Sewer Bonds.

PROCTOR, VT., Jan 1, 1897.  
In pursuance of the authority conferred by an act of the General Assembly of the State of Vermont, approved October 30th, 1896, and in accordance with the vote of the Village of Proctor Dec. 29, 1896, bids are invited for the whole or any part of the above mentioned loan.

Said loan will be issued in bonds of \$1,000 each, bearing interest at the rate of 4%, payable semi-annually in Boston, Mass., or Proctor, Vt.

A circular giving full information will be mailed on application to the Treasurer.

Proposals will be opened by the undersigned on the 22d day of January, 1897, at three o'clock P. M. The right is reserved to reject any and all proposals or bids.

WILLIAM SWIFT,  
Treasurer,  
Village of Proctor, Vt.

### W. N. Coler & Co.,

BANKERS.

### MUNICIPAL BONDS.

34 NASSAU STREET.

pal will mature in four equal instalments on October 1, 1901, 1906, 1911 and 1916.

The bridge bonds will bear the same date and mature as follows: \$25,000 on October 1, 1914; \$20,000 on October 1, 1915; \$30,000 on October 1, 1916. Interest on both loans will be payable semi-annually at the office of the City Treasurer. These bonds will be coupon bonds and registered with the Union Trust Company of New Haven.

**Philadelphia, Pa.—Bond Offering.**—Proposals will be received until 12 o'clock noon, Tuesday, Jan. 13, 1897, by Charles E. Warwick, Mayor of the city, for the purchase of \$2,400,000 of the \$5,000,000 serial loan, authorized March 15, 1894, and for the \$2,000,000 serial loan authorized Jan. 13, 1896. The denomination of the securities will be \$100 or multiples of this sum. The proceeds of the \$2,400,000 loan will be used to defray the expenses of abolishing grade crossings, and the \$2,000,000 will be applied to the widening of Delaware Avenue and the improvement of the channel of the Delaware River.

On the bonds first mentioned semi-annual interest at a rate not exceeding 4 per cent will be payable on the first days of January and July and the principal will mature at the rate of \$300,000 yearly from Dec. 31, 1911, to Dec. 31, 1918, inclusive. The second loan will bear interest at a rate not exceeding 3½ per cent, payable semi-annually on Jan. 1 and July 1, and the principal will be divided into twenty series of \$100,000 each, payable one each year on Dec. 31 from 1905 to 1924 inclusive. No bid will be considered unless accompanied by a certified check for 5 per cent of the amount bid, and all proposals must be made upon blank forms, which may be obtained upon application at the office of the Mayor.

For the \$2,400,000 loan, settlement in full must be made with the City Treasurer on or before Monday, Jan. 18, 1897, at 12 o'clock noon, and for the \$2,000,000 issue on Monday, Feb. 15, 1897, at the same time; interest on the bonds will be adjusted to those dates.

**Pima County, Ariz.—Bond News.**—It is reported that holders of Pima County bonds have given notice to the Loan Commission of Arizona that unless the exchange of territorial bonds for the Pima County bonds, arranged for when the county bonds were sold, is made shortly, the Supreme

Court of the Territory will be applied to for a mandamus to compel the exchange.

**Pomeroy, Ohio.—Bonds Authorized.**—This city has authorized the issuance of refunding bonds to the amount of \$6,000 but the loan will not be offered for sale at present.

**Port Gibson, Miss.—Bonds Authorized.**—City Clerk Thos. M. Rea reports to the CHRONICLE that the citizens of Port Gibson have voted to issue water-works bonds to the amount of \$20,000. The securities will bear interest at the rate of 6 per cent and mature in twenty-five years from date of issue. The city at present has no indebtedness of any kind. The assessed valuation is \$700,000 and the population (estimated) 2,000.

**Proctor, Vt.—Bonds Offered.**—Proposals will be received until 3 o'clock P. M. Jan. 22, 1897, by Wm. Smith, Village Treasurer, for the purchase of \$50,000 of water and sewer bonds of this village. Interest at the rate of 4 per cent will be payable semi-annually in Boston, Mass., or Proctor, Vt. The bonds will be of the denomination of \$1,000.

The official advertisement of this bond offering will be found elsewhere in this department.

**Reno, Nevada.—Bonds Proposed.**—Water-works bonds of this city are under consideration.

**St. Albans Academy and Graded School District, Vt.—Bond Sale.**—On Dec. 30, 1896, \$25,000 of coupon school building bonds of this district were awarded to Seymour Bros. & Co., of New York. Five bids were received. The securities will bear 4 per cent interest, and the principal will mature at the rate of \$1,000 yearly, beginning Dec. 31, 1897. The bonds will be issued in denominations of \$500 and \$1,000.

**St. Lawrence County, N. Y.—New Bonds.**—Bonds of this county to the amount of \$14,000 will be issued Feb. 1, 1897. The securities will bear interest at the rate of 4 per cent, payable at the office of the County Treasurer.

**Sandusky, Ohio.—Bond Sale.**—On January 6, 1897, City Clerk A. W. Miller received six bids for the purchase of \$9,000 of 5 per cent sewer bonds of the city of Sandusky. The bids were as follows:

Seasonood & Mayer, Cincinnati, O.	9,091 25
Landprecht Bros. Co., Cleveland, O.	9,091 50
W. J. Hayes & Sons, Cleveland, O.	9,102 00

The denomination of the bonds will be \$500. They will be dated January 1, 1897, interest will be payable semi-annually at the office of the City Treasurer, and the principal will mature in two, three and four years from date of issue at the rate of \$3,000 each year.

**San Jose, Cal.—Bonds Proposed.**—This city proposes to issue school-building bonds to the amount of \$85,000.

**Sullivan, Ill.—Bond Election.**—It is reported that on January 12, 1897, the citizens of Sullivan will decide the question of issuing \$25,000 of water-works bonds.

**Waukesha, Wis.—Bond Sale.**—On Jan. 5, 1897, coupon bonds of this city amounting to \$15,000 were awarded to N. W. Harris & Co., at a premium of \$333 and accrued interest. We give below a list of the bids received:

N. W. Harris & Co., Chicago	\$15,383 00 and interest
Farson, Leach & Co., Chicago	15,339 75
Rudolph Kleybolte & Co., Cincinnati	15,317 50 and interest
The Landprecht Bros. Co., Cleveland	15,315 75 and interest
W. J. Hayes & Sons, Cleveland	15,312 00 and interest
B. A. Selitz, Chicago	15,250 00 and interest
Seasonood & Mayer, Cincinnati	15,183 75 and interest
H. H. White & C., New York	15,105 00
Wm. W. Longstreet & Co., Boston	15,085 50 and interest
S. A. Keao, Chicago	15,000 00 and interest
Waukesha National Bank, Waukesha	15,000 00 and interest
National Exchange Bank, Waukesha	15,000 00 and interest
Wisconsin Trust Co., Milwaukee	15,000 00
Mason, Lewis & Co., Chicago (for \$14,000)	14,144 00 and interest

The securities will be of the denomination of \$1,000. They will be dated July 1, 1896, and interest at the rate of 5 per cent will be payable semi-annually. Both principal and interest will be payable at the office of the City Treasurer. The first coupon, due Jan. 1, 1897, will be detached. The bonds will mature at the rate of \$1,000 yearly from July 1, 1897, to July 1, 1911. The bonded debt of the city, including this issue, is \$45,000; assessed valuation is \$3,490,000, and the population is estimated at 7,600.

**Waterbury, Conn.—Bond Offering.**—Proposals will be received until 8 o'clock P. M. Feb. 8, 1897, by Richard F. Grady,

city clerk, for the purchase of \$25,000 of water bonds of the city of Waterbury. The securities will be dated January 1, 1897, and will mature January 1, 1907. Interest will be payable semi-annually on January 1 and July 1, and the denomination of the bonds will be \$500. Bids may be for 3½ per cent or 4 per cent bonds. On December 1, 1896, the bonded debt of this city amounted to \$1,012,500, and the sinking fund to \$131,000, making a net bonded debt of \$878,500; on the same date the floating debt amounted to \$141,702. The assessed valuation for 1896, real and personal property, was \$10,700,000, and the true value was estimated at \$15,000,000. The population in 1890 was 23,646, and on Dec. 1, 1896, was about 33,000.

**Webster Grove, Mo.—Bond Election.**—It is reported that electric-light bonds of this place to the amount of \$20,000 have been proposed, and the question of issuing the same will soon be submitted to a vote of the people.

**Youngstown, Ohio.—Bond Sale.**—It is reported that this city recently sold \$25,000 of school bonds to Dietz, Denison & Prior. The securities bear interest at the rate of 6 per cent, and will mature in from 6¼ to 7¼ years from date of issue.

**Fayette County, Tex.**—The following statement has been corrected to December, 1896, by means of a special report to the CHRONICLE from R. T. Bradshaw, County Treasurer. The jail, court house and road and bridge bonds are all owned and held by the Permanent School Fund of Fayette county and are non negotiable.

The county seat is La Grange.

## MISCELLANEOUS

An Old Favorite With New Features.

## THE LIVING AGE,

Founded by E. Littell in 1844.

In 1896 the subscription price of THE LIVING AGE which had been Eight Dollars a year, was reduced to Six Dollars. The effect of this change was to add hundreds of new names to the subscription lists.

Encouraged by this response the publishers now take pleasure in announcing several new features of interest which they propose to introduce. These include

First, the publication of occasional translations from the French, German, Spanish and Italian reviews and magazines. Second, the addition of a Monthly Supplement containing three departments, namely:

Readings From American Magazines.

Readings From New Books.

A List of Books of the Month.

The proposed Supplement will add about three hundred pages annually to the magazine, without any added cost to the subscribers.

Published weekly at \$6.00 a year.

To New Subscribers for the year 1897, remitting before January 1, the weekly numbers of 1896 issued after the receipt of their subscriptions will be sent **GRATIS**.

### THE FINANCIAL SITUATION.

The leading incidents of the week have been the defeat of the Pacific Railroad funding bill, the signing of the arbitration treaty by Great Britain and the United States, the continued flow of currency from the interior towards New York with its natural result a demoralized money market, and the return of variable rates for foreign exchange. Easier exchange with which last week closed continued until Monday and was a result mainly of the unchanged condition of our foreign trade movement—that is, very large exports and very small imports, the easier tendency being aided no doubt by maturing long bills bought two and three months ago for investment; on the other hand the hardening of the rates subsequently was reported to be due in part to more purchases for investment, but also to a special movement, the borrowing by London in New York of amounts to be loaned in the former city so as to secure the profit which the difference in interest rates promised.

We are told by banks through which some of the transactions just referred to have been effected that they have been large. The operation consists in the making, say, of a sixty-day draft in London by a banking house there upon its New York correspondent, sending it hither for acceptance and discount. The proceeds are promptly remitted to London through sight sterling or cable transfers. When the sixty-day draft matures the drawer must of course provide the funds for its payment. In this way London has been getting the use of the money obtained from our market for sixty days at, say, 2 per cent and has employed the money in London at 3 per cent, that having been the open market discount rate ruling at that center until the latter part of the week, when rates fell off a fraction.

These operations are attended with risk and look a little as if this kind of business was being carried on now more for the purpose of keeping up the exchange market and saving parties from loss on previous investment purchases than for the profit the new ventures may yield. If general business does not revive, imports of merchandise will not show the increase usual at this season of the year. In that case it is not impossible that our unliquidated trade balance should get so large as to cause embarrassment, that is loss, to those who are engaged in such manipulations. The hope, however, and may we not say the expectation, these operators entertain is that an extra session of Congress soon after the fourth of March, and the progress of tariff legislation during the extra session, will for a time so largely increase the imports of goods hastened forward to get into warehouse before the higher duties go into effect, that the trade balance will be reversed, exchange rates be advanced in a natural way, and the manipulators helped out, even if trade revival does not stimulate the movement of foreign merchandise hitherward.

The foreign trade figures for the month of December and for the year ending with December were given out yesterday by Mr. Ford, Chief of the Bureau of Statistics. We publish the details lower down in this article with some very interesting comparisons. Next week we shall give our usual comprehensive review of the trade for 1896. But the totals are instructive in connection with the foregoing remarks with reference to foreign exchange. It appears that the merchandise balance in favor of the United States for the 12

months ending with December is \$325,322,184, the largest balance ever recorded within a similar period. What, however, is of still more importance as bearing on present transactions in exchange is the fact that the merchandise balance for the six months since July 1 has been \$250,365,753, or over 85 million dollars larger than ever before; and if we include the whole trade, that is, merchandise, gold and silver, the net balance is still found to be over 203 million dollars. This statement indicates what those who are speculating in foreign exchange are fighting against. We have shown on previous occasions that the United States owes Europe every year for interest freights, etc., not to exceed 150 millions of dollars annually. But the foregoing balance is only for the last six months; hence, deducting one-half this interest etc. item from the above balance, we have left 128 million dollars, which, less the *net* security movement since July 1 1896, represents the amount owing to the United States and still unpaid by the outside world.

We are sorry the Pacific Railroad funding bill, which has been before Congress, was lost. At least this we affirm, that it would have been considered an act of good omen had Congress passed some feasible law under which the tangled affairs of those great properties could have been straightened out and settled. Possibly Congress will do something even yet, though it appears late to begin new legislation. As at present situated these defaulted roads constitute one of the burdens under which our industries are suffering. Although the roads are kept agoing during their receiverships, their efficiency is lessened and the capital in them is largely unproductive. Every such half-dead thing is an incubus, somewhat after the character that insolvent firms with corresponding assets and liabilities would be while their affairs were undergoing liquidation in the hands of assignees. Still, even if Congress does nothing, these railroad properties are not likely to be left much longer in the position they now are. Foreclosure proceedings already in progress must soon come to a head; or if not that, judging from the statement in President Cleveland's message with reference to the Pacific roads, the Government will not delay action under its mortgage many weeks. Thus, in some way it is quite reasonable to suppose that the non-action by our legislators will not long hence be found to have forced rather than retarded the rehabilitation of these properties.

We should not omit to mention as a most hopeful event of the week the Sound Money Convention at Indianapolis and its wise action. The gathering was a non-partisan meeting of business men for consultation upon currency reform, the vital issue of the day affecting our industries; the resolutions passed showed that the delegates had not only diagnosed the disease carefully, but that they had studied the case so closely as to know, in providing a cure, how to touch with extreme accuracy the very points any perfect system for this country must make provision for. First of all the Convention brushed aside all nostrums and palliatives by stating that "a consistent, straightforward and deliberately planned monetary system" had "become absolutely necessary; next it declared that a gold standard must be maintained; next "that steps should be taken to ensure the ultimate retirement of all classes of United States notes by a gradual and steady process;" finally, "that a banking system be provided which shall

furnish credit facilities to every portion of the country and a safe and elastic circulation,' &c. Here are the outlines of the work to be done, simply, clearly and concisely stated. Any one can take them and fill out the thought by merely preparing a scheme carrying the suggestions into effect. Some may find them a little iconoclastic in character, because they call for the breaking up and throwing into the scrap basket of many matured plans—matured before the present currency conditions fully developed—but cherished as idols now. It is consequently a great gain to have had the practical business man's idea put into such a living shape. There is no doubt of its speedy growth in popularity among those who are working for sound money. The developments day by day of the losses which the present unscientific currency arrangements are producing will enable all honest men not long hence to see that the Convention's action just meets the needs of the country.

Last week's bank statement showed unexpectedly large increases in cash and in deposits. This was due about one-half to the disbursements of the Treasury and the other half to the movement of currency from the interior to this centre. There was a gain of \$17,523,200 in deposits, while the increase in cash was \$15,017,800. Comparisons of the bank statements show that since the week ending November 7 there has been an addition of \$48,936,500 to the loans, of \$13,190,400 to the specie, of \$43,390,800 to the legal tenders, of \$109,600,600 to the deposits and of \$29,181,050 to the surplus reserve. Naturally enough under such circumstances the money market has all the time been growing easier, the tendency continuing through this week. For instance, the call loan branch of the market, in which the average has heretofore been about 2 per cent, has ruled this week at an average nearer 1½ per cent; for time contracts the tendency has been more decidedly downward, and on Wednesday 2 per cent was quoted for sixty days and 3 per cent for six months; rates for commercial paper have also been lower, as will be seen in our review below.

The iron trade, which by many is always looked upon as a sort of barometer of our industries, just now seems to be reflecting pretty accurately the general business situation. Things are better than they were before the election, but the progress towards a full revival of activity is much slower than had been expected. The "Iron Age" has this week published its usual monthly statement showing the number of pig iron furnaces in blast, with their capacity per week, and the further addition during the late month is seen to have been quite small. In brief the number of active furnaces has been increased by only 7, raising the total to 154. These 7 were quite large furnaces, adding 17,442 tons to the weekly production, but even after this increase the product is only 159,720 tons per week. Of course as compared with the low point on October 1, when the weekly output was down to but 112,782 tons, there has been a very substantial recovery, the increase of 46,938 per week being at the rate of about two and a half million tons per year. But we have only to go back to the 1st of July, just before Bryan's nomination, to see how far from a normal state we still are. As against 154 active furnaces now, the number then was 191, and against the present product of 159,720 tons per week, the product at that time was 180,532 tons. But even in July the output had already greatly dwindled,

and if we compare with the 1st of January last year we find that the number of furnaces in blast then was no less than 241 (or 87 more than at present), and the weekly product 207,481 tons, as against only 159,720 tons now. When at its maximum, namely November 1 1895, the weekly output was 217,306 tons, or at the rate of nearly three million tons per year better than the present rate. The reports from the iron centres this week speak of a somewhat more active demand in the various branches of the trade, and possibly if Congress does not put an embargo on the movement, the production of pig will now be further materially increased. It would be interesting to know what had been the course of accumulated stocks—whether there had been a further decrease—but the "Age" does not give the statistics this time.

We make this week an analysis and compilation of the gross earnings of United States railroads for the late calendar year. The net earnings for the twelve months of course will not be known for some time. The latest returns in this case cover the month of November, though one or two roads which issue their statements with unusual promptness have already furnished figures for December. The Union Pacific for November reports \$44,090 increase in gross but \$71,507 decrease in net; the Illinois Central \$283,933 decrease in gross, \$343,830 decrease in net; the Atlantic & Pacific \$5,864 decrease in gross, \$37,858 increase in net; the Fort Worth & Denver City \$9,963 increase in gross, \$30,054 increase in net; the Chicago & Northern Pacific \$6,048 decrease in gross, \$687 increase in net; the Choctaw Oklahoma & Gulf, \$4,968 increase in gross and \$9,277 increase in net; and the Norfolk & Western, \$49,362 decrease in gross and \$16,661 increase in net. The following is a four-year comparison for a number of roads which have during the week furnished returns for November.

\* Includes St. Louis Alton & Terre Haute for all the years.

The amount of gold and of gold obligations turned into the Sub-Treasury in exchange for legal tenders this week was \$300,000. The net gold in the Treasury officially reported from Washington on Friday of last week was \$138,624,814 and the amount so reported on Friday of this week was \$141,086,876.

Money on call, representing bankers' balances, has, as already stated, loaned this week generally at 1½ and at 1¼ per cent, with some loans at 2, and the average has been a fraction below 1½ per cent. Banks quote 2 per cent as the minimum, but trust companies loan at 1½ per cent. The inquiry for time contracts is light, many intending borrowers feeling that they can obtain better rates later on, and lenders have this week made concessions in rates. Quotations are 2 per cent for sixty days, 2½ for ninety days to four months, and 3 for five to six months, on good Stock Exchange collateral. The demand for commercial paper is so urgent from almost every quarter that all offerings are promptly absorbed and brokers report an increasing business. Rates are 3@3½ per cent for sixty to ninety-day en-

dorsed bills receivable, 3½@4 for first-class and 4½@5 for good four to six months' single names.

There has been no feature of importance in the European financial situation this week. The Bank of England minimum rate of discount remains unchanged at 4 per cent. The cable reports discounts of sixty to ninety day bank bills in London 2 15-16 per cent. The open market rate at Paris is 2 per cent and at Berlin and Frankfurt it is 3½ per cent; according to our special cable from London the Bank of England gained £1,076,190 bullion during the week and held £35,594,282 at the close of the week. Our correspondent further advises us that the gain was due to receipts from the interior of Great Britain of £948,000 net and imports of £128,000, of which £108,000 were from Australia and £20,000 from China.

The foreign exchange market, though it opened easy, has been generally firm this week, with a good demand for long sterling for investment. The offerings of maturing sixty day bills have been moderately large, but they have made only a slight impression upon the market, and part of the demand for short sterling and for cable transfers has come from remittances of the proceeds of London drafts discounted by some of our banks, as related above. The market after being easy Saturday opened firmer on Monday, and the range for posted rates was from 4 84½ to 4 85½ for sixty day and from 4 87½ to 4 88½ for sight, nearly all the drawers advancing their rates half a cent compared with the close on Friday and Saturday a week ago, and there was also an advance of half a cent in rates for actual business, to 4 84½@4 84½ for long, 4 87½@4 87½ for short and 4 88@4 88½ for cable transfers. There was no change in nominal rates on the following day, but a supply of maturing long bills made short sterling and cable transfers easier and rates for actual business in these fell one-quarter of a cent to 4 87½@4 87½ for the former and 4 87½@4 88 for the latter, while rates for long sterling were unchanged. The range for posted rates on Wednesday was 4 85 to 4 85½ for sixty-day and 4 88 to 4 88½ for sight. The market was quoted steady, with rates for actual business unchanged. On Thursday posted rates remained unaltered while those for actual business advanced one-quarter of a cent all around to 4 84½@4 85 for long, 4 87½@4 87½ for short and 4 88@4 88½ for cable transfers. The market closed firm, especially for long sterling. Yesterday the range for posted rates remained 4 85@4 85½ for sixty-day and 4 88@4 88½ for sight, and no change occurred in the rates for actual business. The following shows the daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

	FRI. Jan. 6	MON. Jan. 11	TUES. Jan. 12	WED. Jan. 13	THUR. Jan. 14	FRI. Jan. 15

\* Excess of imports.

In the last table gold and silver in ore for 1893, 1894, 1895 and 1896 are given under the heads respectively of gold and silver; for the other years both are included in the merchandise figures.

The following statement gives the week's movements of money to and from the interior by the New York banks.

Week Ending Jan. 15, 1897.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$7,764,000	\$3,381,000	Gain \$4,383,000
Gold.....	807,000	411,000	Gain. 396,000
Total gold and legal tenders.....	\$8,561,000	\$3,792,000	Gain \$4,769,000

With the Sub-Treasury operations the result is as follows.

Week Ending Jan. 15, 1897.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$8,561,000	\$3,792,000	Gain \$4,769,000
Sub-Treasury operations.....	18,300,000	14,300,000	Gain. 4,000,000
Total gold and legal tenders.....	\$26,861,000	\$18,092,000	Gain \$8,769,000

The following table indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

Bank of	Jan. 14, 1897.			Jan. 16, 1896.

\* The division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as those banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE.—We receive the foregoing results weekly by cable, and while not all of the date given at the head of this column, they are the returns issued nearest to that date—that is, the latest reported figures.

### THE ARBITRATION TREATY.

Almost exactly a year ago the outlook for peaceful relations between ourselves and foreign States, and between these European powers and one another, had darkened to a degree not witnessed since the last continental war. At the close of 1895 the United States was in a flame of hostile sentiment against Great Britain. The dramatic "Jameson raid" had drawn the German Emperor into a public attitude which, as even the conservative London "Economist" declared, was "a piece of gratuitous insolence" which the British people "are bound to resist, even if resistance costs them a great war." The Armenian massacres had complicated the tangled European diplomatic situation; the preliminary rumors of Congressional action such as would logically force a war with Spain were already circulating.

We venture to say that the historian will have some trouble, when he studies the present generation philosophically, to explain this extraordinary and almost world-wide outburst of warlike feeling. Part of it certainly was a mere coincidence, yet it did undoubtedly for the time appear as if almost every one of the Great Powers was eager to enter upon an angry international dispute. Particularly in this country, the fury with which the press and people rushed into talk of foreign war suggested latent possibilities from which most of us have believed our nation to be completely free. The singular part of the narrative, when it is written in comprehensive history, will be the sudden and universal subsidence of the outbreak. The ringleader of the Transvaal raid is brought to England, tried and convicted by a jury of his countrymen. The German Emperor's official organs in the press virtually apologize for him. The Powers apparently co-operate harmoniously to force on Turkey observance of the rules of humanity. The Senators, bent on Cuban intervention, abandon their scheme before they have brought the resolution to a vote. Last of all, the critical dispute over the Venezuela boundary is almost forgotten, while the issue of that one small problem is superseded by an arbitration treaty between the two States lately on the verge of conflict so broad and permanent in its provisions that it may properly be described as a revolution in diplomacy. We question if history can anywhere provide, within the compass of a single year, so dramatic and significant a contrast.

The arbitration treaty, which was signed at Washington last Monday by the official representatives of Great Britain and of the United States, grew in one

sense out of the Venezuelan dispute. The plan did not, however, by any means originate with that controversy. Arbitration, special or general, may be said to have been a recognized policy of this Government since the submission of the Alabama Claims to such a court in 1871. It has been peculiarly the policy of the present Administration. Long before the Venezuela episode the State Department was at work on plans for a general arbitration treaty. Negotiations to that end were conducted with great assiduity by the late Secretary Gresham; and Secretary Olney, on his succession to the office, found much of the preliminary work already done.

A very powerful influence was however exerted by the Venezuela episode in this respect: that the actual crisis which arose between the two nations a year ago proved the immediate necessity for a permanent understanding such as could be appealed to in emergency. Two years ago the suggestion of war between Great Britain and the United States would have been regarded as absurd. Twenty-five years ago President Grant, referring in his annual message to the treaty of Washington, expressed the "sincere hope," which was clearly the popular conviction, that the friendly relations between the two governments, left by that treaty "without a shadow, may forever remain equally unclouded." Diplomats, sharing this conviction, took their time. But the extraordinary outbreak at the close of 1895 opened the eyes of statesmen. It undoubtedly startled our own administrators quite as much as it did the English public leaders. No one can seriously suppose to-day that the President, in issuing his special message of December 17, contemplated any such popular explosion as resulted.

The warning to both parties to the controversy was so unmistakable that the work of the new Venezuela Commission was at once overshadowed and eventually quite superseded in public interest by the negotiations for the larger treaty. From the moment that the general arbitration plan was known to be on foot, the Venezuela question practically disappeared from public notice. The universal satisfaction over this turn in events is the best imaginable proof that the "war talk" of a year ago did not represent the true and sober sentiment of our people. Lord Salisbury's announcement, at the Lord Mayor's banquet on November 9, that the terms of a general arbitration treaty were already virtually settled, received almost as conspicuous notice in the press and in public discussion as did the original Venezuela message. Last Tuesday's formal publication of the treaty was received with an enthusiasm which leaves no doubt whatever as to the feeling of the United States.

The terms of the treaty thus formally submitted are clear and comprehensive. Its provisions cover three distinct classes of disputes: Claims not involving territory and amounting singly or in a group to less than £100,000; similar claims exceeding £100,000; and controversies involving the determination of territorial claims. Of these the first and smallest class are to be settled by three arbitrators; two "jurists of repute" named respectively by the two governments, and an umpire chosen by these two. Pecuniary claims exceeding £100,000 are to be settled by a similar tribunal if unanimous decision can be obtained. If unanimity is not obtainable the decision may on appeal be reviewed by a second tribunal of five other "jurists of repute," two named by each of the contracting Powers and an umpire selected by these four.

The third class of cases, embracing territorial claims, is naturally the most delicate of all. Such disputes are to be submitted to a tribunal of six members; three of them Justices of the United States Supreme Court or circuit courts, named by the President, and three Judges of the British Supreme Court of Judicature or members of the Judicial Committee of the Privy Council, named by the Queen. This tribunal, in order that its verdict shall be binding and final, must award by a majority of not less than five to one. But decision by less than this five-sixths majority shall also be final, unless either Power file its protest within three months. In any case, it is provided that no recourse to hostile measures shall be had until the mediation of one or more friendly Powers shall have been invited. Finally, in the event of failure by either of the two first-named tribunals to choose the umpire requisite to complete their membership, such umpire shall be appointed by the King of Sweden; this sovereign being obviously named as the ruler most removed, politically and territorially, from any association which would prejudice his individual judgment. The treaty is to remain in force absolutely for five years, and permanently thereafter, unless on twelve months' notice by either government of its wish to terminate the agreement. The time and place of meeting are left to the decision of the tribunal itself, and decisions are, if possible, to be rendered within three months.

Such are the chief points of this exceedingly important document. Its terms are largely based on those of the Treaty of Washington signed May 8 1871. It differs from that memorable State paper, however, not only in its permanency of character, but in some of its essential provisions. As might naturally have been expected, from the difference in the scope of the two treaties, the precautions and safeguards thrown about the present convention are by far the greater. The Geneva commission established by the former Washington treaty consisted of five arbitrators named respectively by the President of the United States, the Queen of England, the King of Italy, the President of the Swiss Confederation and the Emperor of Brazil, and decision by majority vote was to be final. The claims submitted to the Geneva Commission were, however, pecuniary; the case in point and the principles governing that case were thoroughly well defined. The award, therefore, necessarily depended almost wholly on the tribunal's judgment of the facts.

It will be seen at a glance how far the scope of this month's treaty extends beyond that of the treaty of 1871. The pecuniary claims considered under the treaty of this year will, indeed, resemble in general character or principle the questions at issue twenty five years ago, and the tribunals provided for such cases, in the earlier articles of the treaty, are for that reason not unlike those under which the Geneva commission acted. But territorial disputes open a very different problem. Such questions, it is known, presented the chief difficulty in the negotiation. It was on this very point that Lord Salisbury stood out longest; nor was Great Britain any more vitally concerned than we. That such questions should be submitted in advance to a tribunal chiefly made up, as the Geneva commission was, of nominees of other foreign States, it was scarcely reasonable to expect. No such provision appears in the article governing cases of this order. In territorial disputes the rights of the two contracting parties are guarded jealously. Such claims

involve, as was sufficiently shown in the Venezuela controversy, examination of intricate points of law and precedent; therefore selection of the arbitrators is wisely stipulated from the highest law courts of the nations. Such claims peculiarly affect, moreover, the interests, remote or immediate, of neutral States; therefore no umpire from the outside is provided for.

Indeed, the more the Sixth Article of the treaty is studied, the more the conviction deepens that only the highest exercise of enlightened judgment and public spirit will make possible, in a case of serious dispute, a positive settlement by the court of arbitration. Reduced to its simplest terms, the meaning of this article is that territorial disputes can be positively settled by the arbitrators only in case two out of the three judicial authorities named by one contesting Power shall decide against the claim of their own government. This is certainly as much of conservatism as the most jealous Power could demand. Judge Harlan did indeed vote against the claim of the United States in the Bering Sea arbitration of 1893; but he was the only American vote thus cast. In advance of actual experience in a serious case, it would be hard to say how far the arbitration court would serve its purpose.

Be that as it may, the treaty is an auspicious achievement. As the President observes in his message of transmittal, "although the result reached may not meet the views of the advocates of immediate, unlimited and irrevocable arbitration," it must nevertheless be "recognized as making a long step in the right direction, and as embodying a practical working plan by which disputes between the two countries will reach a peaceful adjustment as a matter of course and in ordinary routine." The approval of the Senate is anticipated. The arrangement, as we have seen, is much more guarded and conservative in terms even than that of 1871. It is open to no such objection as the original convention of 1869 regarding the Alabama claims, a treaty which the Senate reasonably enough rejected. That treaty provided an umpire who would decide individually all cases on which the arbitrators for the contracting Powers disagreed; in substance the whole decision was placed in his hands only. The present treaty is as far removed as possible from any such fundamental weakness. Nor need any importance be attached to newspaper rumors of opposition on the ground that the King of Sweden is allowed too large dictation. This suggestion is without reason. Resort to his judgment, in the first place, is not allowed at all in territorial disputes; and in pecuniary matters it is provided only in the case that the arbitrators of the two contesting States shall fail to select their own umpire. We attach quite as little significance to the current vague reports that other foreign Powers are discontented with a treaty of such intimate association between Great Britain and the United States. If these Powers feel that either England or our nation has gained undue advantage as compared with other States, there is an easy remedy. Let such other Powers open negotiations for similar arbitration treaties for their own benefit.

It is our belief, in short, that the treaty will meet the cordial approval of the civilized world, as it has already received the prompt approval of American public sentiment. This second treaty of Washington worthily closes an administration noteworthy, in spite of its many vicissitudes and troubles, for its high pur-

pose and honest effort in behalf of public welfare. If Mr. Cleveland had no other claim on the recognition of history, the repeal of the Silver Purchase Act in the first months of his second term and the settlement of the arbitration problem near its close, would ensure its place. This final achievement is in truth a step in the march of civilization which promises to affect the whole world's history. It is the honorable distinction of the United States that for a generation it has taken the initiative in this vital problem.

### THE REPORT OF THE LEHIGH VALLEY RAILROAD.

In taking up the report of the Lehigh Valley one is forcibly impressed with the fact of changed methods. Time was (and not so very long ago either) when the company's annual reports did not even contain a balance sheet. Now not only this essential of a complete report is furnished, but the announcement is made in the report that the monthly publication of the results of the business of both the railroad company and the Lehigh Valley Coal Company will be begun with the current fiscal year. Furthermore, we are told that the English system of annual examination of the company's accounts by public accountants—in other words, the system of an independent audit—is also under consideration by a committee of the board of directors. We will only say as to these departures that they are steps of the right kind, and indicate the desire of those directing the management to meet the wants of security holders and the public for fuller and more frequent information, accompanied by the assurance that the accounts as presented are in accordance with accurate methods of accounting.

The Lehigh Valley is one of the larger anthracite coal-carrying properties, and in the anthracite trade, as our readers know, the conditions the late year were very unfavorable. We will not go so far as to assert that it was the worst year ever experienced in the trade, but it was at all events a very poor year. As a matter of fact the anthracite situation has been unsatisfactory for a good many years, the hopes of an improvement having unfortunately again and again been disappointed. The suspension of dividends by the Lehigh Valley in 1893, after a continuous dividend record extending over thirty-five years, can not perhaps entirely be ascribed to the coal trade situation. It followed in part from the burdens imposed by the extension of the lines of the system. These extensions were made with the view to strengthening the road's position and diversify its traffic, and the fruits of that policy, as we shall presently show, are now appearing in increased traffic and revenues. But the immediate effects were rather disappointing. The heavier charges entailed by these various outlays began to accrue at once, while the development of the new sources of traffic (particularly at a time of depression in the business world) was necessarily slow. Simultaneously the road had to contend with a great strike and with other adverse circumstances.

Giving due weight, however, to all this, it still remains true that the conditions in the anthracite trade, not only during 1896 but for some years past, have been decidedly adverse, and that all the anthracite carriers, even the largest and strongest among them, have suffered from that cause. Not only has the Reading had to be reorganized again, but the Central of New Jersey felt obliged in the last half of 1895

to reduce its dividends from the basis of 7 per cent per annum to 5 per cent, and the Lehigh Coal & Navigation, an allied corporation, in 1894 came down to a 4 per cent basis. Then the Delaware & Hudson has now also made a reduction in its rate of distribution, dropping from 7 per cent per annum to 5 per cent. This leaves the Lackawanna as the only one of the large anthracite carriers still maintaining the old rate of dividend payments.

In the late year if the industrial situation had not taken such a disastrous turn the anthracite trade would undoubtedly have shown decided improvement. The various anthracite interests had at last (in January 1896) abandoned their policy of ruinous strife and substituted common-sense methods for the indefensible practices previously in vogue. They had been mining coal without limit, and carried competition so far that the profit from the business was extinguished. They decided to curtail production and bring it down more nearly to the demand. Hence a very radical policy of restriction was inaugurated. Yet President Wilbur says it was not until midsummer that the price received for coal covered its cost. There were three reasons for this. In the first place the advance in the selling prices of coal was made only gradually; in the second place all the companies had large future contracts outstanding at low prices, and in the third place the expense of operating the collieries is increased when production is small. Unquestionably, however, the benefits expected from the new policy would have accrued the latter part of the year except for the intense depression in trade which developed as the result of the silver agitation. This caused a very great falling off in the demand for coal, so that though better prices prevailed the companies disposed of greatly diminished amounts of coal. The consumption, indeed, fell so much below expectations that the output once more ran greatly ahead of it, leaving supplies again accumulating.

Mr. Wilbur says that the better rates obtained in the latter part of the year produced an undiminished net revenue, notwithstanding the loss in tonnage. He points out, however, that unless something is done to prevent sales for future delivery at the lower prices usually current in the early part of the year, and to avoid excessive output of coal when not required, the favorable result anticipated for the current year may fail of realization. The anthracite companies should certainly take care to guard against such an outcome. At the same time it appears to us that the situation is measurably more satisfactory than it was twelve months ago. The carriers have the trade better in hand, contracts at the old low prices are nearly all out of the way, and then also we think the indications point unmistakably to a revival of activity in our industries, ensuring an augmented consumption of coal, under which the difficulties in the trade must disappear.

Quite apart from the improved outlook in this branch of the company's business, the road's general traffic is being steadily developed, even in the face of industrial depression, and this growth will of course also be accelerated in the event of trade revival. The development in the direction referred to has been very striking during the last two years. We have adverted above to the enlargement of the system's mileage. Since the opening of the Buffalo extension in 1892 the company has had a through line under its own control extending from New York to Buffalo. It has also made a number of other acquisitions, the most recent of these

being the Middlesex Valley and the Elmira Cortland & Northern. The report says that these lines, besides having a good local trade, are both important feeders to the general business of the system.

The effect of the new extensions and acquisitions, together with the general development of the company's business, is seen in the announcement in the report that for the late year the tonnage movement of merchandise freight for the first time in the history of the company exceeded that of anthracite and bituminous coal and coke. In the fiscal year ending November 30 1893 the ton-mileage of coal had been 1,323 million tons, that of general freight 1,283 million; for the fiscal year 1896 the coal ton mileage was 1,333 million (anthracite having decreased, while bituminous increased), and the general freight mileage increased to 1,555 millions. In 1894 this latter amounted to only 1,004 millions, so that in two years the expansion has been over fifty per cent. The passenger traffic is also being steadily developed, the passenger revenues showing an increase in the late year of \$239,995 after an increase of \$211,863 in the year preceding. Mr. Wilbur notes that while the increase in 1896 was partly due to the added volume of traffic obtained through the acquirement of the Elmira Cortland & Northern, yet a considerable portion of the gain was secured by an active solicitation for business and by the improvement of the road's train service. He also points out that the running of the Black Diamond Express between New York and Buffalo, which was put on in May last, has proved to be even more satisfactory in its results than had been expected.

The company's aggregate gross earnings, after having dropped from \$18,610,777 in 1893 to \$17,330,594 in 1894, have since then been steadily rising—increasing first to \$18,564,454 in 1895 and now to \$19,514,660 in 1896, making them, we believe, the largest in the company's history. In the revenues from coal the changes have not been very important, the receipts in 1894 having been \$8,391,542, in 1895 \$8,470,859 and in 1896 \$8,623,574; but in the earnings from general merchandise the increase has been from \$5,982,857 in 1894 to \$7,472,104 in 1896. The improvement is the more noteworthy since it has been made in face of a very considerable decline in rates. The average per ton per mile on coal for 1896 at 6.46 mills was only a little better than that for 1895 at 6.40 mills, and compares with 7.32 mills in 1894. In the case of general freight the average was only 4.80 mills in 1896, against 5.34 mills in 1895 and 5.95 mills in 1894. The decrease in this last instance in the two years has been nearly 20 per cent, while in coal the decline has been about 12 per cent. What an important factor these declines in rates have been is evident from the statement in the report that the shrinkage of 0.31 mills in the average in 1896 for the whole tonnage (coal and merchandise combined) represents a loss in income in the large sum of \$900,000.

In brief then, it may be said that in the late year rates were very low, the coal trade failed to show the improvement expected, and all the industries of the country were in a state of extreme depression. About the only favorable factor was the heavy grain movement as the result of the large crops of 1895 and 1896, and which was of advantage to the Lehigh Valley in swelling the amount of its through traffic from Buffalo to New York. Bearing on this latter point, we observe that of the 662,951 increase in the merchandise tonnage in the late year, 528,365 tons was in the item

of grain. That, however, must not be taken to indicate that the development has been entirely in that direction. As a matter of fact, though there were some considerable losses in a few leading items owing to the depression in trade (the tonnage in ores for instance being only 170,195 tons against 290,893 tons), if we take the whole of the twenty-six items of freight reported separately, we find that 17 show increases and only 9 decreases; moreover, this is after an increase in 1895 over 1894 in 20 out of 23 items enumerated.

Altogether the increase of \$950,206 in gross earnings during the late year indicates very substantial growth in the business of the system in face of adverse conditions. Operating expenses during the twelve months were augmented by extra outlays of \$108,906 spent in equipping cars with couplers, brakes, &c., in accordance with the statute requirements of the various States and the United States; but notwithstanding the augmentation in this and various other directions, net earnings were increased from \$4,658,678 to \$5,124,682. On the other hand, there was a considerable falling off in the income from investments or "other sources," and at the same time the fixed charges for interest and rentals were somewhat heavier, so that the surplus remaining after these charges was not quite so large as in 1895, being \$449,763, against \$642,842. In this the interest on the Lehigh Valley Coal Company bonds assumed by the company, amounting to \$590,650 in 1896 and to \$596,625 in 1895, is not treated as a charge against income, but carried as a debit to profit and loss. If that item were taken into account, the final result for 1896 would show a small deficiency, which, however, is a not unsatisfactory exhibit, considering the character of the year and the extent to which the other anthracite carriers suffered from the unfavorable conditions prevailing.

In the balance sheet we find that the amount of bills payable outstanding November 30 1896 was slightly less than on November 30 1895, though the total fell below 2½ million dollars at both dates. On the other side of the account it appears that the cash advances to the Lehigh Valley Coal Company were increased during the twelve months \$1,859,851, and now amount to \$5,166,889. The increase arose out of the accumulation of stocks of coal towards the end of the year on account of the depression in trade—that is to say, the Railroad Company had to furnish the money to the Coal Company to enable it to carry the stocks. It may be asked if the Coal Company has the means to repay those advances. It would appear that it had. Without attempting an analysis of the current assets of the coal company, it will be sufficient to say that two large items make up enough to cover nearly the whole amount. We refer to the \$2,690,285 of coal reported on hand according to the inventory and the \$2,168,259 of presumably collectible accounts on coal sold

#### RAILROAD DIVIDENDS IN 1896.

The reduction last week in the dividend rate of the Delaware & Hudson from 7 per cent per annum to 5 per cent makes interesting a review of the dividend record of our railroads for 1896. It is rather noteworthy that among the larger companies holding rank as dividend payers there were very few changes in the rate of distribution to their stockholders during the late year. Nor were there a great many reductions or

suspensions among any class of companies, large or small. This latter fact is explained by the circumstance that the period of depression has been a long one and that dividend reductions and suspensions in such great numbers had occurred in the years preceding. No doubt also there are cases where the dividends, though paid, were not earned, and that in these cases changes will be forced the present year unless business conditions materially improve. Fortunately all the indications at present point to a decided recovery in trade.

As the matter stands, the most striking feature is, that though our industries became more and more prostrated as the year progressed, until the election brought relief, instances where dividends have been increased or resumed are much more conspicuous than those of the other kind. The improvement has come mainly from two classes of roads, those recently reorganized where the reorganization was very conservative and where there was an implied promise that dividends were to be declared if earned, no matter how small, and those which have been greatly helped by the excellent grain harvests, particularly in the spring-wheat regions of the Northwest.

The Southern Railway has this month paid a dividend of 1 per cent on its preferred stock. The Georgia Southern & Florida paid a first dividend of 4 per cent to its 1st preferred shareholders in November. The Minneapolis & St. Louis, which was reorganized in October 1894, is paying 5 per cent dividends on the 1st preferred stock and 3 per cent on the second preferred. Both the Canadian Pacific and the Denver & Rio Grande preferred have returned to the dividend ranks. The Des Moines & Fort Dodge gave its preferred stockholders 6 per cent in August 1896, against only 4 per cent in August 1895. The Burlington Cedar Rapids & Northern increased from 3 to 4 per cent. The Philadelphia Wilmington & Baltimore paid 7 per cent in 1896 against 6½ in 1895, and the Pittsburg Youngstown & Ashtabula 6½ per cent on its common against 6 per cent, while the Evansville & Terre Haute made its first payment on the preferred stock. The New York Chicago & St. Louis made an annual dividend of 5 per cent in March out of the earnings of 1895, against nothing paid in 1895 out of the earnings of 1894. The Rutland, which was forced to pass its July dividend on the preferred stock and which seemed to have little prospect for a resumption of dividends, since the Central Vermont, to which it had been leased, had gone into the hands of receivers, has already paid a dividend of one per cent the present January. The road is now operated independently of the Central Vermont, by its own officers. Rumor also says that the Chicago St. Paul Minneapolis & Omaha is to begin dividends on its common shares after having paid on its preferred shares for many years.

The roads that have suspended or reduced in 1896 are not numerous. The Toledo & Ohio Central passed the October dividend on its preferred shares; the Nashville Chattanooga & St. Louis deferred the quarterly payment due in November but has now declared both that dividend and the next quarterly one. The Canada Southern will pay only 1 per cent February 1897, against 1½ per cent at previous semi-annual dates. The Boston Revere Beach & Lynn, which at one time paid 3½ per cent each six months, now is down to 1 per cent semi-annually. The Keokuk & Des Moines, whose preferred shareholders had been receiv-

ing small amounts in other years, received nothing in 1896.

As already stated, among the larger and more prominent roads the changes in 1896 were few. Here is the record for the Western roads for ten years. It will be observed that both the St. Paul and the Chicago & North Western paid a larger aggregate on their common shares in 1896 than in 1895.

‡ Old stock exchanged into new preferred with 33½ per cent stock dividend; and 2 per cent paid on this preferred stock in November, 1897, after 3 per cent on old common in January, 1897, and 2 per cent in May, 1897.

§ This is on new preferred stock.

¶ Increase due to change of dividend period.

|| Also 32½ per cent extra out of amount received from the Old Colony under the provisions of lease.

(a) Exchanged for New York New Haven & Hartford stock.

(b) Change from 7 per cent due to change of dividend period.

In the case of the great east and-west trunk lines, the New York Central dropped to a 4 per cent basis in 1895. Our statement makes the aggregate during that year 4½ per cent, the dividend in January 1895 having been still 1½ per cent. It is proper to say that we show in all cases the aggregate amount paid within the twelve months of the calendar year, not the amounts paid out of the earnings of the year. Below is the comparison for the trunk lines. The lowering of the dividend on Canada Southern does not appear in this list, since the dividend will not be paid till February 1897.

Among the anthracite coal roads, the Central of New Jersey changed from 7 per cent to 5 per cent in 1895, and the Delaware and Hudson, as already announced, has now concluded to make a similar change.

## RAILROAD GROSS EARNINGS FOR 1896.

The course of railroad gross earnings during 1896 was just the reverse of that during 1895. In the last-mentioned year the comparisons the first six months were rather poor, those of the second six months very good. In 1896, on the other hand, while the returns the first six months continued on the whole fairly satisfactory, the second six months they became quite unfavorable. The contrast between the two years is perhaps best indicated by saying that during 1895 the monthly exhibits kept growing steadily better, in 1896 they kept steadily growing worse.

The principal reason for this difference between the two years is of course found in the great change which occurred in the trade situation. In 1895 the Morgan-Belmont contract with the Government in February started a revival in business, which made steady head way until near the end of the year. In 1896 this trade revival was again checked, owing to a variety of causes which have been set out at length on previous occasions, the principal one being the agitation for free silver, and as the year progressed great depression developed, which became steadily more pronounced, so that the traffic and revenues of the roads were very largely reduced. In January and February our monthly statements showed the largest gains, with one exception, recorded in any month for about four years. But after that the gains rapidly fell off, and in August the totals again began to show losses, and thereafter there were decreases to the end of the year. The largest falling off occurred in November, when the shrinkage fell but little short of 10 per cent. Here is a summary of the monthly aggregates for the twelve months.

Period.	Mileage.		Earnings.		Inc. or Dec.	P. C.
	1894.	1895.	1896.	1895.		
	Miles.	Miles.	\$	\$	\$	
January (131 roads).....	93,822	93,293	37,066,469	33,951,041	+3,732,448	10.99
February (128 roads).....	93,411	93,080	35,357,181	31,058,010	+4,199,171	13.52
March (123 roads).....	92,222	91,859	37,250,670	33,674,209	+1,576,311	4.42
April (131 roads).....	95,629	95,084	37,240,278	36,012,491	+1,227,785	3.41

December (125 roads).....	97,233	96,449	42,808,334	43,507,220	-618,886	1.41

The unfavorable trade situation was the influence of paramount importance in the results. Many of the other influences were favorable, and would under ordinary circumstances have left marked indications of their presence in the revenue returns for the year. There was an almost entire absence of special disturbing agencies—no strikes or labor troubles of large magnitude, no floods or storms of extensive moment. Of course strikes occurred in minor instances, and floods also at times did more or less damage to particular roads; none of these, however, attained large proportions. The weather was bad nearly all over the country in March, and in November the Northern Pacific and some other roads in the same territory suffered severely from storms and generally bad weather. But these were all of limited application.

In some respects also the rate situation was better than usual, though the year was by no means entirely free from rate disturbances. Three important traffic associations were established, whose influence may count for much in the future of the roads. The origin

of the Joint Traffic Association dates back to 1895, but the contract did not go into effect until January 1 1896. This agreement proved more satisfactory than any previous similar agreement. Rates were reduced on special classes of traffic during the summer, but the reduction was made as prescribed in the agreement, and not by the individual action of the roads, and hence there was no demoralization. The fact that the trunk lines had to meet new competition in the taking of grain for export by the lines running to the Gulf ports put the new compact to a special test. In April the South-western Traffic Association was formed, and this likewise proved very beneficial. In October the Western roads united and organized the new Western Freight Association. Both these latter associations are modeled on that of the Joint Traffic Association. The Western Freight Association was formed only after a long period of strife in the summer, during which rates dropped to extremely low figures. A general restoration of tariff schedules did not occur until Nov. 2. In the South a war broke out between the Seaboard Air Line and the Southern Railway, which was checked by the intervention of the courts when it threatened to involve all the roads in the South, but was resumed when the restraint imposed by the courts was removed, and then was again arrested by a further move in the courts.

The grain movement was of large dimensions, and proved a favoring influence of great magnitude with many Western roads and also with some of the lines to the seaboard. The spring wheat crop, however, was not equal to the phenomenal yield of the preceding year, and this caused some serious losses in earnings the latter part of 1896. We shall refer further below to the movement. In the South and Southwest the small cotton crop of 1895 was a depressing agency for the first six or seven months of the year, but the crop of 1896 being of more liberal proportions and comparison being with the small total of 1895, the situation changed decidedly for the better the last four or five months.

Owing to the variation in the results between the first and the second half of the year and also between the different sections of the country, the final total of earnings for the year does not show any very great change from that for the preceding year. Of course it is not possible so soon after the close of the period to furnish complete figures. We have returns for the full twelve months from 132 roads, operating 99,201 miles of line. On these there is a gain of \$7,229,969 over the previous year. In addition we have the returns of 73 roads, operating 54,928 miles, which have reported for ten or eleven months of the year. On these there is a loss of \$4,053,052. Combining the two sets of figures the increase for the whole 205 roads, operating 154,129 miles, is found to be only \$3,176,917, or but one-third of one per cent. These figures include the earnings of a few thousand miles of Mexican and Canadian roads, but the aggregate reaches very large totals—924 million dollars in 1896, as will be seen by the following:

	Gross Earnings.			Mile of Road.	
	1896.	1895.	Inc. or Dec.	1896.	1895.
	\$	\$	\$		
132 roads full year.....	523,249,970	516,039,310	+7,229,969	99,201	98,406
73 roads 11 months....	401,090,282	405,143,334	-4,053,052	54,928	54,515
Grand tot. (205 roads).....	924,340,252	921,182,644	+3,157,608	154,129	152,921

It should be said that while this gain is small, it follows a gain of almost fifty million dollars in 1895. But this latter gain came after a loss of over 112 million dollars in 1894 and of 25 million dollars in 1893. Hence we may sum up with the remark that the roads, treated as a whole, have maintained the recovery established in 1895. Here is a comparison for five years of the totals for the twelve months and also those for December. Of the latter we shall speak further on.

	Mileage.		Earnings.		Increase or Decrease.
	Year Given.	Year Preceding.	Year Given.	Year Preceding.	
December.	Miles.	Miles.	\$	\$	\$
1895 (186 roads).....	94,103	92,326	47,113,694	46,019,414	Inc. 1,094,280

1895 (123 roads).....	99,975	99,854	45,025,858	41,249,329	Inc. 3,776,529
1896 (135 roads).....	97,333	96,440	42,893,334	43,507,320	Dec. 613,986
Jan. 1 to Dec. 31.					
1895 (174 roads).....	132,334	130,503	938,377,747	981,467,492	Inc. 44,910,255
1896 (183 roads).....	141,839	139,371	936,237,055	961,407,915	Dec. 25,169,960
1894 (194 roads).....	151,404	150,081	865,709,844	973,123,166	Dec. 107,413,321
1895 (201 roads).....	143,305	147,887	836,267,395	839,329,418	Inc. 49,030,967
1896 (205 roads).....	154,129	157,923	924,359,561	921,182,644	Inc. 3,176,917

Taking up the separate roads we find considerable irregularity in the results and also fewer changes than usual of large magnitude. Northwestern lines have on the whole done better than any others, the gains in the early part of the year on the spring-wheat movement being the main cause of this. On the other hand, the poorest results come from the roads in the manufacturing sections of the Middle and Middle Western States, these reflecting the industrial depression. The anthracite roads have also done poorly, though there is an exception in the case of the Lehigh Valley, which for the twelve months ended November 30 added \$950,206 to its receipts, in part on an increase in mileage. Enumerating some of the more important decreases, the Pennsylvania on the lines directly operated east and west of Pittsburgh and Erie has fallen \$4,913,000 behind in the eleven months to November 30; the Reading, with the Coal & Iron Company, has lost \$1,906,895 in the ten months to October 31, and the Southern Pacific for the eleven months has lost \$1,747,715. In the Southwest there is a sharp difference between the roads dependent mainly on the cotton traffic and those which, while hauling much cotton, also have a very heavy traffic in grain. Several of these latter, like the Atchison, the St. Louis & San Francisco and the Missouri Kansas & Texas, are able to show gains, while many of the former report losses. The Southern roads, with few exceptions, record improved totals, and the Norfolk & Western has a gain of \$1,402,094, caused by the fact that in 1895 the road had suffered a great part of the year from a strike of its miners.

The largest gains reported by any roads are \$1,737,690 by the Canadian Pacific and \$1,505,707 by the Great Northern, both being due to the very exceptional movement of spring wheat out of the crop of 1895; at one time during the year these gains were of still larger magnitude, there having been a falling off in the earnings the last few months. As showing the extent of the decrease in the later months, we may note that the Milwaukee & St. Paul, which for the year has only \$744,383 gain, for the first seven months had \$2,330,813 gain; and the Chicago & North Western, which for the eleven months reports \$842,106 increase, at the end of the first seven months had \$2,643,704 gain. We annex a list of all roads whose gains or losses exceed \$200,000.

\* For ten months only.

† Eastern lines decreased \$2,083,300 and Western lines \$2,829,700.

‡ For year ending November 30.

We have said that the grain movement was of very large dimensions. At the seaboard the receipts of wheat, corn, oats, barley and rye for the fifty-two weeks in 1896 were 260 million bushels, against 159 million bushels in 1895 and 154 million bushels in 1894. The gain, however, was offset to an extent by smaller receipts of flour, as will appear by the following.

## SEABOARD GRAIN RECEIPTS FOR THE FIFTY-TWO WEEKS.

	1896.	1895.	1894.	1893.
Flour.....bbls.	12,809,869	17,915,415	20,749,597	19,978,653
Wheat.....bush.	87,992,388	50,631,774	57,613,811	93,855,531
Corn....."	99,607,409	59,798,628	46,907,081	58,978,185
Oats....."	73,584,443	43,749,570	44,630,607	52,438,036
Barley....."	13,137,109	4,882,688	4,942,916	5,080,443
Rye....."	8,141,044	579,290	590,080	1,138,166
Total grain.....	260,462,373	159,821,930	154,884,495	211,486,301

At the Western primary markets the increase was of still more striking proportions. Of wheat the deliveries were 185 million bushels against 174 million, of corn 147 million against 95 million, of oats 169 million against 124 million, of barley 40 million against 31 million, and of rye 6 million against 3 million. Taking the grain movement as a whole the receipts were 550,760,654 bushels against 429,477,590 bushels. In other words, the increase was 121 million bushels, equal roughly to 3 million tons of freight. Here the flour deliveries also were slightly larger. Nothing else is needed to show the prominent part played by the large crops. From the following, giving the details of the grain movement in our usual form, it will be observed that notwithstanding the large general gain some of the Middle Western points, like Detroit, Toledo and Cleveland, have gained either only slightly or not at all.

## RECEIPTS OF FLOUR AND GRAIN FOR FIVE WEEKS ENDING DECEMBER 31 AND SINCE JANUARY 1.

Year '95, 52 wks.	11,118,032	174,586,260	96,398,530	124,674,223	31,639,790	8,911,378

The foregoing covers the fifty-two weeks ending December 31. For Chicago we have the figures for the even year. These show receipts of grain for 1896 of 239,884,957 bushels, against 175,984,095 bushels for 1895. In brief at this point alone the increase has been almost 64 million bushels. The following gives also the movement of provisions and of hogs.

#### RECEIPTS AT CHICAGO DURING DECEMBER AND FOR THE YEAR.

	December.			Year.		
	1896.	1895.	1894.	1896.	1895.	1894.
Wheat, bush.	701,170	2,907,492	908,682	19,981,502	20,637,542	25,093,887
Corn, bush.	4,864,884	5,577,444	6,391,014	90,246,378	59,601,518	64,909,856
Oats, bush.	9,437,393	7,317,352	3,566,278	100,585,465	79,892,792	63,198,658
Rye, bush.	293,361	166,997	174,051	2,630,236	1,657,216	1,368,167
Barley, bush.	2,274,292	1,674,136	1,458,355	17,691,376	14,195,627	13,405,401
Total grain	17,515,164	17,643,511	11,498,450	239,884,957	175,984,095	188,575,748
Flour, bbls.	163,763	290,915	202,506	2,532,041	3,005,508	4,223,696
Pork, bbls.	1,206	644	1,184	7,985	9,672	5,099
Outfit, lbs.	13,114,136	18,998,867	12,521,110	160,612,721	172,004,133	137,906,256
Lard, lbs.	6,851,167	8,591,007	6,145,299	67,181,969	54,046,324	62,846,369
Live hogs, No.	788,794	780,906	735,062	7,669,472	7,885,274	7,453,228

It will be seen that the receipts of hogs were only 7,659,472 head in 1896, against 7,885,274 in 1895. We may add that of cattle the receipts were 2,600,475, against 2,588,558; of calves, 138,337, against 168,740; of sheep, 3,590,655, against 3,406,739, and of horses, 105,978, against 113,193.

With reference to the cotton movement in the South, the receipts at the Southern outports were larger than in the preceding year, the total being 6,475,263 bales for 1896, against 5,639,663 bales for 1895 (up to July 31 there had been a loss of 698,706 bales), but the shipments overland were smaller, reaching only 1,274,944 bales, against 1,444,364 bales. The following shows the details of the port receipts.

#### RECEIPTS OF COTTON AT SOUTHERN PORTS IN DECEMBER AND FROM JANUARY 1 TO DECEMBER 31, IN 1896, 1895 AND 1894.

Ports.	December.			Full Year.		
	1896.	1895.	1894.	1896.	1895.	1894.
Galveston, bales.	250,187	181,400	238,997	1,362,391	1,118,823	1,429,471
Texas City, Ac.	14,827	23,737	17,182	123,423	89,556	62,590
New Orleans, Ac.	398,138	360,004	434,766	2,125,407	2,097,099	2,247,180
Mobile, Ac.	63,489	34,503	52,478	267,316	208,498	217,230
Florida, Ac.	16,576	7,194	3,220	82,390	24,435	29,370
Bavannah, Ac.	117,596	117,372	144,949	678,556	792,196	923,190
Braswell, Ac.	42,359	36,764	48,651	152,371	132,204	149,507
Charleston, Ac.	64,030	45,464	71,029	318,131	325,367	374,749
Port Royal, Ac.	20,748	14,104	23,884	94,791	190,263	117,685
Wilmington, Ac.	35,736	28,218	46,177	145,638	108,533	280,041
Washington, Ac.	233	245	355	813	768	7,462
Norfolk, Ac.	130,971	69,718	100,370	714,544	534,725	476,120
West Point, Ac.	4,561	46,394	75,148	46,413	235,273	322,380
Total, bales.	1,185,043	944,954	1,366,392	6,475,263	5,639,663	6,584,265

Taking the leading Southern roads, we find that the earnings of 1896 have been nearly three million dollars better than for 1895, and the total also compares quite well with earlier years. This is made plain by the following six-year comparison.

#### EARNINGS OF SOUTHERN GROUP.

Year.	1896.	1895.	1894.	1893.	1892.	1891.
<b>Okeechobee &amp; Ohio.....</b>	10,372,598	9,798,324	9,127,664	9,865,471	9,955,849	9,353,970
<b>Georgia.....</b>	1,858,875	1,357,760	1,318,560	1,419,738	1,508,075	1,795,444
<b>Kan. C. Mem. &amp; Bir.</b>	1,188,873	1,194,437	1,056,216	1,125,852	1,146,577	1,209,101
<b>Louisv. &amp; Nashv.</b>	20,247,340	19,509,108	19,405,294	20,474,633	21,850,478	20,217,526
<b>Memphis &amp; Char.</b>	1,328,163	1,266,936	1,296,710	1,404,236	1,466,978	1,617,892

<b>Nash. Chat. &amp; St. L.</b>	5,004,913	4,871,963	4,623,906	4,727,479	6,156,574	4,730,449
<b>Norfolk &amp; West. I.</b>	11,009,400	9,607,360	10,840,452	10,032,617	9,959,882	9,188,048
<b>South'n Railway.</b>	18,573,122	18,818,529	18,018,552	18,279,415	19,360,678	21,116,010
<b>Total.....</b>	72,994,876	70,146,677	68,468,337	70,662,376	73,689,106	72,785,660

5 Including Scioto Valley & New England and Shenandoah Valley for all the years.

In the case of the Southwestern roads, the showing is much less favorable, both as compared with 1895 and still more so as compared with the earlier years.

#### EARNINGS OF SOUTHWESTERN GROUP.

Year.	1896.	1895.	1894.	1893.	1892.	1891.
<b>Den. &amp; Rio Gr.</b>	7,221,114	7,270,368	6,760,210	7,731,910	9,221,739	8,451,408

4 Includes the Kansas City Clinton & Springfield and the Current River for all the years.

3 Galveston Houston & Henderson not included for 1896 and 1895.

On the trunk lines the great depression that has existed in our manufacturing industries and the large falling off in merchandise imports, which these roads distribute, is reflected in earnings for 1896 smaller not only than those for 1895 but smaller also than for the previous four years with one exception.

#### EARNINGS OF TRUNK LINES.

Year.	1896.	1895.	1894.	1893.	1892.	1891.

With reference to the exhibit for December it will be observed that the comparison of earnings (we are referring now to the country as a whole) is much better than that for November. In the last-mentioned month the decrease was \$4,553,172, or 9.97 per cent; for December it is only \$613,886, or 1.41 per cent. This is the more noteworthy as the grain movement was slightly below that for the corresponding month in 1895, the wheat receipts having been very much less. In cotton the receipts at the Southern outports were 1,185,043 bales against 944,954 bales, while the shipments overland were 227,925 bales against 215,025 bales. One fact should not be overlooked, however; the month contained an extra business day, there having been only four Sundays in December 1896, against five in December 1895. Notwithstanding the small falling off in the aggregate, the losses in nearly all sections outnumber the gains. Here is a list of changes exceeding \$30,000, whether gains or losses.

## PRINCIPAL CHANGES IN GROSS EARNINGS IN DECEMBER.

Increases.	Decreases.
Mo. Kans. & Texas..... \$187,692	N. Y. Central..... \$332,679
Grand Trunk..... 111,832	Great Northern..... 215,444
Mex. Central..... 110,932	Ohio Mil. & St. Paul..... 193,776
Int. & Gt. Northern..... 95,944	Southern Railway..... 158,997

from among the most eminent in their several professions. The commission was appointed in 1893 to investigate the following questions:

1. The causes and effects of the recent change of ratio between gold and silver. 2. The effects of the change upon Japan. And, 3. Whether such change necessitates the reform of our present currency system, and, if so, to determine what new standard of currency shall be adopted and how it shall be done.

As these questions covered quite a wide field of inquiry the commission at its first meeting held October 25, 1893, selected a special committee to make preliminary investigations into the first two questions. The special committee thereupon took up the matter and finished its work March, 1895. It agreed generally to the statements contained in chapters I. and II. affixed thereto, but could not come to an understanding upon the questions covered by chapter III. Accordingly the majority and minority of the committee submitted separate reports to the commission.

The currency commission on receipt of this report met on several occasions and unanimously indorsed chapters I. and II. It, however, differed on chapter III., and at last after lengthy discussion adopted the chapter by a majority of 10 against 5.

The commission, excepting one member, was of the opinion that the change of the ratio between gold and silver was so far beneficial to Japan, and that therefore there is for the present no necessity of changing our currency system. However, it differed on the point whether there will possibly in future arise such necessity. Eight took the affirmative, seven the negative. The commission then proceeded to the discussion about the kind of metal to be made the future standard of currency and the method of carrying out the reform. Six out of eight voted for gold and two for bimetalism. The committee, however, could not reach a conclusion about the method of enforcing the new monetary system. Some urged an immediate change, while others preferred to make only necessary preparations for the future. Some proposed to wait an international arrangement, while others wished to establish bimetalism independently of other nations.

#### CHAPTER I.

##### THE CAUSES OF THE CHANGE IN THE RATIO BETWEEN GOLD AND SILVER AND ITS GENERAL EFFECT.

SECTION I. During about two hundred years, from 1687 to 1873, the ratio between gold and silver did not change very much, the difference in the London market having been between 14:14 to 16:25 to 1 per ounce. The rate, however, in March, 1894, was 34:61 to 1. The ratio in Japan differed independently from other countries during her ages of seclusion. Still we come to recognize lately a marked change in our country in the ratio of the two metals.

(Here follow tables to verify the statement. The same is the case at the end of each following section, paragraph, article, etc.)

SEC. II. In China, India and other silver countries the price of silver has changed only slightly as against commodities, with the exception of some tendency in late years to fall even against commodities. But according to the investigations made as to the prices of commodities in England, the United States, France, Germany, etc., gold has advanced remarkably as against commodities.

SEC. III. The following are the principal causes of the change in the ratio of gold and silver:

(1) Increase in production of silver.—Silver was produced in nearly the same quantities until about 1840. But its production for ten years after 1841 averaged 25,000,000 ounces a year, and it has increased so much ever since that notwithstanding the continuous fall of silver after 1873 its production in 1892 was four and a-half times the average amount for five years after 1851. The enormous amount of 128,000,000 yen of silver which Germany is ready at any time to put on the market has the same effect upon the price of the metal as its increased production.

(2) Reduction in cost of production of silver.—It is very hard to find out the comparative cost of production of silver in different ages on account of the difficulty we have in procuring reliable information and in ascertaining the expenses of reducing different ores. Professor Austin estimates it at 2½d. per ounce, while others estimate it at 24l. There is no doubt, however, that the cost has been decreased very much with the progress of the arts of metallurgy and mining and the development of communication. In Japan the decrease in cost of production from 1882 to 1891 is about 4 sen and 1 rin per momme.

(3) Demand for silver as money does not increase in proportion to the increase of its production.—In 1873 Germany and the Scandinavian Kingdom adopted the gold standard. In 1874 the Latin Union restricted for three years the coinage of silver except for subsidiary coin. In 1875 the Netherlands adopted the gold standard. In 1878 the Latin Union abrogated bimetalism and agreed not to coin silver except for subsidiary coin. In 1879 Austria closed her mint to free coinage and in 1892 adopted the gold standard. For twenty years preceding 1870 the amount of silver coined in these countries exceeded the production, but for twenty-two years after the change of monetary systems in these countries since 1873 the total amount of silver coined was far less than the production. Especially has this been the case since June, 1893. India has closed her mints to free coinage and an annual absorption of 26,140,000 ounces of silver as her

currency since 1875 has been stopped. The absorption of 54,000,000 ounces of silver into the United States Treasury was stopped since October of the same year by the repeal of the so-called Sherman act. Russia has in the same year refused to coin the people's silver in her mints. In July of the same year she prohibited the import into her Central Asiatic regions of all foreign silver coins except Chinese coin called Kwan Hui Yuan Pao, and later also the import of foreign silver coins in her maritime territories.

(4) Decrease in demand for silver as articles of art.—Lately silver and all silver wares are not liked so much as gold. The duties to be paid in gold upon silver wares being naturally heavy in proportion to the prices of the wares, it has to some extent disturbed the growth of the demand for silver wares. We notice that the consumption of silver for art has in spite of the fall of its price decreased instead of increasing in proportion to the production.

(5) The total amount of silver to be affected in price by the increase or decrease of supply and demand is small in proportion to the increase of its supply.—More than half of silver coins being of a representative character they are higher in price than their face value. Silver used in the arts being also higher in price than its actual value it does not appear in the market even if silver appreciates more or less, and it lies entirely beyond the influence of supply and demand. The only part of this metal which is affected by supply and demand are unworked silver and silver coins having a real price. Therefore the production of silver in enormous quantities must affect very much the price of silver belonging to these classes.

(6) The proportion of increase in production of gold is less than that of increase in silver.—Gold was produced in comparatively small quantities until 1840. The production then began to increase until the average amount of production for five years after 1851, upon the discovery of rich mines in California and Australia, became over three and a-half times more than the average for ten years before 1851. The increase has, however, not been so steady after that, and the amount of production in 1893 is only about one a-half per cent more than the average amount for five years after 1851. Silver on the other hand has, as was seen, multiplied four and a-half times.

(7) Increase in demand for gold as money.—The demand for gold as money increased since 1873, as the necessary consequence of the monetary reforms adopted in Germany and other European countries. The amount of gold coined during twenty years preceding 1870 exceeded its production for the same period by 14,000,000 ounces, while during twenty-two years since 1871 the excess amounted to 39,000,000 ounces.

(8) Increase in demand for gold as articles of art.—We notice in Europe, and especially in the United States, the increase of demand for gold for use in the arts.

(9) Growing tendency to accumulate gold.—We notice the fact that several governments, nations, and especially banks, are hoarding gold. This is due to the general tendency to value this metal more highly, and also to the convenience and security with which it can be kept.

Sec. IV. The effects of the change of ratio between gold and silver.

#### PART I.

##### EFFECTS UPON SILVER COUNTRIES.

ARTICLE 1. Increase of exports.—There is no question that the change of ratio between gold and silver stimulates exports. This is due first to the fact that the prices of commodities in silver countries being practically low as against those in gold countries, the former have great advantage over the latter with respect to export. Besides silver countries have an advantage in competing with gold countries in the same articles made in both countries.

ART. 2. Rise in prices of commodities.—As has been seen, gold has not only appreciated very much as against prices of commodities, but also against silver, while silver has not depreciated much as against commodities. However if the demand for silver shall become less in the future and its price decline more, the prices of commodities will rise. This rise will be enhanced by the increase of money consequent upon the increase of exports from silver countries.

ART. 3. Light burden of debtors and taxpayers.—It is quite an advantage to everybody to borrow money and pay it after a decline. The borrower, as a matter of fact, gets money having more purchasing power and pays in money with less purchasing power.

ART. 4. Good condition of agriculture.—The change in the ratio of the two metals causes the rise in prices of agricultural products. Farmers can get more income and pay taxes easier than before. Besides the lightening of their burden and the rise in price of their farms induce them to make improvements and encourage them to wider cultivation.

ART. 5. Development of commerce and industry.—The increase of exports and the inducement offered to merchants to purchase, and manufacturers to make more, by reason of the rise in prices of commodities lead to general prosperity in commerce and industry. We notice this feature in India, especially in the growth of her cotton mills, before the change of her monetary system. As regards China, we have no reliable statistics, but her industry has, we have no doubt, greatly developed lately.

ART. 6. Increase in revenue from taxes and other sources.—The tax upon consumption, the income tax and other

revenues, such as from posts, telegraphs and railroads, increase with the increase of production and the prosperity of commerce and industry. We notice this fact in India before the change of her monetary system, in Austria, Russia and Mexico.

ART. 7. Increase in demand for labor.

ART. 8. Increase of national expenditure.—The rise in prices of commodities necessitates the increase of the government funds for purchasing several articles, and the appreciation of gold demands similar increase in government funds for maintaining their offices in gold countries and for payment of their debt abroad. This is especially the case with India, which has to pay large amounts in pounds sterling annually to England.

ART. 9. Distress of those who receive fixed wages.—This is naturally the case when daily expenses increase with the rise in prices of commodities. Wages go up sooner or later; but as they do not go with the same speed as the rise in prices, laborers have to suffer, at least for a time.

ART. 10. The disadvantages to creditors.—This is just the opposite case to that of debtors.

ART. 11. Growth of speculative enterprise.—When prices go high and commerce and industry assume a favorable aspect, business transactions are generally enlarged and new enterprises are contemplated. A reaction must, however, take place and often leads to panic.

ART. 12. Rise in prices of commodities imported from gold countries and decrease in imports.—As long as the prices of commodities in gold countries do not decline as much as the difference of the two metals, silver countries have to pay higher prices for goods imported from gold countries. In other words, the prices of goods from gold countries have so far risen in silver countries. We notice that the change in ratio of gold and silver which has been especially great these two or three years decreased imports from gold countries.

### PART II.

#### EFFECTS UPON GOLD COUNTRIES.

ARTICLE 1. Profits to creditors.—The effect of the change of ratio between gold and silver upon gold countries are just the opposite to those upon silver countries. The price of commodities having fallen, gold has more purchasing power than before. According to the investigations made in gold countries the prices of commodities have fallen from 100 in 1873 to 70 in 1894, so that the purchasing power of money has increased 429 per cent; which is the direct profit to creditors.

ART. 2. Fall in prices of commodities imported from silver countries.—The prices of commodities in silver countries are rising when there are fluctuations in the ratio of gold and silver. But as the prices do not rise so much as the difference of the two metals, they are still to some extent low as against gold. In other words, gold countries can obtain articles cheaper from silver countries.

ART. 3. Decrease of national expenditure.—With the increase of the purchasing power of money the government funds for purchasing articles and for paying debts to silver countries naturally becomes smaller. It has decreased about 429 per cent since 1873.

ART. 4. Depreciation of prices of commodities.—(See Section 2.)

ART. 5. Loss to debtors and taxpayers.—This is necessarily the case when they have to pay their debts with money the purchasing power of which has increased after the debt was incurred.

ART. 6. Depression of commerce and industry.—It is quite natural that commerce and industry should not flourish when prices of commodities decline and debtors and taxpayers are in distress. When prices decline day by day merchants hesitate to purchase and manufacturers to make, and then the general depression follows. This is true in England, where commerce and industry do not prosper and cotton and other industrial business have been retarded. It is also the case in the United States, where a panic occurred in 1893; 640 banks closed during the year, large numbers of factories closed and trade in general was suspended. In Germany, also, the same depression was felt and a silver commission was appointed to investigate this matter.

ART. 7. Decline of rate of interest.—When prices decline and commerce and industry are depressed the apprehension of failures prevents capitalists from investing money in new enterprises. Besides, as capital invested in silver countries will be withdrawn more money will be left unemployed, the demand will decrease and at last the rate of interest will fall.

ART. 8. Distress of farmers.—The income of farmers decreases, and the prices of land fall together with the fall in prices of agricultural products. This distress is, moreover, enlarged by the heavier burden upon the taxpayers.

ART. 9. Decrease in revenue.—The revenue from taxes on consumption, from income tax, from posts, telegraphs and railroads, increases very slightly in comparison with silver countries.

ART. 10. Distress to employers.—This is naturally the case with the employers who have to pay wages and salaries to the employees with money the purchasing power of which has increased. As especially wages do not only fall with the prices of commodities, but generally take the contrary course, employers have to restrict their business. Any attempt on their part to decrease wages will be met with strikes or some other form of opposition.

ART. 11. Decrease in demand of labor.—This is naturally the case with the depression of agriculture, industry and

commerce. Many also go out of employment and paupers and criminals increase accordingly.

ART. 12. Increase of imports from silver countries.—As gold countries can buy goods cheaper from silver countries, their consumption of the products of the latter countries increases and the balance of trade with these countries generally goes against the former. This is to be seen in the trade returns of England, the United States, Germany, France, etc. The capital invested in silver countries from gold countries may to some extent account for this feature, but there is no doubt that the cheap importation from silver countries is one of the causes.

### PART III.

#### EFFECTS UPON THE RELATION OF GOLD AND SILVER COUNTRIES.

ARTICLE 1. Stagnation of trade between gold and silver countries.—This is the necessary consequence of the constant fluctuations in exchange quotations, and it sometimes even stops the trade entirely.

ART. 2. Decrease of capital investment from gold to silver countries.—When the ratio of the two metals is fluctuating, gold capitalists hesitate to invest capital in silver countries, and sometimes even try to withdraw funds already invested. The results are that the field of investment becomes narrow in gold countries, and that the supply of capital becomes less in silver countries.

### CHAPTER II.

#### THE EFFECTS ON THE RECENT CHANGE OF RATIO BETWEEN GOLD AND SILVER UPON JAPAN.

Japan, as all other silver countries, partakes of the same advantages and disadvantages.—Besides the effects mentioned in Articles 1 to 12 in Part I, and Articles 1 and 2 in Part III, of Section 3 of the preceding chapter, respectively, we notice that the prosperous condition of commerce and industry led the people in general to adopt a higher mode of living, even tending to some luxury. Another feature which has not specially been mentioned as an effect upon silver countries in the foregoing paragraphs, and which is very plainly to be seen in Japan, is the growing import of silver. This may be due to the annual increase of exports from our country, but is also due to the fact that Japan is the only country in the East having its mint opened to free coinage. The annual reports of the director of the mint clearly show he increase of requests made to the mint for coining silver.

### CHAPTER III.

#### CONCLUSIONS.

(1) Radical change in the relative prices of gold and silver.—There is no question that there has been an unparalleled change in the relative prices of gold and silver during the last quarter of a century. In 1873 the average price of silver in London was 59½ pence per ounce; that is to say, the ratio of gold and silver was 15.92 to 1; while in March, 1894, silver valued at 27¼ pence, i. e., 34.61 to 1.

It is a necessity of primary importance to study whether the cause of this change lies in the appreciation of gold or in the depreciation of silver, or in the change in the value of both gold and silver. Mere comparison of their relative values is not sufficient for this study. The investigation of prices of commodities both in gold and silver countries must be carefully made.

(2) Gold appreciated more than silver depreciated.—In examining the rise and fall of the prices of commodities, we see that they have fallen considerably in gold countries during the last quarter of a century, while they have not changed very much in silver countries, except as regards some tendency to rise during these last two or three years. There being many causes which affect the prices of commodities, we cannot attribute this rise or fall only to the fluctuations of gold or silver. Yet we may say that the considerable fall of prices of commodities in gold countries in general shows the equally remarkable rise of gold as against silver, while the rather stationary condition of prices of commodities, with some tendency to rise in silver countries, shows that silver has only lately begun to decline as against commodities, however great the decline may be as against gold. We therefore conclude that the considerable fall in prices of commodities in gold countries is mainly due to the rise of gold, and that the small rise in prices of commodities in silver countries mainly to the small depreciation of silver.

Some explain the fall of prices of commodities in gold countries in another way. They say the application of science, the invention of new machinery, the facilities of communication, etc., increased the production by reducing the cost, and thereby caused the fall of prices of commodities. We of course admit that this is true, and is also true with gold as with all articles of commerce. But even supposing that gold was an exception, that its cost of production was not lessened under some counteracting influences, and that gold was not produced in large quantities, we may say that, as a matter of fact, the production of other articles increased before, as it did during, the last quarter of a century, while prices declined, especially during the last 25 years. Moreover, it is also to be seen that prices declined considerably during the last two or three years, while the application of science, etc., did not advance to the same degree at the same time.

For convenience sake, let us compare the period of 20 years from 1851 with another period, from 1871 down to the present (1895). The increase in the supply of gold during the former period, upon the discovery of gold mines in California and Australia, had depreciated gold and caused a rise in

prices in commodities. However, the growth of industry followed this rise in prices of commodities, and the increase of articles consequent upon the growth of industry balanced the increase of money and kept the economic world in harmony. On the contrary, matters progressed entirely differently in the latter period after 1871; the demand for gold increased with the reform of the monetary systems of different countries, gold thereupon appreciated; prices declined, and at last caused the depression in agricultural, industrial and commercial business. But we are in doubt whether production has greatly increased in the latter period over the former.

(3) The chief cause of change in the ratio of gold and silver is the increased demand for gold in several countries.—There are many causes of the radical changes in the ratio between gold and silver. But the most important one is, no doubt, the increase of demand for gold as money. In 1873 Germany adopted the gold standard and absorbed enormous quantities of gold. Other European countries have, in succession, changed their monetary systems and adopted gold as their standard of money. The Powers forming the Latin Union first restricted, and then prohibited entirely, the coinage of silver in order to prevent the influx of this metal. Italy and the United States resumed specie payments. Austria made gold the standard. India changed her monetary system. The United States abolished the silver-purchasing law. It is quite evident that the demand for gold as money has increased as a necessary consequence of these changes. It is also no wonder that people began to respect gold more than ever, to use it more in arts, and then to accumulate it as much as possible. The production of gold was not indeed small, but the increasing demand caused it to appreciate.

Although silver, on the other hand, was rejected by many countries, it seems that its price has not changed as much as that of gold. When, however, we notice the rise of prices of commodities in silver countries, we are compelled to say that silver has even depreciated as against commodities. Silver did not depreciate as much as gold appreciated. Above all, the change in the ratio of gold and silver is due to the appreciation of gold.

(4) The change in the ratio of gold and silver gives advantages to the silver countries and disadvantages to the gold countries.—The price of commodities is the most important factor in the economic world; its rise promotes agriculture, industry and commerce; its fall, the reverse. Every person who holds merchandise hastens to dispose of it, and every person who holds money will hesitate to part with it whenever there is any likelihood of the fall in prices of commodities. The fact is that the merchandise will decline and the money will rise the longer it is kept. Accordingly, the money-owners, creditors and others who have to receive fixed sums of money will gain, and the merchandise holders, debtors, taxpayers and others who have to pay fixed sums of money will lose. The loss thus incurred by the merchants, etc., is the cause of the decline of industry and the depression of the market. The prices of commodities have been falling these 20 years in gold countries, and general complaint has for so long a time been heard, particularly in England. In 1885 the commission on trade depression was formed with the view of ascertaining the exact state of affairs. They discovered the fact of such depression, but in trying to trace up to the cause of depression they found it necessary to investigate also the merits of their monetary system. This work, however, being entirely beyond the sphere of their power they recommended their Government to appoint another commission to investigate into the matter. The recommendation was adopted, and next year (in 1886) the commission on gold and silver was appointed. They agreed that both silver and prices of commodities have declined, but they differed as to its cause, some attributing it to the appreciation of gold, while others to the depreciation of both silver and commodities; some advising the adoption of a gold standard while others of bimetallism. The British Government could under the circumstances find no remedy to apply, and have not therefore up to the present adopted any measure of relief. However, prices have declined more and more, and the depression has extended further and further, until the discussion of monetary reform grew so hot that even some commissioners who had urged the adoption of the gold standard have now changed to bimetallism.

Germany has suffered similar misfortunes. The silver commission appointed last year (1894) have unanimously concluded that the depreciation of silver is injurious both to her home and foreign trade, but that it is impossible for any one Power to maintain the price of that metal. The depression having been so general in all the gold countries they are studying the question with keenest attention. Economists and business men are now gradually inclining to bimetallism, and even those who advocate the gold standard admit that it is necessary to find a wider field for the use of silver.

The state of affairs in silver countries is entirely opposed to that in gold countries. The general tendency toward a rise in the prices of commodities naturally encourages agriculture, industry and commerce, augmented exports and even tended to promote the manufacture of many articles that had formerly been imported. In India, before the late monetary reform, there had been great financial difficulty on the part of the Government on account of the fall of sil-

ver, but agriculture, industry and commerce had, on the other hand, been greatly developed.

The greatest injury which falls upon silver countries by reason of this change in ratio of gold and silver is the increase of national expenditure. Such countries as have large amounts of bonds as against gold countries, or which have a large indebtedness to be paid in gold, have to suffer very much by reason of the appreciation of gold. India has accordingly changed her monetary system. Some silver countries on the American continent have suspended the payment of gold bonds. These disadvantages are, however, rather limited only to countries having large indebtedness and do not prevail universally in all silver countries.

It is most convenient for studying the comparative advantages and disadvantages in gold and silver countries to look to the actual state of affairs in a country having both systems. England and India are an example. Both are under the British rule, but as regards the monetary system one different from each other in standard; the change in the ratio of gold and silver affects one country just in the opposite direction to that in which it affects the other. In India export is increased, agriculture and industry developed, the demand for labor multiplied and revenue advanced; while England presents an exactly opposite state of affairs. In England the revenue, which does not decrease much in amount, has as much more purchasing power than before as the fall of the prices of commodities, and it even could produce some surplus. However, the depression of agriculture, industry and commerce is the decay of the source of revenue, and the British Government has naturally to suffer the consequences. The trouble in India is, on the other hand, not on account of her agriculture, industry or commerce, but only with her finances. She has large quantities of bonds and an extraordinary amount of expenditure to be paid in gold to England, while on the other hand silver has been greatly depreciated. To meet this trouble she has at last effected monetary reform, and she will become a pure gold country. She will thereupon be freed from her financial trouble, but she will, like her mother country, suffer from general depression in agriculture, industry and commerce. Some in commenting on this change say that it has already proved to be a failure, while others predict it to be the case. Above all it seems to be pretty certain that the British Government was not even confident of the success of this change, if we see that a Secretary of State has openly declared in the House that the change was rather of an experimental nature.

(5) Our country has made great economic progress.—Although this is due naturally to the intelligence and energy of our nation, the remarkable progress made during these few years must rest greatly upon the change in the ratio of the two metals. One of the most gratifying features of our recent economic progress is the manufacturing of goods formerly imported from abroad and even their export to foreign countries. We have to get a large supply of raw materials for such manufacture, but it is far more profitable to us to buy them than to import manufactured goods. Besides, every facility which Japan has for industrial enterprise and the high prices of imported goods are great inducements to the development of our industry.

The development of our agriculture, industry and commerce presents the most satisfactory condition, as explained in Articles 4 and 5 of Part I, Section III., Chapter I. However, loss follows profit, especially in the affairs of economy. The former resulting in Japan from the change in ratio of gold and silver is not very small as the latter is large. But if we compare the benefits mentioned in Articles 1-7 with the losses in Article 8 et seq. it becomes very plain that we need not be too much afraid of such losses. Some short explanations are given in the following:

(8) Increase of national expenditures.—There is no doubt that this is one of the losses we have to suffer. But fortunately we have not a large debt in foreign bonds nor many government expenses to be paid in gold, and such small losses may be met with rather easily by the increased revenue mentioned under Article 6.

(9) Distress of those who receive fixed wages.—This trouble, however, will be counter balanced by the increased demand for labor consequent upon the growth of business.

(10) Loss of creditors.—This follows naturally the decrease in the purchasing power of money. But when business prospers and transactions increase the demand for capital increases and debts are readily paid, thus balancing the loss above mentioned.

(11) Prevalence of speculative enterprise.—This is generally true both in gold and silver countries when business prospers. To prevent this we have, however, only to rely upon the vigilance of bankers and the economic world in general.

(12) Rise in prices of goods imported from gold countries.—This, however, will be set off by the increase of exports; the high prices of goods practically amounting to the same thing as the imposition of high duties stimulates on the other hand the growth of home industry.

(13) Tendency to luxury.—When business prospers and income increases the mode of living goes higher and even becomes luxurious. But this can be checked only by the moral forces governing society.

(14) The opening of the mint invites the import of silver.—The Commission on Indian Currency has counted this as one of the things resulting from the opening of the mint. We

observe in Japan that the import of silver is increasing, and the requests for its coinage are greater than ever. This is not, however, to be counted as an evil in our country, as such feature is the necessary consequence of the balance of trade in our favor, and also of the requests from Hong Kong, Singapore and other Straits settlements to make their coins.

(15.) Stagnation in commercial dealings with Japan and gold countries.—The constant fluctuation in the foreign exchange market causes stagnation in our trade with gold countries. But if we see to the prosperous condition of our late foreign trade we might say that such fluctuation has only affected commerce temporarily.

(16.) Decrease of capital investments from gold countries.—Only a small amount of foreign capital has been invested. The withdrawal of such investments therefore affects our market only in a slight degree. The change of ratio between the two metals has, as stated above, had a good effect upon our country. But we do not think that the fall of silver and the rise in prices of commodities are absolutely beneficial to our country, especially as the fall of monetary standard will disturb our business. Believing, however, that the decline of silver will not be unlimited, and observing the advantages and disadvantages resulting to our country from such changes, we conclude that we derive more advantage and less disadvantage than the gold countries.

The report of the minority also deals with the particulars mentioned in the foregoing. They, like the majority, admit the advantages and disadvantages accruing to the gold and silver countries from the change of ratio between gold and silver. But they differ in this way, that while the majority lay more importance upon the advantages to Japan the minority view it in another light, and fear the disadvantages rather than the advantages will predominate. The report of the minority concludes in the following words: "The effects of the change of ratio between gold and silver upon Japan are both advantageous and disadvantageous. The increase of exports and the prosperity of industry and commerce thereby stimulated are the most important of the advantages, while the distress of laborers and the stagnation of foreign trade are among the chief disadvantages. The increase of exports, however, invites more imports of silver, inflates the currency, raises the prices of commodities and at last will result in the excess of imports over exports. The change of ratio between gold and silver being injurious to all countries, many new schemes will be proposed to remedy the evils, and very often great economic disturbances will be raised in consequence. It is therefore very necessary on our part, in view of such disturbances, to seek the future advantage of our country instead of temporary and alluring benefits, and to establish a sound and steady financial system which will conform to the proper order of things and which will be in harmony with the monetary systems of the Powers having the greatest economical relations with our country."

#### DEBT STATEMENT DECEMBER 31, 1896.

The following statement of the public debt of the United States on December 31 1896 is made up from official figures issued on that day. Lower down we give an interesting exhibit of the bonds issued in aid of the Pacific Railroads, and the Treasury cash holdings, all of the same date.

##### INTEREST-BEARING DEBT DECEMBER 31, 1896.

Title of Loan—	Interest payable.	Amount issued.	Registered.	Coupon.	Total.
4½% Fund. loan, 1891, Q. M.		\$51,000,000	25,364,500		25,364,500
Continued at 2 p.c.					
4% Funded loan, 1897, Q. J.		740,000,000	499,393,750	69,215,150	568,608,900
4% Refund. cert. Q. J.		40,012,730			40,012,730
5% Loan of 1891, Q. E.		100,000,000	50,000,000		50,000,000
5% Loan of 1893, Q. E.		100,000,000	50,000,000		50,000,000

Total outstanding Pac. R.R. Bonds ..... 1,294,214,400 678,591,400 171,734,400 843,301,600

Note.—The denominations of bonds are as follows: Two percents (registered only), \$5, \$10, \$20, \$50, \$100, \$1,000; 4 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 4½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 5 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 5½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 6 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 6½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 7 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 7½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 8 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 8½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 9 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 9½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 10 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 10½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 11 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 11½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 12 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 12½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 13 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 13½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 14 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 14½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 15 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 15½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 16 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 16½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 17 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 17½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 18 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 18½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 19 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 19½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 20 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 20½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 21 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 21½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 22 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 22½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 23 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 23½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 24 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 24½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 25 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 25½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 26 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 26½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 27 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 27½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 28 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 28½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 29 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 29½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 30 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 30½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 31 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 31½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 32 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 32½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 33 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 33½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 34 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 34½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 35 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 35½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 36 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 36½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 37 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 37½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 38 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 38½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 39 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 39½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 40 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 40½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 41 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 41½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 42 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 42½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 43 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 43½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 44 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 44½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 45 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 45½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 46 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 46½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 47 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 47½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 48 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 48½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 49 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 49½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 50 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 50½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 51 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 51½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 52 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 52½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 53 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 53½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 54 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 54½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 55 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 55½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 56 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 56½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 57 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 57½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 58 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 58½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 59 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 59½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 60 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 60½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 61 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 61½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 62 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 62½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 63 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 63½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 64 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 64½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 65 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 65½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 66 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 66½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 67 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 67½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 68 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 68½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 69 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 69½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 70 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 70½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 71 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 71½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 72 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 72½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 73 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 73½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 74 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 74½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 75 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 75½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 76 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 76½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 77 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 77½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 78 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 78½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 79 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 79½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 80 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 80½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 81 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 81½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 82 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 82½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 83 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 83½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 84 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 84½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 85 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 85½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 86 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 86½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 87 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 87½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 88 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 88½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 89 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 89½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 90 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 90½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 91 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 91½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 92 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 92½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 93 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 93½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 94 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 94½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 95 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 95½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 96 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 96½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 97 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 97½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 98 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 98½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 99 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 99½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 100 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 100½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 101 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 101½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 102 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 102½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 103 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 103½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 104 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 104½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 105 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 105½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 106 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 106½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 107 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 107½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 108 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 108½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 109 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 109½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 110 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 110½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 111 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 111½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 112 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 112½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 113 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 113½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 114 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 114½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 115 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 115½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 116 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 116½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 117 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 117½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 118 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 118½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 119 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 119½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 120 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 120½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 121 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 121½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 122 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 122½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 123 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 123½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 124 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 124½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 125 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 125½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 126 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 126½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 127 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 127½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 128 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 128½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 129 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 129½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 130 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 130½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 131 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 131½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 132 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 132½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 133 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 133½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 134 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 134½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 135 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 135½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 136 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 136½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 137 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 137½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 138 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 138½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 139 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 139½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 140 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 140½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 141 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 141½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 142 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 142½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 143 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 143½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 144 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 144½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 145 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 145½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 146 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 146½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 147 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 147½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 148 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 148½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 149 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 149½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 150 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 150½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 151 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 151½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 152 percents, \$5, \$10, \$20, \$50, \$100, \$1,000; 152½ percents, \$5, \$10, \$20, \$50, \$100, \$1,000; ## THE NEW YORK MONEY MARKET FOR FIVE YEARS.

We have compiled in a convenient form, from our own journal and from the books of money brokers, and give on the pages which follow, a comprehensive record of all departments of the New York money market for the last five years. This is the only attempt ever made to preserve that department of business affairs in a shape fitted for ready reference. The publication of the statements in this form was begun by us last year and the comparison was extended back so as to cover a number of past years. We now bring the data down to the end of 1896.

The tables require but little explanation. We begin with the call loan branch of the market, giving the range for each week at the Stock Exchange and the average, and also the minimum for call money at bank and trust companies. Following call loans we give time money, reporting under that head separately transactions at 30 days, 60 days, 90 days, and four, five, six and seven months, all representing choice collateral. Finally, the rates for commercial paper are presented: first, double-name paper divided into choice 60 to 90 day contracts, ordinarily known as bills receivable, and choice 4 months paper, known as commission house acceptances, and then single-name paper, divided into three classes. A complete monthly review of the money market during 1896 was furnished in the CHRONICLE of January 2 1897, pages 9 to 17, but as a matter of convenience we annex here a brief reference to the situation each month.

**January**—Market still affected by the panic the previous December caused by the Venezuelan incident, but gradually returning to normal conditions. Large return flow of currency from the interior and heavy gain in the money holdings and surplus reserve of the Clearing House banks. **February**—Opening of bids for Government loan. Part of the proceeds of loan left with the banks. Money market not disturbed. **March**—Further payments on bond subscriptions, and money holdings of banks diminishing, but money rates easy. **April**—Resumption of gold exports, but cash holdings of banks again increasing. **May**—Very heavy gold exports, but continued inflow of currency from the interior. Call money at  $1\frac{1}{2}$  to 2 per cent. **June**—Final payment on Government loan. Government gold reserve rapidly declining. Flurry in stocks causes a slight stiffening in money. **July**—Nomination of Bryan. Banks replenish Government gold reserve. Syndicate stops gold outflow. **August**—Money market strained. Issue of Clearing House certificates suggested but none made. Gold imports. Commission charged for loans. **September**—Large shipments of currency to interior, but heavy inflow of gold from Europe gives some relief. **October**—Approach of election produces great tension. Money difficult to obtain. Banks place 10 million dollars at disposal of Clearing House Loan Committee to relieve stringency. **November**—Election of McKinley restores normal conditions. Money hoardings released. Gold becomes a drug. **December**—Money holdings of banks increasing, and deposits and loans at highest point of year.

# Monetary: Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, January 3d, 1897.

The new year is opening with brighter promise than any one expected a little while ago. In every European capital it is believed that an agreement of some kind between England and Russia has been arrived at, and that in consequence there will be a settlement of the Turkish question that may be expected to last for some years. Nobody knows what the agreement between the two Powers is, or what the settlement of Turkey is likely to be; yet that there is an agreement and will be a settlement is almost everywhere thought likely.

The change in Russian policy dates from the recent visit of the Czar to so many European courts, and it was helped on by an indiscreet attempt on the part of the French Government to induce the Czar not to resume specie payments. The attempt naturally gave great offense to the Russian Ministers, and since then there has been much less cordial relations between France and Russia. The misunderstanding, if it can be described as such, will probably prove very temporary, but for the time being it has contributed to change the Russian policy at Constantinople.

There is a very strong belief here that the Cuban question also will be settled. Nothing for certain is known of the alleged intervention at Washington of the French and German Ambassadors, but it is thought that Spain herself is aware that the conflict in Cuba is exhausting her resources, and that she is anxious therefore to bring about a settlement while Mr. Cleveland is in office.

In India, too, things look somewhat brighter. There has been rain over vast areas, and though a great deal more is wanted, much good has been done. It is now hoped that actual famine will be averted, though there must of course be great distress. It is believed that the ravages of the plague in Bombay are exaggerated.

In Australia likewise there has been a very fortunate rainfall, and there has also been a fall in South Africa. The losses there through drought and rinderpest, of both natives and Boers, are very heavy; yet it is believed that the relations between the Transvaal and the Cape Colony are improving, and that the prospects of the mint industry are certainly brighter.

During the week money has been in exceedingly strong demand in the City, but that is a very usual experience at the end of a year, and in another week the Bank of England will pay out the quarterly interest on the national debt, and will thus add about  $4\frac{1}{2}$  millions sterling to the supply. Besides, the temporary requirements of the end of the year will be over and immense sums will be set free in the shape of interest and dividends due at the beginning of the new year. During the last four days of the year, however, money was very scarce. The Bank of England lent immense sums at  $4\frac{1}{2}$  per cent, and on one or two days 4 to  $4\frac{1}{2}$  per cent was charged in the open market. It is estimated that the total borrowings during the past fortnight have been from eight to ten millions sterling, yet Thursday's Bank of England return shows that most of this borrowing was caused by mere shifting of accounts. The India Council, for example, called in from the market two million sterling, and to-day and Monday it will pay out the whole sum as interest. The Joint Stock Banks also have called in large amounts while preparing their balance sheets, and will let out the same in a day or two. The scarcity, to a large extent, is thus artificial, and consequently the discount rate has fallen to about 3 per cent, while in some instances as much as 5 per cent has been paid for money for one day.

The Indian money market is exceedingly stringent, the bank rates in Bombay and Bengal being both 10 per cent, and a further rise is expected very soon. In the native money market about 12 per cent is the minimum, and up country it is said that rates are 15 per cent and higher. It may seem odd, therefore, that the India Council having offered forty lacs of rupees in bills and telegraphic transfers on Wednesday sold only three lacs; the explanation is that the exchange banks find it cheaper to send out rupee paper and similar securities, and that, foreseeing the stringency, they have been providing themselves with exchange for a considerable time past.

In spite of the tightness of the money market, the Stock Exchange settlement which ended on Wednesday evening, and the fact that New Year's Day was a holiday and to-day a half holiday, prices have been exceedingly well maintained throughout the week; indeed in some cases there have been marked rises, especially in British railway stocks and Argentine railway stocks. Foreign Government bonds, too, have advanced, particularly on Paris buying. Paris is exceedingly interested in Spanish finances. It is estimated that the French investments in Spanish securities of all kinds are very little under a thousand million dollars, and Paris is also very much interested in the securities of Turkey, Bulgaria, Roumania and Servia. The prospect, therefore, of both the Turkish and the Cuban questions being settled is a great relief to the anxieties of Paris capitalists.

In the American market there is not much doing by the public. British investors were thoroughly alarmed during the recent campaign, and they have not quite recovered yet. The unsatisfactory traffic returns, the occasional bank failures, and so on, make them shy, while the talk of an extreme protectionist bill that may cause dissension between Republican and Democratic supporters of Mr. McKinley induce caution. But all this will pass away in time, and if a wise currency policy is adopted there will no doubt be a large investment by and by in American securities.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1896 Dec. 31.	1895 Jan. 1.	1894 Jan. 2.	1893 Jan. 3.
Circulation .....	26,064,125	26,468,425	25,915,775	25,748,110
Public deposits .....	8,384,136	9,914,320	6,598,306	6,237,325
Other deposits .....	45,351,795	50,536,818	28,198,631	31,132,556
Government securities .....	13,752,969	14,936,154	14,787,039	10,287,433

French gold coin .....	oz.	76 3½	76 3½	Mexican dollars .....	oz.	29	29½

Messrs. Pixley & Abell write as follows under date of December 31:

Gold—The Bank has received £1,000, of which £44,000 came from Australia. The report that Russia had decided for the present to abandon the idea of a gold standard and currency caused the open market price to decline to 77s. 1½d. Large amounts of bar gold have been bought by Japan and India. Arrivals: West India, £73,500; Chili, £22,000; South Africa, £254,900; total, £230,900. Shipments: Japan, £60,000; Bombay, £235,500; total, £295,500.

Silver—The price has declined by reason of the cessation of buying orders from the East. Arrivals: New York, £213,000; West India, £6,700; Chili, £32,500; total, £252,200. Shipments: Hong Kong, £5,000; Bombay, £184,000; total, £189,000.

Mexican Dollars—These coin are in strong demand for the Chinese New Year Arrivals: New York, \$36,000. Shipments: Penang, \$1,600; Hong Kong, \$1,001; total, \$5,601.

The following shows the imports of cereal produce into the United Kingdom during the first seventeen weeks of the new season compared with previous seasons:

	1896.	1895.	1894.	1893.
Imports of wheat, cwt.	22,914,530	23,056,960	22,213,912	21,471,707
Barley.....	10,419,870	10,419,270	12,193,965	12,000,361
Oats.....	7,179,230	4,923,810	5,247,157	4,871,322
Peas.....	1,499,345	1,063,350	951,793	954,002
Beans.....	1,146,300	1,341,310	1,551,994	1,624,943
Indian corn.....	20,291,700	13,636,930	7,350,192	9,517,638
Flour.....	7,501,730	6,430,900	6,613,834	6,935,013

Supplies available for consumption (exclusive of stocks on September 1):

	1896.	1895.	1894.	1893.
Wheat imported, cwt.	22,914,530	23,056,960	22,213,912	21,471,707
Imports of flour.....	7,501,730	6,430,900	6,613,834	6,935,013
Sales of home-grown.....	10,019,909	5,315,836	7,441,449	6,931,709
Total.....	40,336,169	34,933,696	36,279,095	37,038,459

## Commercial and Miscellaneous News

**BONDS HELD BY NATIONAL BANKS.**—The following interesting statement, furnished by the Comptroller of the Currency, shows the amount of each class of bonds held against national bank circulation and to secure public moneys in national bank depositories on December 31.

Description of Bonds.	U. S. Bonds Held Dec. 31, 1896, to Secure—		
	Public Deposits in Banks.	Bank Circulation.	Total Held
Currency 6s, Pac. RR....	\$375,000	\$9,521,000	\$9,896,000
5 per cents, 1894.....	535,000	15,514,350	16,049,350
4 per cts., funded 1907..	12,135,000	151,626,400	163,761,400
4 per cents, 1895.....	1,850,000	37,931,550	39,781,550
2 per cts., funded 1891..	1,033,000	22,592,850	23,625,850
Total.....	\$15,928,000	\$210,236,100	\$226,164,100

**IMPORTS AND EXPORTS FOR THE WEEK.**—The following are the imports at New York for the week ending for dry goods Jan. 7 and for the week ending for general merchandise Jan. 8; also totals since the beginning of the first week in January.

#### FOREIGN IMPORTS AT NEW YORK.

For week.	1897.	1896.	1895.	1891.
Dry goods.....	\$2,014,273	\$3,183,076	\$3,952,537	\$2,128,918
Gen'l merchandise.....	7,752,649	7,754,590	5,691,101	6,693,382
Total.....	\$9,766,922	\$10,937,666	\$9,643,638	\$8,822,300
Since Jan. 1.	\$2,014,273	\$3,183,076	\$3,952,537	\$2,128,918
Dry goods.....	7,752,649	7,754,590	5,691,101	6,693,382
Gen'l merchandise.....	7,752,649	7,754,590	5,691,101	6,693,382
Total 1 week..	\$9,766,922	\$10,937,666	\$9,643,638	\$8,822,300

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Jan. 11 and from January 1 to date:

#### EXPORTS FROM NEW YORK FOR THE WEEK

	1897.	1896.	1895.	1891.
For the week.....	\$8,792,610	\$9,533,612	\$7,016,723	\$7,110,150
Prev. reported.....	.....	.....	.....	.....
Total 1 week.....	\$8,792,610	\$9,533,612	\$7,016,723	\$7,110,150

The following table shows the exports and imports of specie at the port of New York for the week ending Jan. 9 and since January 1, 1897, and for the corresponding periods in 1896 and 1895:

#### EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Gold.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	.....	.....	\$502	\$502
France.....	.....	.....	10	10
Germany.....	.....	.....	118,800	118,800
West Indies.....	\$36,800	\$36,800	2,294	2,294
Mexico.....	.....	.....	10,460	10,460
South America.....	.....	.....	.....	.....
All other countries.....	.....	.....	.....	.....
Total 1897.....	\$36,800	\$36,800	\$132,066	\$132,066
Total 1896.....	4,036,883	5,048,923	52,944	161,919
Total 1895.....	2,099,300	6,553,336	11,115	34,478

Silver.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	\$624,544	\$624,544	\$45	\$45
France.....	.....	.....	.....	.....
Germany.....	.....	.....	3,476	3,476
West Indies.....	.....	.....	27,694	27,694
Mexico.....	.....	.....	65	65
South America.....	.....	.....	.....	.....
All other countries.....	.....	.....	.....	.....
Total 1897.....	\$624,544	\$624,544	\$31,280	\$31,280
Total 1896.....	996,432	1,305,924	17,500	53,722
Total 1895.....	638,550	1,190,158	21,486	75,804

Of the above imports for the week in 1897 \$13,560 were American gold coin and \$325 American silver coin. Of the exports during the same time \$36,800 were American gold coin.

**FORIGIN TRADE OF NEW YORK—MONTHLY STATEMENT.**—In addition to the other tables given in this department, made up from weekly returns, we give the following figures for the full months, also issued by our New York Custom House. The first statement covers the total imports and exports of merchandise and the Customs receipts for the twelve months of the last two seasons.

MONTH.	MERCHANDISE MOVEMENT AT NEW YORK				CUSTOMS RECEIPTS AT NEW YORK.	
	Imports.		Exports.		1896.	1895.
	1896.	1895.	1896.	1895.	\$	\$
January.....	44,795,519	40,438,020	33,901,742	29,899,720	10,424,87	12,816,691

—The annual statement of the Home Life Insurance Company is a strong and satisfactory showing of results achieved in a year that has not been the most favorable generally to the life insurance business. The statement is accompanied by an extract from the report of Sept. Process of the State Insurance Department, in which it is remarked: "The report of the Examiner shows conclusively that the management of the company is satisfactory and for the best interests of the policy holders." Some of the totals of the year's business and the conditions of the company at the beginning of 1897 will indicate the basis for his very favorable finding. The total income in 1896 was \$3,051,550.72, the total business was \$1,705,963.40. The total assets admitted by the Insurance Department are \$9,384,857.42. The total liabilities are \$8,349,112.57, inclusive of the reserve on policies and deferred dividends, leaving the strong surplus of \$1,035,744.85. The President of the Home Life Insurance Company is George B. Ide, and the other officers are Wm. M. St. John, Vice-President; Ellis W. Gildwin, Secretary; F. W. Chapin, Medical Director; Wm. M. Marshall, Actuary, and Wm. G. Low, Counsel.

—Martin's Stock Fluctuations for 1896 was issued this week. This pamphlet has for many years been the standard authority for ready reference for range of prices, dividends, etc., for all classes of securities peculiar to the Boston market. Copies may be had at 50 cents from J. G. Martin, 10 State Street, Boston.

—The Home Insurance Company of New York, 119 Broadway, publishes its eighty-seventh semi-annual statement in the advertising department of to-day's CHRONICLE. The company's net surplus is now \$2,346,268 71, being a net gain of \$640,000 for the year.

—\$100,000 Baltimore Traction Company's 5 per cent convertible gold bonds are offered for sale by Messrs. Dick Bros. & Co., Philadelphia, at 95 and accrued interest. For particulars see their advertisement in to-day's issue.

**Broadtable Figures Brought From Page 145.**—The statements below are prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Jan. 9, 1897, and since August 1, for each of the last three years:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.
1896.	1897.	1898.	1899.	1900.	1901.	1902.
Chicago...	83,797	142,101	107,214	1,608,139	297,985	61,010

1897-98...	6,961,427	165,764,147	40,000,401	18,451,630	91,240,332	1,598,271

The receipts of flour and grain at the seaboard ports for the week ended Jan. 9, 1897, follow:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.
1896.	1897.	1898.	1899.	1900.	1901.	1902.
New York...	122,414	224,475	512,767	332,400	108,547	3,000
Boston...	24,444	196,184	734,777	95,075	4,841	1,855
Philadelphia...	41,284	129,741	1,792,392	101,929	24,000	4,900
Baltimore...	74,434	76,683	119,424	119,354	5,691	91,000
Richmond...	1,106	6,756	16,718	8,112	...	360
New Orleans...	5,998	1,240	655,741	81,000	...	...
Total week...	269,260	437,641	2,515,399	1,021,149	209,251	105,105
Week 1896...	263,814	333,571	1,640,095	611,637	96,251	12,791

\*Receipts do not include arrival passing through New Orleans for foreign ports on through bills of lading.

In last week's CHRONICLE the total receipts at seaboard ports for the years 1895, 1894 and 1893 were erroneously stated. The correct figures are given below:

Receipts at—	1895.	1896.	1897.
Flour.....bbles.	13,105,402	18,340,383	21,000,739
Wheat.....bush.	64,615,431	50,962,906	67,922,250
Corn.....bush.	103,291,631	61,777,571	47,821,441
Oats.....bush.	74,994,042	44,483,907	43,008,323
Barley.....bush.	13,611,756	5,145,391	5,042,287
Rye.....bush.	6,199,817	584,017	604,213
Total grain.....	266,655,299	162,968,858	156,102,614

NOTE.—53 weeks in each year.

The total receipts at ports from Jan. 1 to Jan. 9 compare as follows for four years:

Receipts at—	1897.	1898.	1899.	1900.
Flour.....bbles.	\$80,249	\$93,564	\$29,178	\$44,359
Wheat.....bush.	437,641	1,033,611	\$29,607	\$70,979
Corn.....bush.	2,515,399	1,074,093	606,094	4,724,205
Oats.....bush.	1,021,149	441,637	601,315	1,000,646
Barley.....bush.	209,251	91,251	101,183	357,610
Rye.....bush.	105,105	12,791	17,043	6,899
Total grain.....	4,790,541	2,705,319	1,312,822	4,470,110

The exports from the several seaboard ports for the week ending Jan. 9, 1897, are shown in the annexed table:

Exports from—	Wheat.	Corn.	Flour.	Oats.	Rye.	Peas.	Barley.
1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.
New York...	295,415	369,739	113,141	535,654	15,019	4,341	\$25,844
Boston...	206,924	130,293	18,191	1,600	...	...	...

## WALL STREET, FRIDAY, JAN. 15, 1897-5 P. M.

**The Money Market and Financial Situation.**—In the absence of developments affecting the general situation, Wall Street has been largely interested this week in events of limited significance. Prominent among these was the defeat of the bill for funding the Union Pacific Railway indebtedness to the Government. This action was construed to foreshadow a heavier assessment on Union Pacific stock in the reorganization than had been contemplated, and had a depressing effect.

The unfavorable condition of the bituminous coal trade is having its natural fruitage, and the earnings of some of the bituminous coal roads suggest the desirability of an adjustment of the relations governing this industry.

The importance of the facts shown by the Bureau of Statistics in its recent statement of the foreign trade of the United States can hardly be over-estimated. The statement shows a very large increase in the exports of cotton, breadstuffs and mineral oils. These facts sufficiently account for the abundant supply of foreign exchange. The surplus, however, is readily absorbed by investors, and the amount thus held is reported to be increasing.

The investment demand for securities, especially of high-grade bonds, has been pronounced this week, although the offerings of such securities are limited. Government bonds and the better class of railway bonds have been firm as a result of these conditions.

Money is growing more and more abundant. This is a natural consequence of the largely increased deposits and cash holdings. Rates for both call and time loans are lower.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 1¾ per cent. Prime commercial paper is quoted at 3 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £1,076,190, and the percentage of reserve to liabilities was 50.50, against 44.98 last week; the discount rate remains unchanged at 4 per cent. The Bank of France shows a decrease of 3,343,000 francs in gold and 587,000 francs in silver.

The New York City Clearing-House banks in their statement of Jan. 9 showed an increase in the reserve held of \$15,017,500 and a surplus over the required reserve of \$43,931,450, against \$33,236,950 the previous week.

	1897. Jan. 9.	Differ'n's from Prev. week.	1896 Jan. 11.	1895. Jan. 12.
Capital	60,772,700		61,122,700	61,622,700
Surplus	74,488,100		73,017,100	72,028,200
Loans & discounts	491,116,200	Dec. 259,700	458,268,400	489,682,600
Circulation	18,907,800	Dec. 692,300	14,002,600	11,426,500

Legal reserve	137,009,550	Inc. 4,313,300	122,917,200	138,550,700
Surplus reserve	43,991,450	Inc. 107,045,000	27,183,100	41,792,200

**Foreign Exchange.**—The foreign exchange market has been steady to firm, with all offerings readily absorbed by remitters and investors. The easy condition of the money market favors holding long bills here until maturity.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4 84¼ @ 4 85; demand, 4 87¼ @ 4 87½; cables, 4 88 @ 4 88¼.

## Posted rates of leading bankers follow:

January 15.	Sixty Days.	Demand.
Prime bankers' sterling bills on London.	4 85 @ 4 84½	4 88 @ 4 88½
Prime commercial.	4 84 @ 4 84¼	4 88 @ 4 88½
Documentary commercial.	4 83½ @ 4 84	4 88 @ 4 88½
Paris bankers' (francs).	5 19½-5 18½	5 17¼-5 16½
Amsterdam (guilder) bankers.	40 @ 40½	40¼ @ 40½
Frankfort or Bremen (reichmarks) bankers.	95 @ 95½	95¼ @ 95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1-16 discount, selling 1-16 premium; New Orleans, bank, \$1 50 premium commercial, par; Chicago, 50c. per \$1,000 discount; St. Louis, par @ 25c. per \$1,000 premium.

**United States Bonds.**—Government bonds have advanced. Sales at the Board include \$90,500 4s, coup., 1925, at 120½ to 121½; \$42,000 4s, coup., 1907, at 111¼ to 111¾; \$7,500 4s, reg., 1907, at 110¾ to 111; \$1,000 5s, coup., at 114¼, and \$2,000 currency 6s, '98, at 103½ to 103¾. The following are closing quotations:

\* This is the price bid at the morning board, no sale was made.

**United States Sub-Treasury.**—The following table shows the daily receipts and payments at the Sub-Treasury during the week.

Date.	Receipts.	Payments.	Balances.		
			Coin.	Coin Cert's.	Currency.
Jan. 9	2,211,663	3,153,429	122,590,584	1,587,068	50,538,514
" 11	3,614,034	4,628,693	122,568,371	1,631,624	49,501,493
" 12	2,416,179	4,061,565	122,585,174	1,506,473	47,964,455
" 13	3,698,065	4,365,119	122,653,377	1,612,152	47,123,538
" 14	5,938,484	4,764,614	122,624,461	1,544,930	45,288,950
" 15	4,445,797	5,971,481	122,678,508	1,634,147	46,624,902
Total	22,273,626	26,950,951			

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	\$4 85 @ \$4 88	Fine silver bars... -	64¼ @ -	65½
Napoleons.....	3 85 @ 3 88	Five francs.....	93 @ -	95½
X X Reichmarks.	4 74 @ 4 78	Mexican dollars... -	50¾ @ -	51½
25 Pesetas.....	4 77 @ 4 83	Do noom'cal... -	@ -	-
Span. Doubloons.	15 55 @ 15 75	Peruvian sols.....	45¾ @ -	46
Mex. Doubloons.	15 50 @ 15 75	English silver....	4 80 @	4 86
Fine gold bars... par	@ 4 prem.	U. S. trade dollars	-	65 @ - 75

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$13,000 Tenn. Settlement 3s at 80, \$24,000 Virginia fund debt 2-3s of 1891 at 61¼ to 62 and \$10,000 Virginia 6s, deferred trust receipts, stamped, at 6½.

The railway bond market reflects a steadily increasing demand for investment securities. The business in this department has been well distributed, and includes a considerable proportion of high-grade issues. The market has been firm, and changes in quotations, although unimportant in some cases, are generally to a higher level. The active list includes Atchison, St. Louis & S. F., Mo. Kan. & Texas, Kansas Pacific, Texas & Pacific, Rio Grande West., Burlington & Quincy, Rock Island, Union Pacific, North West., Chic. & No. Pacific, Mil. & St. Paul, Duluth & Iron Range, Ore. Ry. & Nav., No. Pacific, St. Paul M. & O., Chic. & Erie, Wabash, Erie, Ches. & Ohio, Richmond & Danville, Southern Ry., Reading, Lake Shore, New York Central and West Shore bonds.

**Railroad and Miscellaneous Stocks.**—The market for stocks has been dull and narrow throughout the week until to-day, when there was more activity than of late and a general advance in prices. The most prominent feature of the railroad list was Wheeling & Lake Erie, which declined on rumors of the financial condition of the company and the possibility of a receiver. The preferred stock, which sold last week at 30¼, dropped to 12, and the common declined from 6¼ on Monday to 2¾ on Thursday. Union Pacific lost 2½ points on Monday, when it was announced that the funding bill had been killed in the Lower House of Congress. Central of New Jersey recovered 2½ per cent of its recent decline. Delaware & Hudson Canal has continued weak on limited offerings. Manhattan Elevated has fluctuated over a range of 4 points and closes with a net gain of 3¾.

The miscellaneous list has generally advanced. Chicago Gas gained 3½ per cent on the expectation that the consolidation of the companies will be effected. U. S. Leather preferred advanced 2½ points on dividend rumors and reports that the annual statement of the company will show that its financial affairs have improved. Tenn. Coal Iron & Ry. was strong on new accessions to the directory. American Sugar has gained 3¾ points on relatively limited transactions.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STRAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

**Net Earnings Monthly to Latest Dates.**—The table following shows the net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of December 19, 1895. The next will appear in the issue of January 23, 1897.

**STREET RAILWAYS AND TRACTION COMPANIES.**  
The following table shows the gross earnings for the latest period of all street railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest:

week or month, and the last two columns the earnings for the calendar year from January 1 to and including such later week or month.

## STREET RAILWAYS AND TRACTION COMPANIES.

Figures were exceptional in 1895 on account of Atlanta Exposition.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of December 19, 1896. The next will appear in the issue of January 23, 1897.

Roads.	Gross Earnings.		Net Earnings.

## Missouri Kansas &amp; Texas Railway.

(Earnings for year ending Dec. 31, 1896.)

Gross earnings for calendar year 1896 have been reported and compare as follows with 1895 and 1894 and with the year 1891:

	1896.	1895.	1894.	1891.
Freight .....	\$9,247,555	\$8,102,286	\$8,010,969	\$7,244,015
Passenger .....	1,940,241	2,014,772	1,988,974	1,941,777
Mail .....	322,387	317,259	297,016	266,135
Express .....	194,217	181,730	181,959	144,611
Miscellaneous .....	30,749	73,122	92,666	137,522

**Total gross ..** \$11,746,239 \$11,030,140 \$10,502,588 \$9,775,129  
—V. 63, p. 638.

## Choctaw Oklahoma &amp; Gulf Railroad.

(Report for the year ending October 31, 1896.)

President Francis I. Gowen in the report says in part:

**General Results.**—Considering the great business depression during the year, the earnings of your property cannot but be regarded as reasonably satisfactory. In addition to general adverse conditions, the earnings of the railroad department for the first eight months were considerably diminished by our inability to secure from connecting lines fair divisions of rates on through business. In July, 1896, however, more equitable arrangements were made, and as a result this business has since been much more remunerative.

The sales of coal increased over 1895 to the amount of only 5,454 tons. This result was due to two causes: First, the largely decreased demand of the railroad companies [owing to their comparatively light traffic] and the very considerable falling off in the commercial business due to the extremely mild winter; and second, the low price at which the competitive coals from the Kansas field were marketed as the result of a coal war. It is not likely that this condition of affairs will continue, and indeed the prices in the past few months have been advancing. The business of the railroad has, of course, suffered as a result of the comparatively small output of coal, but the fact that the earnings of this department alone for the past year have been almost equal to the entire present interest charges of the company is most encouraging. It is believed that there will be a very decided increase in these earnings for the current year. Comparing the three months of October, November and December, 1895, with the same months of 1896, the gross earnings have increased from \$117,000, in round figures, to over \$200,000. The roadbed, equipment and mines of the company have been maintained in good condition. The output of coal in 1893 was 364,110 tons against 358,655 tons in 1895.

**Land Tenure in Indian Territory.**—The report says:

Nothing could, however, add so materially to the earnings of your road as a change to the existing conditions of land tenure in the Indian Territory. Only a few weeks ago the Dawes Commission reached an agreement with a Commission appointed by the Choctaw Nation, which will probably be made the basis for action by Congress at an early date. This agreement provides for the establishment of towns and for allotment of the land in severalty among the members of the Choctaw Nation and authorizes leases of lands by the latter. It is hoped the term of such lease may be made sufficiently long to induce settlement and cultivation of the lands. The importance of any such arrangement will be appreciated when it is considered that 137 miles of your railroad out of a total of 216 are in the Indian Territory and 95 of these 137 miles are in the Choctaw country.

**Retirement of Bonds with Preferred Stock.**—During the past year an issue of \$9,000,000 of preferred stock of the par value of \$50 was made, from which the company realized in its own bonds and in cash the sum of \$3,937,591 or \$37.97 per share. The bonds received in exchange included \$1,200,000 of the general mortgage and all of the income mortgage bonds, although four of the latter have not yet been surrendered. The general mortgage bonds have been lodged with the Girard Life Insurance, Annuity & Trust Company of Philadelphia, under an agreement which permits their use only for future extensions (exceeding 10 miles in length), and

at a rate not in excess of \$15,000 a mile for new road constructed. The income mortgage bonds will not be reissued.

The reasons for this transaction were of a two-fold character. In the first place, as the coal business was falling short of what had been counted upon, it was felt to be wiser to bring the fixed charges within the earning capacity of the company. It was also considered best to secure bonds for extensions in case construction should be forced upon the company in order properly to protect its business. Fortunately, the immediate use of these bonds for that purpose has been rendered unnecessary by the satisfactory arrangements made with our connecting lines. The larger part of the car trusts have been paid off and those outstanding will be retired out of the proceeds of the installment on the preferred stock, which is payable April 1, 1897.

**Extension Proposed.**—A survey has been made for an extension to the Kansas City Pittsburg & Gulf R.R., and construction will probably be undertaken this summer. Pending this, an arrangement has been made for the interchange of business between the two roads via the Frisco road, which forms an intermediate link between them.

**Financial Status.**—The company has no floating debt. During the past year the car trust obligations have been largely reduced. The amount required to pay those still outstanding is \$125,000. The company now owns 15 locomotives, 10 cars in passenger service, 491 coal cars and 41 other cars. It holds under lease the following, title to which will be acquired when outstanding car trust obligations are liquidated: 492 coal cars, 250 stock cars, 50 box cars. No balance sheet is given.

**Earnings.**—The comparative statement of earnings for two years is as below, the results for 1895 covering but one month's operation of the new line:

	1896.	1895.
<b>Railroad Department—</b>		
Passenger receipts .....	\$120,146	\$66,663
Freight .....	361,219	213,829
Mail, express, etc. ....	58,635	61,326
<b>Gross earnings .....</b>	<b>\$543,040</b>	<b>\$332,319</b>
<b>Operating expenses .....</b>	<b>340,819</b>	<b>205,859</b>
<b>Net earnings .....</b>	<b>\$202,220</b>	<b>\$126,459</b>
<b>Mining Department—</b>		
Receipts .....	\$536,017	\$559,345
Expenses .....	509,630	495,260
<b>Net earnings .....</b>	<b>\$26,387</b>	<b>\$64,085</b>
<b>Total net income for both departments .....</b>	<b>\$228,607</b>	<b>\$190,544</b>
<b>Taxes .....</b>	<b>11,200</b>	

**Balance .....** \$27,407  
Int. charge on \$1,000,000 prior lien 64 and  
\$2,995,000 gen. mort. be now outstanding is \$208,750

**New Directors.**—During the year Samuel Dickson, N. Thouron and Charles Biddle resigned from the Board in order to give a representation to the preferred stock, their places being filled by the election of Samuel Hunt, Edward B. Smith and Edward D. Toland.—V. 62, p. 668.

## Edison Electric Illuminating Co. of Brooklyn.

(Statement for year ending Dec. 31, 1896.)

In advance of the annual report the earnings and expenses for the late year have been reported as follows:

	1896.	1895.	1894.
Gross earnings .....	\$810,266	\$821,149	\$421,074
Expenses and taxes .....	494,266	383,707	234,198
<b>Net earnings .....</b>	<b>\$311,000</b>	<b>\$237,412</b>	<b>\$186,876</b>
Other income .....	31,148	24,907	34,539
<b>Total .....</b>	<b>\$342,148</b>	<b>\$262,319</b>	<b>\$223,406</b>
<b>Deduct—</b>			
Interest on bonds .....	\$50,000	\$33,750	\$25,000
Dividends .....	(6%) 215,000	202,500	168,750
<b>Total .....</b>	<b>\$275,000</b>	<b>\$236,250</b>	<b>\$193,750</b>
<b>Surplus for year .....</b>	<b>\$67,148</b>	<b>\$31,099</b>	<b>\$29,656</b>

Doubtful accounts for \$7,143 were written off and \$51,000 was carried to "Depreciation Reserve," leaving balance to credit of income Dec. 31, 1896, \$53,413.—V. 62, p. 633.

## The H. B. Claflin Company.

(Report for the half-year ending Dec. 31, 1896.)

Mr. John Claflin, President, says in the report:

"During July, August, September and October the whole country was prostrated by fears which were dissipated by the result of the Presidential election. After November 3 a hopeful improvement in trade, and the last six months of 1896 add a bright chapter to the record of four years of difficulty and disappointment. Our net profits for the six months are \$103,402, against \$359,373 for the corresponding period in 1895."

"Whenever this country gets a tariff which will produce sufficient revenue for the needs of the Government and will at the same time intelligently encourage domestic industries, we expect a return of general prosperity. Meantime we think there will be a moderate recovery from the present unreasonable depression."

The following, compiled for the CHRONICLE, compares the results of the half-year's business in four seasons:

	1896.	1895.	1894.	1893.
<b>Net earnings, after taxes, salaries and expenses ..</b>	<b>103,103</b>	<b>359,273</b>	<b>245,435</b>	<b>6,523</b>
<b>Int. on pref. stock ½ year ..</b>	<b>142,120</b>	<b>142,126</b>	<b>142,126</b>	<b>142,125</b>
<b>Remainder for com. stock, of</b>	<b>38,721</b>	<b>127,147</b>	<b>104,499</b>	<b>df. 135,602</b>
<b>Dividends on com. stock ..</b>	<b>114,473</b>	<b>114,473</b>	<b>114,473</b>	<b>114,473</b>
<b>Surp. in autumn for com. of</b>	<b>153,590</b>	<b>102,274</b>	<b>df. 11,504</b>	<b>df. 250,475</b>
<b>Reserve for common brought forward .....</b>	<b>277,006</b>	<b>273,615</b>	<b>287,493</b>	<b>552,076</b>
<b>Surp. reserve for com. stock</b>	<b>123,410</b>	<b>375,999</b>	<b>275,910</b>	<b>301,601</b>

The following table shows the results for the full years 1893 to 1896 inclusive, the "profit" being given after deducting the dividends (\$284,232) on the preferred stock:

	1896.	1895.	1894.	1893.
Profit for year over interest on pref. stock.....	df.22,734	329,718	204,061	39,535
Dividends on common.....	229,746	229,746	229,746	287,182

Balance.....df.252,480 sur.99,972 df.25,685 df.247,847  
Dividends on common stock from organization to October, 1892, 8 per cent per annum; from October, 1892, to July, 1893, 9 per cent; from July, 1893, to date, 6 per cent per annum.

BALANCE SHEET DECEMBER 31, 1896.

1895.....	275,128	112,248	864	43,394	69,218

Loans and bills payable Dec. 31, 1896, \$121,000, against \$65,000 on June 30.—V. 63, p. 957.

**American Sugar Refining. —Annual Meeting.**—At the annual meeting on Wednesday directors Henry O. Havemeyer, William Dick and Francis O. Matthiessen were re-elected. President Havemeyer made some general remarks expressing the desire of the directors for the approbation of the stockholders, but giving no information whatever regarding the finances or operations of the company.

**Contest with Arbuckles.**—Arbuckle Brothers having acquired 61 shares of stock of the Woolson Spice Co., the remainder of whose stock was recently purchased by the American Sugar Refining Co., have brought suit to have the Woolson Company placed in receivers' hands. Their petition alleges that the Sugar Company stated when purchasing the

Woolson stock that it was to be used solely to enable the trust to crush the Arbuckles, and that as soon as that should have been accomplished, it would be sold back to the original holders at a reduced rate; that in the face of a rising market the trust has made a reduction of 3 cents in the roasted coffee, and that the plant is now being operated at a loss of about \$1,000 a day. The court issued a restraining order, and will hear the motion Jan. 25.—V. 64, p. 40.

**Atlantic & Pacific RR. —New Committee.**—A committee is being formed to protect the interests of the holders of junior bonds and of the stock. Holders are requested to send their names and amount of their holdings to T. W. Lillie, Mills Building, New York City.—V. 64, p. 40.

**Atlantic Short Line RR. —Sale Confirmed.**—The foreclosure sale of this road has been confirmed.—V. 64, p. 40.

**Bloomsburg & Sullivan RR. —Coupons Cut Off.**—The bondholders are requested by their committee to cut off and deposit with the Fidelity Trust & Safe Deposit Company of Philadelphia coupons due respectively July, 1896, and January and July, 1897. A form of agreement can be had upon application to the Fidelity Company.

A circular sent out by the committee, which consists of Morton McMichael, J. G. Leiper, H. H. Pigott, A. W. Kelsey, F. W. Clark, Jr., says in substance:

At a meeting representing a large majority of the bonds your committee was appointed to decide upon a practicable plan for providing the considerable sum of money required in order to rebuild bridges and for other necessary improvements. Up to Dec. 1 the road earned net \$22,700. The taxes for 1896 were \$1,856, the new construction has cost \$12,735, and \$540 has been paid for right of way. It will be seen that the sum of these debit items about uses up the net earnings, leaving the road, however, clear of any debt but the bonds (\$810,000). To finish the work originally contemplated will take all of \$12,000 more, so that the committee is convinced that bondholders will be obliged to give up three coupons, viz: July, 1896; January, 1897, and July, 1897, after which there seems to be every prospect of the resumption of interest payments, although probably the interest may have to be less than 5 per cent and taxes.—V. 63, p. 115.

**Branswick Company. —Sold in Foreclosure.**—At foreclosure sale Jan. 5 this property was bought in by the bondholders' committee for \$30,000. The Knickerbocker Trust Co. was trustee of the \$300,000 mortgage foreclosed.—V. 63, p. 185.

**Butte & Boston Mining. —Securities Deposited Under Plan.**—The following securities, it is stated, have been deposited under the plan: \$935,000 first mortgage bonds, \$917,000 second mortgage consols and 190,335 shares of stock, leaving unassented \$65,000 first mortgage bonds and \$33,000 second mortgage consols and 9,665 shares of stock.—V. 63, p. 1153.

**Calumet & Hecla Mining. —Extra Dividend.**—The company has declared the expected \$5 per share dividend, and an extra dividend of \$10, making \$15 in all, calling for distribution of \$1,500,000.—V. 63, p. 188.

**Central Ohio RR. —Stockholders' Committee and Circular.**—At a meeting recently of many of the larger stockholders a committee was appointed consisting of Joseph H. Rieman, Chairman (Howard and German Streets, Baltimore, Md.); William H. Conkling and Basil B. Gordon, with general instructions to confer with all stockholders desiring to protect their rights under the lease to the B. & O. RR. Co. The committee has sent to stockholders the following circular:

The lease provides that 35 per cent of the gross earnings of the Central Ohio shall be turned over to our stockholders, and under its provisions, for thirty years, dividends on the stock have been paid, and the surplus, now aggregating nearly \$1,000,000, has been withheld by the B. & O., and is acknowledged by them as an obligation due us. Ten months ago the B. & O. went into the hands of receivers. No dividend on our stock has since been paid, and while our gross receipts are greater than last year, the statement furnished by Receiver Owen alleges that the operating expenses for the last six months have been 97 per cent of the gross receipts, which our board has admitted to be in excellent order. Among other items we are charged with \$112,000 for six months' maintenance of equipment, whereas the rolling stock on the road belongs to the B. & O., and it is specifically pledged to maintain it. Such a statement should need no comment.

The insignificant net earnings allowed us under such a system are not nearly enough to meet the coupons on bonds ahead of our stock. In addition to this there are other obligations in the way of leased lines which have been put upon the road without the knowledge of stockholders, and which claim to be upon the same footing as the bonded debt. The continuance of these conditions must result in final foreclosure and the total extinction of our interest. It is the opinion of this committee that nothing but prompt and energetic measures can avert this disaster and restore this property to its original and intrinsic value. A meeting of stockholders will shortly be called.

As to the suit brought by a stockholder of the Columbus & Cincinnati Midland RR. to secure payment of dividends guaranteed by the Central Ohio, see item headed Columbus & Cincinnati Midland below.—V. 64, p. 32.

**Central Pacific RR. —Listing.**—On the regular list of the New York Stock Exchange have been placed \$3,210,000 first mortgage series E bonds extended to Jan. 1, 1898, and on the special list \$787,000 series E extended and \$1,323,000 series F, G, H and I bonds recently held in the Government sinking fund and now issued stamped either as stated in V. 63, p. 1033 or as follows:

UNITED STATES TREASURY DEPARTMENT, Dec. 22, 1896.  
This bond is hereby withdrawn from the sinking fund of the Central Pacific RR. Co. and released to bearer,  
V. 63, p. 1153. W. E. CURTIS, Acting Secretary.

**Chattanooga Home & Columbus RR. —Sold in Foreclosure.**—This road was purchased at foreclosure sale January 13 by Simon Borg & Co., agents for the bondholders, for \$500,000. The sale was made subject to the Roads & Carrollton RR. mortgage for \$150,000.—V. 64, p. 82.

**Choctaw Oklahoma & Gulf RR. —Preferred Stock Listed.**—On the Philadelphia Stock Exchange has been listed \$3,063,600 preferred stock. The authorized issue is 80,000

shares in \$50 shares, of which 61,272 shares have been issued and 18,728 shares are reserved to be issued as follows: 18,637 shares to take up certificates for a like number of shares on which three installments amounting to \$20 per share has been paid, to be issued full paid upon payment of final installment of \$3 per share, due and payable April 1, 1897; 71 shares to take up \$4,973 income bonds and scrip and \$814.55 preferred stock scrip outstanding. No dividend paid as yet. Preferred stock is entitled to dividend of 5 per cent (cumulative after Nov. 1, 1897,) before any dividend shall be paid on common stock. The annual report appears on another page of to-day's CHRONICLE.—V. 62, p. 868.

**Colorado Midland RR.—Extension of Bondholders' Agreement Adopted.**—Reorganization Plan to be Prepared.—A large majority of both classes of bonds has assented to the extension of the bondholders' agreement to July 1, 1897. The committee accordingly announces that it will now proceed to prepare a plan of reorganization and to submit the same to the bondholders for their approval as soon as practicable. Certificate holders who have not yet assented to the extension of the agreement may present their certificates for stamping at the Central Trust Company until Feb. 1, 1897, or withdraw their bonds from deposit upon surrender of the certificate and payment of \$10 per bond as their share of the expenses of the committee. Deposits of bonds under the agreement will also be received up to Feb. 1, 1897, after which date deposits and assents will be accepted only upon such terms as the committee may impose.—V. 63, p. 1115.

**Columbus & Cincinnati Midland RR.—Baltimore & Ohio RR.—Central Ohio RR.—Suit to Collect Rental.**—W. E. Case of Scipio, N. Y., has brought suit in the United States Circuit Court at Baltimore to compel the Baltimore & Ohio receivers to pay the guaranteed annual dividend of 3 per cent on the \$1,000,000 preferred stock of the Columbus & Cincinnati Midland RR., which road is under lease to the Central Ohio, the latter being operated by the Baltimore & Ohio. The plaintiff alleges that the B. & O. share of the Central Ohio gross earnings and the Columbus & Cincinnati Midland net earnings have been more than sufficient to pay the dividends passed July 1, 1896, and Jan. 1, 1897. The receivers are ordered to show cause on Feb. 6 why these charges have not been met.—V. 63, p. 1007; V. 64, p. 83.

**Columbus & Hocking Coal & Iron.—Foreclosure Suit Instituted.**—At Columbus, Ohio, Jan. 8, the Central Trust Company, as trustee, brought suit in the United States Circuit Court to foreclose the mortgage for \$930,000 and for its own receiver. The interest due Jan. 1, 1897, was not paid. The mortgage provides, "if any default shall be made in the payment, when due, of any money, principal or interest secured by this mortgage," then at any time thereafter the trustee may begin foreclosure. The customary delay is, therefore, not necessary. As already stated, it is proposed to scale the interest on the bonds.—V. 64, p. 41.

**Columbus Sandusky & Hocking RR.—Receiver Appointed.**—Yesterday, without notice to the company, E. M. Paston was appointed receiver of the Columbus Sandusky & Hocking on the application of a creditor.—V. 63, p. 1117.

**Cuyler & Woodburn RR.—Master's Sale.**—This property is advertised to be sold March 2, 1897. The road extends from Cuyler to Woodburn, Ga., 14 miles.

**Duluth & Wainipeg RR.—Duluth Superior & Western RR.—New Securities Ready.**—Holders of reorganization certificates for the first mortgage bonds of the Duluth & Wainipeg are receiving the new securities issuable therefor at the office, No. 44 Wall Street, New York City.—V. 63, p. 1063.

**Edison Electric Illuminating Co. of Brooklyn.—New Stock and Bonds.**—The stockholders on Jan. 11 authorized an increase in the capital stock of \$250,000 and a further issue of \$500,000 bonds under the present mortgage. These securities are offered until Feb. 1 at par to the stockholders at the rate of ten shares of stock and a \$1,000 bond for each 150 shares of stock held. The subscriber must take both stock and bonds in equal amounts, payments to be made 20 per cent at time of subscription, 30 per cent April 1, 30 per cent July 1 and 20 per cent Oct. 1. A circular to the stockholders says:

The purpose of your company is to keep in the forefront as to supplying any section of the city as readily as there is call for electric light. Last summer Bergen Beach and Canarsie were made bright with the best of lighting at regular rates. By the enlargement now contemplated, the much larger population of Coney Island, which has heretofore been compelled to pay high prices for its electric lights, will be amply supplied by this company at current rates.

In furtherance of this policy your directors have purchased a very valuable piece of property at the foot of Sixty-sixth Street, containing 560 feet of water front and running 576 feet back—332 feet of which a good land all ready to build upon. Heretofore it was proposed to erect a new power plant which will be connected with all the other stations and give to the city of Brooklyn the most completely equipped lighting plant of any city in this country. The calculations submitted demonstrate that the economy in operation by reason of the improvements will be far in excess of the interest and dividends upon the new issues without reference to the new business to be supplied. At no period in the progress of your company have its officers been so confident of its future.

A statement of earnings for the late fiscal year will be found under the heading "Annual Reports."—V. 63, p. 683.

**Fair Haven & Westville RR.—New Haven & Centreville Street Ry. \$300,000 Stock to Pay for Road.**—The Fair Haven & Westville RR. Co. has voted to issue at par to stockholders \$300,000 of new stock to pay for the New Haven & Centreville Street Ry. recently purchased. Possession of the road was taken Jan. 1, 1897.

**Green Bay & Western RR.—Securities Listed.**—The company has listed at the New York Stock Exchange \$2,500,000 capital stock, \$600,000 debenture certificates, series A, and \$7,000,000 debenture certificates, series B, all issued under the plan in V. 61, p. 74, which describes them fully. Some facts regarding the company's finances will be found under "Annual Reports" in next week's CHRONICLE.—V. 63, p. 922.

**Kansas City & Atlantic RR.—Kansas City & Northern Connecting RR.—Sale and Purchase.**—The Kansas City & Atlantic, extending from North Kansas City to Smithville, Mo., 30 miles, has been acquired by the Kan. City & North. Connecting RR., and will be used as part of that company's line now in course of construction between Kansas City and Pattonsburg. The price paid is stated to have been \$225,000. The new owners assumed the operation of the road Jan. 11. The extension to Pattonsburg will be pushed.—V. 62, p. 186.

**Kansas City Pittsburg & Gulf RR.—Handling Grain Business.**—Negotiations have just been completed with one of the leading grain exporting houses of the world for the handling of the entire grain business of the Kansas City Pittsburg & Gulf RR. These negotiations include the leasing of all the grain elevators on the Kansas City Suburban Belt RR. and the building of a large terminal elevator at Port Arthur, La. Contracts have also been closed whereby a large colony of Germans will be located on the road.—V. 63, p. 1115.

**Laclede Gas Light Co.—Results for Year.**—The net earnings for the year 1896 were \$782,213, as against \$933,892 in 1895. The falling off is said to represent the loss due to the voluntary reduction in the price of gas from \$1.18 to \$1 per 1,000 and to 80 cents on fuel gas.

**Charter Case.**—The decision in the charter case, which is to be re-argued before the U. S. Supreme Court, is not expected before next fall.—V. 63, p. 1159.

**Lake Street Elevated RR.—Foreclosure.**—Judge Grosscup at Chicago on Jan. 11 refused to stay the foreclosure proceedings. The attorneys arguing for the stay represented that, outside of the 605 Ziegler bonds, which are in litigation, there are but 240 bonds not consenting to the plan of adjustment.—V. 63, p. 154.

**Little Rock & Mississippi River RR.—Receiver Appointed.**—This road has been placed in the hands of Charles F. Pentzel as receiver. The road is said to be 23 miles long.

**Louisville & Nashville RR.—Bonds Listed.**—On the New York Stock Exchange have been listed the \$3,253,000 Louisville & Nashville-Louisville Cincinnati & Lexington 4½ per cents sold in December last to pay bonds maturing Jan. 1, 1897, etc.—see particulars in V. 63, p. 1010. The bonds so listed were originally 6s, but before they were issued the interest was reduced to 4½ per cent.

The application to the Stock Exchange states:

The \$3,258,000 Louisville & Nashville RR. Co., Louisville Cincinnati & Lexington Ry. Co. 4½ per cent gold mortgage bonds, are dated Nov. 1, 1881, mature Nov. 1, 1931, and are secured upon road Louisville to Newport, Ky., opposite Cincinnati, Ohio, 110 miles; La Grange to Lexington, Ky., 67 miles; total, 177 miles. Mortgage trustee, Mercantile Trust Co.

The Louisville Cincinnati & Lexington Ry. was sold and transferred Nov. 1, 1881, by the Louisville Cincinnati & Lexington Railway Co. to the Louisville & Nashville RR. Co. for and in consideration of the above issue of bonds of the Louisville & Nashville RR. Co., secured by a mortgage on the Louisville Cincinnati & Lexington Ry. The mortgage is for \$7,000,000, of which bonds Nos. 51 to 3,732 have been cremated, these bonds having originally been set aside to take up prior liens. The Louisville & Frankfort and Lexington & Frankfort RR. Co. first mortgage, amounting to \$1,850,000, matured Jan. 1, 1897, and the same have been released from proceeds of above mentioned bonds, leaving \$392,000 of Louisville & Frankfort and Lexington & Frankfort 7 per cent bond, as the only prior lien to the bonds now asked to be listed. The rate of interest on the above issue of bonds was originally 6 per cent, but by agreement between the Louisville Cincinnati & Lexington Railway Co., the Louisville & Nashville Railroad Company and the Mercantile Trust Company, trustee, dated Dec. 1, 1896, the interest was reduced to 4½ per cent, the reduction of interest being printed on each bond and coupon, and the amount of bonds limited to \$3,258,000.

**Semi-Annual Statement.**—Earnings for the six months ending Dec. 31, 1896, partly estimated, compare with actual results in previous years as follows:

	6 months end. Dec. 31.	Gross earnings.	Net earnings.	Fixed charges.	Other income.	All other charges.
1896, act'd.	\$10,577,915	\$3,521,296	\$2,822,641	\$221,064	\$247,223	
1895, act'd.	10,720,081	3,894,442	2,831,170	176,126	184,785	
1894, "	10,180,878	4,108,938	2,820,768	179,844	1,065,282	
1893, "	9,755,923	3,874,577	2,850,713	161,940	72,124	

which leaves a balance over all charges for six months of \$678,456 in 1896, against \$1,091,613 in 1895.

"All other charges" include the following: Loss on Georgia RR. (profit in 1896 of \$14,000) in 1895, \$4,797; loss on other roads, \$28,084 in 1896 against \$33,911 in 1895; sinking fund payments, etc., \$121,135 against \$95,997; advances to South & North Ala. RR., \$98,001 in 1896; none in 1895.—V. 63, p. 1010.

**Louisville New Albany & Chicago Ry.—Second Instalment Due.**—Holders of the preferred and common stock subscribing to the common stock of the proposed new corporation are called upon to pay the second cash instalment at the office of the Central Trust Co. Jan. 15, being \$150 on each 100 shares of old preferred stock and \$50 on each 100 shares of old common stock.—V. 64, p. 42.

**Manhattan Ry.—Bonds Listed.**—On the New York Stock Exchange have been listed \$282,000 additional consolidated mortgage 4s, making the total amount listed \$241,820,000, of which \$117,000 are canceled, leaving amount on list \$24,665,000.—V. 64, p. 83.

**Metropolitan Street Ry. of New York—Compressed Air Power Co.—Organization.**—The Compressed Air Power Co. has filed articles of incorporation under the laws of N. Y., one-half of its authorized capital stock of \$1,000,000 having been paid in. The directors are William C. Whitney, Thomas J. Ryan, Frederick S. Pearson, William L. Elkins and W. W. Cook, all or most of whom are largely interested in the Metropolitan Street Railway Company. This latter fact has raised the question whether the Fourth, Sixth and Eighth Avenue horse-car lines may not after all be equipped with air motors. President H. H. Vreeland is quoted as saying:

"The matter has not yet gone beyond the experimental stage. We have had good results with both the underground trolley system and compressed air, and it is safe to say that one or the other of these will eventually be adopted for the north and south horse-car lines of the company. The Siemens & Halske electrical system has its advantages, and is highly regarded by many who are expert judges of mechanical traction. It is not so old as the compressed air system, but there have been some very great improvements recently in the latter, which have not been applied in previous tests."

The compressed air motors are built at Worcester, Mass., and several of them are in service on the Lenox Avenue line, alternating with the electric cars.—V. 63, p. 922.

**Metropolitan West Side Elevated R.R. (Chicago).—Remaining \$5,000,000 First Mortgage Bonds Offered.**—The West Side Construction Co. is offering to its stockholders \$5,000,000 first mortgage bonds of the Metropolitan West Side Elevated R.R.—the unsold balance of the authorized issue of \$15,000,000, and the bonds which at one time it was proposed to cancel and replace with preferred stock, this latter plan having proved impracticable. The proceeds will be used to liquidate the indebtedness of the Construction Company, and when this is done stock of the railroad company to the amount of \$12,412,100 will be distributed among the Construction stockholders, making \$15,000,000 stock and the same amount of bonds in the hands of the public.

The circular offering the bonds says in substance:

The contract undertaken by this company having been completed, it is deemed advisable to close up its affairs. The Construction Company now owns as assets \$5,000,000 of the first mortgage bonds of the Metropolitan West Side Elevated R.R. Co. and \$12,412,100 of its capital stock. It also possesses other credits and assets consisting of moneys due from the Metropolitan West Side Elevated R.R. Co. for work in excess of its contract, property acquired during the course of construction and various other interests. It is also entitled to receive bonds of the Union Consolidated Elevated Ry. Co. of Chicago, amounting to about \$375,000. Against all the assets above mentioned the Construction Company owes the sum of about \$1,500,000.

In order that the assets of the company may be realized upon to the best advantage of the stockholders, the directors have determined that the \$5,000,000 first mortgage bonds of the Railroad Company shall be sold to the stockholders of the Construction Company at such price as shall enable this company to realize a sufficient amount in cash to pay off its debt, and that thereafter the balance of its assets shall be distributed among the stockholders, and the affairs of the Construction Company be thus practically wound up with as little delay as possible. It is proposed that the \$12,412,100 of stock of the Metropolitan West Side Elevated R.R. shall, so far as practicable, be distributed in kind among the stockholders of the Construction Company as soon as the indebtedness of the company shall have been taken care of by the sale of bonds herein provided for.

These \$5,000,000 of the first mortgage bonds, with coupon maturing February 1, 1897, are accordingly offered to our stockholders *pro rata* at the price of \$300 for each \$1,000 bond.—V. 63, p. 1065.

**Michigan Central R.R.—Terminal R.R.—Chicago Hammond & Western R.R.—New Mortgage.**—A mortgage for \$1,500,000 to E. B. Wesley and William E. Roosevelt, as trustees, has been filed by the Terminal R.R. Co. and the Michigan Central R.R. Co. to secure, it is understood, bonds to be issued by the Michigan Central. The mortgage covers the roadbed, right of way and rolling stock of the Terminal Company. The instrument is dated Dec. 30, 1896, and is signed by F. S. Winston, President, and James Miles, Secretary, of the Terminal Company, and H. B. Ledyard and Elwin D. Worcester, President and Secretary of the Michigan Central.

The stockholders of the Chicago Hammond & Western were to vote Jan. 5 on a proposition to make a mortgage for \$2,500,000.—V. 63, p. 1155; V. 64, p. 5.

**Nashville Chattanooga & St. Louis R.R.—Payment of Regular and Deferred Dividends.**—The directors this week declared the regular quarterly dividend of 1 per cent and an extra 1 per cent to cover the dividend passed last November. With the exception of that quarter 1 per cent has been paid annually during the last two years.—V. 63, p. 1063.

**Nashville Street Ry.—Stockholders' Meeting.**—The stockholders on Jan. 4 adopted a resolution approving the action of the directors in the carrying out of the plan of organization of the company, including the compromise of pending litigation and other questions growing out of the execution of said plan. The following matters were also acted upon favorably:

The payment of the purchase price of the property in the case of R. Wiggins vs The United Electric Railway and others in the United States Circuit Court for the Middle District of Tennessee; the settlement of the betterment account proposed in the plan of organization; the issuance of stocks and bonds; the settlement of claims for bonds and claims on coupons.—V. 63, p. 1115.

**New York Biscuit.—New President.**—William H. Moore resigned from the presidency Jan. 6 and Henry J. Evans the General Manager, has succeeded to the office.—V. 63, p. 560.

**Northern Pacific Ry.—Coar d'Alene Ry. & Navigation.**—Bought at Foreclosure Sale.—At Wallace, Idaho, Jan. 12, the Northern Pacific Railway purchased the Coar d'Alene Railway & Navigation Company's property at foreclosure sale for \$221,000.—V. 64, p. 83.

**Norwich & Worcester R.R.—Bonds and Extension Authorized.**—At the annual meeting Jan. 13 it was voted to extend the road from Alijo's Point to Groton, Conn., a distance of six miles, at a cost, it is said of from \$100,000 to \$500,000, and

to issue \$400,000 of 4 per cent thirty-year bonds to provide for the 6 per cent bonds maturing March 1, 1897.—V. 64, p. 83.

**Ohio Southern R.R.—Receivers' Certificates.**—The application for the receivers' certificates mentioned last week, we understand, will be made to-day, and will be for an amount somewhere between \$400,000 and \$500,000, to take care of over-due car trusts, labor charges, etc.—V. 64, p. 83.

**Oregon Short Line & Utah Northern Ry.—Sold in Foreclosure.**—On Jan. 9 this property was sold in foreclosure to the reorganization committee through Henry G. Nicholls for \$7,185,500. The amount realized on the consolidated mortgage of 1889 was \$5,447,500, on the Utah Southern \$763,000 and Utah Southern extension mortgage \$975,000.

**Bonds Listed.**—On the New York Stock Exchange have been listed \$342,000 additional Utah & Northern first mortgage 7 per cent bonds of 1903, making total amount listed to date \$1,031,000. The total issue outstanding is \$4,993,000, but of this amount the Union Pacific on Jan. 1, 1896, held \$3,934,000—\$1,974,000 deposited under its 6 per cent collateral trust loan of 1879 and \$1,860,000 under its 5 per cent collateral trust of 1883.—V. 64, p. 42.

**Pittsburg Bessemer & Lake Erie R.R.—Pittsburg Shenango & Lake Erie R.R.—Consolidation.**—The stockholders of the Pittsburg Shenango & Lake Erie have voted in favor of the proposed consolidation, and the line will henceforth be known as the Pittsburg Bessemer & Lake Erie R.R. Co. The directors of the new company and many facts regarding its property were in the CHRONICLE of Dec. 26, 1896, p. 1159.

**Carnegie-Rockefeller Alliance.**—The agreement which the Carnegie interests in behalf of this road have made with the Rockefeller interests, controlling the Mesaba iron mines is discussed as follows by the "Iron Age":

The Carnegie-Rockefeller alliance continues to be the subject of much comment in the iron trade. It is reported on good authority that the freight from the mine to Duluth has been fixed at 80 cents per ton, and that any reduction in that rate is to be equalized by adding the amount of the reduction to the royalty. In other words, the Rockefeller interest get \$1.05, guaranteed as the joint royalty and rail freight. The lake freight is said to be arranged in the following manner: The Carnegie interest pays a fixed minimum rate per ton on every cargo received, and agrees to make a final settlement on the basis of the average rate of lake freight paid during the season. It is understood that the Rockefeller interest received payment for all the moneys expended in opening up, stripping and equipping the Iron Mountain Mine, and that the sum involved was about \$800,000. It will be noted, therefore, that the Rockefeller party secure a minimum tonnage of 1,200,000 tons per annum for their road and steamers, are guaranteed the royalty, and have refunded the whole cost of the mine to them. The Carnegie Company have also agreed not to become connected with any competing line from the Mesaba deposits to shipping port, and are not allowed to sell any of their ore in the open market.—V. 63, p. 1159.

**Rapid Transit in New York City.—Route Adopted.**—The Rapid Transit Commissioners on Thursday adopted a route for an underground railroad from the City Hall to One Hundred and Fourth Street, and thence on the west side to King's Bridge and on the east side to Bronx Park. The Commissioners retained the right to extend the road to the Battery. The route as adopted does not differ materially from the provisional route given in CHRONICLE of January 9, p. 84.—V. 64, p. 84.

**Reading Company.—Chestnut Hill R.R.—Reduced Rental Accepted.**—The shareholders of the Chestnut Hill R.R. have agreed to accept the reduction in their rental from 12 to 6 per cent, proposed by the Reading.—V. 64, p. 81.

**Tennessee Coal & Iron.—New Directors.**—Col. C. M. McGhee and Col. O. H. Payne have been elected directors in place of the late John H. Isaacs, and J. Edward Simmons, resigned.—V. 63, p. 561.

**Toledo & Ohio Central Ry.—Dividend Deferred.**—The directors Thursday voted to defer the dividend due this month on the preferred stock. The October, 1896, dividend was also deferred. It is stated that the losses due to the soft-coal rate cutting have been so severe as to preclude the payment of a dividend at the present time.—V. 63, p. 752, 758.

**Union Traction Co. of Philadelphia.—Description of Securities Listed.**—On the Philadelphia Stock Exchange have been listed \$31,000,000 common stock of the Union Traction Co. in \$50 shares, \$10 paid in on each share, and \$29,721,876 "Electric and People's Traction 4 per cent gold stock trust certificates" issued by the Pennsylvania Company for Insurance on Lives and Granting Annuities. The stock trust certificates are described as follows:

They are registered Nos. A 1, etc., \$1,000 each; B 1, etc., \$500 each; C 1, etc., \$100 each; D 1, etc., \$200 each; E 1, etc., \$100 each, and F 1, etc., for odd amounts under \$100. Their interest is payable in gold coin free of tax, and both their principal and interest are guaranteed by the Union Traction Co., the principal being redeemable at the option of the Union Traction Co. on and after October 1, 1915. The authorized issue is \$29,721,876, of which amount \$21,721,876 has been issued to take up the stock of the Electric and People's Traction companies. The payment of the principal and interest of these stock trust certificates is secured by the deposit of the stock so purchased, with the Pennsylvania Company for Insurance on Lives and Granting Annuities, as trustee, and by the guarantee of the Union Traction Co.

**Instalment of \$2.50 to be Called.**—The executive committee of the board of directors on Tuesday decided to recommend that an instalment of \$2.50 a share be called on the stock of the company. The recommendation will be acted on by the full board next week. The two previous instalments were \$5 each, so that with this additional amount paid in the \$51 shares will represent a cash payment of \$12.50 each. The company will receive \$1,500,000 from the present payment.—V. 63, p. 1060.

**Union Pacific R.R.—Central Pacific R.R.—Funding Bill Defeated.**—The bill for funding the debt of the Pacific railways to the Government was defeated in the House of Representatives on Jan. 11 by a vote of 163 against 102. On Thursday the House Committee decided to prepare a bill providing for a commission of Cabinet Officers to arrange a settlement of the debts of all Pacific railroads to the United States. The Senate Committee has done the same.—V. 63, p. 1158; V. 64, p. 83.

**Western New York & Pennsylvania Ry.—Annual Meeting—Increased Earnings.**—The annual meeting of stockholders was held on Monday in Philadelphia, the old Board of Directors being re-elected.

President Samuel G. D. Coursey presented the report for the fiscal year ending June 31, 1896, with a supplemental statement for the six months ending Dec. 31, 1896. The supplemental report shows a decrease in gross earnings of \$126,515, but an increase in net earnings of \$126,164. The Philadelphia "Ledger" says:

This large increase in net earnings in the face of a decrease of gross earnings is accounted for by a slight improvement in the average rate of freight and an enforcement of the strictest economy consistent with the proper maintenance of the property. The decrease in tonnage occurred largely at the close of the year, but was to low rate freight. The fund contributed by stockholders for paying interest on general mortgage bonds was exhausted by the April coupon on said bonds. The October interest was paid out of earnings. For a period of four years after April 1, 1897, interest on these bonds will be at the rate of 3 per cent (\$300,000), after which time it will be at the rate of 4 per cent.—V. 63, p. 832.

**West Superior Iron & Steel.—Reorganization Plan.**—The reorganization committee (Fred C. Gates, Colgate Hoyt, George Welwood Murray, Stephen Baker and Robert Masley) gives notice to holders of Knickerbocker Trust Company's certificates representing bonds deposited under the agreement dated Sept. 28, 1895, that a plan of reorganization has been prepared, and that a meeting will be held at the Knickerbocker Trust Company, 63 Broadway, New York, Jan. 21 1897, to consider the said plan, which will be then submitted.

**Plan.**—The plan provides that the property, after foreclosure sale under the Central Trust Company mortgage, shall be turned over to a new company, which shall issue:

**First mortgage** 6 per cent gold bonds payable on or before two years and not foreclosable within that time, to be issued for assessments..... \$100,000

**Preferred stock** entitled to 8 per cent cumulative dividends, preferred as to assets and dividends, and to share equally with common stock, share for share, in all dividends after payment of 4 per cent on common—amount to be issued for old securities and debts..... 1,729,000

**Preferred stock** to be issuable for improvements..... not stated

**Common stock** entitled to 6 per cent non cumulative dividends after payment in full of dividends on preferred, and entitled to share equally with preferred, share for share, in all dividends after payment of 4 per cent on both common and preferred—amount to be issued for old securities..... 544,475

**Common stock** to be issuable for improvements..... not stated

**Terms of Exchange.**—The old securities and debts will pay assessments and receive new stock in exchange for their principal and first mortgage bonds for their assessment, as follows:

Old securities and debts in amount of \$10.—	Pay assessment.	And receive—			
		New 1st M.	Com. Stock.	Prct. Stock.	
1st mortgage, \$1,379,000.....	\$5	\$5	...	1 00%	
Pitts. Iron & Steel R.R., et al., \$62,000.....	5	5	25%	75%	
All other creditors, say \$49,000.....	5	5	50%	50%	
Common stock, \$745,900.....	15	15	2%	all	

The assessments, exclusive of that on stock, which will probably not be paid, and the profits for 1896 and 1897 from the fund of \$14,000, aggregate \$14,000, to be applicable to receivers' certificates, \$42,500; taxes 1896 and 1897, \$24,000; expenses of reorganization, etc., \$20,000, any balance to go to new company.

The agreement shall cease unless declared operative by Jan. 1, 1898.—V. 62, p. 366.

—An interesting circular has been prepared by F. J. Lisman, 39 Broad Street, giving the facts concerning several railroad first mortgage bond issues which are selling at prices yielding an income of from 5½ to 7 per cent. The bonds referred to are not issues on new properties but are the bonds of reorganized companies, with fixed charges based on low-water mark earnings. The circular gives the record of earnings and makes an attractive presentation of the merits of a number of first mortgage bonds selling at low prices. The list of bonds which are offered by Mr. Lisman is advertised in another column of this issue.

—The Hand Book of Railroad Securities was issued this week from the office of the CHRONICLE. This is a semi-annual publication of about 200 pages giving statistics regarding railroads, earnings, dividends and prices for a series of years up to Jan. 1. Price \$1 00, or to CHRONICLE subscribers, 75 cents.

—Attention is directed to the list of investment securities offered for sale by Messrs. R. Dimond, Kerr & Co., comprising mortgage issues on both steam and traction companies. Detailed information and special circulars on the various issues offered can be obtained on application at their offices in New York and Philadelphia.

—The trustees of the first mortgage 6 per cent bonds of the Mechanical Rubber Co. inform holders thereof that they are desirous of expending the sum of \$49,588 in the purchase of bonds of said issue, provided the purchase can be made advantageously. Offers should be sent to the Knickerbocker Trust Co.

## Reports and Documents.

### LEHIGH VALLEY RAILROAD COMPANY.

#### ANNUAL REPORT FOR THE FISCAL YEAR ENDING NOVEMBER 30, 1896.

JANUARY 12, 1897.

The results of the operations of the different railways comprising the Lehigh Valley Railroad System for the past year are as shown below.

The total tonnage for the fiscal year ended November 30th, 1896, as compared with the previous year, was as follows:

TOTAL TONNAGE OVER ROAD, IN TONS OF 2,000 POUNDS.			
	1896.	1895.	Differences.
Anthracite coal.....	11,534,354	12,045,368	D.510,514
Bituminous coal and coke.....	819,938	450,194	I.368,744
Miscellaneous freights.....	6,520,576	5,857,625	I.662,951
Total.....	18,975,368	18,359,187	I.516,181

TONS CARRIED ONE MILE.			
	1896.	1895.	Differences.
Anthracite coal.....	1,265,097,168	1,293,672,112	D.28,574,944
Bituminous coal and coke.....	68,854,844	29,073,404	I.38,881,440
Miscellaneous freights.....	1,555,587,281	1,283,200,791	I.272,386,487
Total.....	2,889,539,293	2,606,846,310	I.282,692,983

AVERAGE FREIGHT RATES.			
	1896.	1895.	Differences.
Average rate per ton on coal.....	69-80 cents	67-70 cents	I.2-04 cents
Average rate per ton per mile on coal.....	.646 cents	.640 cents	I-.006 cents
Average rate per ton on miscellaneous freight.....	114-59 cents	116-92 cents	D.2-33 cents
Average rate per ton per mile on miscellaneous freight.....	.480 cents	.534 cents	D-.054 cents
Average rate per ton on total tonnage.....	85-27 cents	83-45 cents	I.1-82 cents
Average rate per ton per mile on total tonnage.....	.557 cents	.589 cents	D-.031 cents

PASSENGER TRAFFIC.			
	1896.	1895.	Differences.
Passengers carried.....	5,020,564	4,748,037	I.272,527
Passengers carried one mile.....	126,179,711	118,282,636	I.7,897,075

PASSENGER AVERAGES.			
	1896.	1895.	Differences.
Average mileage per passenger.....	25-13 miles	24-91 miles	I-.22 miles
Average receipts per passenger.....	50-92 cents	48-79 cents	I.2-13 cents
Average rate per mile.....	2-026 cents	1-958 cents	I-.068

#### INCOME ACCOUNT FOR YEAR 1896.

The transportation earnings of the past year, compared with those of 1895, were as follows:

	1896.	1895.	Differences.
From coal.....	\$9,023,573 81	\$9,470,450 32	I.446,876 51
From miscel. freight.....	7,472,104 26	6,819,062 24	I.653,042 02
From passengers.....	2,556,535 63	2,316,540 33	I.239,995 35
From express and mail.....	340,082 10	281,795 71	I.58,286 39
From other items.....	522,364 32	616,196 56	D.123,832 24

Total.....	\$19,514,660 17	\$18,564,454 16	I.950,208 01
Transportation earnings as stated.....			\$19,514,660 17
Operating expenses.....			14,593,657 79

Add net receipts from other transportation lines operated conjointly with Lehigh Valley Railroad.....			\$4,031,002 38
			103,078 80

Net earnings.....			\$5,124,682 18
Less balance of interest account, loss on Lehigh Valley Trans. Co. and Morris Canal, and State taxes.....			673,306 28
			\$4,451,315 92
Add income from other sources.....			492,479 33
Net available income.....			\$1,033,795 25
From which deduct interest on funded debt and fixed rental of leased lines.....			4,484,032 50
Surplus.....			\$449,762 75

The details of above items of operating expenses are supplied in a table appended to the pamphlet report.

Bal. to credit of Profit and Loss Acc. Nov. 30, 1895, was.....			\$7,672,712 93
To which add surplus earnings for 1896, as stated.....			449,762 75
Add premium and profit on bonds sold, less balance of old accounts written off.....			2,451 56

			\$8,124,927 24
From which deduct interest on Lehigh Valley Coal Company bonds assumed by this Company.....			500,650 00

Leaving a balance to credit of Profit and Loss Account November 30th, 1896.....			\$7,534,277 24
---	--	--	----------------

The capital account of the Company at the close of the fiscal year stood as follows:

Common stock.....	\$10,334,800	
Preferred stock.....	106,300	
		\$40,441,100
First mortgage six per cent bonds, due June 1st, 1899 (coupon and registered).....		\$5,000,000
Second mortgage seven per cent bonds, due in 1910 (registered).....		6,000,000

Consolidated mortgage bonds due (excepting sterling and annuity bonds) in 1923:—

Six per cent bonds:—		
Sterling.....	\$810,000	
Coupon.....	1,399,000	
Registered.....	4,319,000	
Annuity.....	9,562,000	15,810,000
Four and one-half per cent bonds:—		
Coupon.....	\$1,669,000	
Registered.....	3,093,000	
Annuity.....	2,538,000	7,300,000
Car Trust five per cent gold bonds:—		
Series A, due in semi-annual payments to February 1st, 1906.....	\$950,000	
Series B, due in semi-annual payments to August 1st, 1906.....	500,000	35,560,000
		\$76,001,100

Three hundred and sixty of the sterling bonds (including thirty-four of the eighty-six purchased and canceled in 1895) were drawn payable December 1st, 1896, leaving \$234,000 bearing interest from that date and maturing Dec. 1st, 1897.

The guarantees by this Company of outstanding stocks and bonds of affiliated companies are shown below:

Pennsylvania & New York Canal & Railroad Company—	
First mort. seven per cent bonds, due 1906.....	\$1,500,000
Five per cent bonds, due 1939.....	4,000,000
Four and one-half per cent bonds, due 1939.....	1,500,000
Four per cent bonds, due 1939.....	3,000,000
	\$10,000,000
Easton & Amboy Railroad Company, first mortgage five per cent bonds, due 1920.....	6,000,000
The Lehigh Valley Railroad Company, first mortgage four and one-half per cent gold bonds, due 1910.....	15,000,000
Lehigh Valley Terminal Railway Company, first mortgage five per cent gold bonds, due 1911.....	10,000,000
Lehigh Valley Coal Company, first mortgage five per cent gold bonds, due 1913.....	10,332,000
Delano Land Company, five per cent gold bonds, due 1932.....	1,177,000
Morris Canal & Banking Company—	
Preferred stock, ten per cent.....	\$303,600
Consolidated stock, four per cent.....	706,700
	1,610,300
Lehigh & New York Railroad, first mortgage four per cent gold bonds, due 1915.....	2,000,000
Easton & Northern Railroad, first mortgage four and one-half per cent gold bonds, due 1935.....	51,000
Middlesex Valley Railroad, first mortgage five per cent gold bonds, due 1912.....	211,000
Elmira Cortland & Northern Railroad—	
First mortgage bonds, five per cent, due 1914.....	1,250,000
Total.....	\$57,631,300

The monthly publication of the results of the business of this Company and of the Lehigh Valley Coal Company will be begun with the current fiscal year. The English system of annual examination of the company's accounts by public accountants is also under consideration by a committee of the Board of Directors.

Our Hazelton and Beaver Meadow coal lands being entirely distinct from our railroad lines, and being operated under leases either by the Lehigh Valley Coal Company or by other parties, a charter was obtained for the Hazelton Coal Company, to which these coal properties were deeded, and all the stock of which belongs to the Lehigh Valley Railroad Company. Its first mortgage 5 per cent bonds for \$2,000,000, taken in part payment, have been guaranteed by this company. This transaction does not affect the valuation on our books, and the interest and dividends to be received will take the place of the coal rents heretofore included in our income from other sources.

These bonds, as well as \$2,000,000 of the 5 per cent first mortgage bonds of the Schuylkill & Lehigh Valley Railroad Company, \$500,000 of the 6 per cent bonds of the Morris Canal & Banking Company, \$271,400 of the preferred and \$318,300 of the consolidated stock of the Morris Canal & Banking Company, \$243,000 of the bonds of the Easton & Northern Railroad Company, \$164,000 of the guaranteed bonds of the Middlesex Valley Railroad Company, \$300,000 of the first mortgage bonds of the Rochester Southern Railroad Company and \$1,400,000 of the first mortgage 5 per cent bonds of the Lehigh Valley Coal Company, and amounting altogether to \$7,202,700, are among the assets of the company and do not appear in the list of guaranties.

As stated last year, the Delano Land Company provides the interest on its bonds guaranteed by us, and it also reduces the amount outstanding by the operation of its sinking fund. This now amounts to \$226,000, of which \$23,000 is in bonds of that company canceled and \$203,000 in other securities and cash in the hands of the trustees awaiting investment.

The purposes contemplated by the organization of the Joint Traffic Association, alluded to in the last annual report, have been largely effected. Unjust discriminations in rates and fares have been in large measure avoided, resulting in improved earnings and in healthier relationships between the railway companies and shippers. Further benefits are anticipated as experience enables the managers of that association to determine what further revision can be judiciously recommended, and wherein economies of administration can be safely applied.

The coal business for the past year has been conducted with a greater regard to the question of supply and demand than has prevailed for some years previous, the efforts of the various companies engaged in the business having been directed with better success than has heretofore attended such efforts to the mining of only so much coal as the market demanded.

The effect of this policy if pursued will, it is hoped, result in the maintenance of the present distribution of tonnage among the various transportation interests, as any serious diversion from one to another is not likely to occur when each coal-producing district is engaged in meeting the natural demands upon it, and as not throwing away its product in a vain effort to force a market which does not exist.

The very large stocks of coal on hand at the beginning of the year, carried over from 1895, together with the commercial stagnation and falling off in manufactures throughout the country, caused great depression in the trade, and it was not until midsummer that the price received for coal covered its cost, owing largely to the increased expense of operating the collieries when their production is small. The total tonnage of anthracite coal for the year, as compared with that of 1895, fell off about 3,250,000 tons, of which this company lost about 500,000 tons. The better rates obtained in the latter part of the year produced an undiminished net revenue from that source notwithstanding loss in tonnage.

The large increase in coal on hand at all stocking points as compared with 1895 is due to excessive production at the close of the year, and has obliged us to make large advances to the Coal Company to enable them to carry it. Some of the smaller producers have, however, been forced to dispose of their surplus, resulting injuriously to the market. Unless something is done to prevent sales for future delivery at the lower prices usually current in the early part of the year, and to avoid excessive output of coal when not required the favorable result anticipated for the current year may fail of realization.

The tonnage of miscellaneous freight shows an increase of 662,951 tons as compared with the previous year and of \$623,042 of revenue. The reduction in the average rates prevailing throughout the year of .031 cent per ton upon the total tonnage carried one mile, as compared with 1895, reduced our income about \$900,000.

The matter of our claim against the Philadelphia & Reading Railroad Company on unadjusted account, referred to in the last annual report, has been the subject of repeated conferences by the President of this company with the receivers of the Philadelphia & Reading Railroad Company, and since the reorganization of the Reading, with the President of the Philadelphia & Reading Railway Company as the owners of the property of the former organization. The reorganization of the Reading Company has to some degree delayed the negotiations, but inasmuch as under the order of court authorizing the sale of the property the purchasers assume the liability of the receivers in regard to claims against them, and as this company holds collateral for its claim against the Philadelphia & Reading Railroad Company, we are advised that the interests of this company are protected. Our claim has been fully presented to the authorities of the Philadelphia & Reading Railway Co., and its final adjustment and payment should not be long deferred.

For the first time in the history of the company the tonnage of miscellaneous freights has exceeded that of anthracite and bituminous coal and coke.

In addition to the Middlesex Valley Railroad, of which, as stated last year, we obtained possession on December 1st, 1895, the Board, in February last, directed the purchase of the entire capital stocks of the companies forming the line of the Elmira Cortland & Northern Railroad, extending from Elmira, N. Y., to Camden, in the same State, a distance of about 140 miles, the consideration being the indorsement of \$1,250,000 of the first mortgage 5 per cent bonds of that company. These lines, besides having good local trade, are both important feeders to the general business of our Company. The cost of bringing them up to our standard of track and roadbed has been included in our general operating expenses, and the earnings form part of the income accounts herewith submitted.

The Greenville & Hudson Railway, about 2.62 miles in length, connecting our road at Greenville with our docks at Jersey City, and which will, when completed, materially increase our much-needed yard facilities at Jersey City, has been under construction during the past year and the work is well advanced. The road crosses the Newark & New York Railroad and the Central Railroad of New Jersey overhead, the masonry has been completed, and a part of the bridge superstructure is in place. This road, when finished, will complete the connection between our lines from Buffalo to our terminals at tidewater, Jersey City, and very much facilitate our traffic to and over our docks.

To provide for 2,000 box freight cars, 1,000 gondola cars, 50 stock cars and 6 combination cars, purchased last year, the Board directed the issue of \$1,500,000 in Car Trust bonds bearing interest at 5 per cent, and payable at semi-annual periods during ten years; \$50,000 matured and were paid August 1st, 1896. The remainder of the cost of this equipment and the whole cost of 50 locomotives purchased during the year has been paid from other sources.

Attention is called to the continuing large increase in the passenger business. While this is partly due to the added volume obtained during the year through the acquirement of the Elmira Cortland & Northern Railroad, yet a considerable portion has been secured and developed by an active solicitation for business, and by the improvement of our train service.

The operation of the dining and cafe cars and restaurants has proved satisfactory. This department is now operating

two dining cars, two cafe cars, and the station restaurants at Easton, Wilkes-Barre, Sayre and Geneva.

The running of the Black Diamond Express between New York and Buffalo, which was put on in May last, has proved to be even more satisfactory in its results than we had any reason to anticipate. The train has become a very popular one with the traveling public. The receipts from the date of its inauguration have been more than sufficient to pay all expenses, while the reports show that our other through trains have also increased their earnings.

During the year we have established a line of postal cars for the carrying of United States mail between New York and Buffalo. These cars were built by our Company for this service upon the application of the Post Office Department.

The comparative statement of freight handled at Buffalo Tift-Farm shows an increase over 1895 of 60,887 tons of east bound and a decrease of 35,224 tons west bound.

The following is a statement of tonnage of miscellaneous freight (exclusive of coal and coke) handled at Jersey City and Perth Amboy, and passing over the docks at those points, including Grand Street, Avenue "D" and National docks, as compared with the tonnage in 1895:

	1896.	1895.	Increase.
Net tons .....	2,915,531	2,341,727	476,804

A number of changes have been made in our tracks at the various collieries in the Wyoming and Mahanoy regions on account of the installation of track scales at the collieries for the weighing of coal.

We hope during the coming year to inaugurate train service for the through movement of coal, weighed at the mines, from Delano, Weatherly and Fairview to tidewater without change of engines and without yarding and weighing the coal at Packerton.

The new station at Pittston, referred to in our last report, is completed and now in use. The construction of this station enabled us to abandon what is known as the Town Track in Pittston for our passenger trains. All through trains are now run on our main double-track line along the river front, avoiding the danger which attended running through the city of Pittston. The town track continues to be used for the movement of local freight trains.

The large volume of business, requiring a great number of trains to move it expeditiously and safely, has required more interlocking signal plants and the extension of the Hall system referred to in our last report. New signal plants have been erected at Black Creek Junction, Hazel Creek Junction, Coxton Yard, Rochester Junction, Depew Junction and Tonawanda Junction, at a cost of \$23,683 44. The Hall automatic block signals have been erected and are now in use, with few exceptions, between Neshanic, N. J., and L. & B. Junction, 141-40 miles. There has been expended on this work during the year \$198,654 39.

Our business to and from Rochester is increasing annually, notwithstanding the inadequate terminal facilities afforded. Considerable preparatory work has been done towards the necessary foundations for the proposed new station at Court Street, Rochester, about \$30,000 having been expended. This work has been practically suspended for the present.

Work was begun on the connection between our road at Easton Station and the Easton & Northern Railroad. The major part of the grading and masonry is done, though work is now suspended thereon.

During the last few months of the year experiments have been made in the mixture of bituminous with the smaller sizes of anthracite coal for locomotive fuel. It is too soon to give any very definite figures as to the results of these experiments, but the opinion of all our Master Mechanics, as well as of the General and Division Superintendents and the Superintendent of Motive Power, is that the saving in cost will be large.

The tonnage hauled by our engines has been increased during the past year by not less than 15 per cent. Our engines are now being weighted in accordance with the weight of the train, and not by the number of cars, as was formerly the custom, the result being increased service from our engines with the same cost for crews.

During the past year we have changed our standard rail section, and increased the weight of our standard rails from 80 to 90 pounds to the yard. The estimate of new rails for the coming year for renewals and repairs only is 7,000 tons.

The importance of a full supply of water for our locomotives and for mine purposes has prompted the purchase of a mill property on the Quakake Creek containing 82 acres. A 12-inch pipe 31,250 feet in length has been laid, reaching the 10-inch pipe now in use at Hazleton; 25,200 feet of this (covering the portion under extreme pressure) is laid with 12-inch wrought iron pipe, tested to a pressure of 1,000 pounds to the square inch. The foundations for the pumps are in and the pumps will be delivered in January. These are guaranteed to carry to Hazleton 2,000,000 gallons per 24 hours. There has been an 8-inch connection put into both Hazleton No. 1 and the new Hazleton shaft plants, so that we can force a large volume of water to either of these places in case of emergency. The whole cost of this work up to this time has been \$100,000. There has also been expended on the reservoirs at Hazleton \$35,500 and on Delano Water Supply \$13,600.

The general condition of the Company's property has been maintained up to the usual standard during the past year.

The length of lines embraced in the Lehigh Valley system, including second track, branches, &c., is as follows:

Division—	Main Line.		Branches and Siding.	Total.
	Single Track.	Second Track.		
Miles.	Miles.	Miles.	Miles.	Miles.
Easton—Amboy RR., incl. all lines east of Phillipsburg...	107-027	84-397	154-911	347-235
Lehigh Division .....	58-373	47-577	129-825	235-775
Wyoming Division .....	191-278	73-141	132-907	397-326
Weaver Meadow Division .....	19-218	9-556	20-455	49-229
Hazleton Division .....	51-663	12-906	53-210	117-779
Mahanoy Division .....	95-164	40-736	57-203	193-103
Pottsville Division .....	40-514	.....	12-291	52-805
Penna. & New York Division .....	293-910	173-490	129-358	596-758
Buffalo Division .....	128-731	97-852	90-949	326-532
Auburn Division .....	300-607	.....	60-757	367-364
Easton & Northern RR. ....	8-137	.....	2-047	10-184
Total .....	1,295-522	539-655	858-913	2,694-090

The Depew & Tonawanda Railroad, referred to in our last report, was opened for business November 15th, and all traffic destined for Suspension Bridge and west thereof, and east-bound traffic, which was formerly delivered to and received from the New York Central Railroad at Batavia, now goes over our own main line to Depew, and thence over the new line to North Tonawanda, in all 39-62 miles, as compared with 36-35 miles by the New York Central RR.

The equipment belonging to the various companies composing the Lehigh Valley system on November 30, 1896, was:

Locomotives .....	750	Special cars .....	4
Chair cars .....	12	Fruit cars .....	11
Passenger cars .....	243	Freight cars .....	18,390
Combination cars .....	69	Coal cars, eight-wheeled .....	12,127
Dining cars .....	3	Coal cars, four-wheeled .....	17,520
Baggage and mail cars .....	33	Cars used in transportation .....	792
Postal cars .....	3	and roadway departments .....	792
Express cars .....	38		

The total capacity in tons of 2,000 pounds of our freight and coal car equipment is 905,020 tons.

The expense for maintenance of equipment has been increased this year by extraordinary work made necessary by the enactment of laws of the various States and of the United States, as follows:

Cost of equipping cars with Master Car Builders' Couplers .....	\$55,103 12
Cost of equipping cars with air-brakes .....	27,523 86
Cost of raising cars to secure standard height of draw bars .....	26,279 45

\$108,906 43

#### THE LEHIGH VALLEY COAL COMPANY.

The following table is summarized from the report of W. A. Lathrop, General Superintendent of the Lehigh Valley Coal Company, and shows the tonnage of that Company's collieries:

	1896.	1895.	1894.
Tons.	Tons.	Tons.	Tons.
Amount of coal shipped from collieries owned and operated by this Co. ....	2,819,757	2,619,960	2,061,115
Amount of coal shipped by tenants .....	2,278,434	2,564,090	2,822,135
Total .....	5,098,191	5,484,050	4,883,250
From Wyoming region .....	2,383,951	2,693,040	1,917,223
" Lehigh .....	684,960	653,233	1,185,896
" Pottsville .....	119,974	142,790	151,441
" Mahanoy .....	1,142,366	1,994,981	1,627,690
" Shamokin .....	766,940	.....	.....
Total .....	5,098,191	5,484,050	4,883,250

Showing a decrease for the year 1898 of.....385,859 tons.

The present capacity of the collieries operated by the Coal Company per day of ten hours, as shown by the results during the year, is about 17,966 tons, an increase of 2,275 tons as compared with the capacity at the close of the fiscal year of 1895, due principally to our acquisition of the collieries upon the Locust Mountain property and to Primrose, which was idle in 1895.

Seven hundred and ninety-two thousand eight hundred and sixty-seven and eleven one-hundredths tons were shipped from property covered by mortgage, making the gross sum set aside for the sinking fund this year \$79,236 75, the amount last year being \$77,841 55.

The cold storage plant at West Superior has been completed and kept in successful operation throughout the year.

Active operations upon the Calumet dock, which is located at One Hundredth Street, South Chicago, were commenced on February 1st, 1896, and the machinery completed and put in operation July 13th. The plan is designed to transfer coal directly from vessels to cars or to put it into storage and later to transfer it to cars. It consists of three large wooden storage sheds and a set of reloading pockets along the dock front, all covered with corrugated iron. Both the storage sheds and pockets are provided with necessary elevators, screens, conveyors and other appliances for economical handling. The coal is unloaded from vessels by means of five towers, with automatic clam shell buckets. The entire cost of the plant, machinery, dock repairs, dredging slip, &c., was \$205,847 81, exclusive of the cost of the real estate. This dock, though differently designed, works upon the same general principle as our dock at West Superior and is most satisfactory. The average cost of discharging vessels at West Superior during the boating season was 3-63 cents per gross ton, and at Calumet Dock, for three months, the average cost was 5-49 cents per gross ton, as against a cost of 17-17 cents per gross ton under the old system at Chicago Avenue and 19-06 cents per gross ton at Harrison Street, Chicago. The reason for a higher cost at Calumet Dock than at West Superior is because of the lack of experience in handling the machinery. Next season should show the cost of discharging at each to be the same.

The coal yards and stocking grounds owned and controlled by our railroad and coal companies, together with their respective tonnage capacities, are located as follows:

Tons.		Tons.	
Perth Amboy.....	200,000	Buff., Louisiana St. Yard	1,500
South Plainfield.....	310,000	Buffalo, Seneca St. Yard	500
Jersey City Wharf.....	40,000	Buffalo, Main St. Yard...	500
Jersey City, Grand Street	5,000	Chicago, Calumet Dock.	75,000
Newark, Hamburg Place	6,000	Chicago, Chic. Av. Yard	39,000

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 15, 1897.

A gradual opening up of trade is to be noted for the past week. Thus far, however, dealings have been confined almost exclusively to supplies necessary for immediate requirements, and in some lines of merchandise business has been disappointing, resulting in a slight weakening of tone, although values have not suffered. The indications still point to an increasing trade as the year advances, and hence the general feeling has continued hopeful. The signing of the arbitration treaty between England and the United States has been a topic of deep interest and has generally been commented upon favorably. Doubt, however, has been expressed over its ratification by the present Congress. The monetary conference held at Indianapolis was largely attended. It declared for the maintenance of the present gold standard, the retirement of the demand obligations of the Government and in favor of the appointment of a commission to devise means for currency reform.

Lard on the spot has been in slightly increased demand for export, but an extensive business has been checked by the high ocean freight rate. Prices have advanced and the close was steady at 4.25c. for prime Western, 3.85c. for prime City and 4.60c. for refined for the Continent. There was no trading in the local market for lard futures, but at the West there has been moderate buying by shorts to cover contracts, stimulated by a decreasing movement of swine, closing steady.

#### DAILY CLOSING PRICES OF LARD FUTURES.

	Jan.	Mon.	Tues.	Wed.	Thurs.	Fri.
January.....	4.15	4.20	4.20	4.17	4.30	4.25

Pork has been in fairly good export demand and prices have advanced, closing at \$9.50@\$9.00 for mess, \$9.75. @ \$10.00 for family and \$8.75@\$10.00 for short clear. Cut meats have had an increased sale and at higher prices, closing at 4 3/8@4 5/8c. for pickled bellies, 12@10 lbs. average, 4 1/4@4 3/8c. for pickled shoulders and 8 1/4@9c. for pickled hams. Beef has been firm but quiet at \$7.00@\$8.00 for mess, \$7.50@\$9.00 for packet, \$9.00@\$11.00 for family and \$13.50@\$15.00 for extra India mess. Beef hams have been dull at \$17.50@\$18.00. Tallow has had a fair sale and closed steady at 3 1/2c. Oleo stearine has been in more active demand, and prices have advanced to 4 3/8c. Lard stearine has had a slow sale, but values have improved to 4 5/8c. Cotton seed oil has been in increased export demand and firmer, closing at 20c. for prime crude and 23 1/2c. for prime yellow. Butter has been quiet but steady at 13@20c. for creamery. Cheese has had a moderate sale at firm prices, closing at 7 1/2@11 1/4c. for State factory full cream. Fresh eggs have been quiet and easy, closing at 16@16 1/2c. for choice Western.

The Brazil grades of coffee have had very little call and values have weakened slightly. At the close the market was steady at 10c. for Rio No. 7. Mild grades have been in only moderate request, but prices have been maintained, closing at 15 1/2c. for good Cucuta and 22 1/2@23 1/2c. for standard Java. The market for contracts has been quiet, and under free of ferings by local traders prices have declined. The close was steadier on buying by shorts to cover contracts.

The following were the closing prices:

Jan.....	9.40c.	April.....	9.60c.	July.....	9.65c.
Feb.....	9.50c.	May.....	9.60c.	Aug.....	9.70c.
March.....	9.55c.	June.....	9.65c.	Sept.....	9.70c.

Raw sugars have continued quiet. Refiners have been bidding old prices, but importers have held for higher prices. The close was at 3.3-16c. bid for centrifugal, 96-deg. test, and 2.13-16c. bid for muscovado, 89-deg. test. Refined sugars have been quiet, and prices for the soft grades have been lowered 1-16c. to 3-16c. Granulated has been unchanged at 4 3/8c. Teas have had a limited sale at about steady values. Other staple groceries have been quiet but steady.

The demand for Kentucky tobacco has been quiet but values have held steady. Seed leaf tobacco has had an active sale at full values. Sales for the week were 4,220 cases, including 300 cases 1895 crop, New England Havana, 15 1/2@22 1/2c.; 250 cases 1895 crop, State Havana, 12@15c.; 200 cases 1893 crop, Pennsylvania Havana, 12@12 1/2c.; also 700 bales Havana at 60c. to \$1.10 in bond and 225 bales Sumatra at 65c. to \$1.75 in bond.

There has been a fair volume of business transacted in the market for Straits tin and prices have advanced, closing firm at 13.15@13.25c. Ingot copper has been in fairly good demand and prices have further advanced, closing firm at 11.70@11.80c. for Lake. Lead has been quiet and slightly easier, closing at 3@3.05c. for domestic. Spelter has further declined, closing dull at 3.85@3.95c. for domestic. Pig iron has had only a moderate sale and values have been easy, closing at \$11@\$13 for domestic.

Refined petroleum has been steady, closing at 6.90c. in bbls., 3.70c. in bulk and 6.90c. in cases; naphtha dull at 6 3/8c. Crude certificates have been neglected. Credit balances have been steady at 90c. Spirits turpentine has been quiet and prices have weakened slightly to 27 1/2@28c. Rosins have been active at unchanged values, closing at \$1.70 for common and good strained. Business in wool has been limited to hand-to-mouth orders, and values have been largely nominal. Hops have had a limited sale at steady prices.

## COTTON.

FRIDAY NIGHT, JANUARY 15, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 151,841 bales, against 196,537 bales last week and 219,133 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,271,631 bales, against 3,799,825 bales for the same period of 1895-6, showing an increase since Sept. 1, 1896, of 1,471,806 bales.

Speculation in cotton for future delivery has continued quiet and the change in prices for the week has been towards a slightly lower basis. Saturday the market advanced slightly, reflecting stronger foreign advices, which were accompanied by a few buying orders. The South also made a limited number of purchases. Monday there was a decidedly easier turn to the market. The receipts were in excess of estimates and both foreign and Southern holders of cotton turned sellers. As prices weakened stop orders were reached, which added to the depression. The close was at the bottom prices of the day, and 17 to 21 points below Saturday's final quotations. Tuesday there was a slight recovery. A reduced crop estimate, together with better foreign advices than expected, stimulated something of a demand from shorts to cover contracts. The South also was a limited buyer.

The net gain in prices for the day was 7 to 9 points. Wednesday the market was quiet and no changes of a radical nature occurred in values. The close showed a loss of 1 to 8 points for the day, more from the absence of speculative interest than new developments. Thursday the market was weaker during early change under rumors of an increased crop estimate. Subsequently, however, reports of a decreased crop movement in the interior induced buying, and the loss was more than recovered, and for the day prices showed an advance of 1 to 2 points. Friday the market was quiet and unsettled. The opening was 1 to 3 points lower under disappointing foreign advices, then followed an advance of 4 to 6 points on the execution of a few buying orders. Subsequently the weekly statement of the interior crop movement prompted selling and prices declined 6 to 9 points. Toward the close, however, shorts bought to cover contracts and part of the loss was recovered. The close was quiet at a decline of 3 to 5 points for the day. Cotton on the spot has been quiet. Monday prices advanced 3-16c., Tuesday weakened and declined 1-16c., but recovered 1-16c. on Wednesday. To-day the market was quiet and unchanged, middling uplands closing at 7 5-16c.

The total sales for forward delivery for the week are 712,200 bales. For immediate delivery the total sales foot up this week 4,930 bales, including 2,431 for export, 1,096 for consumption, — for speculation and 1,400 on contract. The following are the official quotations for each day of the past week—January 9 to January 15.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

UPLANDS.						
	Sat.	Mon.	Tues.	Wed.	Th.	Fri.

Columbus, Miss.....	6 <sup>1</sup> / <sub>4</sub>	Nashville.....	6 <sup>1</sup> / <sub>4</sub>	Shreveport.....	6 <sup>1</sup> / <sub>4</sub>

**RECEIPTS FROM THE PLANTATIONS.**—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			St'k at Interior Towns.			Receipts from Plant'ns		
	1896-97.	1896-97.	1894-95.	1894-97.	1895-96.	1894-95.	1896-97.	1896-97.	1894-95.
Dec. 11 ....	278,408	234,050	368,130	568,782	556,372	501,606	288,332	257,713	380,719
" 18.....	327,175	222,763	339,608	575,781	585,332	568,829	331,171	251,743	426,021
" 24.....	277,615	223,919	312,797	580,718	596,822	609,001	292,582	235,459	352,972
" 31.....	219,122	176,324	351,851	578,175	583,668	600,936	216,819	163,165	243,806
Jan. 8.....	196,537	135,322	207,746	582,205	565,410	568,651	170,207	117,669	175,441
" 15.....	151,841	119,837	209,800	532,119	552,608	530,021	131,755	107,035	171,179

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 5,633,156 bales; in 1895-96 were 4,319,733 bales; in 1894-95 were 6,278,193 bales.

2.—That although the receipts at the outports the past week were 151,841 bales, the actual movement from plantations was 131,755 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 107,035 bales and for 1895 they were 171,179 bales.

**OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.**—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 15 and since Sept. 1 in the last two years are as follows.

January 15	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<b>Shipped—</b>				
Via St. Louis.....	11,162	359,291	6,415	363,934
Via Cairo.....	6,987	192,421	7,297	169,888
Via Parker.....	246	9,785	288	12,451
Via Evansville.....	.....	1,537	.....	45
Via Louisville.....	4,402	96,208	2,198	93,394
Via Cincinnati.....	2,413	85,572	2,643	54,262
Via other routes, &c.....	3,378	74,039	3,792	56,241
<b>Total gross overland.....</b>	<b>28,589</b>	<b>818,916</b>	<b>22,633</b>	<b>750,215</b>
<b>Deduct shipments—</b>				
Overland to N. Y., Boston, &c.....	13,533	221,424	9,411	149,959
Between interior towns.....	37	2,532	79	2,389
Inland, &c., from South.....	1,153	21,718	503	27,692
<b>Total to be deducted.....</b>	<b>14,723</b>	<b>245,674</b>	<b>9,993</b>	<b>180,040</b>
<b>Leaving total net overland*.....</b>	<b>13,865</b>	<b>573,242</b>	<b>12,640</b>	<b>570,175</b>

\* Including movement by rail to Canada.  
The foregoing shows that the week's net overland movement this year has been 13,865 bales, against 12,640 bales for the week in 1896, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 3,065 bales.

In Sight and Spinners' Takings.	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<b>Receipts at ports to Jan. 15.....</b>	<b>151,841</b>	<b>5,271,631</b>	<b>119,837</b>	<b>3,799,825</b>
<b>Net overland to Jan. 15.....</b>	<b>13,865</b>	<b>573,242</b>	<b>12,640</b>	<b>570,175</b>
<b>Southern consumption to Jan. 15.....</b>	<b>22,000</b>	<b>405,000</b>	<b>20,000</b>	<b>404,000</b>
<b>Total marketed.....</b>	<b>187,706</b>	<b>6,249,873</b>	<b>152,477</b>	<b>4,774,000</b>
<b>Interior stocks in excess.....</b>	<b>20,086</b>	<b>411,525</b>	<b>12,862</b>	<b>519,908</b>
<b>Came into sight during week.....</b>	<b>167,620</b>	<b>.....</b>	<b>139,675</b>	<b>.....</b>
<b>Total in sight Jan. 15.....</b>	<b>.....</b>	<b>6,661,398</b>	<b>.....</b>	<b>5,293,908</b>
<b>North's spinners takings to Jan. 15.....</b>	<b>31,562</b>	<b>1,028,042</b>	<b>46,846</b>	<b>1,090,491</b>

It will be seen by the above that there has come into sight during the week 167,620 bales, against 139,675 bales for the same week of 1896, and that the increase in amount in sight to-night as compared with last year is 1,367,490 bales.

**WEATHER REPORTS BY TELEGRAPH.**—Reports to us this evening by telegraph indicate that in the Southwest the weather has been favorable, very little rain having fallen, and that preparations for the spring crops have progressed well. Elsewhere at the South where rain has fallen the precipitation has, in general, been light. Marketing of cotton continues quite free.

**Galveston, Texas.**—Farm work is well advanced generally throughout the State, owing to the exceptionally favorable weather. Plowing has progressed well, and the ground is in good condition but will need good rains soon. There has been but a trace of rain during the week. Average thermometer 60, highest 71, lowest 47.

**Palestine, Texas.**—Farmers are busy preparing land for the spring crops. Moisture would be beneficial. We have had only a trace of rain during the week. The thermometer has averaged 54, highest 70, lowest 39.

**Huntsville, Texas.**—There has been only a trace of rain during the week. The thermometer has averaged 56, ranging from 40 to 72.

**Dallas, Texas.**—Plowing is active, and with good rains the ground will be in fine condition for spring planting. There has been rain on one day during the week, to the extent of twelve hundredths of an inch. The thermometer has ranged from 32 to 70, averaging 51.

**San Antonio, Texas.**—The weather has been favorable for farm work. Garden truck is being marketed rapidly. There has been no rain during the week. Average thermometer 58, highest 73, lowest 42.

**Luling, Texas.**—We have had no rain during the week. The thermometer has averaged 57, the highest being 74 and the lowest 40.

**Columbia, Texas.**—Rain has fallen to only an inappreciable extent during the week. The thermometer has averaged 55, ranging from 34 to 70.

**Cuero, Texas.**—There has been only a trace of rain during the week. The thermometer has ranged from 34 to 76, averaging 55.

**Brenham, Texas.**—The weather has been warm and rather unseasonable during the week, with a trace of rain. Average thermometer 60, highest 70, lowest 48.

**Fort Worth, Texas.**—Rain has fallen on one day of the week, the precipitation being five hundredths of an inch. The thermometer has averaged 50, ranging from 31 to 70.

**Weatherford, Texas.**—It has been showery on one day of the week, the rainfall reaching eight hundredths of an inch. The thermometer has ranged from 32 to 70, averaging 51.

**New Orleans, Louisiana.**—The weather has been dry all the week. Average thermometer 60.

**Shreveport, Louisiana.**—We have had rain on two days during the week, the precipitation reaching fifty hundredths of an inch. The thermometer has averaged 56, the highest being 70 and the lowest 39.

**Columbus, Mississippi.**—Telegram not received.  
**Leland, Mississippi.**—No rain during the week. The thermometer has ranged from 27 to 77, averaging 52.7.

**Vicksburg, Mississippi.**—We have had rain on two days of the past week, the rainfall being ninety-three hundredths of an inch. Average thermometer 56, highest 68, lowest 40.

**Little Rock, Arkansas.**—It has rained on one day during the week, with rainfall to the extent of forty-two hundredths of an inch. The thermometer has averaged 48, the highest being 65 and the lowest 36.

**Helena, Arkansas.**—Plowing has been begun. We have had light rain on three days of the week, the rainfall reaching thirty-four hundredths of an inch. The thermometer has averaged 46.5, ranging from 31 to 60.

**Memphis, Tennessee.**—There has been rain on one day of the past week, the precipitation reaching thirty-eight hundredths of an inch. The thermometer has ranged from 35.2 to 63.8, averaging 48.2.

**Nashville, Tennessee.**—We have had rain on three days of the past week, the rainfall being one inch and forty-seven hundredths of an inch. Average thermometer 49, highest 61, lowest 20.

**Mobile, Alabama.**—Dry weather has prevailed all the week. The thermometer has averaged 54, the highest being 68 and the lowest 36.

**Montgomery, Alabama.**—It has rained on two days of the week, to the extent of twenty-six hundredths of an inch. The thermometer has averaged 50, ranging from 40 to 60.

**Madison, Florida.**—We have had rain on one day of the week, the rainfall reaching twenty hundredths of an inch. Average thermometer 55, highest 66 and lowest 30.

**Savannah, Georgia.**—There has been rain on three days during the week, to the extent of three hundredths of an inch. The thermometer has averaged 59, ranging from 30 to 69.

**Augusta, Georgia.**—Rain has fallen on two days of the week, to the extent of one inch and ninety-five hundredths. The thermometer has ranged from 21 to 66, averaging 45.

**Charleston, South Carolina.**—There has been rain on two days during the week, the rainfall reaching twelve hundredths of an inch. The thermometer has averaged 49, the highest being 70 and the lowest 36.

**Stateburg, South Carolina.**—Farmers have begun plowing. We have had rain on two days of the week, the rainfall reaching eighty-two hundredths of an inch. The thermometer has averaged 48.8, ranging from 26 to 63.

**Wilson, North Carolina.**—Rain and snow have fallen on

The particulars of these shipments, arranged in our usual form, are as follows.

[illegible]

**Total.... 98,753 23,072 9,829 37,160 8,682 23,506 3,452 207,356**  
Below we a ll the clearances this week of vessels carrying cotton from United States ports, bringing our data down to the latest dates:

OLYMPIA—To Liverpool—Jan. 9—Steamers Capsila, 7,730; Springwell, 6,778 ...Jan. 31—Steamer Navigator, 3,200 ...Jan. 14—Steamer Benita, 3,939.  
To Manchester—Jan. 9—Steamer Long, 3,923.  
To Havre—Jan. 13—Steamer Blocholt, 4,433.  
To Hamburg—Jan. 12—Steamer Lolla, 3,455.  
NEW ORLEANS—To Liverpool—Jan. 11—Steamer Cuban, 6,905...Jan. 13—Steamer Orion, 6,739...Jan. 14—Steamer Navarro, 5,400...Jan. 15—Steamer Buenavista, 3,200; Javatoan, 7,100.  
To Belfast—Jan. 14—Steamer Mail Head, 3,108.  
To Havre—Jan. 9—Steamers Assavo, 9,051; Hardwick Hall, 12,192...Jan. 15—Steamer Stanley Hall, 10,911.  
To Bremen—Jan. 12—Steamer Croina, 4,700 ...Jan. 14—Steamer Queenamore, 8,751.  
To Genoa—Jan. 13—Steamer Portuguese Prince, 5,300 ...Jan. 14—Steamer Pion, 3,404.  
MOBILE—To Liverpool—Jan. 12—Steamer Huntellff, 8,045.  
To Manchester—Jan. 14—Steamer Rockoff, 8,001.  
PENSACOLA—To Liverpool—Jan. 14—Steamer Gracia, 6,210  
PENANGA—To Liverpool—Jan. 8—Steamer Lady Armstrong, 6,800....Jan. 9—Steamers Ormlale, 10,957; Searsdale, 8,457.  
CHARLESTON—To Manchester—Jan. 13—Steamer Laurelwood, 5,743 upland and 233 Sea Island.  
To Bremen—Jan. 13—Steamer Reloader, 6,703.  
NORFOLK—To Liverpool—Jan. 9—Steamer Plinner's Point, 3,122.  
NORTH—To Liverpool—Jan. 7—Steamer Sylvia, 458 ...Jan. 9—Steamer Canada, 5,397 ...Jan. 11—Steamer Sagamore, 1,365.  
To Hull—Jan. 4—Steamer Chicago, 349.  
To Yarmouth—Jan. 12—Steamer Boston, 374.  
BALTIMORE—To Liverpool—Jan. 4—Steamer Ikalal, 1,508 ...Jan. 7—Steamer Templemore, 2,435.  
To Belfast—Jan. 8—Steamer Lord Chisleham, 100.  
To London—Jan. 9—Steamer Lord Errol, 641.  
To Bremen—Jan. 13—Steamer Cr-fel, 800.  
To Rotterdam—Jan. 8—Steamer Durango, 152.  
To Antwerp—Jan. 11—Steamer Norea Klug, 903.  
PHILADELPHIA—To Liverpool—Jan. 8—Steamer Pennant, 3 id.

Spec. & exp.	1,000	500	1,000	1,000	500	500
<b>Futures.</b>						
Market, } 1:45 P. M. }	Firm at 2-4 ad- vance.	Quiet at partially 1-4 dec.	Steady at 1-4 in. c'no.	Steady at 1 1/2-2 1/2 advance.	Quiet.	Steady at partially 1-1 1/2 adv.
Market, } 4 P. M. }	Woody	Rarely steady	Firm.	Quiet and steady	Quiet and steady	Rarely steady.

The prices of futures at Liverpool for each day are given below. Prices are on the basis of Uplands, Low Middling clause, unless otherwise stated.

The prices are given in pence and 64th. Thus: 3 63 means 3 63-64d., and 4 01 means 4 1-64d.

[illegible]

**BREADSTUFFS.**

FRIDAY, January 15, 1897

The volume of business transacted in the market for wheat flour has been small. Demand has been light, as buyers, owing to a weaker tendency to the values for grain, have shown a disposition to hold off and await concessions, limiting their purchases to urgent wants. Sellers, however, have held only moderate stocks and have continued fairly firm in their views, with the result that business has been flat. Rye flour has sold slowly but values have held steady. Buckwheat flour has been quiet but steady. Corn meal has continued in fairly good demand but at slightly lower prices. To-day the market for wheat flour was quiet and without changes.

There has continued a moderately active speculation in the market for wheat futures, but the course of prices during the week has been irregular. Saturday prices advanced  $\frac{3}{4}$ c. on unexpectedly stronger foreign advices, which stimulated a demand from shorts to cover contracts. Monday, however, there was a decidedly easier turn, and prices declined  $1\frac{1}{2}$ @  $1\frac{3}{4}$ c., under liquidating sales by tired longs, prompted by easier foreign advices. Tuesday the market again turned stronger, although from no apparent reason other than a demand from shorts to cover contracts and take profits. Wednesday there was renewed selling by longs and prices again weakened, declining  $\frac{3}{8}$ @1c. for the day. Thursday foreign buying caused an upward turn to values but to-day there was renewed selling both for short and long account, and prices declined slightly. In the spot market a large business has been transacted here and at out-ports, the purchases by shippers during the week reaching nearly 1,000,000 bushels. To-day business was only moderately active and prices were slightly lower with futures. The sales included No. 1 hard Duluth at  $95\frac{3}{4}$ c. f. o. b. afloat and No. 2 Chicago spring at  $89\frac{3}{4}$ c. f. o. b. afloat. No. 2 red winter was quoted at  $97\frac{3}{4}$ c. f. o. b. afloat and No. 1 northern Duluth at  $92\frac{3}{4}$ c. f. o. b. afloat.

July delivery.....c.	83½	82½	83½	82½	83½	83

The market for Indian corn futures has been quiet and the fluctuations in prices have been within narrow limits. The recent heavy export clearances, the largest ever recorded, have had a tendency to hold values steady. To-day the market was quiet, and fractional declines were quoted in prices, in sympathy with the easier market for wheat. The export demand has continued active, the purchases by shippers here and at out-ports amounting to about 1,200,000 bushels. To-day the market was quiet. The sales included No. 2 mixed at 29½¢, in elevator and 30½¢@30½¢, f. o. b. adist.

**DAILY CLOSING PRICES OF NO. 2 MIXED CORN.**

	Sat	Mon.	Tues.	Wed.	Thurs.	Fri

July delivery.....C.	31½	31½	31½	31½	32	31½

Oats for future delivery have been dull, and in the absence of new features of importance changes in prices have been slight. To-day the market was a trifle easier, with wheat and corn. In the spot market business has been fairly active. Shippers have been moderate buyers, their purchases amounting to 350,000 bushels. To-day the market was moderately active and easy. The sales included white clipped at 24½¢, f.o.b. all at; No. 2 mixed at 23½¢, in elevator, and No. 3 white at 24½¢, in elevator.

**DAILY CLOSING PRICES OF NO. 2 MIXED OATS.**

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Jan. 15, 1897

There has been a slight improvement in the volume of business passing at first hands during the week but not enough to relieve it of dullness. Jobbers have, however, had a considerably better trade, the attendance of buyers with them showing a marked increase. Reports from other jobbing centres also speak encouragingly of the development of spring business. Under these conditions there ought to be a steady expansion of buying in the primary market, even though purchasers do not abandon the conservative policy so far pursued by them. Meanwhile the tendency of prices in most directions is in their favor, but without undue pressure on the part of sellers to move stocks and without quotable declines in quotations. The Fall River manufacturers have not yet agreed upon any plan to relieve the cloth situation, but at previous prices have had opportunities and availed themselves of them to sell a large quantity of cloth, probably 100,000 pieces in excess of current production. In the woolen goods division of the market the demand continues backward for all descriptions of men's wear and prices have an irregular tendency. Collections are still satisfactory. The half-yearly statement of the H. B. Claffin Company up to Dec. 31, 1893, reflects the very unsatisfactory condition of business during the second half of last year. There was nothing earned on the common stock and net profits (\$103,432) fell short by \$33,723 of paying interest on the preferred stock. The surplus reserve which was \$277,006 at the end of June, 1893, was reduced to \$123,410 at the end of the year.

**DOMESTIC COTTON GOODS**—The exports of cotton goods from this port for the week ending Jan. 11 were 2,083 packages, valued at \$95,469, their destination being to the points specified in the tables below:

NEW YORK TO JANUARY 11.	1897.		1896.

Total.....	2,083	10,174	7,939	10,166

7 From New England mill points direct.

The value of the New York exports for the year to date has been \$327,356 in 1897 against \$445,358 in 1896.

There has been rather more business doing in brown sheetings and drills, but some of the increase has been at the expense of prices in a few directions; the general tone is easy and the market irregular. Brown ducks and osenbargs are inactive and easy to buy. The coarse colored goods market is generally inactive, but there has been more doing in denims through some sales at low prices. Leading tickets in 4x4 bleached cottons are still unchanged in price and this keeps the demand in check, as buyers are waiting for lower quotations; other grades are weak and irregular. Kid finished cambrics are slow of sale and generally quoted at 3c. for sixty-four squares. Wide sheetings inactive throughout and cotton flannels and blankets slow and featureless. There has been some improvement in the readier demand for fancy calicoes and printed specialties in fancy weaves and sheer goods, but regular prints are slow, with an easier tendency in some directions. The gingham departments continue dull and without feature. Print cloths have been in improved request in both extras and odd goods, and sales this week will reach a considerable total. Extras still quoted at 2½c.

	1887	1896.	1895.	1894.

---------------------------------	------------------	----------------	----------------	----------------

**WOOLEN GOODS.**—The market for woollen and worsted trou-serings and suitings has shown little improvement in volume of business during the past week in either light or heavy-weight goods. The season for the latter is unusually back-ward, and there is still but a limited number of new lines opened. Sellers are discouraged by the indifference of buyers and by the indications of unsteadiness on the part of certain sellers who have been out for business for several weeks past with limited success. From present appearances the market on heavy-weights is hardly likely to fairly develop before next month. The overcoating business is more advanced, but still much short of what it usually is by the middle of January. In overcoatings also there is a tendency towards a lower market in some directions. Business in cloakings is slow. Flannels are in light demand and blankets in moderate request without change in prices. Fancy woollen and worsted dress goods are being ordered in moderate quantities in spring lines. Staples quiet.

**FOREIGN DRY GOODS.**—There has been an improved demand for spring lines of fancy and specialty goods, but more staple merchandise of the order of dress goods, silks, linens and hosiery and underwear have again been generally quiet. Men's wear woolsens and worsteds in new heavy-weights are dull with some irregularity in prices.

### Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending January 14, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

## Terms of Advertising.—(Per inch space.)

One time.....	\$3 50	Three Months (13 times).....	\$25 00
One Month (4 times).....	11 00	Six months (26 times).....	43 00
Two Months (8 times).....	19 00	Twelve Months (52 times).....	58 00

(The above terms for one month and upward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT**. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopaedia of information respecting **Municipal Debts**.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Adams County, O.—Bond Offering.**—Proposals will be received until January 20, 1897, by the County Auditor for the purchase of \$30,000 of funding bonds. The securities will bear interest at the rate of 4 per cent and mature in twenty years from date of issue.

**Baltimore, Md.—City Debt.**—The report of the Finance Commissioners of Baltimore lately completed places the amount of the bonded debt at \$33,493,518, an increase of over a million dollars during the past year. The amount in the sinking fund is a little over \$3,500,000, an increase of about \$750,000 over last year.

**Brookline, Mass.—Bond Sale.**—Geo. H. Worthley, City Treasurer of Brookline, reports to the **CHRONICLE** that the loan of \$15,000, recently authorized, has been taken by the Provident Institution for Savings, Boston, in the shape of one bond for the whole amount, dated January 1, 1897, and payable at the rate of \$750 yearly from 1898 to 1917. Interest at 8 9-16 per cent will be payable semi-annually.

**Charles County, Md.—Bond Sale.**—It is reported that Charles County has sold \$8,000 of refunding bonds at prices ranging from 105 to 107. The loan will mature in ten years from January 1, 1897.

**Charlotte, N. C.—Bond Sale.**—Water bonds of this city amounting to \$250,000 have recently been sold to Messrs. E. D. Shepard & Co. of New York. The securities bear interest at the rate of 5 per cent.

**Chelsea, Mass.—Bond Sale.**—The Boston News Bureau reports that the city of Chelsea has sold \$10,000 of 4 per cent 40-year coupon park bonds to Jose, Parker & Co. at 109-008. Other bids received were as follows:

C. H. White & Co.....	109-565	H. L. Day & Co.....	107-347
Tower, Giddings & Co.....	108-274	Chelsea Savings Bank.....	107
Blodget, Merrill & Co.....	108-03	C. E. Legg & Co.....	106-55
Allen Arnold.....	107-99	Blake Bros. & Co.....	106-51
Ketchikan & Co.....	107-625	W. J. Hayes & Sons.....	106-49
J. W. Longstreet & Co.....	107-37	A. L. Swaeeler & Co.....	105-217

**Chicago Sanitary District, Ill.—Bond Offering.**—Proposals will be received until 12 o'clock, noon, Jan. 18, 1897, by James Reddick, Clerk of the District, for the purchase of bonds to the amount of \$500,000.

The securities will be dated Jan. 1, 1897. Interest at the rate of 4 1/2 per cent will be payable semi-annually on Jan. 1 and July 1, and the principal will mature at the rate of \$40,000 yearly from Jan. 1, 1898 to Jan. 1, 1917, inclusive.

Both principal and interest will be payable at the office of the Treasurer of the Sanitary District, Chicago, Ill. The denomination of the bonds will be \$1,000. A certified check or cash equal to 3 per cent of the amount of the bid must accompany each proposal.

The present net bonded indebtedness of the above district is \$11,210,000, and the assessed valuation over \$341,000,000.

The official notice of this bond sale will be found among the advertisements elsewhere in this Department.

**College Hill, O.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 2, 1897, by Village Clerk F. R. Strong, at the office of E. F. Layman, 32 East Third Street, Cincinnati, O., for the purchase of ten bonds of the village of College Hill, amounting to \$1,013 61, maturing as follows: One bond for \$413 61 on February 2, 1898, and the balance at the rate of \$400 yearly on February 2, from 1899 to 1907, inclusive.

Bids will also be received for the purchase of ten bonds amounting to \$5,615 92, also maturing in ten instalments as follows: One bond for \$575 92 on February 2, 1898, and the balance at the rate of \$560 yearly from 1899 to 1907, inclusive.

The above securities are assessment bonds, will be dated February 2, 1897, and bear interest at the rate of 6 per cent, payable annually; both principal and interest being payable at the Citizens' National Bank, Cincinnati, O.

**Coraopolis, Pa.—Bond Offering.**—Proposals will be received until 6 o'clock P. M., January 25, 1897, by the Finance Committee of this borough, for the purchase of \$22,000 of water bonds. The securities will be dated December 1, 1896, and will mature in thirty years, redeemable at the option of the borough after five years from date. Interest at the rate of 4 1/2 per cent will be payable semi-annually. The bonds will be of the denomination of \$500. A certified check for \$250 must accompany each bid.

The official notice of this bond sale will be found among the advertisements elsewhere in this Department.

**Cripple Creek School District, Col.—Bond Offering.**—Proposals will be received until January 21, 1897, by this district for the purchase of \$50,000 of school building bonds. The securities will bear interest at the rate of 7 per cent and the principal will mature in fifteen years from date of issue.

**Denver, Col.—Bond Sale.**—On December 30, 1896, the Board of Public Works, of Denver, Col., received the following bids for the \$12,400 of sewer and paving bonds recently offered for sale:

G. W. Ruessels offered \$2,450 and accrued interest for the \$2,500 Court Place paving district bonds.

Otto Achleiter offered \$980 and accrued interest for \$1,000 of the \$1,200 Downing Avenue sanitary sewer district No. 4 bonds and \$970 and accrued interest for \$1,000 of the \$7,500 South Side sanitary sewer district No. 2 bonds; he also offered \$1,900 with accrued interest for \$2,000 more of bonds, but did not state of what district, so his last bid could not be considered.

F. J. Warren offered par and accrued interest for the \$200 worth of alley paving district No. 1 bonds.

As all bids below par were rejected, it is probable that the bonds unsold will soon be re-advertised. The securities will bear interest at the rate of 6 per cent and will mature in 8 years from date of issue, subject to call.

**Delta County, Mich.—Bond Election.**—In April next the question of issuing \$75,000 of road bonds will be put to a vote of the people of Delta County.

**Duluth, Minn.—Bond Sale.**—It is reported that the city of Duluth has sold \$119,000 of bonds to N. J. Upham & Co. of Duluth at par and accrued interest. The securities will bear interest at the rate of 4 per cent and mature in thirty years from date of issue.

**East Cleveland, Ohio.—Bonds Authorized.**—It is reported that sewer bonds of this town to the amount of \$100,000 have been authorized.

**Escondido Irrigation District, Cal.—Bonds Proposed.**—This district proposes to issue water-works improvement bonds to the amount of \$4,500.

**Fall River, Mass.—Bond Sale.**—On January 14, 1897, the following bids were received by City Treasurer Charles P. Brightman for \$75,000 of public library bonds of Fall River:

C. H. White & Co., New York.....	112-126
Whann & Schlesinger, New York.....	111-093
Binks Brothers & Co., Boston.....	110-93
Blodget, Merrill & Co., Boston.....	110-66
Estabrook & Co., Boston.....	110-65
Lee, Higginson & Co., Boston.....	110-513
R. L. Day & Co., Boston.....	110-236
E. C. Stanwood & Co., Boston.....	110-35
Cushman, Fisher & Phelps, Boston.....	110-177
Hertmann & Storrs, New York.....	109-76
Parson, Leach & Co., New York.....	109-559
E. H. Rollins & Sons, Boston.....	109-559
Geo. A. Fernald & Co., Boston.....	109-46

The loan was awarded to C. H. White & Co. of New York. The securities will be registered bonds of the denomination of \$1,000 or multiples of this sum, and will be dated Jan. 1, 1897, becoming due Jan. 1, 1927. Interest at the rate of 4 per cent will be payable semi-annually. These bonds will be secured by sinking fund.

**Far Rockaway, N. Y.—Bond Offering.**—On Jan. 25, 1897, at 2:30 o'clock P. M., the trustees of this village will offer at public sale in the village hall, \$85,000 of improvement bonds.

The bonds will be of the denomination of \$1,000, and will be dated Jan. 1, 1897. Interest at the rate of 5 per cent will be payable semi-annually, and the principal will mature at the rate of \$1,000 yearly on Jan. 25 for twenty-four years from date of issue and \$61,000 on Jan. 25, 1922. These bonds cannot legally be sold for less than par and accrued interest. A statement of the financial condition of this village will be found among the debt changes.

*The official notice of this bond sale will be found among the advertisements elsewhere in this Department.*

**Flagstaff, A. T.—Bonds Proposed.**—F. W. Smith, town clerk of Flagstaff, reports to the CHRONICLE that bonds to the amount of \$65,000 for constructing a system of water works will probably soon be issued. The bill authorizing the bonds has passed the House but has not yet been acted upon by the Senate. It is understood, however, that there will be no opposition in that body. The securities will be thirty-year bonds, with interest at 6 per cent, payable semi-annually.

**Florence, Col.—Bond Election.**—An election will be held in this city on January 20, 1897, to vote on the proposition to issue \$75,000 of water-works bonds.

**Fort Collins School District, Col.—Bond Sale.**—It is reported that this district has sold \$10,000 of school bonds at par. The securities bear interest at the rate of 5½ per cent and are optional after five years from date of issue.

**Franklin Falls, N. H.—Bonds Proposed.**—It is reported that this place will borrow \$20,000 at 4 per cent for one year.

**Hastings, Neb.—Bond Offering.**—Proposals will be received until January 25, 1897, by this city for the purchase of \$3,000 of water-works extension bonds. The securities will bear 5 per cent interest and mature in twenty years, with option of call after five years.

**Healdsburg, Cal.—Bonds Defeated.**—On January 4, 1897, the citizens of Healdsburg defeated the proposition to issue \$25,000 of school building bonds by a two thirds vote.

**Howard County, Mo.—Bond Call.**—Thomas G. Deatherage, County Treasurer, announces that 5 per cent bonds of this county, dated February 1, 1889, numbered from 103 to 119 inclusive, will be redeemed on February 1, 1897, at the National Bank of Commerce, New York City. Bonds of Charlton Township, Howard County, numbered 16, 17, 18, 19 and 20, also bearing 5 per cent and dated February 1, 1889, will be paid on the same date.

**Hudson, Mass.—Bond Sale.**—Jas. W. Longstreet & Co. of Boston have been awarded \$18,000 of Hudson one to thirteen year notes at 101-73. The notes bear interest at 4 per cent. Other bids received were from R. L. Day & Co., 101-556, and Jose, Parker & Co., 101-338.

**Indianapolis, Ind.—Bond Offering.**—Proposals will be received until 12 o'clock noon January 25, 1897, by the Board of School Commissioners of the city of Indianapolis for the purchase of \$180,000 of school bonds.

The issue is to be in the shape of notes dated January 31, 1897, and payable June 30, 1897. One hundred and forty thousand dollars of this issue will be used for current expenses and the balance for building purposes.

*The official notice of this bond sale will be found among the advertisements elsewhere in this Department.*

**Johnstown, N. Y.—Bond Offering.**—Proposals will be received until 11 o'clock A. M. January 20, 1897, by Palmadge L. Parsons, Supervisor, at the office of Dewitt C. Moore attorney, Johnstown, N. Y., for the purchase of \$5,000 of 4 per cent refunding coupon bonds. The securities will be dated February 1, 1897, interest will be payable semi-annually on the first days of February and August, and \$2,000 of the principal will mature at the rate of \$200 yearly, beginning February 1, 1898; the remaining \$30,000 will mature in six years from February 1, 1908, at the rate of \$500 each year. Principal and interest will be payable at The People's Bank, of Johnstown. This loan is for the purpose of refunding bonds to the same amount heretofore issued by the former town of Johnstown and loaned to the Fonda Johnstown & Gloversville Railroad Company. The bonds will be exempt from all taxation. The total bonded debt of said town is estimated at \$13,500, made up as follows: The present issue of \$5,000; the estimated proportional share of \$10,000 refunding bonds, 4 per cent, due 1901; \$14,000 refunding bonds, 4 per cent, due \$3,000 each year, and \$10,000 4 per cent refunding bonds, due \$1,000 each year, making a total of \$31,000, payable by the city of Johnstown and town of Johnstown, of which the town's proportional share is less than 25 per cent. The assessed valuation of real and personal property for the year 1893 is \$366,360 and the estimated real valuation is \$1,732,520.

**Juniata, Pa.—Bond Offering.**—It is reported that J. W. Lees, Borough Clerk, Kippie, Pa., will receive proposals until January 20, 1897, for the purchase of \$11,000 of water bonds. The bonds will bear interest at the rate of 5 per cent and mature in from 15 to 30 years from date of issue.

**Kearney Township, N. J.—Bonds Proposed.**—It is reported that this place will petition the Legislature for authority to issue bonds for street paving purposes.

**Knoxville, Tenn.—Bond Legislation.**—It is reported that this city has presented a bill to the Legislature asking for authority to issue market-house and school building bonds to the amount of \$50,000.

**Larado, Tex.—Bonds Authorized.**—It is reported that school-house bonds to the amount of \$35,000 will be issued by this city.

**Macon, Ga.—Bond Offering.**—Proposals will be received until Feb. 9, 1897, by this city for the purchase of \$130,000 of paving bonds. The securities will bear interest at the rate of 4½ per cent, and the principal will mature in thirty years from date of issue.

**Menasha, Wis.—Bond Sale.**—The Boston News Bureau reports that this municipality has disposed of \$12,000 of school bonds at 101-408. The loan will mature in about nine and a-half years from date of issue.

**Middlesex County, N. J.—Bonds Proposed.**—Road bonds of this county to the amount of \$400,000 are under consideration.

**Middletown, N. Y.—Bond Sale.**—It is reported that the Goshen Savings Bank has purchased water bonds of Middletown to the amount of \$10,000 at 110. The securities bear interest at the rate of 4 per cent.

**Monroe, N. C.—Bond News.**—It is reported that the State Legislature will shortly be petitioned by a committee appointed for the purpose for authority to issue bonds to the amount of \$40,000, for the construction of a water-works system.

**Morgantown, W. Va.—Bonds Defeated.**—Town Treasurer T. B. Williams reports to the CHRONICLE that owing to a misunderstanding with the people the proposition to issue \$15,000 of street-paving bonds did not carry. Another election will probably soon be held.

**Mount Vernon, N. Y.—Bond Sale.**—The Board of Education of this city on January 11, 1897, awarded \$65,000 of school bonds to Edward C. Jones Co. of New York. Bids were received as follows:

Edward C. Jones Co., for 4 per cent bonds.....	105-25
Farron, Leach & Co., for 4 per cent bonds.....	102-75
E. C. Stanwood & Co., for 4 per cent bonds.....	101-23
Dietz, Denison & Prior, for 4 per cent bonds.....	101-11
E. C. Stanwood & Co., for 4½ per cent bonds.....	108-77

The bonds will be dated July 1, 1896, and the principal will mature from July 1, 1918, to July 1, 1920, inclusive, at the rate of \$5,000 each year.

**Muskegon, Mich.—Bond Sale.**—Bonds of this county to the amount of \$30,000 were recently sold to Messrs. Spitzer & Co., of Toledo, O., for a premium of \$2,341. Sixteen bids were received. The securities bear interest at the rate of 4½ per cent and mature in fifteen years from date of issue.

**New York—Bond Sale.**—On January 13, 1897, State Comptroller James A. Roberts received the following list of proposals for \$4,000,000 of New York State canal bonds:

	Amount.	Bid
E. B. Underhill, Jr., New York.....	\$500,000	Par
H. H. Williams, Hackensack, N. J.....	600,000	102-10
Harper, Rives & Phayne, New York.....	50,000	100-125
Paul Fehn, New York.....	100,000	100-001
R. Pentland, New York.....	300,000	101-25
W. M. Norton, Bristol, Conn.....	250,000	103-10
W. M. Norton, Bristol, Conn.....	250,000	103-02
W. M. Norton, Bristol, Conn.....	1,000,000	102-57
C. Leffingwell, New York.....	743,000	107-125
E. E. Bloch, Hillsdale, N. J.....	250,000	102-50
Albany County Savings Bank.....	100,000	Par
F. S. Donnell, New York.....	500,000	98-41
F. S. Donnell, New York.....	350,000	99-901
F. S. Donnell, New York.....	250,000	100-089
Hicks Bros., New York.....	1,000,000	98-007
Joseph E. Gavin, Buffalo, N. Y.....	500,000	100-185
Joseph E. Gavin, Buffalo, N. Y.....	500,000	100-215
A. L. Judson, Albany, N. Y.....	4,000,000	100-61
Comptroller State of New York.....	1,500,000	Par
Hugh Dunn, New York.....	300,000	102-90

The securities will be dated Jan. 1, 1897, and the principal will mature Jan. 1, 1912. Interest at the rate of 3 per cent will be payable semi-annually at the Bank of the Manhattan Co. in New York City on Jan. 1 and July 1. Both principal and interest will be payable in gold.

**New York City, N. Y.—Bonds Listed.**—Consolidated gold bonds and stock of the City of New York, amounting to \$4,039,502 have been admitted to the New York Stock Exchange List this week. A condensed description of the bonds with the amounts listed follows:

New York City 3½s of 1910.....	\$300,000
New York City 3½s of 1911.....	1,206,502
New York City 3½s of 1912.....	458,000
New York City 3½s of 1916.....	1,025,000
New York City 3½s of 1925.....	50,000
New York City 3½s of 1928.....	1,000,000

Interest on all of the above bonds is payable semi-annually in May and November.

**Oneonta, N. Y.—Bonds Authorized.**—It is reported that school building bonds of this municipality to the amount of \$21,000 have been voted.

**Perth Amboy, N. J.—Bond Sale.**—It is reported that this city has awarded \$25,000 of water-works bonds to Blodgett, Merritt & Co. at 105-532. The securities will bear interest at the rate of 5 per cent and mature in twenty years from date of issue.

**Phelps, N. Y.—Bond Offering.**—Proposals will be received until 10 o'clock A. M., Jan. 20, 1897, by Town Clerk John T. Watkins, for the purchase of \$32,000 of coupon refunding bonds. Interest at the rate of 4 per cent will be payable semi-annually, and the principal will mature at the rate of \$1,500 annually. The town of Phelps has at present no bonded indebtedness. The assessed valuation is said to be over \$3,500,000.

**Philadelphia, Pa.—Sale Postponed.**—Owing to a supposed defect in the ordinances authorizing the issuance of the \$2,000,000 loan for the Delaware Avenue improvements and the \$2,400,000 of the Subway loan, the sale set for Jan. 12 did not take place but was postponed until Jan. 26, by which date it is hoped the defect will be remedied.

**Pocahontas, Va.—Bonds Proposed.**—Bonds for the construction of a water-works system for this city are under consideration.

**Pueblo County, Col.—Bond Offering.**—It is reported that proposals will be received until January 20, 1897, by C. J. Long, Chairman of the Board of Commissioners, for the purchase of \$350,000 of refunding bonds. The securities will bear 5 per cent interest and mature in 1917, subject to call after 1907.

**Rankin, Pa.—Bond Election.**—Street improvement and sewer bonds of this municipality to the amount of \$28,000 have been proposed, and the question of issuing the same will be decided by the people on February 16, 1897.

**Raymond, Miss.—Bonds Proposed.**—It is reported that an issue of bonds amounting to \$4,000 is under consideration. The proceeds will be used for the erection of a city hall.

**Reasselaer County, N. Y.—Proposals** will be received until January 29, 1897, by this county for the purchase of 4 per cent bonds to the amount of \$38,000.

**San Jose, Cal.—Bond Offering.**—Proposals will be received until February 8, 1897, by this city for the purchase of \$75,000 of school building bonds and \$40,000 of sewer bonds. The securities will bear interest at the rate of 4½ per cent, payable semi-annually, and the principal will mature in from one to forty years from date of issue.

**Sargeat, Neb.—Bond Offering.**—It is reported that \$100,000 of bonds of this place will be offered for sale on January 18, 1897.

**Springfield, Mass.—Bond Offering.**—Proposals will be received until 2 o'clock P. M., January 21, 1897, by City Treasurer E. T. Tift, for the purchase of \$350,000 of high-school loan bonds of the city of Springfield. The bonds for this loan will be issued in registered certificates of \$1,000 each or any multiple of this sum. Four per cent interest will be payable semi-annually on the first days of January and July, and the principal will mature in twenty years from January 1, 1897. Principal and interest will be payable in gold or its equivalent at the office of the City Treasurer. Proposals must be accompanied by a certified check for one per cent of the amount bid for. This loan will be secured by a sinking fund.

*The official notice of this sale will be found among the advertisements elsewhere in this Department.*

**Suisun, Cal.—Bond Sale.**—This city has completed the arrangements for its new water-works system by disposing of \$42,000 of bonds to the San Francisco Bridge Company, which has taken the contract to build the water-works. The securities bear interest at the rate of 6 per cent and were sold at par.

**Uxbridge, Mass.—Bonds Defeated.**—On January 9, 1897, the people of Uxbridge voted against the proposition to issue \$80,000 of water-works bonds.

**Westborough, Mass.—Bond Sale.**—The Boston News Bureau reports that George A. Fernald & Co. have been awarded \$60,000 of 4 per cent thirty-year sewer bonds of Westborough at 106½. Four other bids were received.

**Westport, Mo.—Bond Sale.**—It is reported that this town has disposed of improvement bonds to the amount of \$101,000.

**Williamsport School District, Pa.—Bond Sale.**—The \$50,000 of coupon bonds offered by this district on January 12, 1897, have been awarded to a local attorney for \$50,100.

The securities will be of the denomination of \$500, bearing interest at the rate of 4 per cent, payable semi-annually.

## NEW LOANS.

### PROPOSALS FOR \$500,000 BONDS Sanitary District of Chicago. 4½ Per Cents.

SEALED proposals addressed to the Board of Trustees of the Sanitary District of Chicago, and endorsed:

"Proposals for Purchasing Bonds," will be received by the Clerk of said Sanitary District at Room 11, 526 Rialto Building, Chicago, Illinois, until 12 M. (standard time) on Monday, the 18th day of January, 1897.

The bonds for the purchase of which said bids will be received are the sixth (5th) and present issue of eight hundred thousand (\$800,000) dollars worth of bonds of the Sanitary District of Chicago, in denominations of one thousand (\$1,000) dollars each, with interest at rate of four and one-half (4½) per cent per annum, payable semi-annually on the first days of July and January of each year, and the principal payable at the rate of forty thousand (\$40,000) dollars each year for twenty (20) years next succeeding January 1, 1897—the first payment to be made January 1, 1898. Both principal and interest payable at the office of the Treasurer of said Sanitary District at Chicago, Illinois.

This issue is to issue of bonds of prior issues paid and retired, and is within the limit of five (5) per cent of the assessed valuation of taxable property within the District as prescribed by law.

Each proposal must be accompanied by certified check or cash of an amount equal to three (3) per cent of the amount of the bid. All certified checks must be drawn on some responsible bank, and be made payable to the order of the "Clerk of the Sanitary District of Chicago." Said amount of (3) per cent of the amount of the bid will be held by the Sanitary District until all of said proposals have been canvassed and the bonds have been awarded.

The bonds will be sold in lots of twenty-five thousand (\$25,000) dollars and multiples of twenty-five thousand (\$25,000) dollars, and each purchaser will be required to take a pro rata share of short time and long time bonds. No bid at less than par and accrued interest, the bonds being dated January 12, 1897, and the first coupon on each bond being for five and one-half (5½) months' interest will be considered, and the right is reserved to reject any and all bids.

The said bonds to be paid for and delivered at the office of the Treasurer of said District.

Advances may be made with the said District for the payment and delivery of said bonds in installments.

The present net bonded indebtedness of the said District is \$1,170,000 of the original issue having been paid. The present tax levy of the District fields about \$2,000,000 yearly, on an assessed valuation of over \$241,000,000. The present terms of the District to date including construction and right of way lands now aggregate about \$21,500,000, the total cost of the work being set at \$28,500,000.

The bonds offered are a first lien upon all the taxable property within the limits of the Sanitary District of Chicago, which are now co-extensive with those of the City of Chicago.

For further information apply to the Clerk of the Sanitary District or the Chairman of the Committee on Finance, Room 11, 526 Rialto Building, Chicago, Illinois.

THE SANITARY DISTRICT OF CHICAGO,  
By FRANK W. TIFT,  
Chairman Committee on Finance  
THOMAS KILLY,  
President Board of Trustees

Attest  
JAMES RUTHERFORD,  
Clerk of the Sanitary District of Chicago  
Chicago Ill Jan 6 1897

## NEW LOANS.

### \$350,000 Registered Gold Bonds. CITY OF SPRINGFIELD, MASS. 4% High School Loan.

CITY TREASURER'S OFFICE.

CITY HALL, Jan. 18th, 1897.  
In pursuance of the authority of an order of the City Council approved by the Mayor January 11th, 1897, the undersigned, Treasurer of the City of Springfield, will receive until Thursday, January 21st, 1897, at 2 o'clock P. M., sealed proposals for the whole or any part of the City of Springfield's twenty-year High School Loan of \$350,000.

The bonds for this loan will be issued in Registered Certificates of \$1,000 each or any multiple thereof, dated January 1, 1897, and due in twenty years, viz: January 1, 1917, bearing interest at the rate of four per cent per annum, payable semi-annually on the first days of January and July. Principal and interest payable in gold coin of the United States of America of the present standard of weight and fineness or its equivalent at the City Treasurer's Office, Springfield, Mass.

Holders of these certificates, if they so desire, can receive the semi-annual interest through the mail by check payable to their order.

This loan will be secured by a sinking fund providing for the payment of the same at maturity. Proposals must include accrued interest to date of delivery of bonds and must be accompanied by a certified bank check for the sum of one per cent of the amount of the loan bid for, made payable to the City of Springfield. All proposals will be opened in the Mayor's Office, Thursday, January 21, 1897, at 2 o'clock P. M., by the Finance Committee, who reserve the right to reject any and all bids.

Certified checks of unsuccessful bidders will be returned immediately, while the check of the successful bidder will be retained and applied as part payment for the loan awarded. City of Springfield bonds are legal investments for New York State Savings Banks.

Address proposals to the undersigned, indorsed "Proposals for High School Loan."  
E. T. TIFT, City Treasurer,  
Springfield, Mass.

Oakland, Cal.—John L. Davie, Mayor. The following statement has been corrected to November 1, 1896, by means

of a special report to the CHRONICLE from R. W. Snow, City Auditor.

No provision having been made for the payment of \$140,000 outstanding "Redemption bonds of 1882," maturing by limitation October 1, 1895, an election was held on September 29, 1894, when the question of the issue of refunding bonds was submitted and defeated. The question was re-submitted at an election held August 31, 1895, when the re-issuance was authorized. The bonds were immediately prepared, but were withdrawn from sale, after being advertised, pending the decision of the Supreme Court of the State of California in a case arising in the City of Los Angeles, involving points of law relating to the method of procedure adopted by the Council in calling the election. The bonds maturing October 1, 1895, have not been presented for payment. If presented, arrangement has been made to meet them.

Oakland is the county-seat of Alameda County.

LOANS—	When Due.	FUNDED DEBT, 1874—
FUNDED DEBT BONDS, 1872—		8s, Q-J, \$90,000.....June 9, 1905
8s, Q-J, \$62,000....June 18, 1903		Subject to call at any time.
Subject to call after June 18, 1893		SCHOOL BONDS, 1892—
		5s, J&J, \$320,000.....July 15, 1897
		(\$20,000 due yearly to July 15, 1912

TOTAL DEBT.—The city's total debt on November 1, 1896, was \$612,000. The interest on the bonded debt for the year ending July 1, 1896, was \$37,208. A special tax is levied for the redemption of each issue of this city's bonds.

CITY PROPERTY.—The following totals are taken from an inventory of real estate belonging to the city of Oakland, published in the city Auditor's report for 1895-96:

Real estate belonging to School Department.	\$329,250
do do Fire Department.	15,900
do do Public Parks.	583,000
Land occupied by Wharf.	50,000
Land for Pumping Station.	1,000

Total value of real estate belonging to city.

ASSESSED VALUATION.—The assessed valuation and tax rate (per \$1,000) have been as follows for the years indicated:

Years.	Valuation.	Tax Rate.	Years.	Valuation.	Tax Rate.
1896.	\$45,000,000.		1890.	\$39,453,302.	\$10.50
1895.	45,382,330.	\$11.20	1889.	35,843,979.	10.00
1894.	44,821,230.	11.20	1887.	32,096,250.	9.50
1893.	44,481,343.	12.40	1885.	29,217,050.	9.80
1892.	42,739,380.	11.00	1883.	28,353,338.	7.80
1891.	42,261,531.	19.50	1881.	28,238,631.	10.10

POPULATION in 1890 was 48,682; in 1880 it was 34,555.

Quotation Supplement (Monthly)  
Investors Supplement (Quarterly)

Street Railway Supplement (Quarterly)  
State and City Supplement (Semi-Annually)

[Entered according to Act of Congress, in the year 1897, by the WILLIAM B. DANA COMPANY, in the office of the Librarian of Congress.]

VOL. 64.

SATURDAY, JANUARY 23, 1897.

NO. 1,648.

## The Chronicle.

PUBLISHED WEEKLY.

### Terms of Subscription—Payable in Advance:

For One Year..... \$10 00  
For Six Months..... 8 00  
European Subscription (including postage)..... 12 00  
European Subscription Six Months (including postage)..... 7 00  
Annual Subscription in London (including postage)..... \$2 10s.  
Six Mos. do. do. do. \$1 10s.  
The INVESTORS' SUPPLEMENT will be furnished without extra charge to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.  
The STATE AND CITY SUPPLEMENT will also be furnished without extra charge to every subscriber of the CHRONICLE.  
The STREET RAILWAY SUPPLEMENT will likewise be furnished without extra charge to every subscriber of the CHRONICLE.  
The QUOTATION SUPPLEMENT, issued monthly, will also be furnished without extra charge to every subscriber of the CHRONICLE.  
File covers are sold at 50 cents each; postage on the same is 18 cents. File cover for supplements can be had at office for 65 cents or mailed for 80 cents.

### Terms of Advertising—(Per inch space).

One time..... \$3 50 Three Months (13 times)..... \$25 00  
One Month (4 times)..... 11 00 Six Months (26 " )..... 43 00  
Two Months (8 " )..... 18 00 Twelve Months (52 " )..... 58 00  
(The above terms for one month and upward are for standing cards.)

### London Agents:

Messrs. EDWARDS & SMITH, 1 Drapers' Gardens, E. C., will take subscriptions and advertisements, and supply single copies of the paper at 1s. each.

WILLIAM B. DANA COMPANY, Publishers.

Pine Street, Corner of Pearl Street,

Post Office Box 958. NEW YORK.

## CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates that the total bank clearings of all the clearing houses of the United States for the week ending to-day, January 23, have been \$1,064,770,527, against \$1,031,675,476 last week and \$945,318,125 the corresponding week of last year.

CLEARING HOUSES. Returns by Telegraph.	Week Ending January 23.		
	1897.	1896	Per Cent.
New York.....	\$512,424,228	\$425,325,101	+20.3
Boston.....	79,028,938	66,892,788	+18.2
Philadelphia.....	54,410,589	55,283,905	-1.6
Baltimore.....	12,251,312	12,005,803	+2.0
Chicago.....	62,069,608	60,805,771	+9.8
St. Louis.....	23,009,373	21,281,188	+8.1
New Orleans.....	9,751,770	9,465,558	+3.0
Seven cities, 5 days.....	\$753,813,868	\$660,550,115	+14.1
Other cities, 5 days.....	146,000,413	133,792,618	+10.6
Total all cities, 5 days ..	\$900,814,281	\$794,342,733	+12.5
All cities, 1 day.....	170,926,248	150,705,392	+13.2
Total all cities for week	\$1,064,770,527	\$945,318,125	+12.6

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, January 16, and the results for the corresponding week in 1896, 1895 and 1894 are also given. Contrasted with the preceding week, there is a decrease in the aggregate exchanges of one-hundred and seventy-three and one-half million dollars, and at New York alone the loss is one-hundred and twenty-nine and a-half millions. In comparison with the week of 1896 the total for the whole country shows a falling off of 2.7 per cent. Compared with the week of 1895 the current returns record a gain of 6.9 per cent and the excess over 1894 is 14.5 per cent. Outside of New York the decline from 1896 is 3.9 per cent. The loss from 1895 reaches 0.1 per cent, but making comparison with 1894 the gain is seen to be 4.1 per cent.

Clearings at—	Week ending January 16				
	1897	1896	1897, P. Cent.	1895	1894.
New York.....	550,905,153	500,905,334	-1.7	613,861,008	467,505,667

## REPORTS OF TRUST COMPANIES IN NEW YORK AND BROOKLYN.

On pages 183 to 185 will be found complete reports of the condition of all the trust companies in New York City and Brooklyn on December 31 1896, as compared with June 30 1896 and December 31 1895.

### THE FINANCIAL SITUATION.

The leading feature in the financial situation this week has been lower rates for money in Europe. The first announcement was the reduction by the Bank of Germany of the rate of discount to 4 per cent; previously and since the 10th of October it had stood at 5 per cent. At the date mentioned the pressure upon the Bank's resources was great, and had been for some months. An indication of the situation at that time may be had from the fact that the coin and bullion holdings of the Bank, which were £45,296,800 on July 23, had fallen when the change was made (Oct 10) to £40,209,400. Rumor also had it that gold from Berlin was being sent to Russia and that a further demand of the same sort was anticipated. However that may have been, Europe had been for some time and was then supplying New York's ante-election requirements of gold, and no doubt that movement, in addition to the Bank and home needs, induced the official change in the rate. The Berlin correspondent of the London "Economist," referring to the latter feature early in October, said that investments in bills were never so high since the Bank of Germany existed as just before the advance to 5 per cent was made; moreover, that the amount of notes issued beyond the duty-free limit was never so large as then, while loans were likewise approaching the admissible maximum and had been only twice exceeded. When December opened, relief from these extreme conditions had been in large measure obtained and affairs were rapidly shaping themselves for an easier money market. But later there were fresh withdrawals of gold and numerous requirements for trade and settlement purposes incident to the opening of the new year, causing a sharp rise for discounts in the open market at Berlin, which deferred to the current week the reduction in the official rate.

The Bank of England has likewise lowered its rate this week from 4 per cent to 3½ per cent. The rise from 3 to 4 per cent did not take place until October 22, notwithstanding as stated above the Bank of Germany had moved its official figure up to 5 per cent on the 10th of that month, and notwithstanding furthermore that the London gold reserve continued to be drawn on for America. The lower rate of the Bank of England now announced has been generally anticipated, indeed the expectation was that the drop would be to 3 per cent. We hardly see how it can be long maintained at even 3½ per cent with discounts of sixty to ninety day bank bills in London ruling at 2½ per cent and the open market rate at Berlin at 3½ per cent, and the latter figure or lower prevailing at almost every financial center on the Continent. Perhaps the Bank will make another special effort to support its official minimum. As the case stands, with these lower rates for money in Europe it is natural that our foreign exchange market should have become easier and lower. Maturing long bills bought for investment are daily being offered; yet bankers report that the most of those

which are now running to sight are being extended for another period of sixty or ninety days, as there is still a fractional profit in the operation; hence the offering of these bills for sale does not make much of an impression upon the exchange market. It is said, too, that the buying of long sterling for investment continues, but only to a moderate extent.

The trade situation has not changed materially; but it can be said with truth that it has not further retrograded and the alterations that have occurred have in the main been of a favorable nature. We have often referred to the print cloth situation because it is in some measure an index of the cotton goods department and when depressed has an unfavorable influence on the whole dry goods industry. Its surroundings just now look a little more promising than they have. It is satisfactory to note that the stocks of cloths, although still very large, have been on the decrease since the new year opened, and that too in the face of large production. During the holidays production fell off, the total outcome of the Fall River and Providence mills for the two weeks ending January 2 being only 197,000 pieces per week, whereas for the last reported week it was 246,000 pieces, which is very near a full normal production. Notwithstanding this out-turn the stocks have fallen to 1,998,000 pieces against 2,276,000 pieces a month ago, when the accumulation was at its highest. Moreover, manufacturers at Fall River have at last taken steps to curtail production. At a meeting held on Thursday it was determined to work only 42 hours per week for 3 months from February 1 provided mills representing not less than 3,500,000 spindles in Fall River and elsewhere sign the agreement; that would be a reduction of about 27½ per cent, a full week being 58 hours. Developing strength in that line of goods would go far towards imparting a more hopeful feeling in other departments.

The Stock Exchange has given evidence of increasing confidence this week. We say that notwithstanding there are at the moment some weak spots in the security situation. Most prominent among these are the bituminous coal roads, which have been having a very bad time. As we write we are informed that an arrangement between the properties interested has been perfected which will relieve the pressure and put rates on a paying basis again. But aside from that, a decline in the Hocking Valley securities on Thursday, growing out of the situation as it has existed, unsettled the whole market, just because the decline was accepted by the public as an indication that the road was going into the hands of receivers. This rumor was easily credited, inasmuch as several other properties connected with the bituminous business have recently passed into receivers' hands. In December this course was adopted for the Columbus & Hocking Coal & Iron Company; and since the first of January the Columbus Sandusky & Hocking Road and the Wheeling & Lake Erie have both had receivers appointed to take charge of their affairs. Under such circumstances it was by no means a difficult matter to get a rumor afloat that another company was about to take a similar course. In the light of these facts it hardly needs to be said that a settlement of the bituminous differences will correct a most unfortunate state of affairs. One is surprised that it has been possible to continue such a ruinous contest until so many of the contestants are in extremes, and it is a pity that the blame cannot be fixed where it belongs.

But notwithstanding this feature and some other prospective rate differences rumored, the stock market has as a rule been firmer and the tone decidedly better. The best classes of bonds are in good request even at the advances established. But the important feature of the week has been the activity in Governments, the prices of the new 4s reaching 122½; the highest point they touched during last year was 120½ in November and December. An element of increased strength those bonds now have is found in the large Government gold reserve, which is virtually an assurance not alone that there will be no need for a new issue of Government bonds during the current year but that there will be no currency disturbance during the twelve months at least. It only takes a moment's thought to realize what an extremely encouraging feature this condition is, not by any means chiefly in its bearing on the Government bond market but in its bearing upon all values and on general business. We said it meant a year of freedom from another bond issue and from another currency crisis. It means far more than that; for during that time the new Administration ought to be able, and we believe will be able, to re-arrange currency matters so as to give the country a perpetual rest from all future fear of a change in the currency standard.

The Board of Managers of the Joint Traffic Association have agreed to reduce the rate on corn from Chicago to New York from the basis of 20 cents per 100 pounds to 15 cents. This action attracts attention for several reasons. In the first place it is rather unusual to reduce rates during the winter months, when navigation is closed. In the second place, the fact that the roads now act unitedly when the necessity arises for a change in rates, instead of acting singly as on former occasions and thereby causing general demoralization, shows that the Joint Traffic agreement continues to work satisfactorily, as it has from the day of its beginning. In the third place such action must seem rather surprising to those United States Senators who have been denouncing the Association as a gigantic trust and who a few weeks ago were spending a good deal of time investigating it. We do not know just what prompted the managers to lower rates. But in any event the rates were reduced and shippers get the benefit. We all know that the Association is not a trust; but supposing it were, its action in this instance is evidence that it is amenable to the laws of trade, and so long as this is the case the Association can hardly be considered as dangerous to public interests.

The conclusion of arrangements by which the Atlantic & Pacific is to be retained as part of the Atchison system must be regarded as matter for congratulation. It removes one more disturbing factor in the railroad world and in the general situation. Though the Atchison itself was reorganized over a year ago, its affairs necessarily remained in an unsettled state so long as it could not be determined what the future relations of the road with the Atlantic & Pacific were to be, and what annual charge would have to be assumed on its behalf. On the other hand, the A. & P. property could not have any definite or certain value while there was a question whether the Atchison would be willing to take the line on reasonable terms. The two roads are interdependent. The Atlantic & Pacific seems essential to the integrity of the Atchison system, while the A. & P. could not well get along without the Atchison. It is

therefore mutually advantageous to have the affair arranged and definitely settled.

We have been favored with an advance report of the income statement of the Mobile & Ohio for the six months ending December 31. The showing is a very satisfactory one for a period of unfavorable conditions. We say a period of unfavorable conditions because though the cotton crop of 1896 was larger than that for 1895, yet our industries were in a state of great depression during the whole six months, and the Mobile & Ohio of course suffered from this in common with other roads. Gross earnings for the half-year in 1896 were \$1,991,675, against \$1,893,838 for the six months of 1895, and net earnings were \$756,987, against \$787,419; out of the net the company took \$113,822 for new equipment and car trust payments, against only \$69,822 in 1895. The interest charges did not differ much in the two periods, being \$521,383 against \$529,394. The final result is a surplus of \$121,782 for 1896 (that is, after deducting equipment payments and fixed charges), against \$188,203 for 1895. The funded debt has been diminished by \$22,500, being the amount of bonds purchased for the sinking fund. The company is reported to have no floating debt, and the car trust debt has been reduced (through the car trust payments) to \$168,645.

On another page we review the gross and net earnings of United States railroads for the month of November. The losses are very heavy in both gross and net, as was expected. Below we compare the earnings for four years of a number of roads which have this week made returns for either November or December.

Currency continues to flow toward this centre, attracted by the 2 per cent which the banks are willing to pay for deposits of interior banks, and the result is that the institutions in this city are literally flooded with money which they cannot profitably employ. One feature of this glut is that the currency which is now being received consists almost wholly of silver certificates. The movement from Boston has been quite large for the last fortnight. The banks at that distributing centre have apparently received the surplus from the other Eastern institutions, and this surplus has accumulated to such an extent as to cause an overflow in the Boston banks, and these institutions have probably culled out the most desirable notes and sent the remainder to New York. There is no use for this currency here at present. It is simply a disturbing agent. Later on, when the spring crop movement begins, a considerable portion of the notes can be shipped to the West. Though there is a plethora of money here, rates do not materially change. The banks

are not pressing their offerings, for they seek to maintain 2 per cent, and they can loan only moderate amounts at this figure. The trust companies are in the market competing with bankers' balances, and these institutions will loan at  $1\frac{1}{2}$  per cent. The quotation of  $1\frac{1}{2}$  per cent—a split between  $1\frac{1}{2}$  and 2—is becoming quite general on the Stock Exchange.

The gold obligations, chiefly Assay Office checks, turned over to the Sub-Treasury in exchange for legal tenders this week, have been \$200,000. The net gold in the Treasury, officially reported from Washington on Friday of last week, was \$141,086,876 and the amount so reported on Friday of this week was \$143,182,755.

Money on call, representing bankers' balances, has loaned at the Stock Exchange this week at 1 and at 2 per cent, with the bulk of the business at  $1\frac{1}{2}$  and at  $1\frac{1}{2}$  and the average about  $1\frac{1}{2}$  per cent. Banks still maintain 2 per cent as the minimum, while trust companies are willing to loan at  $1\frac{1}{2}$  per cent. The inquiry for time contracts is only moderate, most of the commission houses having obtained nearly all the time money they want for the present, and the offerings are quite liberal. Rates are 2 per cent for sixty days,  $2\frac{1}{2}$  per cent for ninety days to four months and 3 for five to six months, with some transactions for nine months at the same rate. There is a good supply of commercial paper and a good demand, but buyers are unwilling to accept less than 3 per cent, and an effort to place some choice Eastern city paper at  $2\frac{1}{2}$  per cent has been unsuccessful. Rates are  $3@3\frac{1}{2}$  per cent for sixty to ninety day endorsed bills receivable,  $3\frac{1}{2}@4$  per cent for first class and  $4@5$  per cent for good four to six months single names. There is close scrutiny of paper in view of recent failures.

The Bank of England minimum rate of discount, as stated above, was reduced on Thursday to  $3\frac{1}{2}$  per cent from 4, at which it had stood since October 22. The cable reports discounts of sixty to ninety day bank bills in London  $2\frac{1}{2}$  per cent. The open market rate at Paris is 2, at Berlin it is  $3\frac{1}{2}$  and at Frankfort  $3\frac{3}{4}$  per cent. According to our special cable from London the Bank of England gained £817,216 bullion during the week and held £36,411,498 at the close of the week. Our correspondent further advises us that the gain was wholly due to arrivals of £817,216 net from the interior of Great Britain, there being no imports or exports.

The foreign exchange market has been dull and irregular this week, with long sterling firm and an easier tone for short sterling and cable transfers. Bankers report very few cotton bills offering and not many grain bills, and this will in part account for the firm tone for long sterling, though another reason is the continued demand for these bills for new investment to hold until they run to sight. The difference between buying such bills and carrying them here, and the purchase of them for remittance to London for discount at open market rates of  $2\frac{3}{4}@2\frac{1}{2}$  per cent, amounts, it is claimed, to about  $\frac{1}{2}$  of 1 per cent in favor of retaining them here, for they can be readily carried with call money at about  $1\frac{1}{2}$  per cent. This difference will of course be reduced under the further decline in the open market discount rate in London, but on large transactions of say £100,000 it amounts to about £125. The easy tone for short sterling is due to offer-

ings of some maturing long bills for sale and also to exchange for sixty day bills, and bankers say that the bulk of the maturing drafts are being so exchanged. The range for posted rates for sterling on Monday was from 4 85 to 4 86 for sixty day and from 4 88 to 4 88 $\frac{1}{2}$  for sight. The tone was firm for long and easy for short sterling and cable transfers, and rates for actual business were unchanged for long and reduced one-quarter of a cent for short, compared with the close of Friday of last week, to 4 87 $\frac{1}{2}@4$  87 $\frac{1}{2}$ , and one-quarter of a cent for cable transfers, to 4 87 $\frac{1}{2}@4$  88. There was no change on the following day either in the tone or in the range for nominal rates. On Wednesday the range was from 4 85 $\frac{1}{2}$  to 4 86 for sixty day and from 4 88 to 4 88 $\frac{1}{2}$  for sight, but rates for actual business were unaltered. On Thursday the range remained unchanged, but cable transfers were reduced one-quarter of a cent, to 4 87 $\frac{1}{2}@4$  87 $\frac{1}{2}$ , while rates for actual business in long and in short sterling were unaltered and the tone continued firm for the former and easy for the latter. The reduction in the Bank of England discount rate had no particular influence upon the market, as rates had been adjusted to conform to the open market figures. Yesterday posted rates were marked down half a cent for sight by several of the bankers, but the range remained 4 85 $\frac{1}{2}@4$  86 for sixty day and 4 88 $@4$  88 $\frac{1}{2}$  for sight. In the rates for actual business there was a reduction of one quarter of a cent in sixty day and sight, while cable transfers remained the same. The following shows daily posted rates for exchange by some of the leading drawers:

The market closed easy on Friday at 4 85 $\frac{1}{2}@4$  86 for sixty-day and 4 88 $@4$  88 $\frac{1}{2}$  for sight. Rates for actual business were 4 84 $\frac{1}{2}@4$  84 $\frac{1}{2}$  for long, 4 87 $@4$  87 $\frac{1}{2}$  for short and 4 87 $\frac{1}{2}@4$  87 $\frac{1}{2}$  for cable transfers; prime commercial bills were 4 84 $@4$  84 $\frac{1}{2}$  and documentary 4 83 $\frac{1}{2}@4$  84.

The following statement gives the week's movements of money to and from the interior by the New York banks.

Week Ending Jan. 22, 1897.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$7,350,000	\$3,213,000	Gain, \$4,137,000
Gold.....	411,000	248,000	Gain, 163,000
Total gold and legal tenders.....	\$7,761,000	\$3,461,000	Gain, \$4,300,000

With the Sub-Treasury operations the result is as follows.

Week Ending Jan. 22, 1897.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$7,761,000	\$3,456,000	Gain, \$4,305,000
Sub-Treasury operations.....	17,000,000	15,600,000	Gain, 1,400,000
Total gold and legal tenders.....	\$24,761,000	\$19,056,000	Gain, \$5,705,000

The following table indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

### THE GREATER NEW YORK CHARTER.

Two weeks ago we outlined in these columns the essential points of the charter as submitted by the Greater New York Commission. We made no attempt at the time to go into the merits of the various innovations proposed in that document. Discussion of the project has now, however, reached a stage where some very positive expression of opinion is invited. To the political future of New York and its adjacent cities the charter embodies results of obvious importance. But the influence of a right or wrong decision in these matters will not affect New York alone. If the plan as finally adopted in the New York charter were to stand the test of practical experience and prove to be a true solution of municipal problems, there are a score of cities in the United States which will draft new charters for themselves on the New model. Unfortunately, there are also many cities which are likely to imitate the New York plan, even if it proves a futile experiment in reform. We do not therefore exaggerate when we say that the construction of a proper charter for the Greater New York, as free as possible from flaws and weaknesses, is equally a matter of concern to New York citizens and to residents of every other growing city in the Union.

The charter as it stands is very far from perfect. This the Commission has itself admitted by its frequent alterations in the document. We have already noticed the sudden change made by the Commission in the number of members provided for the municipal assembly. Without any open discussion of the matter, the charter committee cut this membership down more than one-third from the number originally proposed. On Monday of this week another and equally radical change was made; the Mayor's term being extended from two years, as provided in the first public draft of the charter, to four. Other and numerous minor alterations have been made. We do not mention these changes in the document to criticize the new provisions, but the fact that such repeated and important amendments are being made shows the uncertainty of the committee as to its own work's final merits. It is no great stretch of inference to maintain that other and equally essential chapters of the charter may be quite as properly subject to revision.

This being at least a reasonable supposition, we wish to emphasize the demand of the Chamber of Commerce, two weeks ago, for a prolongation of the public discussion. What our State Legislature at Albany will do in the way of modification or amendment we do not know; but every one is aware of the tendency of that body to hurry legislation through without minute consideration of its merits. If a distinct alternative plan were in the field, or a series of alternative propositions in lieu of the disputed chapters, we should be more hopeful of intelligent legislative debate. As it is, there is no recognized body by which such amendments could in any case be formally submitted. It is, for instance,

known that the majority of the present police commissioners disapprove of the charter's plan for a police department. The charter's entire administrative scheme for city education is opposed this week by formal resolution of the Board of Education. How are such criticisms as these to get a proper hearing if the bill is hurried through the legislative calendar?

It seems to us in view of the very grave possibilities of mischief from a really defective charter that hasty adoption of the instrument at Albany would be wholly without excuse. The least that the Legislature ought to do, in our opinion, is to place the whole matter in the hands of a special committee of its own, which shall hold a reasonably prolonged session in New York City, and invite the open comment and criticism of recognized authorities. The public hearings of the present Commission have only in the slightest degree served such a purpose. Many of the criticisms and objections volunteered were intelligent and useful. But when the Commission allotted only a day apiece to the most important features in the charter—one day for hearings on the municipal assembly plan, one for the police provisions, one for the administrative clauses, and so one—it would be wholly absurd to imagine that expert sentiment had been allowed a fair opportunity for expression.

It is our own judgment that while the charter as it stands contains many undoubtedly wise and far-sighted provisions, it embodies also some propositions so doubtful and dangerous that any consolidated city beginning its career under them would be hampered from the start. We refer especially to the provisions for a municipal assembly. This governing body of eighty-seven members, the charter committee explains in its report, "ought to attract men of the highest character and intelligence. If it shall do so, the problem of successful municipal administration for Greater New York will have been solved." Very true; but will the assembly, elected from scattered districts by a district vote, attract such men? This is the very point at issue. Precisely such a forecast was made by Jay in 1788 regarding the composition of the various State Legislatures. These select assemblies, he predicted in the "Federalist," "will in general be composed of the most enlightened and respectable citizens." Has experience altogether vindicated this prediction? But our judgment of the possible make-up of the municipal legislature need not be based on theory; New York has the experiment of a century to invoke. A city Board of Aldermen is a body quite as distinguished in theory and tradition—probably more so, being more limited in membership—as the proposed municipal assembly. There have been, and there are, some capable public officers in the Board under the present system. But all New Yorkers are aware what was the city's experience with that body as a whole; an experience which eventually forced the people to deprive the Aldermen of practically all important administrative powers. If we could not elect an ideal Board of Aldermen, how are we to elect ideal municipal assemblymen? The voters will be the same; the office, if anything, less conspicuous.

Furthermore, it appears to us that the Commission has been inconsistent with itself. It creates this elaborate assembly, with two separate chambers, and intimates that the foremost citizens will seek and gain admission to its membership. Yet in the very same clause the charter proceeds to strip the municipal

assembly of all genuine responsibility. The assembly is forbidden even to consider large financial measures, except such as the Board of Public Improvements lays before it. Its vote upon even this restricted legislation is subject to the final veto of the Board of Estimate and Apportionment. We do not criticise these restrictions of the municipal assembly's powers; on the contrary, if the city is to have a governing body as proposed, we are decidedly in favor of the most rigid limitations of its authority. But what we wish to notice is the fact that these very restrictions are sufficient witness to the Commission's personal expectations. If the committee seriously believed that the assembly will comprise, as the equally large governing bodies of Manchester and London do, "men of the highest character and intelligence," then the charter should properly have allowed to the Assemblymen the broad and slightly restricted powers which devolve on the English municipal administrators. If, on the contrary, it was suspected that the new Assemblymen would be our present city council over again, under another title, we are somewhat at loss to understand why their number should be considerably more than doubled.

We are aware that the Commission, in proposing this great enlargement of the City Council, based its provisions on the equally large membership of similar bodies in European cities. We have hitherto noticed in these columns the fact that in many of these cities membership of the city government exceeds in numbers that recommended by the Greater New York Commission, and testimony is generally to the effect that the result has not been bad. But there are qualifying features in this comparison. In the majority of these foreign cities, household qualifications are required from voters; in England, moreover, every owner of property in a municipality has a vote, whatever may be his stated residence. We do not say that this is a principle which could be applied to New York City; but nothing can be more obvious than the fact that such an electoral constituency insures the quality of municipal administrators, as unrestricted suffrage will not do. The existence of such electorates abroad and their absence here sufficiently explains the different character of the European and American city councils. We have seen already that the Greater New York Committee, by depriving its assembly of all the liberal powers enjoyed by foreign councilmen, has shown its skepticism over the probable character of our proposed assembly.

Some semblance of authority is conferred on the proposed assemblymen by making each of them members of the "borough council" in his city district; a council which is to make the absolute first move in submitting to the Board of Improvements public enterprises for the district. This plan, it is true, has the possible elements of thorough committee work. But it embodies also some very mischievous possibilities. The members for one district, who are urging large expenditures for that district, will eventually have a vote in full assembly, not only upon their own propositions but upon those of every other member of the municipal assembly. If the character of the new assembly were to be of an inferior standard, it is easy to predict the outcome of this arrangement. The class of political activity commonly known as "deals" and "log-rolling" would be fastened on the city in a degree never before imagined. People who have watched the results of such exchange of favors in the national legislature, a body of much larger calibre,

will hardly hesitate to describe the career of such a municipal assembly. Not even the European city councils, with their conservative membership, have been willing to incur such risks. In the best of those administrative bodies, committee work is assigned, not by districts but by subjects of legislation.

We shall not attempt to go any further at this time into the various complex features of the charter. What we have discussed already seems to us conclusive argument against the plan of hurrying the charter through without a chance for full and public discussion. The very fact that the Commission's scheme of government contains many excellent provisions is a reason for mature consideration of the document as a whole, so that the plan may be harmonious and efficient. The charter under which London is now governed was publicly proposed in 1888; during six years it was debated, altered and modified; the commission named in 1894 took testimony during a considerable period; the matter was then exhaustively debated in the Commons. In the face of such a precedent it seems to us that a hasty packing of the Greater New York charter into concluded legislation would be poor tribute to American sagacity. The proposition stands even now under the veto of the administrations of New York and Brooklyn; it has not been adequately debated, simply because no time has been allowed for such debate. No one has even suggested any imperative need for haste; yet it is now proposed to close consideration of the charter after a few hours' hearing on each section, with the committee itself inserting almost daily changes. This is not the manner in which a serious people are accustomed to construct a plan of government. We trust that the conservative commercial bodies of this city, whose members have by far the largest interests at stake in the pending legislation, will speak to some purpose in behalf of reasonable action.

#### *THE AGITATION FOR TWO CENT PER MILE FARES IN THE WEST.*

Every year about this time propositions for legislative action looking to a reduction of the maximum fare which railroads may charge per mile for the transportation of passengers in the West are very numerous. One would think that the present year might form an exception to the rule, seeing how greatly depressed business is and how much the railroads have suffered in various ways during the last three or four years. But if anything the agitation is more pronounced than on previous occasions. Just at the moment movements to secure a reduction are being pushed in several leading States, among others Illinois, Iowa and Texas.

In most parts of the West the maximum now allowed by law is three cents per mile or higher. The effort is to get the rate down to two and a-half and even to two cents per mile. In some cases the movement takes the form of a proposition to compel the railroads to issue interchangeable mileage tickets at the lower figure; in other cases the attempt is to compel a general reduction of rates to two cents a mile. The railroads are perhaps not opposing these movements with proper vigor. The general disposition among railroad managers is to strain a point in the desire to meet popular approval. Except in some special instances the passenger traffic of the railroads is the most troublesome and the least satisfactory and the least profitable portion of their business. A rate of two cents per mile may look ample, but the

fact is that even here in the Middle States, where population is dense, such a rate does not always pay. In the West, or at least that portion of the West which is sparsely settled, a two-cent rate would be almost ruinous. Indeed, even a three-cent rate is unprofitable on many of the smaller roads.

Those who argue in favor of a reduction overlook the fact that the passenger traffic differs very materially from the freight traffic in essential particulars. The freight traffic of the roads under low rates is capable of very great extension and development. The passenger traffic on the other hand under the most favorable conditions can be developed only to a limited degree. Both between local and between distant points the people will travel a certain amount, and no more. A special stimulus may increase it some, but not much. Hence the controlling element is the size of the population. If that is large, other things being equal, the passenger traffic will be heavy; if small, the reverse. In the West it is this latter condition that prevails, and it follows therefore that compensation for a reduction in rates cannot be looked for to any great extent in an expansion in the volume of the traffic.

It must also be remembered that passenger business is very expensive to handle. The public has been educated to expect the best of service. They demand frequent train service, excellent accommodations, the most approved methods for preventing accidents and every convenience and elegance in traveling. Having been educated to expect the best, it is certain that they would not be satisfied with anything less. Yet to reduce rates would under the conditions prevailing necessarily mean the cutting off of some of the present appointments and conveniences. In times of depression, such as those through which we have been passing, the effect on the passenger business is particularly marked. The volume of the traffic contracts because the people on account of their lessened income cannot travel with the same freedom as before. On the other hand, it is practically impossible to reduce the passenger expenses to any great extent. This is owing to the fact that the public will not permit a curtailment of the train service. They demand the same speed, the same frequency as before, though the trains may carry only one quarter the former number of passengers. Railroad managers do not like to incur public displeasure by even suggesting the taking off of trains or the elimination of other items of expense. Both in the West and in the East the disposition is to do everything within reason to meet public wants and expectations. In fact it may be truthfully said that the tendency is to enlarge rather than contract the conveniences and facilities extended to the patrons of the roads. The most recent evidence of this is found in the action of the roads in the Central Passenger Association in beginning with the 2d of January this year to issue interchangeable five-thousand mile tickets at two cents per mile. It has been reported, too, that some of the larger roads west of Chicago contemplated similar action.

We are glad to see that the difficulties under which the roads labor in this matter of the passenger traffic are beginning to be appreciated. The Board of Railroad and Warehouse Commissioners of Illinois have dealt with the demand for a general reduction in rates from three cents per mile to two cents in a way that must meet the approval of all fair-minded persons. The State Grange of Illinois had addressed a petition to the Board asking for such a reduction. The Board have

found themselves obliged to deny the request and their decision has been announced this week. We had occasion a year ago to refer to the enlightened policy of the Illinois Commissioners, and their latest action is of the same broad-minded character. They give it as their opinion that to order at this time the reduction requested would be unwise and unwarranted, and unjust to the roads. While some of the great trunk lines might be able to stand the loss, yet the smaller roads and those which do almost wholly a local business, and which are now, and have been for the last two years, struggling for existence, would be very seriously affected by it. The action demanded would simply increase the heavy burdens under which the roads are staggering now.

It is, say the Commissioners, a fact well known to those who have taken the trouble to investigate the amount of passenger business done by the railroads in Illinois during the last two years that there has been a large decrease in the number of passengers carried. This is due, not to the amount charged for such service, but to the general depression in all lines of business, the low prices of farm products, and the unsettled financial conditions, which have had their effect on the passenger as well as the freight business. "And it is also a fact, as shown by the sworn reports of the railroads of Illinois, that the capital invested in such property has not paid even a fair interest to the stockholder. This question was before us when we revised the freight schedule in 1895, and the whole question was thoroughly considered. We did not think then, and neither do we feel now, that in justice to both the public and the railroads, because each should stand on the same equality before the law, this reduction should be made at this time. If the country was prosperous our conclusions might be different."

At the very moment that the Illinois Board was making this pronouncement a telegram came from Des Moines saying that the special session of the Iowa Legislature, which convened on Tuesday, would be asked to pass what amounted practically to a two-cent fare bill for the railroads of Iowa. The report added that the scheme had behind it the Iowa State Traveling Men's Association, acting through a committee appointed at the annual meeting in Des Moines some months ago; that the details had been carefully looked after, and that by the time the legislators had been at work a couple of weeks it was expected that 5,000 petitions would arrive asking for the adoption of such a measure. It was furthermore stated that it had been arranged that each person signing the petition should also write letters to the members of both Houses from his district, adding his personal solicitation to the request embodied in the petition. The traveling men ask for the passage of a law requiring the Iowa railroads to sell 1,000, 2,000 and 5,000 mile interchangeable mileage books at a rate of two cents a mile flat. But this, the dispatch tells us, is not all the trouble in store for the railroads. A number of the farmers' organizations are quietly agitating the scheme of asking for a rate of two and one-half cents per mile for every one, this rate to apply to local tickets.

It will be seen that the movement promises to be a formidable one. As far as the proposition for interchangeable mileage tickets is concerned, that problem has not yet been solved, but it may be that the larger roads will see their way clear to the adoption of the idea. As concerns, however, the proposal for a gen-

eral reduction in local rates to  $2\frac{1}{2}$  cents per passenger mile, it is wholly untenable, and has absolutely nothing to commend it. Every argument made against a reduction in the case of the Illinois roads applies with ten-fold greater force to the Iowa roads. We have taken the pains to examine the 1895 report of the Iowa Commissioners (the last report yet issued) to see what the roads now realize on their passenger traffic and what the cost to them is of moving this traffic. It is of course very difficult to ascertain the exact expense of transporting a passenger a mile, a number of indeterminate factors entering into the calculations, and hence not all roads undertake to give the item. The following, however, shows the relation between cost and receipts in the case of ten roads that do report the item.

	<i>Rate received per passenger per mile.</i>	<i>Cost of carrying each pass. per mile.</i>
Albia & Centerville.....	2-78 cents	3-52 cents
Burling. Cedar Rap. & North...	2-63 cents	2-14 cents
Chicago & Northwestern.....	2-08 cents	2-04 cents
Sioux City & Pacific.....	2-61 cents	2-32 cents
Chicago Santa Fe & California..	2-34 cents	2-53 cents
Iowa Central.....	2-47 cents	2-55 cents
Mason City & Fort Dodge.....	2-69 cents	3-69 cents
Omaha & St. Louis.....	2-99 cents	3-78 cents
Sioux City & Northern.....	2-69 cents	6-69 cents
Wabaab.....	2-14 cents	1-97 cents

The foregoing reveals highly significant results. It will be observed that the general averages of the rates received run above  $2\frac{1}{2}$  cents. Yet of the ten roads included in the list, no less than six report (according to their sworn statements) that the cost of moving a passenger per mile was greater than the amount received per passenger mile. In one instance it cost 6-69 cents per mile to transport the passengers, while the amount paid by the passengers for the service was only 2-69 cents per mile. In other words, there was a loss of four cents per passenger mile on every passenger moved. Even on such a system as the Chicago & North Western, with its enormous volume of passenger business, the expense of the service almost equals the receipts. That is to say, while the average rate received was 2-08 cents per passenger mile, the cost was 2-04 cents. Briefly the profit was but four hundredths of one cent per passenger mile. This means that though the company moved 340,892,897 passengers one mile, the profit on the whole passenger business of this large system was but \$136,357. Nothing else is needed to show how utterly indefensible the idea of a general reduction in rates by legislative enactment is.

#### THE LATE YEAR'S FOREIGN TRADE.

The more the statistics of our foreign trade for the late calendar year are studied, the more noteworthy they become. It is quite evident that the year will take rank as one of the most remarkable in the external commerce of the country. When the future historian shall write the history of 1896, with its momentous issue and eventful results, he will most certainly assign to the foreign trade a foremost place among the principal and controlling influences of the year. Indeed, it is almost startling to contemplate what the result might have been the last six months with confidence so deeply disturbed both here and abroad and with the greatest anxiety prevailing throughout the mercantile and financial world, if during this critical period the state of our foreign trade had not been so decidedly in the country's favor, enabling us to gain control of the gold current at a time when a further outflow of the metal must have been attended with most serious consequences.

It should be remembered that as late as July we were exporting gold in large amounts; that then the nomination of Bryan on a free silver platform produced so great a convulsion in business circles that the Treasury gold reserve, replenished only a few months previously, was again in danger of serious depletion, having dropped below 90 million dollars; that at this juncture banks and banking institutions on the one hand combined to restore the Treasury reserve by yielding up their own gold, and a syndicate of foreign exchange houses on the other hand undertook to stop further gold exports. Looking back now, it is seen that this latter action was not only wise and timely, and of inestimable service in checking the development of panicky conditions, but was based on a state of our foreign trade, present and prospective, that fully warranted the step taken. The exchange syndicate was never obliged to sell any considerable amount of bills, and within thirty days after the compact was made the gold current was reversed and the metal was flowing this way in large amounts, thus allaying anxiety on that score. But obviously the movement could not have been successful—could have been little more than a temporary expedient, whose inefficacy might have become patent even before election day—except for the aid which the favorable trade situation gave the effort. Of course it is safe to say that the movement was undertaken only after those back of it had satisfied themselves of its feasibility through their knowledge of the supporting character of this state of our financial relations with the outside world, though it may well be questioned whether even they could have foreseen a trade balance of the dimensions now disclosed.

In part the large excess of merchandise exports over merchandise imports is due, as we shall presently see, to a contraction in the imports, this contraction of course having followed directly from the industrial depression, which led to a curtailment of consumption and diminished the purchasing power of our people. But the large exports, large almost beyond precedent, the two-fold result of abundant supplies at home and deficient supplies abroad, must be regarded as one of those extremely fortuitous combinations of circumstances which on several previous occasions in the country's history have come just at the moment when needed and prevented disaster. When the gold imports began last August many looked upon them as forced. That idea was soon dispelled, and the extent of the trade balance during the six months to December 31, amounting to over a quarter of a thousand million dollars, is the best evidence that the movement was an entirely natural one. Indeed while we received 65 million dollars gold net in these six months, the wonder now is, in view of the phenomenal situation referred to, that we did not receive a great deal more; and the fact that we did not receive more, and that at the close of the year exchange rates were close up to the gold export point again, shows that notwithstanding the election removed doubt regarding our standard of values, conditions have by no means returned to a normal state.

Both the merchandise balance for the full year 1896 and that for the last six months were in excess of that for the corresponding periods of any previous year in the country's history. For the twelve months the balance reaches the extraordinary sum of \$325,322,184. The only other year that has approached 1896 in that regard is 1878, when the merchandise excess was \$305,-

479,590. But there is this difference between the two years: In 1896 \$250,365,753 of the amount, as already shown, accrued in the last six months, while in 1878 only \$149,625,055 of the amount accrued in that period. The very largest balance we ever had in the six months to December 31 prior to 1896 was \$165,057,663 in 1893. The amount for 1896 is over 85 million dollars in excess of this previously unexcelled total. The following shows the results both for the half-year and the full year back to 1874.

## EXCESS OF MERCHANDISE IMPORTS OR EXPORTS.

12 months ending Dec. 31—		6 months ending Dec. 31—	
Year.	Exports.	Year.	Exports.
1874.....	\$7,758,646	1874.....	\$2,232,487
1875.....	7,784,496	1875.....	29,579,698
1876.....	Exports. 163,319,464	1876.....	Exports. 113,255,681
1877.....	Exports. 139,856,112	1877.....	Exports. 101,959,699
1878.....	Exports. 305,479,590	1878.....	Exports. 149,625,055
1879.....	Exports. 251,557,629	1879.....	Exports. 136,520,118
1880.....	Exports. 192,876,246	1880.....	Exports. 161,712,752
1881.....	Exports. 183,339,679	1881.....	Exports. 65,339,713
1882.....	Exports. 15,138,439	1882.....	Exports. 54,575,469
1883.....	Exports. 108,143,100	1883.....	Exports. 62,059,081
1884.....	Exports. 120,104,568	1884.....	Exports. 109,348,733
1885.....	Exports. 100,381,125	1885.....	Exports. 45,067,432
1886.....	Exports. 48,974,832	1886.....	Exports. 50,953,570
1887.....	Exports. 6,482,566	1887.....	Exports. 33,572,693
1888.....	Imports. 3,850,321	1888.....	Exports. 27,924,979
1889.....	Exports. 56,584,382	1889.....	Exports. 87,239,638
1890.....	Exports. 34,104,822	1890.....	Exports. 52,826,195
1891.....	Exports. 142,188,703	1891.....	Exports. 155,450,274
1892.....	Exports. 97,488,765	1892.....	Exports. 50,064,293
1893.....	Exports. 109,592,602	1893.....	Exports. 165,057,663
1894.....	Exports. 148,789,307	1894.....	Exports. 80,303,233
1895.....	Exports. 23,190,780	1895.....	Exports. 27,925,824
1896.....	Exports. 325,322,184	1896.....	Exports. 250,365,753

The contrast here with the preceding year (1895) is particularly striking, showing what a great change in the situation occurred. While in 1896 exports exceeded imports in amount of 325 million dollars, in 1895 the excess was only 23 million dollars, a difference in favor of the late year of 302 million dollars. Similarly in the last six months the favorable balance was 250 million dollars in 1896, against not quite 28 million dollars in the same six months of 1895, a difference in favor of 1896 of 222 million dollars.

The improvement of 302 million dollars in the exhibit for the twelve months was the result roughly of a reduction of 121 million dollars in the imports and an increase of 181 million dollars in the exports. The total of the latter exceeds a thousand million dollars—in exact figures, \$1,005,878,417. There has been one fiscal year (ending June 30) when the total was larger than this and ran in excess of a thousand million, but never before has the thousand million mark been reached in the calendar year. The following shows both the merchandise imports and the merchandise exports back to 1870.

## MERCHANDISE EXPORTS AND IMPORTS (CALENDAR YEARS).

Calendar Year.	Exports.	Imports.	Excess.	Total Foreign Trade.
1870.....	403,540,010	461,189,039	Imp. 57,548,049	864,729,048
1871.....	466,838,066	573,111,099	Imp. 116,273,011	1,039,949,165

1873.....	567,757,967	665,248,018	Imp. 97,490,181	1,233,005,985
1874.....	569,872,553	592,115,907	Exp. 7,246,646	1,161,988,460
1875.....	510,847,432	503,162,936	Exp. 7,684,496	1,014,010,368
1876.....	590,566,690	427,347,185	Exp. 163,219,505	1,018,013,791
1877.....	590,302,418	460,446,300	Exp. 129,856,118	1,050,748,718
1878.....	737,091,973	451,612,383	Exp. 285,479,590	1,188,704,356
1879.....	765,159,825	513,602,708	Exp. 251,557,099	1,278,762,621
1880.....	899,653,432	606,807,176	Exp. 292,846,256	1,506,460,608
1881.....	833,549,137	670,309,418	Exp. 163,239,719	1,503,858,555
1882.....	767,931,046	762,943,507	Exp. 15,987,539	1,530,874,555
1883.....	795,909,816	667,066,216	Exp. 128,843,600	1,462,976,032
1884.....	749,368,429	690,361,960	Exp. 120,106,468	1,439,730,387
1885.....	698,248,796	657,668,673	Exp. 100,881,125	1,355,917,469
1886.....	713,404,021	669,489,189	Exp. 43,914,832	1,382,893,210
1887.....	715,801,014	708,818,478	Exp. 6,982,536	1,424,619,522
1888.....	661,761,050	725,411,371	Imp. 163,650,321	1,387,172,421
1889.....	827,106,347	770,521,905	Exp. 56,584,382	1,597,628,252
1890.....	877,532,648	823,307,726	Exp. 54,224,922	1,699,840,374
1891.....	1,070,509,646	823,320,043	Exp. 247,189,603	1,893,829,689
1892.....	936,420,060	840,930,935	Exp. 95,489,125	1,777,350,995
1893.....	876,831,848	766,339,846	Exp. 110,492,002	1,643,171,694
1894.....	825,102,549	676,913,941	Exp. 148,188,607	1,502,016,496
1895.....	824,960,136	601,029,347	Exp. 223,930,789	1,425,989,483
1896.....	1,005,878,417	680,556,333	Exp. 325,322,184	1,686,434,650

Besides the large balance on the merchandise movement our exports of silver are also steadily growing. In 1890 when the silver purchase law was enacted, the net silver shipments suddenly dropped from 21 million

dollars to only 4 million dollars; exports and imports of silver in ores were not then included in the figures; if they had been, the excess for 1889 would have been about 14 million dollars, while for 1890 the balance would have been on the side of the imports in the sum of about 2½ million dollars. Now we have for 1896 a net outflow of silver (including ores) in the sum of 33½ million dollars, the largest amount for any calendar year on record. The following shows both the silver movement and the gold movement for each year since 1870.

## GOLD AND SILVER IMPORTS AND EXPORTS.

Year Ending Dec. 31—	Gold.		Silver.	
	Exports.	Imports.	Exports.	Imports.
1870.....	68,109,745	10,480,581	15,259,100	12,586,894
1871.....	44,915,975	6,811,048	32,524,195	10,062,467
1872.....	68,638,125	11,113,290	32,018,799	10,068,714
1873.....	25,406,118	20,537,254	39,076,207	9,212,185
1874.....	34,149,001	7,422,906	35,726,283	7,830,988
1875.....	53,413,947	14,338,789	39,076,158	8,547,357
1876.....	31,281,789	23,078,891	35,544,419	10,769,043
1877.....	18,932,639	11,629,856	29,358,929	12,141,569
1878.....	8,656,348	10,477,569	1,821,911	13,309,252
1879.....	4,116,448	78,767,941	74,652,405	14,425,017
1880.....	3,062,459	78,644,698	70,582,239	11,631,025
1881.....	2,603,543	60,898,620	57,796,077	8,565,845
1882.....	38,721,079	13,402,528	25,318,551	9,098,385
1883.....	6,048,770	22,055,961	16,007,191	14,153,367
1884.....	40,948,240	27,057,567	13,900,589	15,604,777
1885.....	14,117,907	23,045,811	12,228,104	17,776,714
1886.....	11,233,222	41,309,181	25,955,076	17,223,465
1887.....	9,144,426	44,839,299	35,744,837	10,772,614
1888.....	24,536,447	10,990,773	23,565,874	15,007,969
1889.....	60,933,480	12,004,632	38,924,828	10,694,230
1890.....	24,033,074	20,230,090	48,832,984	22,426,119
1891.....	72,086,581	44,970,110	34,114,471	19,192,750
1892.....	76,632,068	77,450,946	50,081,110	27,726,252
1893.....	79,883,798	73,280,575	46,703,151	27,765,696
1894.....	101,819,735	21,350,807	44,499,128	17,633,594
1895.....	104,977,403	34,596,892	70,571,010	24,373,347
1896.....	66,262,465	104,724,562	47,777,097	30,234,357

NOTE.—For years 1893, 1894, 1895 and 1896 the figures embrace gold and silver in ore; in the years preceding both were included in the merchandise movement.

If 1896 has been distinctive as regards the silver movement, the foregoing shows that it was also distinctive as regards the gold movement. The net gold imports for the twelve months were, roughly, 47½ million dollars. In the last six months the net imports, as already pointed out, were \$364,951,686, indicating a net export the first six months of 17 million dollars. The noteworthy feature in the net import of 47½ million dollars for the twelve months is that it is the first time in nine years—that is since 1887—that there has been a net influx of gold during the calendar year. It will be interesting to have the combined result on the merchandise, gold and silver movements for the twelve months, as follows. It will be observed that the total has varied greatly in the different years, though we have not the space to go into an analysis of the causes for this.

## YEARLY TRADE BALANCE.

	1896.	1895.	1894.	1893.	1892.
Merch. exports.....	325,322,184	21,190,789	149,798,307	109,502,062	97,480,705
Silver exports.....	33,787,841	29,537,739	29,612,213	18,592,052	14,240,582
Total.....	359,110,025	50,728,528	179,410,520	128,094,114	111,721,287
Gold imports.....	47,777,097	*70,571,010	*80,109,124	*6,703,151	*59,081,110
Grand total.....	311,332,927	121,299,538	259,519,644	134,797,265	170,802,397

\* Excess of exports.

In the merchandise exports, besides the fact that the total is in excess of any previous year, a noteworthy and gratifying feature is that the gain has been very general, extending not only to the leading staples, but practically to the whole list of articles. The cotton exports were 233 million dollars against 189 million, the breadstuffs exports 182 million against 125 million, &c. The following table compares the figures for the main staples for the last six years.

## EXPORTS OF LEADING PRODUCTS FOR SIX CALENDAR YEARS.

Exports.	1896.	1895.	1894.	1893.	1892.	1891.
Cotton.....	233,398,800	189,860,645	200,113,772	204,106,023	217,063,658	277,038,511
Breadstuffs.....	182,485,514	125,266,871	125,601,486	187,396,034	248,211,221	232,821,992
Provs. &c. 124,176,490	132,456,843	141,742,436	135,205,902	148,488,412	131,054,766	
Cattle, sheep and hogs.....	39,556,029	30,426,800	40,706,585	23,176,180	36,078,890	29,442,808
Petrol. &c. 67,147,221	67,129,700	41,219,748	41,836,265	42,720,157	46,174,835	
Total.....	652,246,854	535,169,458	549,716,929	591,719,206	692,571,277	716,983,612
All oth. exp. 353,612,063	289,690,678	275,385,316	284,112,552	245,840,883	253,577,084	
Total.....	1,005,878,417	824,860,136	825,102,245	837,560,089	946,148,361	970,560,616

What are called the "other exports" in the foregoing, show, it will be observed, an almost uninterrupted growth from year to year. The amount for 1896 is 353 million dollars, against 289 million dollars in 1895, and only 253 million dollars in 1891. In other words, in five years the increase has been 100 million dollars, of which 64 million dollars occurred in 1896. The details of these miscellaneous exports are not yet available, but examining the statement for the eleven months to November 30 we find that the late year's increase has been very widely distributed, as already noted; of copper the exports were \$24,884,119 against \$10,978,232; of iron and steel and manufactures of, \$43,458,748 against \$31,223,834; of wood and manufactures of \$31,681,219 against \$26,348,215, &c.

In the case of the breadstuffs exports, a better price for wheat counted as an influence in swelling the totals. Including flour the wheat exports were, roughly, 154½ million bushels in the calendar year 1896, against about 132 millions in 1895. The average price per bushel realized for the twelve months was 71 cents, against 61 cents; but in December the average was 87 cents, against 62 cents. In the other cereals there was not the advantage of a higher price. We sent out unprecedented amounts, however, in many instances. The corn exports reached 132 million bushels at an average of 33½ cents, against only 62 million bushels at an average of 45 cents in 1895. The total at 132 million bushels is about 30 per cent in excess of the heaviest amount ever previously shipped in any period of twelve months. Even in the case of the minor cereals the outward movement was of very exceptional dimensions; thus of oats the shipments were over 30 million bushels in 1896, against only 2 million bushels in 1895, and of rye we sent out 5½ million bushels, against less than a thousand bushels. The cotton exports were about six million bales, against 5½ million bales in 1895, the increase being made on the crop of 1896, which was a very much better crop than that of 1895; the average price was 7.70 cents per pound, against 6.85 cents, but at the close of the year prices had materially declined, and in December the average price was only 7.3 cents, against 8.3 cents in December 1895.

#### RAILROAD NET EARNINGS FOR NOVEMBER

When we printed our preliminary statement of gross earnings for November in the issue of THE CHRONICLE of December 12, the predominant fact disclosed was its unfavorable character. The statement of gross and net earnings for that month, which we have now compiled, further emphasizes the same fact. The showing for October had been bad, but that for November is a great deal worse. In the gross the loss from last year has been 5½ million dollars, or 9 per cent; in the net it has been 3½ million dollars, or 14.71 per cent. This is the poorest monthly statement that we have had since that for July 1894, the month of the great railroad strike. Out of 134 roads 95 have losses in gross and 86 losses in net. The following shows the totals for November and the eleven months ending with November.

	November, (134 roads.)			January 1 to November 30 (123 roads.)		
	1896.	1895.	Decrease.	1896.	1895.	Inc. or Dec.
Gross earnings	\$7,217,386	\$8,893,707	\$1,676,321	\$6,921,416	\$8,145,137	+1,223,721
Oper. exp.	27,711,299	40,016,119	12,304,820	197,642,778	306,184,741	+108,541,963
Net earnings	19,506,087	27,479,584	7,973,497	181,067,698	167,000,396	+14,067,302

The reasons for this poor exhibit for November are of course well understood, and were set out at length in our article of December 12. The depression in trade occasioned by the silver agitation reached its height in November, business in many instances coming almost to a standstill in election week. The subsequent revival, on the announcement of the success of the sound money cause, was real, but the results could not count in November to any considerable extent. In the Northwest there was a great contraction in the spring-wheat movement, comparison being with the phenomenal spring-wheat crop of the previous year. Besides this there was an extra Sunday in the month in 1896, giving one less business day. In the South the cotton movement was much heavier than in the previous year, but on the other hand there was no Atlanta Exposition as there had been in 1895. Furthermore, storms and bad weather affected operations on many Western roads, the Northern Pacific being practically closed for two-thirds of the month at some points. It should also be remembered that we are comparing with a month in 1895 which had shown quite marked improvement. Indeed, when we look back we find that the present losses, though large, are but little heavier than the previous year's gains. Here is a comparison extending back to 1891.

Year and number of roads.	Gross Earnings.			Net Earnings.		
	Year Given.	Year Preceding.	Increase or Decrease.	Year Given.	Year Preceding.	Increase or Decrease.
November 1891 (138)	\$7,458,451	\$6,255,349	+1,203,102	\$3,718,779	\$2,795,374	+923,405
1892 (131)	\$6,322,782	\$6,124,818	+1,997,964	\$3,137,026	\$2,695,489	+441,537
1893 (131)	\$6,739,620	\$6,143,846	+5,955,774	\$3,305,294	\$2,201,923	+1,103,371
1894 (127)	\$6,938,620	\$6,037,046	+8,901,574	\$3,114,691	\$2,630,261	+484,430
1895 (130)	\$1,085,304	\$8,910,401	+7,825,097	\$2,019,253	\$2,407,057	-3,887,804
1896 (134)	\$7,217,386	\$6,895,707	+3,321,679	\$1,506,087	\$2,879,589	-1,373,502
Jan. 1 to Nov. 30.	\$60,155,907	\$62,988,996	+2,833,089	\$27,133,351	\$28,201,199	-1,067,848
1891 (123)	\$68,061,781	\$67,105,743	+9,956,038	\$32,961,773	\$19,816,250	+13,145,523
1892 (121)	\$64,810,987	\$60,183,897	+4,627,090	\$29,393,190	\$27,508,742	+1,884,448
1893 (130)	\$77,006,452	\$68,059,720	+8,946,732	\$17,689,518	\$20,943,182	-3,253,664
1895 (126)	\$90,054,800	\$64,259,701	+25,795,099	\$19,023,476	\$17,853,818	+1,169,658
1896 (123)	\$83,623,416	\$81,185,187	+2,438,229	\$18,057,668	\$18,000,396	+57,272

Among the separate roads the losses of course are equally heavy, the Pennsylvania (lines directly operated east and west of Pittsburgh) leading with a decrease of \$1,658,000 in gross and a decrease of \$775,000 in net. A very few roads are noted for large gains; the Atchison has \$127,261 increase in gross and \$152,490 increase in net, and the others distinguished in this way are chiefly Mexican and Southwestern roads. The Baltimore & Ohio with \$99,387 gain in gross has \$178,257 decrease in net, but that follows simply from exceptional expenditures on equipment and track. The following is a full list of gains and losses in excess of \$30,000.

#### PRINCIPAL CHANGES IN GROSS EARNINGS IN NOVEMBER.

Increases.		Decreases.	
Atch. Top. & S. F. ....	\$127,261	Wabash .....	\$162,712

Canadian Pacific .....	164,311		

Covers lines directly operated east and west of Pittsburgh; the gross on Eastern lines decreased \$331,200 and on Western lines \$1,024,900.

Through the courtesy of the Collector of Customs at San Francisco we have received this week the details of imports and exports of gold and silver through that port for the month of December, and they are presented below, together

mon Chicago & North Western common, Chicago Rock Island & Pacific, Delaware & Hudson, Delaware Lackawanna & Western, Distilling & Cattle Feeding, General Electric, Lake Shore & Michigan Southern, Louisville & Nashville, Manhattan, Missouri Kansas & Texas preferred, Missouri Pacific, New York Central, New York Lake Erie & Western, New York & New England, New York Ontario & Western, New York Susquehanna & Western preferred, Northern Pacific preferred, National Lead common, Philadelphia & Reading, Southern Railway common & preferred, Tennessee Coal & Iron, Texas & Pacific, Union Pacific, United States Leather common and preferred, United States Rubber common, Wabash common and preferred, Western Union and Wheeling & Lake Erie common.

## Monetary: Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, JANUARY 9th, 1897.

Mr. Rhodes's triumphal procession through Natal and Cape Colony not unnaturally has given offence in the Transvaal, and it is to be feared, therefore, has delayed for some little time the return of better feeling between British and Boers. It has also made more difficult the task of the home government. The demonstrations in Mr. Rhodes's honor appear to have been quite spontaneous, and men of Dutch as well as British descent joined in them. Apparently, therefore, Mr. Rhodes is still the most popular man in Cape Colony, and it is a ticklish thing for the mother country to deal with the most popular man in one of her great colonies. The large majority of Englishmen desire to act fairly towards all parties in South Africa, but it looks as if we cannot act fairly to one side without giving mortal offence to some other. Unfortunately, too, the temper of the Boers just now is tried by the failure of the crops and by the rinderpest; the losses, especially from the latter, are exceedingly heavy. The natives all over South Africa have suffered terribly and are in great distress. There have been fears of native risings in Cape Colony, but the danger has, it is now hoped, passed away.

In India rain has fallen over extensive areas and has done much good, though more is wanted; still it is hoped now that actual famine will be averted. Unhappily the plague in Bombay is carrying off large numbers every day. The natives, especially the working classes, are panic-stricken and are fleeing from the city, although, of course, it must be a wide exaggeration to say that 350,000 have left, which would be more than half the population. The plague has spread to Kurnachee, where it is doing great havoc, and it is feared that it may spread in other directions. Business is paralyzed in Bombay, especially the import business, and there are grave fears that the cotton mills will have to be closed because of the flight of the native work people. The Indian money market is not quite so stringent, although the bank rates remain at 10 per cent, and the real rates to the natives are about 12 per cent.

The Ambassadors at Constantinople are still discussing the reforms needed, but nothing is known as to their action. Little more is known respecting the Spanish decision with regard to Cuba, but the fact that Spanish bonds have risen in Paris seems to indicate that there is a very strong hope amongst the great bankers that the French Government has successfully exerted its influence in Madrid to secure a settlement.

Early this week the tightness in our own money market was relieved by the payment of the interest on the national debt, by the payment also of the interest on the Indian debt held here and by other dividend payments. Altogether it is calculated that the addition in this way to the supply in the open market is not under 8 millions sterling; it is most likely higher and probably reaches 10 million sterling. To-day, yesterday and the day before the loans, borrowed from the Bank of England before the end of the year, have been falling due, and, the re-payments have been causing a great deal of disturbance in the money market. Some institutions have been unable to lend while others have had more money than they could dispose of. Next week the market will settle down and probably for some time will continue moderately easy; a strong demand for gold, however, exists in the open market, which is believed to be for Russia.

The silver market is very quiet, and there is but little demand for Indian Council drafts notwithstanding the great stringency in India. On Wednesday the Council offered 40 lacs and sold only 5; since then, however, it has sold by pri-

vat contract a considerable amount. The reason of the smallness of the demand is chiefly that the banks, fearing the Council would be unable to offer bills some time ago, provided themselves very freely with exchange.

Not very much has been doing in the stock markets this week. In the beginning the American market was neglected, but the last day or two it has been more active; the truth is, however, that the public is not buying in any department, though there is a very confident feeling that we are near a decided improvement. Consols and other high-class securities have been somewhat lower, owing to the perturbation of the money market, and mining securities after being depressed by the Rhodes incident have recovered.

The best market, perhaps, is that of Argentine securities. Trade there is exceedingly good, and the railway traffic returns, week by week, show large advance; besides Congress has passed a bill for resuming the full interest on the debt. Owing to all this, Argentine bonds and Argentine railway stocks have been rising steadily, but unfortunately Dr. Romero, the Finance Minister, has resigned, and it is not known who his successor will be. On the Continent the first settlement at the beginning of the year has everywhere passed off quietly, and there is a decided and general improvement in foreign government bonds. The bank dividends now coming due are very satisfactory, most of them showing an increase on 12 months ago.

The Board of Trade returns for December record an increase in the value of the imports over the current month in 1895 of somewhat over 6½ millions sterling, or about 17½ per cent. For the whole of the year the increase is decidedly more than 25 millions sterling, or about 6 per cent. In the exports there is an increase of over £1,100,000, which is, roughly, a little more than 5½ per cent for the month, while for the whole year the increase is about 6½, and generally throughout the country trade is active, and there are signs of expansion in most directions.

The British imports for the year have been as follows:

	1896.	1895.	Difference.	Per Ct.
IMPORTS.	£	£	£	
January.....	38,473,856	36,743,481	+1,730,375	+4.79
February.....	35,476,736	28,134,489	+7,342,247	+26.09
March.....	38,344,750	35,959,890	+2,384,860	+6.63
April.....	35,809,600	34,341,358	+1,468,242	+4.27
May.....	33,349,989	34,752,096	-1,402,098	-4.03
June.....	35,229,255	33,894,584	+1,334,671	+3.98
July.....	34,382,450	35,097,514	-714,064	-2.03
August.....	32,472,622	34,587,396	-2,114,774	-6.11
September.....	33,111,156	30,618,854	+2,492,302	+8.10
October.....	39,576,280	36,959,868	+2,616,412	+7.37
November.....	42,502,969	39,006,941	+3,496,028	+8.96
December.....	43,503,595	36,961,248	+6,542,347	+17.70
12 months..	441,807,335	416,689,658	+25,117,677	+6.02

The exports for the year have been as follows:

	1896.	1895.	Difference.	Per Ct.
EXPORTS.	£	£	£	
January.....	21,127,168	18,224,236	+2,902,932	+15.93
February.....	19,683,456	15,973,095	+3,710,361	+23.22
March.....	20,422,419	18,523,030	+1,899,389	+10.25
April.....	18,426,690	17,252,311	+1,174,379	+6.80
May.....	18,612,927	18,344,744	+268,183	+1.46
June.....	20,530,053	17,900,100	+2,629,953	+14.68
July.....	21,334,785	20,559,486	+775,299	+3.77
August.....	20,301,568	20,481,495	-179,927	-0.87
September.....	19,797,080	19,461,940	+335,140	+1.78
October.....	20,654,997	20,328,866	+326,131	+1.60
November.....	18,539,853	19,540,333	-1,000,480	-5.12
December.....	20,291,206	19,179,538	+1,111,668	+5.79
12 months..	239,922,209	225,890,018	+14,032,193	+6.21

The re-exports of foreign and colonial produce show the following contrast:

	1896.	1895.	Difference.	Per Ct.
RE-EXPORTS.	£	£	£	
January.....	4,825,707	3,887,258	+938,449	+24.14
February.....	5,638,232	4,407,824	+1,230,408	+27.91
March.....	4,623,326	4,846,599	-223,273	-4.60
April.....	5,411,590	6,608,113	-1,196,523	-18.10
May.....	4,770,958	5,215,785	-444,827	-8.52
June.....	4,668,976	5,265,773	-596,797	-11.33
July.....	4,274,686	4,789,951	-515,265	-10.75
August.....	4,198,290	6,189,702	-1,991,412	-32.15
September.....	3,301,511	3,907,836	-606,325	-15.51
October.....	4,759,026	5,460,404	-701,378	-12.84
November.....	4,389,431	4,361,070	+28,361	+0.67
December.....	5,612,812	4,976,992	+635,820	+12.77
12 months..	58,466,165	59,942,381	-3,476,216	-5.79

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1897. Jan. 6.	1896. Jan. 8.	1895. Jan. 9.	1894. Jan. 10.
Circulation .....	26,571,350	25,979,845	25,519,460	25,335,155

Copenhagen.....	4	4	4	4	4	4	4	4

Messrs. Pixley & Abell write as follows under date of January 7:

Gold.—Since our last the movements of gold at the Bank have been unimportant. \$33,000 has been received, while \$15,000 has been taken for export to Monte Video. Supplies in the open market have been readily sold, and the price has risen on extensive purchases for Russia and Japan. Shipments: Bombay, \$50,500; Japan, \$150,000; Colombo, \$200; Calcutta, \$3,250; total, \$203,950. Arrivals: South Africa, \$180,000; River Plate, \$21,000; West Indies, \$47,000; Australia, \$20,000; total, \$268,000.

Silver.—China has been buying moderately, but the demand for India has been very limited owing to the absence of business caused by the plague in Bombay, and with free selling from New York the price has fallen to 29½¢, at which the market closes quiet. Indian price-to-day is 79 Rs. per 100 Tohals. Shipments: Bombay, \$67,200; Calcutta, \$28,000; total, \$95,200. Arrivals: New York, \$151,000; River Plate, \$22,000; West Indies, \$9,000; total, \$182,000.

Mexican dollars.—The price of these coin has fallen to 29½¢, at which a considerable amount has changed hands. Shipments to Peking, \$2,600. Arrivals from West Indies, \$11,000.

The quotations for bullion are reported as follows:

GOLD. London Standard.	Jan. 7.		Dec. 31.	SILVER. London Standard.	Jan. 7.		Dec. 31.

WALL STREET, FRIDAY, JAN. 22, 1897-3 P. M.

**The Money Market and Financial Situation.**—Beginning with Friday of last week there followed a few days when business at the Stock Exchange was in a more flourishing condition than for several weeks past. But the activity has not continued; the trading has largely fallen back into the hands of the professionals, and the usual meaningless drift of prices for speculative securities generally follows.

There are a few features of more or less importance to note, however. It will be remembered that during the four months while the Presidential campaign was in progress there was a gradual liquidation of investment securities, a general disposition to turn everything into cash which could be so converted, and to hoard the cash. The reverse movement is now in unmistakable evidence. Deposits in local banks have increased with almost unprecedented rapidity, and there has been a steadily increasing absorption of investment securities since January first. As a consequence all high-grade railway bonds find a ready market at good prices. The demand for Government bonds is difficult to supply; the offerings are limited, and prices for the 4s of 1925 have this week advanced to a higher point than was reached in 1896, or since October, 1895.

There is a gradual easing up of the European money markets; the Bank rate at Berlin has been reduced from 5 to 4 per cent, and at London from 4 to 3 1/2 per cent. Partly as a result of this reduction our foreign exchange market has become easier. The narrower margin between London and New York interest rates renders the purchase of bills for investment less profitable, and this feature of the market is disappearing. There is no evidence at present that exchange will materially advance in the near future.

There have been more bank failures in the West, but they are strictly local in effect, and the general situation is practically unchanged. There is still only a limited demand for the large accumulation of loanable funds held by banks and trust companies at this centre.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1 to 2 per cent. To-day's rates on call were 1 to 2 per cent. Prime commercial paper is quoted at 3 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £817,216, and the percentage of reserve to liabilities was 52:15, against 50:50 last week; the discount rate was reduced from 4 to 3 1/4 per cent. The Bank of France shows an increase of 2,442,000 francs in gold and 2,890,000 francs in silver.

The New York City Clearing-House banks in their statement of Jan. 16 showed an increase in the reserve held of \$10,518,100 and a surplus over the required reserve of \$52,172,525, against \$43,991,450 the previous week.

	1897. Jan. 16.	Differen's from Prev. week.	1896 Jan. 18.	1895 Jan. 19.
Capital	59,772,700		61,122,700	61,622,700
Surplus	74,888,100		73,017,100	72,024,200
Loans & discounts	491,389,200	Inc. 283,000	453,958,200	490,322,900
Circulation	18,743,900	Dec. 163,900	13,923,400	11,112,100
Net deposits	557,386,300	Inc. 9,318,100	492,403,800	562,022,900
Specie	77,821,300	Ips. 922,300	73,610,500	77,955,300
Legal tenders	113,097,800	Ips. 9,589,900	81,836,000	108,085,500
Reserve held	191,518,100	Inc. 105,181,000	153,446,500	186,040,800
Legal reserve	139,346,575	Inc. 2,337,025	123,100,950	140,575,725
Surplus reserve	52,172,525	Inc. 8,181,075	32,315,550	45,165,075

**Foreign Exchange.**—The foreign exchange market has been dull and weak. Owing to the easier money markets abroad, the investment demand is no longer a feature, and rates, especially for short sterling bills, are lower.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4 8 1/4 @ 4 8 1/4; demand, 4 87 @ 4 87 1/4; cables, 4 87 1/2 @ 4 87 1/2.

Posted rates of leading bankers follow:

	January 22.	Sixty Days.	Demand.
Prime bankers' sterling bills on London	4 85 1/2 @ 4 86	4 88 @ 4 88 1/2	
Prime commercial	4 84 @ 4 84 1/4		
Documentary commercial	4 83 1/4 @ 4 84		
Paris bankers' (francs)	5 18 1/4 @ 5 18 3/4	5 16 1/2 @ 5 16 3/4	
Amsterdam (guilders) bankers	40 1/8 @ 40 1/8	40 1/8 @ 40 3/8	
Frankfort or Bremen (reichmarks) b'k's	95 1/8 @ 95 1/8	95 1/8 @ 95 3/8	

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1-16 discount, selling 1-16 premium; New Orleans, bank, \$1.00 premium; commercial, par; Chicago, 50c. per \$1,000 discount; St. Louis, 25c. per \$1,000 discount to par.

**United States Bonds.**—Government bonds are in demand at advancing prices. Sales at the Board include \$223,000 4s, coup., 1925, at 123 3/8 to 123 1/2; \$19,000 4s, reg., 1925, at 120 1/4 to 120 1/2; \$15,000 4s, coup., 1907, at 112; \$23,000 4s, reg., 1907, at 111 1/4 to 111 3/8; \$8,000 5s, reg., at 113 1/4, and \$5,000 5s, coup., at 114 3/4. The following are the closing quotations:

\* This is the price bid at the morning board, no sale was made.

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns	\$4 86 @ \$4 89	Fine silver bars	64 1/2 @ 65 1/2
Napoleons	3 85 @ 3 88	Five francs	— 93 @ — 95 1/2
X Reichmarks	4 74 @ 4 78	Mexican dollars	— 50 @ — 51 1/4
25 Pesetas	4 77 @ 4 81	Do uncom'lal.	— — @ — —
Spain, Doubloons	15 55 @ 15 75	Peruvian sole	— 45 1/2 @ — 46 1/4
Mex. Doubloons	15 50 @ 15 75	English silver	4 80 @ 4 86
Fine gold bars	par @ 1/4 prem.	U. S. trade dollars	— 65 @ — 75

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$53,500 Virginia fund, debt 2-3s of 1901 at 61 1/2 to 62 and \$10,000 Virginia 6s deferred trust receipts, stamped, at 6.

There was an exceptionally strong and active market for railway bonds during the early part of the week. On Monday the volume of business was larger than at any time since the period immediately following the election and was well distributed throughout the list. Since Monday there has been a gradual falling off in the amount of business and prices have not been sustained in all cases.

The Hocking Valley issues have suffered most severely, the 5s having lost 9 points and the 6s 11 1/2 points on rumors of a receivership. Among the strong features are Atchison, Texas & Pacific, Mo. Kan. & Texas and Oregon Short Line bonds. The activity has been most pronounced in the Atchison, Ches. & Ohio, North West., Rock Island Northern Pacific, Erie, Mo. Kan. & Texas, Ore. Ry. & Nav., Ore. Short Line, Reading, Southern Ry., Texas & Pacific and Wabash issues.

**Railroad and Miscellaneous Stocks.**—The activity in the stock market noted at the close last week continued on Monday, when the volume of business was much larger than of late; there was a liberal taking of profits, which in many cases were tempting; and a reaction followed. Burlington & Quincy, Mo. Pacific and Manhattan Elevated had advanced 3 per cent or more and the average advance of the active list was about 2 per cent. Since Monday there has been a considerable decline in the amount of trading and some recession in prices. The bituminous coal securities have been especially weak, led by Wheeling & Lake Erie and Hocking Valley. The anthracite shares have also suffered a decline. Long Island has lost 7 points within the week on limited sales.

The following table shows the prices at the close last week, the highest during this week and the closing to day of some of the active railway stocks:

	Closing last week.	Highest this week.	Closing to-day.
Burlington & Quincy	74 1/8	77 1/4	75 1/8
St. Paul	75 5/8	77 3/4	75 7/8
North West.	103 1/2	105 1/4	104 1/4
Rock Island	68 5/8	70	68 1/2
Central of New Jersey	102	103 1/2	99 1/2
Delaware & Hudson	111 1/4	112 1/2	107 1/2
Long Island	50 1/2	52	43 1/2
Manhattan Elevated	91	94	91 7/8
Missouri Pacific	21 1/8	21 1/4	22 1/4
Wheeling & Lake Erie (preferred)	14 1/4		12
Hocking Valley	16 1/4	17 1/2	10 1/2

Changes in the miscellaneous list are relatively unimportant. Am. Spirits has been unusually active and the preferred advanced nearly 2 points. U. S. Leather was strong on the election of a President. Am. Sugar has fluctuated over a range of nearly 4 points, and closes with a net gain of 2 1/4 points.

## NEW YORK STOCK EXCHANGE—ACTIVE STOCKS for week ending JAN. 23, and since JAN. 1, 1897.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

\* Figures given do not include Oregon Ry. & Nav., Un. Pac. Denver & Gulf, Denver Leadville & Gunnison, Montana Union and Leavenworth Topeka & Southwestern. † These figures include results on leased lines.

‡ Includes earnings from ferries, etc., not given separately. § Mexican currency. ¶ Includes only half of lines in which Union Pacific has a half interest.

‡ Includes operations of the Ohio, Burlington & Northern in both years.

§ Covers results for lines directly operated east of Pittsburgh.

¶ Includes results on affiliated lines.

‡ Covers besides the Atlantic System the Houston & Texas, Central Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.

† Includes St. Louis Alton & Terre Haute for all periods.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:

For the second week of January our preliminary statement covers 65 roads, and shows 3.71 per cent decrease in the aggregate over the same week last year.

Net decrease (271 p. o.).....				221,457

For the first week of January our final statement covers 79 roads, and shows 4.19 per cent decrease in the aggregate over the same week last year.

**Net Earnings Monthly to Latest Dates.**—The following shows the gross and net earnings to latest dates of all STEAM railroads furnishing monthly statements. The compilation includes every road from which we can get returns of this character and in that form is given once a month. Early returns are published from week to week, as soon as issued, but for the convenience of our readers all the roads making returns are brought together here in the week in which we publish our monthly article on net earnings—say on or about the 20th of the month.

The returns of the street railways we give by themselves under a separate head at the extreme end of these tabulations—see page 175.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

c Deducting other expenditures for repairs, replacements and general expenses, net income applicable to interest on bonds in November was \$125,142, against \$101,052 last year, and from January 1 to November 30 \$1,223,139, against \$979,751. This is the result in Mexican dollars treated (according to the company's method of keeping its accounts) as equivalent to 80 cents in United States money—that is, all depreciation beyond 20 per cent has already been allowed for.

d Prior to July 1, 1896, taxes were included in expenses for 1896 only, but since then they have been included for both 1896 and 1895.

e Results of coal mining operations only.

f Includes besides Atlantic System the Houston & Texas Central, Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.

g After allowing for other income received net from January 1 to November 30 was \$508,402, against \$379,012, and from July 1 to November 30 \$289,436, against \$252,967.

h Lower net due chiefly to increase in maintenance of way and maintenance of equipment.

i St. Louis Alton & Terre Haute not included in 1895 for the three months from July 1 to October 1.

j Includes Chicago Burlington & Northern for both years.

k Includes only one-half of lines in which Union Pacific has a part interest. Figures are given exclusive of results on Oregon Railway & Navigation, Union Pacific Denver & Gulf, Fort Worth & Denver City, Leavenworth Topeka & Southwestern, Montana Union and Kansas City & Omaha.

l St. Louis Alton & Terre Haute included for the full period in both years.

m Figures for 1896 do not include results on Albany Fla. & Northern while those for 1895 include them to August 31 only.

n Including income from ferries, &c.

### STREET RAILWAYS AND TRACTION COMPANIES

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

#### STREET RAILWAYS AND TRACTION COMPANIES.

railways from which we have been able to procure monthly returns. As in the case of the steam roads, the returns of the different roads are published by us each week as soon as received, and once a month (on the third or the fourth Saturday of the month) we bring all the roads reporting together, as is done to-day.

## Chicago City Railway.

(Report for the year ending Dec. 31, 1896.)

At the annual meeting Jan. 15 the old officers and directors were re-elected. The capital stock is now \$12,000,000, contracting with \$10,000,000 Jan. 1, 1896, and \$9,000,000 Jan. 1, 1895. The bonded debt remains unchanged at \$4,619,500. The miles run in 1896 aggregated 24,552,900 against \$21,941,000 in 1895 and 21,947,419 in 1894.

The number of passengers carried and the average cost per car mile are as follows:

Year.	Passengers carried.		Cost per car mile.	
	1896.	1895.	1896.	1895.
Cable lines.	46,135,411	53,350,829	10.55	10.24
Horse car lines.	2,474,631	6,918,616	25.80	30.55
Electric lines.	45,924,473	25,528,016	13.40	14.78
All lines.	95,248,915	85,800,461	12.13	12.80

The following table shows the earnings, expenses, etc., for each of the last four years:

Year ending Dec. 31—	1896.	1895.	1894.	1893.
Gross earnings.	\$1,404,406	\$1,476,824	\$1,264,619	\$6,659,890
Op. expenses & tax.	2,677,208	2,807,728	2,534,684	3,422,011

Total sur. Dec. 31.	334,806	332,180	153,469	2,663,412

## North Chicago Street Railroad.

(Report for the year ending December 31, 1896.)

No remarks accompany the brief printed statement furnished by the company of the year's operations. The Chicago "Economist," however, in its issue of Jan. 16, publishes at length the verbal report made at the stockholders' meeting, and to that paper we are indebted for the extracts below.

President Yerkes said in part:

**General Results.**—The increase in receipts, while considerable (\$130,000), was all made in the first half of the year, and was not what we had expected. The condition of business generally reflected itself upon our street railroads. In fact, the summer months, when we expect to make most of our money, were extremely dull, and the preparations made to take advantage of our electrical equipment, in the way of giving extra inducements for riding, were practically thrown away. We have the satisfaction, however, of knowing that the equipment will be in good shape for use this coming year. Our operating expenses were 49 per cent of the receipts. We think they should be reduced to 45 per cent this year.

**Advances to equip West Chicago Street RR. Lines.**—This company is at the present time using the tracks of the West Chicago Street RR. Co. to a considerable extent, and in consequence has arranged to pay the expenses of changing those lines from horse to electricity, we to be reimbursed by the sale of the bonds by the West Chicago Company. This sum expended in that manner, together with the proportionate share of construction of power houses, has been \$1,305,000. We anticipate this sum will be in a short time entirely paid.

**Guaranteed Bonds.**—The different companies for whom this company has guaranteed bonds are now earning an amount more than sufficient to pay their fixed charges.

**Northwestern Elevated RR.**—I think the Northwestern Elevated RR. will take some business from us, but as an elevated road was sure to come, I concluded to build it so that it would never run parallel to the North Chicago RR. for more than three blocks. While the management is distinct, it will work pretty harmoniously with the North Chicago, and will build up an independent business. The Northwestern people have run out of money, and will do no more building until they accumulate funds, but I think they will soon obtain them and will finish the road in about a year.

**Stock, Dividends, etc.**—I think the present rate of dividend can be maintained a good while, if not increased. There is no water in the stock of this company. We have considerable real estate that is not in use and which may presently be disposed of.

**Earnings.**—The earnings, etc., for four years past were:

	1896.	1895.	1894.	1893.
Passengers carried.	56,524,830	53,887,423	49,511,483	60,311,673

Total surplus Dec. 31.	840,741	514,281	1,337,075	1,618,345

The percentage of expenses to income in 1896 is stated as follows: Cable lines, 45.17 per cent; electric lines, 51.22 per cent; horse-car lines, 90.38 per cent; whole system, 49.32.—V. 63, p. 1010.

## West Chicago Street Railroad.

(Report for the year ending Dec. 31, 1896.)

President Yerkes in his report said in part:

**General Results.** The business of the company has been interfered with very materially during the past year in two ways. The extension of the Metropolitan Elevated south west increased the amount which that company was already taking from our road. About the time this was being fairly overcome, the hard times of the last six months of the year commenced, and the result is as might be expected. You will notice, however, that the operating expenses were very materially cut down. The equipment provided during the year will be in good shape and ready for business this year should we have better times. The electric tracks are practically finished.

"During the year we have disposed of 1,431 horses, and now have employed in the propulsion of cars but 165. As soon as it was demonstrated that it was necessary to cut down our expenses, every effort was made to accomplish this end. The results are not perceptible until the latter part of the year, for the reason that it was not until the month of September that the horses could safely be disposed of. Since that time there has been a decrease in expenses of about \$40,000 a month.

**New Consols—Floating Debt.**—The changing to electric power has caused an expenditure during the last six years of over \$6,000,000; \$7,700,000 of debenture bonds have been sold and there were \$3,307,000 on hand, the sale of which was proposed to pay off the debts incurred for the improvements. As financial institutions did not look with favor upon a debenture bond, it was deemed advisable to issue a consolidated mortgage; about \$4,000,000 to take up the first mortgage bonds when due; \$2,700,000 to take up the debenture bonds already sold and \$3,300,000 to pay off the floating debt. The negotiation for the sale of these bonds is still pending, and it is expected when they are sold, together with other bonds which the company now holds, that the whole floating debt of this company will be obliterated, and over \$1,000,000 of cash still be on hand.

The floating debt amounts to between \$3,000,000 and \$4,000,000. Against this the company has the new consols, \$307,000 of Chicago Passenger Railway bonds and \$30,000 of Cleo & Proviso bonds.

**Cleora & Proviso Lease—Guaranteed Bonds.**—It was deemed advisable to make a lease of the Cleora & Proviso Street Ry. to prevent it from getting into adverse hands. The lease, however, provides that there shall be no set price paid to the Cleora Company, but that the profits, whatever they shall be, turned over to the Cleora Company. We have also endorsed the company's bonds. This lease is dated May 1, 1896, and under the same date we made an operating agreement with the Ogden Street Ry.

All of the companies whose securities have been guaranteed are now earning more than their fixed charges, so that there is practically no responsibility resting on the West Chicago Street RR. We are making a great deal of money out of the business they throw into our hands. We intend, therefore, to seize every opportunity that presents itself of making alliances of this kind.

**Operating Cost.**—The cost of operating the cable lines was 52.2 per cent of the gross receipts, contracting with 51.1 per cent last year and 43.6 per cent in 1894. The cost of operating the electric lines was 41.7 per cent. Per mile run the cost of operating the cable lines was 13.88 cents, horse car lines 21.77 cents, electric lines 10.69. The

cost per passenger was 3.87 cents. Maintenance of way in 1896 cost \$83,041, against \$99,759 in 1895 and \$168,454 in 1893, and maintenance of cars cost \$133,495, against \$92,863 in 1895 and \$158,914 in 1893.

#### United Traction Company (of Reading, Pa.)

(Report for the year ending Dec. 31, 1896.)

President John A. Rigg submits to the stockholders the following statement for the fiscal year ending Dec. 31, 1896:

Receipts from all sources.....	\$415,015
Operating expenses.....	245,945
<b>Gross earnings.....</b>	<b>\$169,070</b>
<b>Fixed charges.....</b>	<b>163,804</b>

**Net earnings.....** \$5,266

Car mileage during year, 1,338,777 miles; passengers carried, 5,312,221.

The equipment of the company consists of: 70 car equipments, 47 closed cars, 35 open cars, 3 trail cars, 3 electric snow sweepers, 1 electric snow plow, 3,875 H. P. engines and 2,242 K. W. generators.—V. 61, p. 1118.

#### Lake Street Elevated Railroad.

(Report for the year ending Dec. 31, 1896.)

President D. H. Lunderback in the report says:

"Owing to the general depression the results for the past year have not been up to our expectations, although the net results are better than in the previous year. During the year we have reduced the amount due on coupons unpaid Jan. 1, 1895—held by American Trust and Savings Bank, in the interest of Columbia Construction Company—\$65,000; leaving a balance of \$67,575 due on that account.

"We have equipped the road electrically at an expense of \$341,813, and started its operation on Sept. 20, 1896. Everything is working in a satisfactory manner, and we have been enabled to make some material reductions, and others will follow as soon as our motormen learn to run their motors economically, and we get the full benefit of our electrical distribution of power from the nearest power house. We began running our trains to Wabash Avenue and Adams Street on Nov. 8, 1896, which added about 3,000 passengers per day. Without this extension we would be that much more behind in our last year's business.

"The road is being operated as economically as possible for the number of passengers carried, and we shall now have to rely on the natural growth of our territory and such increased traffic as the completion of the loop may bring us.

The earnings and the balance sheet have been as follows:

For the year 1896 contrasted with 1895 and ten months of 1894, results were:

	Year. 1896.	Year. 1895.	Ten mos. 1894.
Gross earnings.....	\$573,069	\$517,305	\$128,095
Operating expenses.....	339,383	293,006	290,090
<b>Net revenue.....</b>	<b>\$233,686</b>	<b>\$224,299</b>	<b>\$138,004</b>
Taxes.....	\$12,278	\$17,000	\$18,969
Interest on bonds.....	215,125	230,454	276,858

#### Chicago & South Side Rapid Transit.

(Report for the year ending Dec. 31 1896.)

The Chicago & South Side Rapid Transit Co. has been in receiver's hand since Oct. 5, 1893, and on Jan. 15, 1897, as stated in another column, the South Side Elevated RR. was incorporated as its successor. In 1893, under the receiver, the total number of passengers carried was 13,412,313, against 14,218,004 in 1895 and 13,537,791 in 1894. The daily average in 1896 was 33,727, against 33,593 for the preceding year. On

Dec. 31, 1896, the receiver had on hand a cash balance of \$234,676, against \$135,274 on Jan. 1, 1896.

The earnings and expenses are given below:

Years ending Dec. 31—	1896.	1895.	1894.
Passenger earnings.....	\$672,038	\$710,857	\$879,381
Other sources.....	32,535	33,310	32,303
<b>Total gross.....</b>	<b>\$704,610</b>	<b>\$744,167</b>	<b>\$711,684</b>
<b>Operating expenses—</b>			
Maintenance of way.....	\$31,442	\$37,190	\$42,692
Maintenance of rolling stock.....	38,023	33,903	26,975
Conducting transportation.....	337,200	357,415	405,854
General expenses.....	60,266	85,193	76,290
Taxes.....	31,472	46,630	16,750
<b>Total.....</b>	<b>\$497,105</b>	<b>\$560,384</b>	<b>\$568,561</b>
<b>Per cent of operating expenses.....</b>	<b>(70.5)</b>	<b>(75.5)</b>	<b>(81.2)</b>

Special expenses.....	101,626		
<b>Balance, deficit.....</b>	<b>105,109</b>		

—V. 64, p. 41.

#### New Orleans Traction Co. (Limited.)

(Report for the year ending Nov. 30, 1896.)

The report of President Walmley says in part:

**Floating Debt.**—The floating debt of the company is \$276,999, having been reduced \$1,573,493 during the fiscal year by the sale of Crescent City and New Orleans City & Lake RR. 5 per cent bonds, 2,800 shares of New Orleans City & Lake stock and \$314,000 collateral trust notes. To meet the \$276,999 of floating debt, we have in the treasury \$234,000 of the Traction Company's collateral trust notes.

**Power House.**—Favorable negotiations have been had with the General Electric Co., which will give this company its own power house. On this matter the report says:

About one-half of the existing Louisiana Electric Light plant will be acquired by us, together with the entire railroad machinery. The present machinery will be thoroughly repaired and will be re-energized by one Compound Condensing Allis one thousand horse power engine, and one general electric 1,500 Kilo Watt generator, etc., etc., which have been contracted for, and which, with the division wall to be constructed between the two interests, will probably cost about \$100,000. When completed, we are informed, it will constitute a superior power house, with a capacity for all our requirements.

At the present time the service is good, and regular schedules are being operated on all our lines without interruption.

**Railroad Properties.**—The railroad properties and their equipment are in first rate condition. The following additions are proposed:

As we can spare the money the Bayou Road line, three miles of single track, the last remnant of the mule power, should be electrified. The cost would be only about \$25,000. In Carrollton there is a mile and a half of 8-10 miles, which, when completed (at a cost of about \$7,500) will make available to us 16-10 additional miles of track. Litigation has delayed construction, but we think a decision will soon be reached, and then the work will be commenced at once.

Special effort is being made to reduce operating expenses, while maintaining the properties in first-class condition.

**Prospects.**—The property of your company consists of 115 miles of completed track, thoroughly equipped, and embracing franchises running from fifty to sixty years. The lines are well laid geographically to secure the full benefit from the natural and expected growth of the city. If your expectations have not thus far been realized, we advise you to be patient, and await the increase of patronage, which will surely come with the city's development, believing that if this course is pursued you will finally be well compensated.

**Earnings.**—The statement of earnings, etc., of the New Orleans City & Lake and Crescent City railroads for the years ending Nov. 30, 1896, 1895 and 1894 is as follows:

	1896.	1895.	1894.
Gross earnings.....	\$1,334,276	\$1,327,756	\$951,528
Operating expenses.....	778,803	752,158	820,568

**Net earnings.....** \$565,468    \$575,598    \$331,020

The income account of the New Orleans City & Lake and Crescent City railroads for the year is as follows:

#### INCOME ACCOUNT IN 1896.

Net earnings, as above.....	\$565,468
<b>Fixed charges—</b>	
Interest on bonds.....	296,996
Sinking fund.....	30,012
Taxes.....	99,949
Betterments.....	2,016

**Total.....** \$428,993

**Net surplus.....** 126,495

Dividend paid minority stockholders.....58,047

Surplus to New Orleans Traction Co., Ltd.....68,448

—V. 63, p. 794.

#### Baltimore City Passenger Railway.

(Report for year ending Dec. 31, 1896.)

At the annual meeting on Jan. 13, the stockholders voted down a resolution to have the annual report printed for distribution. The following data are therefore taken from the local papers:

**Directors.**—The old board of directors was re-elected as follows: Messrs. E. Austin Jenkins, Bernard Oshin, Gabriel D. Clark, son of the late Gabriel D. Clark, John W. Hall, Alexander Shaw, Walter S. Franklin and O. A. Kirkland. The directors elected Walter S. Franklin, President; A. B. Clark, Treasurer; Henry P. Smith, Secretary.

**General Results.**—President Franklin's annual report showed receipts from passengers during the year of \$1,030,413, a decrease of \$2,113 compared with 1895. The sum of \$18,743 was paid out in settlement of damage claims. The number of passengers carried was 22,976,715.

**Improvements.**—There were about \$145,000 expended for improvements, as follows: Changing the Ant Street Line to electricity; extension of the Madison Avenue car barn to double its capacity; installation of a 750 horse power engine and an additional generator at the Light Street power-house, giving sufficient power to operate the Blue Line with electricity; sinking an artesian well at the Light Street power-house, which supplies all the water used there and avoids the

necessity of using city water; purchase of 20 new electric cars; rebuilding of 20 horse cars, and introduction of the wheel grip on all cable cars. The company's equipment now includes 301 cars.

**Financing Plan.**—The question of raising the money needed to pay the floating debt, which is said to amount to about half a million dollars was raised, and it was voted that "before any issue of bonds, certificates of indebtedness or stock be made by the directors for the purpose of raising money to fund the indebtedness of the company, or for improving or enlarging its equipment, a special meeting of the stockholders shall be called to give assent thereto." The directors were recently on the point of selling \$500,000 of 4½ p. c. certificates of indebtedness, when certain stockholders interfered, claiming that better terms could be secured.

**Earnings.**—The earnings, etc., were as follows:

Year.	Gross.	Net.	Interest.	Dividends.	Balance.
1896	\$1,060,418	Abt. \$3 0,000	\$100,000	\$250,000	Abt. \$10,000
1895	1,058,305	not reported	100,000	300,000	not reported

In 1893 the gross earnings were \$791,459; in 1892, \$780,388; in 1891, \$835,400.

The President stated that the operating expenses and taxes in 1896 amounted to about 66 per cent of the net income. The net earnings for the year are figured on this basis. The taxes amounted to \$180,000, or 18 per cent of the gross revenue, including the 9 per cent park tax.—V. 63, p. 1008.

### Philadelphia Wilmington & Baltimore Railroad.

(Report for the year ended October 31, 1896.)

This road is leased to the Pennsylvania Railroad and its operations have been as follows:

	1895-96.	1894-95.	1893-94.	1892-93.

Interest..... 20,435	
<b>Total.....\$1,518,422</b>	<b>Total.....\$1,518,422</b>

—V. 62, p. 154.

### Western Maryland Railroad Co.

(Report for year ended September 30, 1896.)

President J. M. Hood in the report says in part:

Although the average rates of transportation obtained during the year were less than during the previous year, and the business showed a heavy preponderance in one direction, the operations for the first nine months showed gross earnings of \$493,366, an increase over same months of 1895 of \$27,308 in earnings and \$170 in net earnings; or in other words, the net earnings were fully maintained up to June 30th. About July 1st began in earnest the agitation in connection with the national Presidential election and with it the general demoralization of business, so that for the three months to Sept. 30th the gross earnings fell off \$36,441.

There was expended \$18,708 during the year in a partial compliance with the provisions of the Act of Congress of March 2, 1893,

requiring all rolling stock used in freight traffic to be equipped with automatic brakes, couplers, etc., prior to Jan. 1, 1894, to complete which it is estimated will require a further expenditure of \$1,216.

An appendix to the report adds:

The average rates of transportation received during the year were 1.49 cents per passenger per mile and .932 cents per ton per mile, a decrease in the passenger rate of .02 of a cent per passenger per mile and in the freight rate of .044 of a cent per ton per mile. There were moved during the year 1,164,421 passengers and 1,469,934 tons of freight, the train performance being equivalent to the movement of 225,038 passengers and 81,324 tons of freight one mile.

At the close of the year the equipment of the road was as follows: 51 locomotives, 80 cars in passenger service, 710 freight, etc., cars (including 100 box cars leased) and 3 snow plows.

**Statistics.**—Earnings and expenses of the Western Maryland System (including Western Maryland, Potomac Valley, Baltimore & Harrisburg and Baltimore & Cumberland) were:

	1895-96.	1894-95.	1893-94.	1892-93.

**American Straw Board.—Official Circular.**—A circular to the stockholders from Secretary E. M. Watkins, under date of January 12, says:

Notwithstanding the adverse conditions prevailing during the past year your floating debt has been reduced more than \$109,000. Bonds amounting to \$67,000 have been redeemed leaving outstanding but \$900,000, which amount will be further reduced on Feb. 1, 1897. A considerable sum has been carried to surplus account. The exact figures cannot be given at this time, but we estimate the amount at about \$125,000. Physically your property is in a healthy condition. Our trade relations are of the most satisfactory character and a return to normal conditions would insure the shareholder something on his investment.—V. 62, p. 587.

**Atchison Topeka & Santa Fe Ry.—St. Louis & San Francisco RR.—Braman Suit.**—Touching the decision of the United States Circuit Court not to dismiss the Braman suit, Mr. E. C. Henderson, General Counsel of the St. Louis & San Francisco RR., makes the following statement:

The action which was brought in the United States Circuit Court of Kansas, which is now being prosecuted by Mr. Dwight Braman, was brought before the sale of the Atchison property under forced sale, and sought to have a lien upon the Atchison property in priority to the old general mortgage declared in favor of the St. Louis & San Francisco Ry. Co. for the amount of certain consolidated mortgage bonds of the St. L. & San F. Ry. which it was claimed had come into the possession of the Atchison without adequate consideration. At the time of the purchase from the Atchison committee of its holdings of the consolidated mortgage bonds of the 'Frisco Company, the 'Frisco Reorganization Committee released in respect of all bonds deposited with the 'Frisco Reorganization Committee, the claims against the Atchison Company which were the subject of this suit. Of the entire issue of consolidated mortgage bonds in 'Frisco, there now remain outstanding less than 1 per cent of the total issue, and the complainant in the suit claims to be the holder of only fifteen bonds. The action therefore can possibly affect less than 1 per cent of the entire issue of the old 'Frisco consolidated 4s.

The St. Louis & San Francisco Railroad Company is not a party to the action. The reorganization committee of the 'Frisco are not parties to the action. The action does not in any way relate to the reorganization of the 'Frisco or to the foreclosure sale of the 'Frisco. The

validity of the new 'Frisco securities is not involved in the action, and cannot be affected by its outcome.

M. Victor Morawetz, General Counsel for the Atchison, says: "The suit is against the old company and does not affect the reorganization or the securities of the reorganized company. The amount involved, in any event, is less than \$100,000."—V. 64, p. 81.

**Atlantic & Pacific R.R.—Atchison Topeka & Santa Fe RR.—Proposition to Purchase Bonds.**—A general meeting of the holders of the certificates of deposit for Atlantic & Pacific 4 per cent guarantee trust gold bonds, deposited under the bondholders' agreement dated July 12, 1894, will be held at the office of the State Trust Co., 100 Broadway, New York City, on Jan. 28, 1897, at 11 A. M., for the purpose of acting upon a proposition by the Atchison Topeka & Santa Fe RR. Co. to purchase the \$16,000,000 of first mortgage 6 per cent Western Division bonds of the Atlantic & Pacific, held by the bondholders' committee on behalf of their certificate holders, and also on behalf of the Frankfurt and Amsterdam Committees, representing the guarantee trust 4s deposited with them. A circular from the committee says:

"After protracted negotiations, the committee has obtained from the Atchison Company an offer to purchase the said \$16,000,000 of Western Division bonds for 52½ per cent of their par value, in Atchison general mortgage 4 per cent bonds, carrying the April, 1897, coupon, and 57½ per cent in Atchison preferred stock, amounting altogether to \$8,400,000 of Atchison 4 per cent bonds and \$9,200,000 of preferred stock. The purchaser is also to pay the expenses of foreclosure and reorganization, including the expenses and compensation of the three committees, and of all the litigation connected with the property, and to assume the net floating debt of the receivership, amounting altogether to about \$1,200,000, and, through the ownership of one-half of the stock of the Atlantic & Pacific R.R. Co., will assist the committees in obtaining the control of the Central Division in case the committees decide not to foreclose the Central Division mortgage.

"The Atchison Company, in addition, is to be released from all liability upon the guaranteed trust four per cent bonds, and the pending suits are to be discontinued.

"The committees will retain the possession and control of the \$2,794,000 of first mortgage 6s secured upon the Central Division of the Atlantic & Pacific road, extending from Seneca, Missouri, to Sapulpa, Indian Territory, a distance of about 112 miles, and will also retain one-sixth of the equipment now in use upon the Western Division, as the property of the bondholders, for use upon the Central Division.

The securities offered by the Atchison amount to about \$14,800 per mile in bonds and \$16,200 per mile in preferred stock for the Western Division, which at their present market value will amount to about 48 per cent of the par value of the total issue of guaranteed trust 4 per cent bonds. The \$2,794,000 of first mortgage Central Division bonds retained by the committee, if disposed of upon equal terms, would provide a further dividend of a little over 8 per cent upon the guaranteed trust 4s.

"The above offer is much more favorable than any previously made to the committees, and, after careful consideration, they believe that it is for the interest of the bondholders to accept it. The bondholders represented by the Amsterdam and Frankfurt committees, amounting to \$14,567,000, at meetings just held have approved the proposed sale and authorized the committees to consummate it."

The circular states substantially as follows the reasons for accepting the above offer:

The length of the Western Division is about 565 miles, and the first mortgages are outstanding upon it at the rate of about \$24,000 per mile. The rails are very light, a large part of them weighing fifty pounds to the yard, and the committee is advised that in the near future it will be necessary to re-laid a large part of the road, as well as to spend other large amounts of money in renewals and repairs, and for additional equipment. The Mojave Division, extending from the Needles to Mojave, 212 miles, furnishes the only western connection, and is operated under an exceedingly burdensome lease from the Southern Pacific at an annual rental of \$436,266. It would be impossible for the reorganized company to live and pay any such rental, and unless the rental can be materially reduced a new line will have to be built to take the place of the Mojave Division.

If the Western Division should be reorganized independently, it will thus be necessary for the bondholders, by assessment or by the creation of a prior lien, or otherwise, to provide:

(1) For the expenses of reorganization and floating debt, amounting to about \$1,200,000.

(2) For necessary renewals and repairs of the Western Division, estimated at about \$1,200,000; and, possibly,

(3) For the construction of a line to take the place of the Mojave Division, in case a satisfactory reduction of the rental upon that division cannot be obtained; and, possibly, also,

(4) For the construction of an outlet at the east in case harmonious relations could not be maintained with the Atchison Company.

Upon an independent reorganization it is believed it might be necessary to assess the bondholders about 12 per cent in order to provide for the floating debt of the receivership, the expenses of reorganization, and the necessary repairs and renewals, or to provide for the same by creating a prior lien or otherwise, and that it would not be safe to give the bondholders upon such a reorganization more than 50 per cent in a new bond and the balance in preferred or common stock of the reorganized company. The securities which could be offered to the bondholders upon such a reorganization would probably be worth much less in the market at any time within the immediate future than the securities offered by the Atchison Company.

If the amount required for the floating debt and reorganization expenses (which the Atchison is also to pay) be raised by the sale of Atchison 4s at their present market value, it will be seen that the Atchison 4s issued to acquire this division will amount to about \$17,500 per mile (or about the same rate at which such Atchison 4s are issued on the rest of the Atchison road); while, if this expense of necessary renewals and repairs, estimated at say \$1,200,000, be provided for in the same way, the Atchison 4s then issued for the Western Division will amount to about \$20,000 a mile.

**Purchase Endorsed by Atchison.**—The directors of the Atchison on Thursday ratified the agreement to purchase the \$16,000,000 Western Division bonds of the Atlantic & Pacific on the terms above stated.

**Income Bondholders Committee.**—The committee for the protection of the holders of the Atlantic & Pacific income bonds is about being formed and will announce its programme within a few days.—V. 64, p. 81, 183.

**Baltimore & Ohio Southwestern Ry.—Extension of Bonds.**—Negotiations are under way for the extension of the \$6,468,000 of Ohio & Mississippi first mortgage bonds maturing Jan. 1, 1898. The bonds will be extended at 4 per cent, which will effect a saving of about \$190,000 in annual fixed charges.—V. 63, p. 1006, 1020.

**Belle City Street Ry., Racine, Wis.—Receiver Appointed.**—On Jan. 16 this road was placed in the hands of Hiram J. Smith, as receiver, on application of the Sterling Co. of Chicago, which held a judgment against it for \$3,000. The coupons due Jan. 1, 1897 are in default.

**Cape Fear & Yadkin Valley RR.—Foreclosure.**—The hearing in the foreclosure proceedings closed Jan. 15. Judge Simon-ton intimated that he would give a decision in February. The case, it is thought, will be appealed.—V. 64, p. 4.

**Central of Georgia Ry.—Bonds to Purchase Middle Georgia & Atlantic.**—The terms of the purchase of the Middle Georgia & Atlantic Ry., which embraces also what was formerly known as the Eatonton Branch RR., and extending from Milledgeville to Covington, Ga., about 65 miles, are as follows: \$9,000 per mile of bonds of the Central of Georgia Ry. Co., to be issued, secured by a mortgage upon the property purchased. Of this amount \$8,000 per mile is to be given in exchange for the property, and \$1,000 per mile to be retained by the purchasers, the Central of Georgia Ry. Co., to be expended for betterments and improvements. The bonds are to be dated Jan. 1, 1897, bear 5 per cent interest and mature 1947.—V. 64, p. 82.

**Central Ohio RR.—Baltimore & Ohio RR.—Stockholders' Suit and Committee.**—At a meeting in Baltimore Jan. 16 the stockholders of the Central Ohio appointed a committee, consisting of Basil B. Gordon, J. H. Rieman and W. H. Conkling, with power to name two additional members to bring proceedings against the B. & O. for collection of the sums due under the lease. A charge of fifty cents a share was agreed to to meet the cost of litigation.—V. 64, p. 133.

**Chester & Lenoir RR.—Carolina & Northwestern RR.—Reorganization.**—The "Railroad Gazette" says:

The Chester & Lenoir is to be reorganized under the name of the Carolina & Northwestern. It is stated that the new company will make an issue of \$450,000 of bonds, of which about \$100,000 will remain in the treasury, to be issued to build the line between Newton and Hickory, to give the company a continuous line. G. W. F. Harper, Receiver and President and Treasurer of the old company for many years, will be the executive head of the new company.—V. 63, p. 338.

**Chicago & South Side Rapid Transit.—South Side Elevated RR.—Incorporation of Successor Company.**—The South Side Elevated RR. Co. has been incorporated in Illinois with a capital of \$10,323,800, to take over the property of the old Chicago & South Side Rapid Transit Co., commonly known as the Alley "L." The month given the stockholders in which to come in under the plan of reorganization expired on Jan. 19, and practically no assents were received. The bondholders of the old company will, however, receive the stock in the new corporation in accordance with the plan in V. 63, p. 1158.

The stockholders having failed to come in and pay their assessment, the "Chicago Economist" says.

It is proposed to execute no mortgage and to have no funded debt of any character. The receiver now has on hand \$231,676, and there is a little over \$100,000 on deposit with the trustee, money which was on hand when the receiver was appointed. It is proposed immediately to set about equipping the road with electric motive power and making connection with the loop. The funds necessary to carry out these plans in excess of money on hand will be procured in the shape of loans from banks and carried as floating debt. Negotiations, however, for the sale of the entire property are by no means entirely dead.

The statement of earnings for the year ending Dec. 31, 1896, will be found under "Annual Reports."—V. 64, p. 41.

**Cincinnati & Miami Traction.—Mortgage for \$650,000 Filed.**—At Dayton, O., Jan. 13, this company filed a mortgage for \$650,000 to the Finance Company of Pennsylvania, to secure \$1,000 twenty-year 5 per cent gold bonds to provide for construction between Miamisburg and Hamilton.

**Columbus & Cincinnati Midland RR.—Bondholders' Committee.**—In 1889 the holders of the first mortgage 6s consented to a reduction of the interest on their bonds to 4½ per cent per annum and the extension of their maturity until 1939, the bonds so extended being guaranteed by the Central RR. Co. of Ohio, and this guaranty being guaranteed by the Baltimore & Ohio RR. Co. The Columbus & Cincinnati Midland RR. Co. defaulted on its coupons due July 1st, 1896, and January 1, 1897, and the Central RR. Co. of Ohio, although at present a solvent corporation, has not fulfilled its obligation; neither has the Baltimore & Ohio RR. Co. The following committee has therefore been formed to protect the interests of the bondholders, the committee being practically the same as the former committee in 1889: Charles S. Hinckman, Chairman; George Stevenson, Secretary, 138 South Third Street, Philadelphia; Harry F. West, Edward B. Smith and Charles Parrott. Deposits of bonds are requested with the

Guarantee Trust & Safe Deposit Co., No. 318 Chestnut Street, Philadelphia.—V. 64, p. 134.

**Commercial Cable.—£400,000 Debenture Bonds Sold at 94 in London.**—Baring Bros. & Co. in two hours on Thursday sold in London £400,000 sterling 4 per cent 500-year "debenture" bonds, secured by the new mortgage, at 94. Of this issue one-half is said to have been furnished by John W. Mackay personally, the balance by the company, to provide for telegraph extensions in 1896 and 1897. Mr. Mackay is the principal holder of the loan and he agrees not to sell any more of the bonds under par within two years except with the consent of Baring Bros. & Co.—V. 64, p. 82.

**Consolidated Street Ry. of Grand Rapids, Mich.—Proposition to Bondholders.**—Touching the default on Dec. 1, 1896, a circular was issued by the company, a copy of which is only now at hand. It says in part:

Out of the total authorized issue of \$1,000,000 5 per cent bonds of 1891, \$2,400,000 were sold and \$800,000 remain in trust to retire the \$500,000 6 per cent bonds of the Street Ry. Co., which are the subject of this statement. During the year ending July, 1892, the company earned the interest on its bonds, but since that date there has been a constant annual deficit, which, together with the expenditures necessary for improvements, paving, etc., has resulted in a floating debt of about \$200,000.

In February, 1898, the holders of the 5 per cent bonds of 1891 voluntarily surrendered one half of their holdings to the company, thus reducing the bonded debt \$1,200,000 and the fixed charges \$80,000 per annum, but notwithstanding this the earnings have been so reduced that they barely meet the present interest charges and leave nothing for necessary betterments. All the electrical equipment (wires, power-houses, motors, etc.) used on the line of the old street railway company are the property of the Consolidated Street Ry. Co., so that if an disruption of the properties should take place the Street Ry. Co. would be unable to operate its lines, even within the circumscribed area of its territory.

In view of the situation the bondholders of the Street Ry. Co. are asked to exchange their bonds at par for the 5 per cent bonds of the Consolidated Street Ry. Co. at par less coupon due Feb. 1, 1897. If this exchange is made the total bonded debt will be \$1,800,000 first mortgage 5s, maturing in 1916, covering the entire property, and the fixed charges will be \$90,000, which it is confidently expected the company can earn in the future and at the same time gradually wipe out its floating debt. Deposits of bonds assenting to this proposition should be made with the Central Trust Co., New York City.

We are informed that up to date none of the old 6s have been surrendered in exchange for consols. Of the issue of \$2,400,000 consols, \$1,189,000 were retired and are now held by the Central Trust Co., they having been exchanged for preferred stock.—V. 63, p. 115.

**Diamond Match.—Official Circular.**—A circular announcing the annual meeting to be held Feb. 3 says:

The affairs of the company are in a prosperous condition. The earnings have fully equaled our anticipations, and the bills payable of the company have been reduced to \$345,000. The balance of the insurance money, about \$100,000, remaining unpaid, will be due and doubtless be received during the present month and applied to the further reduction of the debt. A full report will be submitted on Feb. 3.—V. 63, p. 1062.

**Englewood & Chicago Electric Ry.—Receiver Appointed.**—At Chicago, Jan. 19, this property was placed in the hands of General Manager G. Herbert Condit as receiver on a judgment for \$1,200 in favor of Stephen D. Bayer. A committee has been formed for the protection of the bondholders. Bondholders are requested to deposit their bonds without delay with the Manhattan Trust Company. The members of the committee are: Alfred S. Heidelberg, of Heidelberg, Ickelheimer & Co.; Samuel R. Shipley, President of the Provident Life & Trust Co., of Philadelphia; Jules S. Bache, of J. S. Bache & Co., and Isaac L. Rice.—V. 61, p. 1018.

**Erie RR.—Extension of N. Y. & Erie 7s Due May 1.**—The company has arranged with J. P. Morgan & Co. to extend the New York & Erie first mortgage 7s (for \$2,482,000) due May 1, 1897, for fifty years at 4 per cent interest, both principal and interest to be payable "in United States gold coin of the present standard of weight and fineness, without deduction for any taxes which the railroad company may lawfully be required to retain therefrom." Holders desiring to make the extension must deposit their bonds with J. P. Morgan & Co. before April 1 and pay a premium of \$25 per bond in cash. For this they will receive \$85 per bond for the coupon due May 1, without deduction. Bonds not extended will be paid by the bankers at maturity. The bankers announce that they are prepared to buy at 104, less accrued interest at 3 per cent to May 1, any of the bonds which holders may desire to sell rather than extend.—V. 63, p. 922.

**Hestonville Mantua & Fairmount Passenger Ry., Philadelphia.—Annual Meeting.**—At the annual meeting held Jan. 10 the following directors were elected: President, Isaac Blum; Charles H. Banes, Simon J. Martin, Ferdinand Marks, George D. McCreary, Samuel Y. Heebner.

**Earnings.**—Gross earnings for the year ending Dec. 31, 1896, were \$549,896 against \$523,212 in 1895. Net earnings in 1896 were \$224,669; fixed charges, \$89,019; dividends, \$65,169, balance, surplus, \$70,481. During 1896 carried 10,733,367 passengers, against 10,304,517 in 1895.—V. 62, p. 779.

**Long Island RR.—Mr. Little's Examination.—No Dividend Expected.**—Mr. Little is examining the company's accounts for the syndicate that recently agreed, provided his report should be favorable, to purchase the Corbin interest in the stock. It is understood that no dividends will be paid for the present, and possibly not until the floating debt of \$900,000 is paid. See balance sheet of Sept. 30, 1896, in V. 63, p. 1010.—V. 64, p. 83.

**Metropolitan West Side Elevated R.R. of Chicago.—Receiver Appointed.**—At Chicago, Jan. 20, this road was placed in the hands of Dickinson McAllister, receiver, upon application of Adrian Iselin, Jr., and George G. Haven, of New York, trustees under the mortgage. The company defaulted upon interest due last August amounting to \$37,000, and the bill alleges will be wholly unable to pay the instalment of interest due Feb. 1, 1897. Foreclosure sale and reorganization will be carried out as rapidly as possible.—V. 64, p. 135.

**Mobile & Ohio R.R.—Statement for the Six Months ending Dec. 31.**—The following statement for the six months ending Dec. 31 (December partly estimated) has been furnished to the CHRONICLE:

Six months ending Dec. 31—	1896.	1895.
Gross revenue (Dec., 1896, partly estim'd).	\$1,991,675	\$1,593,838
Operating expenses	1,234,658	1,106,419
	\$756,937	\$747,419
New equip'm't, principal of car trust, etc....	2113,922	69,822
	\$643,163	\$717,597
Interest charges.....	521,383	529,394
Surplus over all.....	\$121,782	\$198,203

x Includes \$17,982 for new construction.

z Includes \$57,000 for 6 additional 10-wheel engines.

"The foregoing statement includes the entire expenditure incident to operation, maintenance and betterment, with the exception of the balance due for account of dock improvement, which will be provided for from wharfage receipts, and the entire amount of fixed charges excepting a small contingent rental charge. Since the close of the last fiscal year (June 30, 1896), the cost of property account has not changed. The funded debt has been diminished by \$22,500 purchased for account of the sinking fund. The company has no floating debt. The car trust debt has, by payment of \$56,822 since July 1, been reduced to \$163,645."—V. 64, p. 42.

**New York & Canada R.R.—Delaware & Hudson Canal—Guaranteed Debentures.**—The New York & Canada issued in 1896 \$1,000,000 of 4½ per cent gold debentures, due May 1, 1904, to represent a portion of the advances made to it by the Delaware & Hudson, leaving the total of said advances \$3,774,865. The debentures are endorsed as follows:

The payment of the within debenture bond and the interest thereon, according to the terms of said bond and the coupons thereto attached, is hereby guaranteed by the President, Managers and Company of the Delaware & Hudson Canal Company.

The President, Managers and Company of the Delaware & Hudson Canal Company,

By

..... Treasurer.

—V. 63, p. 880.

**New York Susquehanna & Western R.R.—Delaware Lackawanna & Western R.R.—Litigation.**—The "New York News Bureau" says:

Officials of the New York Susquehanna & Western R.R. Co. have received a copy of Judge Craig's decision, handed down at Stroudsburg, Pa., in the Lackawanna injunction suit against the Susquehanna, to prevent the latter from taking up sidings owned jointly by both companies. The Susquehanna, according to this decision, is required to repay the rails taken up, the cost of which will not exceed \$50. The other points decided by the Court are claimed to be very important and favorable to the Susquehanna Company.

**Susquehanna Connecting.**—This company has been incorporated to build a line in connection with the New York Susquehanna & Western, in order to give the latter company a connection with coal lands in Eastern Pennsylvania. The line to be constructed is about 22 miles long and is to begin at what is called Paddy's Land, a point about ten miles from Wilkes-Barre, extending to Winton, where it connects with the Wilkes-Barre & Eastern. The New York S. & W. road, it is said, pays each year something over \$200,000 to other railroads for hauling coal from collieries controlled by the companies to its Wilkes-Barre & Eastern line. The new road will save the money so paid out. The new line, it is said, will cost \$50,000 to \$60,000 a mile to build.—V. 63, p. 879, 1159.

**Northern Pacific Ry.—Remaining New Securities to be Ready Jan. 25.**—Messrs. J. P. Morgan & Co. give notice to holders of their reorganization certificates that on and after Jan. 25 they will begin the issue of new securities in exchange for certificates representing the following securities, which complete the list of those affected by the reorganization:

Northern Pacific R.R. third mortgage, consolidated mortgage bonds and dividend certificates; Northern Pacific & Montana R.R. 1st mortgage bonds; James River Valley R.R. 1st mortgage bonds; Northern Pacific & Manitoba R.R. terminal bonds; Spokane & Palouse R.R. 1st mortgage bonds; Helena & Red Mountain R.R. 1st mortgage bonds.—Vol. 61, p. 135.

**Northwestern Elevated R.R., Chicago.—Annual Meeting of Construction Company.**—At the annual meeting of the Construction Company last week no financial statement was presented, but it is stated that practically nothing has been done since the meeting last October (see report, V. 63, p. 503). The Construction Company is said to have about \$400,000 of its stock in the treasury unsubsribed. The loan for \$3,500,000 which has been talked about for several months has not yet been placed. As to prospects of construction, see Mr. Loufback's statement in the report of the North Chicago Street R.R. Co. on another page.—V. 63, p. 503.

**Ohio Coal Roads.—Understanding as to Bituminous Coal Traffic.**—At a meeting of the Ohio Coal Traffic Association at Chicago, Jan. 19, an agreement was reached regarding the bituminous coal business by the representatives of seven dif-

ferent roads, including the Baltimore & Ohio, the Pennsylvania, Chesapeake & Ohio and the Ohio Southern. As the new receiver of the Columbus Sandusky & Hocking desired time to understand the situation, the meeting was adjourned until Jan. 26 at Columbus, Ohio.

The new agreement proposed was to abandon concerted action on rates and instead to allot the traffic on the basis of records taken for the last three years, approximately, it is understood, as follows: Hocking Valley 28, Toledo & Ohio Central 18, Wheeling & Lake Erie 14½, Cleveland Lorain & Wheeling 13½, Columbus Sandusky & Hocking 10, Baltimore & Ohio 8, and Walhonding Valley 6. The Columbus Sandusky & Hocking has been holding out for 15 per cent, although the records in recent years show a coal tonnage of only 10 per cent.—V. 63, p. 881.

**Ohio River & Charleston R.R.—Extension.—New Bonds.**—This company, controlled by the Finance and Investment Companies of Philadelphia, has decided to extend its lines from Blacksburg, S. C., to Gaffney, S. C. There will be an issue of \$600,000 bonds on the road in North and South Carolina for the purpose of building branches and making extensions. All the bonds required for the new work at present decided upon, it is stated, have been underwritten, but the shareholders will first be allowed to subscribe.—V. 64, p. 27.

**Ohio Southern R.R. Co.—Time for Deposit of Firsts Extended till Feb. 6.**—The first mortgage bondholders' committee, Wm. A. Read, Chairman, announces that it has received deposits of more than a majority of the bonds, but, owing to the inability of many bondholders living at a distance to deposit their bonds within the required time, the committee has decided to extend the time for deposit until Feb. 6, after which date no bonds will be received except upon the payment of a penalty to be fixed hereafter. Application will be made at once to list the Trust Company receipts on the New York Stock Exchange.—V. 64, p. 145.

**Oregon Short Line & Utah Northern.—Coupon Payment.**—Interest due January 1, 1897, on Utah & Northern consol. 5s, together with interest thereon, in all \$35 06 per coupon was paid on and after January 19, 1897, at the office of the Union Trust Co., New York City, or at the office of James G. Harris, No. 92 Ames Building, Boston.—V. 64, p. 135.

**People's Ry. Co. (St. Louis)—Payment of Interest Deferred.**—"Electricity" says: "This company has deferred payment of interest on its million dollar bonded debt, due January, to March 10. This is the third time that interest has been deferred in the past year, and there is talk of a receivership in the event of the non-payment of the interest on March 10."

**Philadelphia Reading & New England R.R.—Notice to Bondholders.**—Holders of first mortgage bonds have their attention directed to the advertisement of the Wilson Committee, which appears in another column. As to the position of affairs the committee furnishes to the CHRONICLE the following statement:

The old committee, of which Mr. Fletcher is Chairman, has been in existence for over three years, and is "the bondholders' committee," representing all the classes of bonds, whilst we are representing first mortgage bonds only. Of the latter there is outstanding \$6,250,000, and when the unpaid interest is added it increases the first lien to over \$7,000,000. As the gross earnings have run down from \$1,023,000 for the year ending June 30, 1893, to about \$700,000 in the present current year, a number of the holders of first mortgage bonds have deemed it very important, if not essential, that a large number of their bonds be accumulated and measures taken for their mutual protection.

We expect within a short time to offer these bonds as a unit, and should a satisfactory price be obtained they will be sold. Failing in this our expectation is to institute foreclosure proceedings, as the prospects for either increased earnings or the improved physical condition of the property are not very flattering.—V. 64, p. 84.

**Pittsburg Cincinnati Chicago & St. Louis Ry.—Probably no Dividend for 1896 on Preferred Stock.**—The CHRONICLE is officially informed that "no action has been taken upon the dividend for the year 1896, and conditions of business were such that probably a dividend will not be made for that year."—V. 63, p. 1064.

**Quincy Omaha & Kansas City R.R.—Sale of Road.**—The sale of this road under decree of foreclosure is advertised to take place at St. Louis, Mo., on April 23, 1897. This is to carry out the reorganization agreement. Out of a total issue of non-preferred bonds of \$1,489,240, there are on deposit with the Guaranty Trust Co., subject to the various agreements, \$1,432,400. At the foreclosure sale no bid of less than \$300,000 will be received, and in addition the purchaser must pay an amount equal to the principal of the \$250,000 preferred 5 per cent bonds with interest thereon from Dec. 1, 1896.—V. 64, p. 84.

**St. Clair Madison & St. Louis Belt R.R.—Receiver Appointed.**—This company, which owns the new Mississippi River drawbridge at Alton, Ill., was placed in the hands of John F. Bernard as receiver on Jan. 15 upon application of Edward Whitaker, holding a judgment for \$15,250. In addition to \$500,000 first mortgage bonds sold, \$100,000 are said to be outstanding as collateral for a loan of about \$75,000.

**St. Joseph & Grand Island R.R.—Sale Confirmed.**—The foreclosure sale which took place Dec. 23, 1896, was confirmed Jan. 10.—V. 64, p. 85.

**St. Louis & San Francisco R.R.—Abstract of New Mortgage.**—On subsequent pages we publish an abstract of this company's new consolidated mortgage, securing the bonds

that are now being issued. As in other recent abstracts we have taken pains to give not only the salient features of the deed, but in addition foot notes officially revised which will enable the reader to get a correct idea of the character of the property mortgaged, etc.

**Balance Sheet and Position of New Company.**—The earnings of the property for the year ending June 30, 1896, were given in the CHRONICLE of Sept. 12, 1896, page 455. The statement to the New York Stock Exchange made at the time of the recent listing repeats these earnings, and gives other interesting facts. The net earnings for the late year after payment of taxes were \$2,300,714. Against these the fixed charges of the reorganized company, including interest on the bonds issued for the acquisition of the St. Louis Salem & Arkansas and Kansas City & Southwestern branches, and all sinking fund charges and rentals, are as follows:

Charges on bonds undisturbed in the reorganization (later set and sinking fund).....	\$1,771,390
4 per cent bonds, \$4,395,600.....	255,544
<b>Bontals</b> .....	<b>13,314</b>

Total fixed charge for first fiscal year.....\$2,040,248

This total may be increased by \$36,000 for acquisition of branch lines not already acquired.

Provision is made in the mortgage that after July 1, 1897, bonds reserved for improvements, construction, etc., may be issued at the rate of not exceeding \$300,000 in any one year.

For the five months ending November 30 the earnings, etc., were as follows:

5 mos. to Nov. 30—	Gross earnings.	Net earnings.	One-Quarter's ann'l charges.	Balance, surplus.
1896.....	\$2,685,284	\$1,215,878	\$350,100	\$365,278
1895.....	2,741,537	1,158,833		

The slight falling off in gross earnings is said to be due to the decreased mileage of about 100 miles.

The balance sheet on Sept. 30, 1896, shows:

Franch. and property	\$87,613,100	Capital stock.....	\$50,000,000
New equip. & improv.	87,160	Funded debt.....	37,809,100
Deposits, acc. sinking funds, etc.	57,764	Vouchers & pay-rolls.	385,982
Cash in Treasury	257,627	Due to other ry. co's.	31,621
Cash in Trust Co.	59,868	Miscellan. liabilities.	55,311
Due by agents and conductors	146,307	Receiv. St. L. & S. F. Ry.	117,925
Due by U. S. Govern't	55,289	Land department.....	1,918
Due by other ry. co's.	116,469	Matured interest.....	39,763
Miscellaneous assets.	68,287	Acc'd int. not due...	449,851
Supplies and material on hand	411,335	Sinking funds.....	7,133
		Canceled bonds.....	4,000
		Bal. of income acc...	150,611
Total.....	\$89,853,195	Total.....	\$88,653,195

Of the money raised under the reorganization plan, \$1,080,000 will be applied to the improvement of the property other than prepayment of car trusts. The reorganization committee furthermore turn over to the new company, which will have no floating debt, a substantial cash working capital. The consols under the mortgage, are to be applied as follows:

Reserved for prior lien bonds.....	\$39,032,000
Sold as per reorganization plan.....	5,500,000
Reserved for the acquisition of branch lines.....	1,793,000
Reserved until January 1, 1897, to the order of the reorganization committee, thereafter to be used for improvements.....	500,000
For construction, improvements, etc., at the rate of not exceeding \$100,000 per annum.....	3,175,000
	<b>\$50,000,000</b>

\* **NOTE.**—These bonds, it is stated, will in all probability not be issued.

**Voting Trust.**—All the stock, both classes of preferred and common, except seventy-five shares common stock, is held by Messrs. John A. Stewart, Louis Fitzgerald, J. Kennedy Tod, Isaac N. Seligman, B. P. Cheney, Samuel C. Eastman and James A. Blair, as Voting Trustees, under an agreement dated July 1, 1896. The statements to the New York Stock Exchange cite the provisions regarding the Voting Trust which were contained in the Reorganization Plan. This plan and these provisions in full were in the CHRONICLE of May 2, 1896, page 830.—V. 64, p. 85.

**Saranac & Lake Placid RR.—Chateaugay RR.—Lease.**—The Saranac & Lake Placid RR. has been leased to the Chateaugay RR. Co. and the Chateaugay Ore & Iron Co., jointly, for a period of seventeen years.

**Savannah Electric Ry.—Savannah Traction.—Successor Company.**—The Savannah Electric Ry., recently foreclosed; is to be reorganized as the Savannah Traction Company.—V. 64, p. 85.

**Seaboard & Roanoke RR.—Suit Touching Pooled Stock.**—Thomas F. Ryan has brought suit to secure possession of 153 shares of stock which have been assigned to him by the owner but which are held in the pool that prevented his securing control of the road last November (see V. 63, p. 924). Should the suit succeed it is supposed Mr. Ryan sees his way clear to carry out his original plan of obtaining a majority interest in the stock, 2,500 shares having been purchased by him last year.—V. 63, p. 924.

**Terre Haute & Logansport RR.—Bonds Subject to Penalty.**—Seventy per cent of the outstanding first mortgage bonds having been deposited, the Scudder Committee announces that bonds received subsequent to January 20 will be subject to a penalty of ten dollars (\$10) per bond. The depository is the New York Security & Trust Co., 46 Wall Street, New York.—V. 64, p. 85.

**Toledo St. Louis & Kansas City RR.—Status of Preferred Stock Appeal.**—The appeal of the preferred stock against the decision of Judge Ricks, which was argued Nov. 9 before the U. S. Appellate Court at Cincinnati is still pending. Decisions in this court are handed down the first Tuesday in each month, and it is hoped the first Tuesday in February will bring a decision in this case.—V. 64, p. 43.

**Union Pacific RR.—Government Settlement.—Syndicate Formed.**—The negotiations for the settlement of the Government lien on the road by a payment in cash are progressing satisfactorily and are expected to be consummated within the next few days. A syndicate to provide the necessary money, has been formed and has subscribed, it is understood, between \$45,000,000 and \$50,000,000.—V. 64, p. 136.

**Union Railway (N. Y. City).—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been reported as follows:

3 mos. ending Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, sur. or def.
1896.....	\$126,903	\$46,961	\$416	\$35,018	sur. \$12,359
1895.....	111,996	29,787	167	31,962	def. 2,008
<b>6 months—</b>					
1895-96.....	\$282,419	\$120,973	\$499	\$66,791	sur. \$60,691
1894-95.....	247,371	90,592	917	64,869	sur. 27,120

Loans and bills payable Dec. 31, 1896, \$175,104, against \$170,000 on June 30.—V. 63, p. 795.

**Union Traction Co. (Philadelphia)—Instalment Called.**—The directors this week adopted the recommendation of the executive committee to call an instalment of \$2.50 per share on the stock, payable the middle of March.—V. 64, p. 135.

**United States Leather.—New President.**—James Horton has been elected President to succeed Mark Hoyt, deceased.—V. 64, p. 42.

**Wheeling & Lake Erie RR.—Receivers Appointed.**—At Cincinnati, Jan. 15 Judge Taft appointed Myron T. Herrick of Cleveland and Robert Blickensderfer of Toledo receivers of this road on the application of creditors. Mr. Blickensderfer is a practical railroad manager who will perform the active duties of receiver, and Mr. Herrick represents financial institutions to which the road is indebted.

**Cause of Receivership.**—President A. G. Blair, of the Wheeling & Lake Erie Railroad, has made the following statement:

"The difficulties of this company result chiefly from the extremely low rates now, and for some time past, in the bituminous coal traffic, which comprises more than half its tonnage. The demoralization in rates in this trade has been without a precedent. Coal has been carried and sold at such prices as were never before known. The most necessitous railroad has made the rates and the others have either had to meet them or lose the business. At a recent meeting of the board of directors of this company a formal protest against the ruinous cutting of rates was addressed to the other roads engaged in the Ohio bituminous coal trade. The company's earnings have shown a decrease every week since last July, and the falling off in net revenue has been very much greater proportionately than the mere reduction in gross earnings.

"Next, after bituminous coal, the largest item of the company's freight business is iron-ore tonnage. In consequence of the idleness of mills, furnaces and other industries, the railroad has had neither the ore tonnage or the haul of the finished product. The coal mines controlled by the company have also been hampered by constant strikes. The recent bank failures in the Northwest, where a large part of the coal carried over the company's line is sent, have retarded collections and restricted banking facilities; and during the past few days rumors that the company was about to fail have led to pressing demands upon it which its present resources were insufficient to meet, and a suspension of payments has thus been compelled.

"The interest upon the bonded debt has been punctually paid; not one dollar is in arrear on that account, and every effort will be made to avoid a default in interest. The property itself is in excellent physical condition, having recently had the benefit of large expenditures, both for betterments to the railway and for additions to the equipment. It is with the utmost regret that the management has been compelled to invoke the protection of the courts, which until a few hours ago we hoped to avoid doing."

**Reorganization Committee.—Notices to Security Holders.**—Louis Fitzgerald, Chairman; W. L. Bull, of Edward Sweet & Co., and Duncan D. Parmly, of Marquand & Parmly, inform holders of consol. 4s and preferred and common stock, and the holders of first mortgage bonds and stock of the Wheeling Lake Erie & Pittsburg Coal Co. that they have consented to act as a protective committee and to submit a plan of reorganization when needed. All holders are requested to send their names and addresses to the committee at the Mercantile Trust Co. See official notice in our advertising columns.

Dick Brothers & Co. also, by advertisement on another page, request holders of the various securities of the company to communicate with them.

The bondholders of the Wheeling Lake Erie & Pittsburg Coal Co. are notified by advertisement in another column that Francis S. Bangs, Thomas A. McIntyre and Willard H. Jones have consented to act in their behalf as a protective committee. The committee believes their interests "ought not to be committed to those whose largest interests are in the railroad company."—V. 64, p. 85.

**West End Street Ry. (Boston).—Bonds Offered.**—The company will receive bids until twelve o'clock, January 26, for the purchase of the whole or any part of an issue of \$2,700,000 twenty-year 4 per cent bonds. Subscriptions must be paid as follows: For \$2,000,000 on delivery of bonds on or before April 1, 1897; for \$500,000 on delivery June 1, 1897; for \$200,000 on delivery July 1, 1897. Of these bonds to be issued \$2,000,000 are those just authorized by the Railroad Commission, and the balance are the remainder of the bonds authorized last spring but not then issued.—V. 63, p. 1117.

### Trust Companies of New York and Brooklyn.

The reports of these companies Dec. 31, 1896, compared with June 30, 1896, and Dec. 31, 1895, are as follows: The reports for June 30, 1895, and Dec. 31, 1894, are in the April, 1896, INVESTORS' SUPPLEMENT.

## Reports and Documents.

### ST. LOUIS & SAN FRANCISCO RAILROAD COMPANY.

#### ABSTRACT OF CONSOLIDATED MORTGAGE, DATED JULY 1, 1896.

SECURING \$39,000,000 OF 4 PER CENT GOLD BONDS  
DUE JULY 1, 1906.

#### PARTIES.

The St. Louis & San Francisco Railroad Company, of Missouri, hereinafter called the Railroad Company, party of the first part, and The Mercantile Trust Company, of New York, and PASCHAL P. CARR, of St. Louis, the Trustees, parties of the second part.

#### PREAMBLE.

WHEREAS, The property of the St. Louis & San Francisco Railway Company has been sold under foreclosure of its consolidated mortgage of 1891, and duly conveyed to the Railroad Company,

AND WHEREAS the Railroad Company, as duly authorized by its directors and stockholders, has determined to issue its bonds to the amount of \$50,000,000, to be known as consolidated mortgage 4 per cent gold bonds [hereinafter in this abstract called "consols"—Eds.], to be dated July 1, 1896, and to be payable July 1, 1906, in gold coin of the United States or of equal to the present standard of weight and fineness, with interest at the rate of 4 per cent per annum, payable semi-annually on the first day of January and July in each year, in like gold coin, such bonds to bear coupons with the engraved signature of the Treasurer of the Railroad Company and to be substantially in the following form, namely:

#### UNITED STATES OF AMERICA.

#### STATE OF MISSOURI.

#### ST. LOUIS & SAN FRANCISCO RAILROAD COMPANY.

#### CONSOLIDATED MORTGAGE FOUR PER CENT GOLD BOND.

No. \$1,000.

For value received, the St. Louis & San Francisco Railroad Company, a corporation organized under the laws of the State of Missouri, promises to pay to bearer, or if this bond is registered, to the registered holder hereof, the sum of one thousand dollars in gold coin of the United States or of equal to the present standard of weight and fineness, on the first day of July, one thousand nine hundred and ninety-six, at the office or agency of the Railroad Company in the City of New York, with interest thereon from the first day of July, 1896, until said principal sum shall be paid, at the rate of four per cent per annum, payable in like gold coin, semi-annually, at such office or agency, on the first day of January and July in each year, upon presentation and surrender of the respective coupons therefor hereto annexed, as they severally mature.

This bond is one of a series of fifty thousand bonds, all of like tenor, date and amount, numbered from one consecutively upwards, issued and to be issued in pursuance of, and all to be equally secured by a mortgage or deed of trust dated July 1, 1896, executed by the Railroad Company to The Mercantile Trust Company and Paschal P. Carr, as Trustees, covering the property and franchises herein described, to all the provisions of which this bond and the rights of the holder of the same are subject.

This bond shall pass by delivery, unless registered in the owner's name upon the books of the Railroad Company; but after registration of ownership, duly certified thereon, no transfer, except upon the books of the Railroad Company, shall be valid until a transfer thereof upon said books to bearer, which shall restore transferability by delivery, and this bond shall continue subject to successive registrations and transfers to bearer, at the option of the holder. The registration of this bond shall not restrain the negotiability of the coupons by delivery.

No recourse shall be had for the payment of the principal or interest of this bond to any stockholder, director or officer of the Railroad Company, either directly or through said company, whether by any statute or by the enforcement of any assessment or otherwise howsoever.

This bond shall not become obligatory until the certificate endorsed hereon is signed by The Mercantile Trust Company, Trustee.

IN WITNESS WHEREOF, said Railroad Company has caused its corporate seal to be hereto affixed and this bond to be signed by its President and Secretary, this first day of July, 1896.

ST. LOUIS & SAN FRANCISCO RAILROAD COMPANY,

by

Secretary.

President.

#### [FORM OF COUPON.]

St. Louis & San Francisco Railroad Company will pay to the bearer hereof on the first day of twenty dollars in  
gold coin of the United States at its office or agency in the City of New York, being six months' interest, due on that day, on its consolidated mortgage bond No. Treasury.

#### [FORM OF TRUSTEE'S CERTIFICATE.]

This bond is one of the series of bonds described in the mortgage or deed of trust within mentioned.

THE MERCANTILE TRUST COMPANY,

by

Trustee.

#### I.

#### ROAD CONVEYED AS SECURITY.

The following lines of railroad:

#### ROAD CONVEYED TO TRUSTEE AS SECURITY.

Subject to \$5,666,500 A, B and C bonds due Nov., 1901. Miles.  
Main Line, Pacific, Mo., to Seneca, Mo., (202 1/4 miles) and  
Granby branch (1 1/2 miles) ..... 294  
Subject to \$1,010,000 Missouri Division bonds due 1910.  
Pierce, Mo., to Oawego, Kan., (73 miles) and Oronogo, Mo., to  
Joplin, Mo., (19 miles) ..... 82

Subject, as are also the above lines, to \$20,100,000 General Mortgage bonds due 1931.

St. Louis, Mo., to Pacific, Mo., includ'g all property in St. Louis 34  
Bollivar branch, Springfield, Mo., to Bollivar, Mo. .... 39-  
Chadwick branch, Springfield, Mo., to Chadwick, Mo. .... 35  
Fayetteville, Ark., to Powell, Ark. .... 26  
Fayetteville, Ark., to Red River, Ind. Ter. .... 215  
Carl Junction, Mo., to Galena, Kan., via Joplin. [This is part  
of the Joplin Ry. consolidated; see table of securities pledged] 17

Subject to \$2,000,000 St. L. Wichita & West. bonds due 1919.

Oawego to Wichita, Kan., (as to securities conveyed see below;  
also see Article Eighth) ..... 144

Subject to \$984,000 Collateral Trust 6s due 1920.

Plymouth (Monett), Mo., to Fayetteville, Ark. [This is the St.  
Louis Arkansas & Texas Ry. also included in the table of  
securities pledged—see below, and article eighth] ..... 71  
Carl Junction, Mo., to Girard, Kan. (29 miles), and Carbon  
branch, 3 miles. [This is the Joplin RR.—also included in  
table of securities pledged. See that table below and Article  
Eighth] ..... 32

#### Total

989

[NOTE.—The italic headings above do not appear in the mortgage, but have been inserted here to show the relation of the lines conveyed to the underlying mortgages. The lines themselves are those described in the deed, though stated in slightly different form in order to show this relationship.

Since the mortgage was executed the reorganization committee has come to an agreement with practically all the bondholders of the following branch lines, which lines have been or will be sold in foreclosure and be brought under the lien of this consolidated mortgage, as provided in a subsequent article:

#### Other lines conveyed or to be conveyed.

St. L. Salem & Arkansas Ry. (all but \$5,000 bonds acquired).  
Cuba Junction, Mo., to Salem, Mo. .... 40 1/2  
Avery to Smith's Mines (2 1/2 miles); Howe's Station Mo., to  
Plank Mines, Mo. (5 1/2 miles); Sligo Junction to Sligo Furnace (5 1/4 miles) ..... 13 1/2  
Kan. City & Southwestern RR.  
Beaumont to Cale, Kan. (since acquired) ..... 62  
If now we add the five pieces of road conveyed by pledge of securities, as shown below, but not already included in preceding table, said sections being subject to the collateral trust mortgage of 1887 for \$1,099,000 ..... 57

The total of all lines at this date included, or about to be included, in lien of this consolidated mortgage is found to be 1,162

The same 1,162 miles, all of which is owned either in fee or through securities held, is described in more comprehensible form as follows:

Miles.  
St. Louis, Mo., to Seneca, Mo. .... 326  
Pierce City, Mo., to Wichita, Kan. .... 217  
Monett, Mo., to Paris, Tex. (including Ft. Smith & Van Buren Br.) 303  
Springfield, Mo., to Bollivar, Mo. .... 39  
Springfield, Mo., to Chadwick, Mo. .... 35  
Springfield Belt Line ..... 9  
Oronogo, Mo., to Joplin, Mo. .... 11  
Pittsburg, Kan., to Weir City, Kan. .... 11  
Girard, Kan., to Galena, Kan. .... 47  
Fayetteville, Ark., to St. Paul, Ark. .... 33  
Jenson, Ark., to Mansfield, Ark. .... 18  
Granby Branch (1-5); Carbon Branch (3-25) ..... 5  
Cuba Junction, Mo., to Salem, Mo., and branches ..... 54  
Beaumont to Cale, Kan. .... 62

#### Total

1,162

This note is added by way of explanation and is not in the mortgage.—Eds.]

#### II.

#### PROPERTY HEREAFTER ACQUIRED.

All other railroads now owned or hereafter acquired, and all interest in any railroad, whether it is secured by leasehold, operating contract, or by shares of stock or otherwise, subject, however, to any liens thereon at the time of their acquirement, and to any purchase money lien thereon created in the acquisition thereof.

#### ALL EQUIPMENT, ETC.

All telegraph and telephone lines; all rights of way and terminal grounds; all other lands and interest in lands; all tunnels, bridges and other railroad appurtenances; all station houses, office buildings and other structures; all engines and other rolling stock and equipment; all materials and supplies; all leases and contracts. And all other property, real, personal and mixed, which the Railroad Company now owns or which it may at any time hereafter acquire in extension of or appurtenant to any of the railroads and property at any time subject to the lien of this indenture.

#### III.

#### FRANCHISES AND PRIVILEGES.

All franchises, rights, privileges, immunities and exemptions now owned or hereafter acquired.

#### IV.

#### LEASEHOLD INTEREST IN FT. SMITH & VAN BUREN BRIDGE.

The leasehold interest and all other interest of the Railroad Company in the bridge extending across the Arkansas River, in the State of Arkansas, said bridge being about 0-34 miles in length.

#### V. AND VI.

#### STOCKS AND BONDS PLEDGED.

Also the following stocks and bonds and any other shares of stock of said companies hereafter acquired. [The lines of road which these securities represent and also the total of the several issues are not given in the mortgage, but are supplied for the information of the reader. A double dagger (‡) indicates that this piece of road has already been included in the road conveyed under Article I.

## VII.

## LANDS CONVEYED.

The title and interest of the Railroad Company in any and all lands granted to the Atlantic & Pacific RR. Co. by an act of Congress approved July 27, 1866, and situated in the counties of Greene, Christian, Lawrence, Newton and Jasper in the State of Missouri, and in the county of Benton in the State of Arkansas. [These lands, of which 4,854 acres are unsold, are subject to prior mortgages, as stated in Article XVI., which see.]

Also to all lands granted to the State of Missouri by an act of Congress approved June 10, 1852, and situated in the counties of Franklin, Crawford, Maries, Pulaski, Laclede, Camden, Webster, Greene, Christian, Barry, Lawrence, Jasper and Newton, in the State of Missouri, and in the county of Benton in the State of Arkansas. [Of these lands 89,128 acres are unsold.—EDS.]

## RIGHT TO ISSUE THESE CONSOLS.

First. The consols shall be certified only as follows:

CONSOLS FOR \$5,500,000 ISSUABLE FORTHWITH TO REORGANIZATION COMMITTEE.

(a) Consols aggregating \$5,500,000 shall forthwith be delivered to the Reorganization Committee.

CONSOLS FOR \$500,000 DELIVERABLE TO COMMITTEE PRIOR TO JAN. 1, 1897.

(b) Consols aggregating \$500,000 may be delivered to the Reorganization Committee prior to Jan. 1, 1897, but after that date shall be used only for the purposes specified in subdivision (d) and under the same restrictions.

CONSOLS FOR \$1,793,000 TO ACQUIRE PRIOR TO JAN. 1, 1900, THREE BRANCH LINES.

(c) Consols aggregating \$1,793,000 shall be reserved to acquire the following properties or a controlling interest in their securities or of those of any successor corporation:

St. Louis Salem & Arkansas Ry. Co.  
Kansas City & Southwestern RR. Co.  
Kansas Midland Ry. Co.

Said bonds shall be issued only upon delivery to the trust company prior to January 1, 1900, of a certified copy of a resolution of the board of directors stating particularly the railroad or the stocks and bonds to be acquired, together with a written approval of such acquisition on the terms stated, signed by not less than a majority of the board of directors of the railroad company. All stocks, bonds, railroads, etc., so acquired shall forthwith become subject to the lien of this indenture. Any of said consols not so delivered prior to Jan. 1, 1900, shall be used only for the purpose specified in the following subdivision of this article, and under the same restrictions.

CONSOLS FOR \$3,175,000 ISSUABLE AT NOT EXCEEDING \$300,000 YEARLY FOR SECOND TRACK, TERMINALS, IMPROVEMENTS OR ADDITIONAL RAILROAD.

(d) Consols aggregating \$3,175,000 shall be used only after July 1, 1897, and at a rate not exceeding \$300,000 of bonds yearly to make improvements, or to construct or acquire additional property (which shall then be subject to this indenture), as follows:

Additional side-tracks, second tracks, terminals or other additional betterments or improvements upon the properties which shall then belong to and be subject to the lien of this indenture.

Of terminals, branches or extensions of any railway subject to the lien of this indenture.

Additional rolling stock.

Additional lines of railroad.

The acquisition of bonds or stock representative of such additional lines of railroad.

The consols so reserved shall be certified from time to time upon the delivery of a copy of a resolution of the board of directors under the corporate seal of the Railroad Company stating that such bonds will be used only for the purposes hereinabove authorized.

CONSOLS FOR \$39,032,000 RESERVED TO RETIRE \$31,225,500 PRIOR LIENS AT OR BEFORE MATURITY AT NOT EXCEEDING \$1,250 CONSOLS FOR EACH \$1,000 BONDS RETIRED.

(e) The residue, to wit, \$39,032,000 thereof, shall be issued to take up at or before maturity the following bonds:

A. B. & C. bonds due Nov. 1, 1906.	\$5,666,500
Mo. & Western Div. bonds, due Aug. 1, 1919.	1,041,000
Six per cent trust bonds, due Aug. 1, 1920.	984,000
General mortgage bonds, due July 1, 1931.	20,100,000
Five per cent trust bonds, due Oct. 1, 1937.	1,099,000
St. Louis Wichita & Western 1st 6s, due 1919.	2,000,000
Fort Smith & Van Buren Bridge 6s, due April 1, 1910.	335,000
Total Prior Liens.	\$31,225,500

The Trust Company shall deliver said consols at the rate of \$1,250, par value thereof, in exchange for each \$1,000, par value, of the above bonds delivered to it, whether the same shall have been redeemed by the sinking fund or otherwise.

Within twelve months before the maturity of any of such outstanding bonds the Railroad Company, in order to pay the same, may sell these consols at the rate of \$1,250, par value, for each \$1,000 of such outstanding bonds about to mature, provided 80 per cent of the par value of the consols so sold shall simultaneously be deposited in cash with the Trust Company to be applied to such payment. The certificate of the President, or other executive officer, and of the Treasurer of the Railroad Company, as to any facts pertinent to the right to deliver the consols shall be conclusive evidence of such facts and be full authority for the action of the Trust Company in accordance therewith.

Until canceled, as permitted when any entire issue has been retired, all bonds so delivered to the Trust Company shall be held as additional security subject to the lien of this indenture and upon the trusts herein declared.

## NEW BONDS TO REPLACE ANY MUTILATED OR DESTROYED.

The Trust Company in its discretion may certify a new bond in exchange for any bond mutilated, upon cancellation thereof, and in substitution for any bond lost or destroyed upon satisfactory evidence regarding the same and the receipt of proper indemnity.

## VARIOUS PROVISIONS.

SECOND TO SEVENTH.—These articles relate (1) to the termination of the trust upon the faithful performance of the covenants of the mortgage, (2) to the Railroad company's right to peaceful possession of the property prior to default, (3) to the treatment of the securities pledged and the company's right to the income therefrom (except any sums representing principal), (4) the company's right to vote on the shares pledged for purposes not inconsistent with this mortgage, (5) to the preservation of the corporate existence of companies whose securities are pledged, and (6) to the extension of the bonds pledged when these shall mature.

## POSITION OF ST. LOUIS WICHITA &amp; WESTERN AND OTHER ROADS WHOSE SECURITIES ARE PLEDGED HEREUNDER.

EIGHTH. The property of the St. Louis Arkansas & Texas RR. Co., the St. Louis Wichita & Western Ry. Co. and of the Joplin RR. Co., bonds of each of which are pledged hereunder, has become vested in the mortgagor and is subject to the lien of this indenture. Whenever said property formerly of any of said companies shall be free from any lien prior to this indenture except bonds then pledged hereunder, the Trustees, upon request of the Railroad Company, shall cause such bonds to be canceled and any mortgage securing the same to be satisfied of record. Other properties may be treated in the same manner.

## CONSOLIDATION.

NINTH. This article permits the companies whose securities are pledged to consolidate with other companies, or with the Railroad Company, provided the rights of the bondholders hereunder are fully preserved in the manner prescribed in the mortgage.

## DEEDS OF FURTHER ASSURANCE.

TENTH. All lines of railway and property of every kind, and all interest thereon, when acquired, by means of these consols, shall immediately be subject to the lien of this indenture; and the Railroad Company, mortgagor, will deliver any and all such further assurances as the Trustees may reasonably require for better securing the payment of the principal and interest of the consolidated mortgage bonds.

ON DEFAULT, TRUSTEES SHALL TAKE POSSESSION WHEN REQUESTED BY ONE-THIRD IN INTEREST OF THE BONDS.

ELEVENTH. In case (a) of default for six months in the payment of any instalment of interest on any of the consols, or in the payment of the principal when due; or (b) of default for three months in the performance of any other covenant herein; or (c) of the appointment of a receiver

of the property, or the winding up of the business; or (d) of default as to principal or interest on any of the outstanding and underlying bonds specified in subdivision (e) of the first article of this indenture, then, in any such event, the Trustees may, in their discretion, and upon a requisition in writing signed by the holders of a third in amount of the consols then outstanding, and upon receiving a proper indemnity against all costs, shall enter into all the mortgaged premises and shall operate the same, making from time to time all repairs and replacements as may seem to them judicious.

In case of such entry the Trustees shall apply the income of the property after deducting the expenses of operating, and of the said repairs and replacements, and all lawful taxes, or liens prior to the lien of this indenture, as follows:

First, to the payment of the interest on the consols in the order in which it shall have become due, ratably, to the persons holding the coupons, and to hold any surplus as additional security for the consols in the like manner as the net proceeds of a sale of the mortgaged premises. But if possession shall be restored to the Railroad Company, then such surplus shall be paid to the mortgagor, his successors or assigns.

After the payment of all interest due and the fulfillment of all said covenants, the Trustees shall, if no proceedings be then pending for the foreclosure or sale of the mortgaged premises, restore the same to the Railroad Company, subject to the terms of this indenture.

#### TRUSTEES SHALL DECLARE THE PRINCIPAL DUE AND SELL THE PROPERTY.

**TWELFTH.** Or the Trustees may, in their discretion, and upon like requisition shall, declare the principal of all the consols to be forthwith due and payable, without notice to the mortgagor. In which event the Trustees may in their discretion, and upon like requisition and proper indemnity against all costs shall, sell all and singular the mortgaged premises at public auction in the City of St. Louis, Mo., or in the City of New York, N. Y., in the discretion of the Trustees, first giving public notice of such sale by advertisement in three newspapers, two published in said City of St. Louis, and one in said City of New York, once in each week for six successive weeks.

After deducting all expenses, taxes, etc., the Trustees shall apply the purchase money to the payment of the principal and interest of the consolidated mortgage bonds without preference or priority of principal over interest or interest over principal or of any instalment of interest over any other instalment.

At any sale of the mortgaged premises the Trustees may purchase on behalf of the holders of the consols the property so sold, provided that the price shall not exceed the whole amount of the consols then outstanding, with the interest accrued thereon, in behalf of which the said purchase shall be made, together with the costs and expenses of such sale; and if but a portion of the mortgaged premises shall be sold, the price shall not exceed such amount as shall be in the judgment of the Trustees reasonable. Any holder of consols may purchase the mortgaged premises, receiving credit, as so much cash paid, for so much of the purchase money as shall be his proper share of the purchase price on account of the consols held by him.

#### COUPONS SEPARATE FROM BONDS TO HAVE ONLY A SUBORDINATE LIEN.

No coupon for interest which after maturity shall be assigned, transferred or pledged separate from the bond to which it relates shall, unless accompanied by such bond, be entitled, in case of default hereunder, to the security of this indenture, except subject to the prior payment in full of the principal of all the consols outstanding, and of all coupons thereof not so assigned, transferred or pledged.

#### SURRENDER OF PROPERTY TO TRUSTEES PRIOR TO DEFAULT, ETC.

**THIRTEENTH TO FIFTEENTH.** The Trustees may, in their discretion, accept possession of the mortgaged premises, although one of the events of default aforesaid shall not have happened, if the Railroad Company shall offer to surrender possession thereof, and it may thereupon operate the premises and apply the income thereof as hereinbefore provided, in case of an entry after default.

The Trustees may, in their discretion, in respect of bonds pledged hereunder, resort to any proceedings, legal or equitable, in their judgment necessary for the enforcement of the trust deeds securing the same.

Any remedies specially conferred by any of the provisions of this indenture shall be deemed cumulative and not exclusive.

#### RELEASE OF PROPERTY FROM LIEN HEREOF.

**SIXTEENTH.** Upon the written request of the Railroad Company, with a copy of a resolution of its board of directors approving such request, the Trustees, from time to time, shall release from the lien of this indenture, in order that it may be sold, any portion of the mortgaged premises appurtenant to any line of railroad subject to the lien hereof which in the judgment of the mortgagor shall, at the time of such release, be no longer requisite for use for the purposes for which the same shall have been so acquired, and likewise any parts of the roadway which may have been thrown out of use by reason of straightening or alteration of the line of road, or other satisfactory cause. The mortgagor covenants that the proceeds of any such sale shall be invested in the purchase of other property, real or personal, which shall be conveyed by the mortgagor to the Trustees, subject to all the trusts

declared in this indenture; or in betterments or improvements, or in some other way, for the benefit of the mortgaged premises to the satisfaction of the Trustees, or shall be applied to the redemption by the Trustees of the consolidated mortgage bonds. When such released premises shall have been thrown out of use by reason of changes of the line of the road, etc., the mortgagor covenants that the substitutes therefor acquired shall at once become subject to the lien of this indenture.

#### THE LANDS CONVEYED ARE SUBJECT TO UNDERLYING BONDS.

The lands described in the seventh sub-division of the granting clause hereof and constituting part of the Atlantic & Pacific land grant are subject to the mortgage known as the A B and C mortgage of the St. Louis & San Francisco Railway Company, and any of said lands remaining after the payment of all said bonds become subject to the general mortgage of said Railway Company. The Railroad Company shall have full power to dispose, free from the lien of this indenture, of any of said lands, provided the net proceeds shall be applied exclusively to the payment of the principal and interest of said A B & C bonds and thereafter of said general mortgage bonds.

#### REDEMPTION OF CONSOLS TO BE BY PURCHASE ONLY.

**SEVENTEENTH.** Any amounts applied towards the redemption of the consols shall be used in their purchase in the open market; and all consols so purchased shall be canceled.

#### LIABILITY OF TRUSTEES.

**EIGHTEENTH.** The Trustees shall not be responsible for loss or damage caused by the act or neglect of any agents selected with reasonable care.

#### COMPANY'S BOOKS OF ACCOUNT TO BE ACCESSIBLE TO TRUSTEES HEREUNDER.

**NINETEENTH.** The Railroad Company will conduct its business to advantage, and will keep proper books of account and therein make true and proper entries of all dealings and transactions of, and in relation to, its said business. Said books of account and all other documents relating to the affairs of the Railroad Company shall be accessible to the Trustees, and the same shall, at all reasonable times, be open to the inspection of the Trustees and such person or persons as they shall from time to time, in writing, for that purpose, appoint. The Railroad Company will, at all times during the continuance of this security give to the Trustees such information as it shall require as to all matters relating to the said business of the mortgagor or otherwise relating to its affairs.

#### OFFICE FOR REGISTRATION IN NEW YORK CITY.

The Railroad Company will keep at the office of the Trust Company for the time being trustee under this indenture, an agency in the City of New York, and books therein, which shall serve as a register of such of the consolidated mortgage bonds as shall be registered.

#### PROPERTY TO BE WELL MAINTAINED AND INSURED, ETC.

The Railroad Company shall properly maintain all property at any time covered by this mortgage, repairing the same as may be necessary, and shall keep said railroads supplied with sufficient equipment and motive power. It shall also keep all wooden bridges and trestles and all buildings and furniture, cars and other equipment, machinery tools and implements properly insured against loss by fire. Should the mortgagor fail to effect such insurance, the Trustees may insure such property in like manner. The Railroad Company shall also pay all taxes lawfully imposed upon the premises and shall not suffer to be created any mechanics' or other lien which would be prior to the lien of these presents. The Trustees may pay the foregoing if the Railroad Company fails to do so. The Railroad Company shall repay on demand all moneys expended by the Trustees for any insurance, taxes, etc.; and if it fail so to do the same shall be paid to the Trustees out of the proceeds of any sale of any of the mortgaged property.

#### REMOVAL AND APPOINTMENT OF TRUSTEES.

**TWENTIETH.** The Mercantile Trust Company, or any successor to it, may be at any time removed from the trusteeship under this indenture, by the holders of a majority in amount of the consols then outstanding, by an instrument in writing. In case of the resignation or removal of The Mercantile Trust Co. or of any successor to it, as Trustee, the holders of a majority in amount of the consols then outstanding, may, in writing, within thirty days, appoint a new trustee, or, in default thereof, the Railroad Company may, by proper instrument in writing, name a new trustee. Any trustee in succession to The Mercantile Trust Company appointed under any of the provisions of this article, shall be a trust company having an office in the City of New York.

The individual Trustee may be at any time removed and a successor to him be appointed by the trust company acting as trustee hereunder.

Any request in writing by The Mercantile Trust Company, or any trust company appointed in succession to it, to the individual Trustee hereunder, or any trustee appointed in succession to him, shall be sufficient warrant for the individual Trustee or his successor taking such action as may be so requested. Such individual Trustee or any successor, may delegate to his co-trustee the exercise of any power, discretionary or otherwise, conferred by any of the provisions of this indenture.

## RECEIVER MAY BE APPOINTED ON COMMENCEMENT OF JUDICIAL PROCEEDINGS.

**TWENTY-FIRST.** Upon commencement of any judicial proceedings to enforce any right of the bondholders under this indenture, the Trustee shall be entitled to the appointment of a Receiver of the premises, provided the Trustee shall be entitled at all times to continue to hold the stocks, bonds, and other securities pledged hereunder. In every case in which a receiver shall be appointed, the Trustees shall be entitled to receive all the surplus income of the property for the benefit of the holders of the consolidated mortgage bonds.

## RIGHT OF ACTION HEREUNDER VESTED SOLELY IN THE TRUSTEES.

**TWENTY-SECOND.** Every right of action, including the right to foreclose this indenture, is vested exclusively in the Trustees until they shall neglect to begin appropriate proceeding in a proper court, by way of remedy, within a reasonable time after request of the holders of the greater part in amount of the consolidated mortgage bonds then outstanding, filed with the Trustees, with offer of reasonable indemnity.

## COUPONS PAID SHALL BE CANCELED.

**TWENTY-THIRD.** As the coupons annexed to the consols are paid they shall be canceled, and no purchase, advance or loan thereof, after the same shall have been detached from the bonds to which they belong, shall keep such coupons alive or preserve their lien upon the mortgaged premises.

## DIRECTORS AND STOCKHOLDERS NOT LIABLE.

**TWENTY-FOURTH.** The directors and stockholders of the Railroad Company shall not be individually liable in respect to the consols, or any of them, or the interest thereon.

## COMPANY WAIVES ALL RIGHTS UNDER EXTENSION, VALUATION AND REDEMPTION LAWS.

**TWENTY-FIFTH.** The Railroad Company will not take advantage of any stay or extension, valuation or redemption law now or at any time hereafter in force, and it covenants that it will not hinder the execution of any power herein granted to the Trustee.

—The annual statement of the Atlantic Mutual Insurance Co. was issued on the 21st inst., and will be found in detail in our advertising columns. Six per cent interest on the outstanding certificates is payable Feb. 2. The certificates of 1891 will be redeemed at the same time. A dividend of 40 per cent is declared on the net earned premiums of the company for the year ending 31st December, 1896, for which certificates will be issued on and after Tuesday, the 4th of May next.

—The semi-annual statement of the Union Discount Co. of London has come to hand this week and will be found in the advertising columns of this issue. The statement includes a balance sheet and the profit and loss account for the six months ending Dec. 31. The paid-up capital stands at \$3,185,000 and the reserve fund at \$1,078,000. The Union Discount Co. has a standing card on the third page of the CHRONICLE, in which it keeps revised by cable the rates allowed for money.

—Messrs. August Belmont & Co. offer at par and accrue interest a limited amount of Nashville Chattanooga & St. Louis Railway Co. first consol. mort. 5 p. c. gold bonds due 1928. The earnings for the fiscal year ending June 30, 1895, showed a surplus above all charges of \$392,436; for the fiscal year ending June 30, 1896, there was a surplus of \$411,793, and for the five months ending Nov. 30 last a surplus of \$218,950.

—An interesting and valuable compilation showing in tabular form the financial status of leading railroads has been prepared by Mr. Geo. P. Toby, well known as manager of the investment department of H. B. Hollins & Co. The firm proposes sending these "tables" to its customers from time to time; also similar tables in regard to street railways, gas companies, ferry companies, municipal bonds and other subjects.

—"Guide to Buyers and Sellers of Real Estate," by Geo. W. Van Sicken, is a handy book of reference well known in real estate circles. A second edition recently issued contains the text of the real property law which went into effect Oct. 1, 1896. It has a complete index. Paper, 75 cents; cloth, \$1. "Record and Guide" Publishing Co., Nos. 14 and 16 Vesey Street.

—Messrs. Redmond, Kerr & Co. offer the balance of the first mortgage five per cent gold bonds of the Lexington Ave. & Pavonia Ferry and the Columbus & Ninth Avenue roads, guaranteed by the Metropolitan Street Railway Co., at 115½ and interest, at which price they yield 4.30 per cent. For details see their advertisement on page viii.

—Messrs. Spencer Trask & Co. are distributing their "Statistical Tables" for January, 1897, giving information relative to all securities dealt in on the New York Stock Exchange. The data has been compiled from original sources, and in the condensed form presented should prove useful.

—Attention is directed to the advertisement of Messrs. Farson, Leach & Co. in our State and City Department, offering \$150,000 Omaha, Neb., 4½ per cent bonds.

—Messrs. Pfeiffer, Walker & Co., 53 State Street, Boston, issued, under date of Jan. 20, a list of quotations for inactive railroad bonds.

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 22, 1897.

The general business situation has continued to slowly but steadily improve. Trade is gradually broadening, and the impression that a year of prosperity has been entered upon appears to be growing. Advice from financial circles have been generally of an encouraging nature. Early in the week the Bank of Germany lowered its official rate from 5 to 4 per cent and on Thursday a reduction of ½ of 1 per cent was made by the Bank of England in its minimum rate of discount.

A resolution has passed the State Senate providing for the appointment of a committee to investigate trusts and report for legislation. The Arbitration Treaty has continued a topic of interest, and all public declarations have been in favor of its ratification. Advice from Washington indicate that at the prospective special session of Congress prompt action on the tariff question will be taken, and that by the first of August the new bill will be before the President for his signature. Reports from Bombay, India, state that the ravages of the plague have continued unabated.

There has been a quiet market for lard on the spot but there has been no pressure to sell and values have held about steady, closing at 4.25c. for prime Western, 3.75c. for prime City and 4.55c. for refined for the Continent. The local market for lard futures has continued neglected and at the West trading has been quiet. Values have weakened slightly under fairly large receipts of swine, closing quiet.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Jan.	Mon.	Tues.	Wed.	Thur.	Fri.
January.....	4.25	4.20	4.20	4.25	4.25	4.20

Pork has continued to meet with a fair sale and values have ruled firm, closing at \$8.50@\$9 for mess, \$9.75@\$10 for family and \$8.75@\$10 for short clear. Cut meats have been in fairly good demand at hardening prices. The close was firm at 4½@4¾c. for pickled bellies, 12@10 lbs. average, 8½@9c. for pickled hams and 4½@4¾c. for pickled shoulders. Beef has had a limited sale, but for extra India mess prices have weakened slightly, closing at \$7.00@\$8.00 for mess, \$7.50@\$9.00 for packet, \$9.00@\$11.00 for family and \$13.00@\$14.00 for extra India mess. Beef hams have been quiet at \$17.50@\$18.00. The home trade has been a fair buyer of tallow at steady prices, closing at 3½c. Oleo stearine has had a fair sale, and the close was firm at 4¾c. bid and 4¾c. asked. Lard stearine has been dull and unchanged at 4¾c. Cotton seed oil has had a slow sale, but prices have been unchanged and steady, closing at 20c. for prime crude and 23@23½c. for prime yellow. Butter has been moderately active and steady at 13@20c. for creamery. Cheese has been in demand and firmer, closing at 8@11½c. for State factory, full cream. Fresh eggs have sold slowly and prices have further declined, closing at 15½c. for choice Western.

There has continued a quiet market for coffee of Brazil growth and at the close prices weakened slightly to 9¾c. for Rio No. 7. Mild grades have had a fairly quick sale and prices have advanced, closing at 16c. for good Cucuta and 22½@23½c. for standard Java. The trading in the market for contracts was quiet and the changes in prices have been unimportant. The close was quiet but steady.

The following were the closing prices:

Jan.....	9.45c.	April.....	9.50c.	July.....	9.60c.
Feb.....	9.45c.	May.....	9.50c.	Aug.....	9.60c.
March.....	9.45c.	June.....	9.55c.	Sept.....	9.60c.

Raw sugars have been unchanged. Refiners have been willing to pay old figures for supplies, but importers have continued to hold for higher prices and the sales have been limited to a few odd lots. The close was quiet at 3.3-16c. bid for centrifugal 98-deg. test; and 2.13-16c. bid for muscovado 89 deg. test. Refined sugars have been dull and prices for the hard grades have been lowered ½c. The soft grades are unchanged to ½c. lower; granulated was quoted at 4¾c. Teas have been quiet and barely steady.

Kentucky tobacco has sold slowly, but values have been firmly maintained. Seed leaf tobacco has continued in active demand at firm prices. Sales for the week were 4,200 cases, including: 1,700 cases 1895 crop, Pennsylvania seed leaf, 9@11c.; also 600 bales Havana at 65c. to \$1.10 in bond and 225 bales Sumatra at 70c. to \$1.75 in bond.

Only a moderate amount of business has been transacted in Straits tin, but prices have advanced sharply in response to foreign advices. At the close the higher prices had a tendency to check demand, closing firm at 13.60@13.70c. Ingot copper has had a fair sale at higher prices, closing firm at 11.90@12c. for Lake. Demand for lead has been moderate and prices have advanced slightly, closing at 3.05@3.10c. for domestic. Spelter has also advanced, closing at 3.90@3.95c. for domestic. Pig iron has been quiet and easy at \$11@13 for domestic.

Refined petroleum has been lower, closing at 6c. in bbls., 3.50c. in bulk and 6.70c. in cases; naptha dull at 6¾c. Crude certificates have been neglected. Credit balances have declined to 85c. Spirits turpentine has had only a limited sale but values have held steady at 27½@28c. Rosins have been quiet but steady at \$1.70 for common and good strained. Wool has been in increased demand and firmer. Hops have had a moderate sale at full values.

## COTTON.

FRIDAY NIGHT, JANUARY 22, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 130,160 bales, against 131,811 bales last week and 196,537 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,401,791 bales, against 5,912,320 bales for the same period of 1895-6, showing an increase since Sept. 1, 1896, of 1,183,571 bales.

There has been no increase in the speculative dealings in cotton for future delivery. A stronger undertone, however, has developed in the market, and should the speculation broaden to any extent, it is believed that prices would score a material advance. Saturday there was a slight weakening of prices under full port receipts. Monday the market was unsettled and prices were irregular. During early 'Change prices were lower in response to easier foreign advices, which were influenced by the belief that the movement of the crop for the week would be comparatively large. Subsequently, however, there developed a demand from "shorts" to cover contracts, on advices from the South reporting an increased export demand for cotton. The close showed prices 4@5 points higher to 2@3 points lower as compared with Saturday's final figures. The market Tuesday was firmer. There was buying by local traders, induced by stronger foreign advices and a decreased movement of cotton to the ports. Advices from the South stated that the export demand continued, and reports from Fall River were more favorable, which also added to the strength of the market. The advance in prices for the day was 4 to 10 points. Wednesday there was a slow market, but as foreign advices were again stronger and the port receipts were decreasing, prices further improved and closed at an advance of 2 to 4 points for the day. Thursday the market was higher during early 'Change on the execution of a few buying orders induced by a further improvement in foreign advices and a continued decreased movement of the crop. Subsequently, however, increased estimates of the port receipts for Friday prompted liquidating sales and the improvement was lost, the market closing unchanged to 3 points lower for the day. To-day the market opened 4 to 5 points higher on foreign advices and the decreased crop movement for the week; then weakened and lost the advance under realizing sales by longs; rallied to opening prices but again weakened, and closed barely steady with prices 2 points lower to 1 point higher for the day. Cotton on the spot has been in increased demand for export. Saturday and Monday prices declined 1-16c., but on Tuesday and Wednesday the loss was recovered. To-day the market was steady, middling uplands closing at 7 5-16c.

The total sales for forward delivery for the week are 612,501 bales. For immediate delivery the total sales foot up this week 6,837 bales, including 4,170 for export, 917 for consumption, — for speculation and 1,800 on contract. The following are the official quotations for each day of the past week—January 16 to January 22.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

UPLANDS.	Sat.	Mon.	Tues.	Wed.	Th.	Fri.
Good Ordinary.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Low Middling.....	6 7/8	6 13/16	6 7/8	6 13/16	6 13/16	6 13/16
Middling.....	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4

The above figures indicate an increase in the cotton in sight to-night of 153,441 bales as compared with the same date of 1896, a falling off of 764,831 bales from the corresponding date of 1895 and a decrease of 472,344 bales from 1894.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895-96—is set out in detail below.

† Last year's figures are for Newberry, S. C.

The above totals show that the interior stocks have decreased during the week 29,202 bales and are now 30,771 bales less than at same period last year. The receipts at all the towns have been 23,741 bales more than same week last year and since Sept. 1 they are 753,037 bales more than for same time in 1895-6.

\* Includes sales in September, for September, 15,100; September-October, for October, 384,800; September-November, for November, 372,000; September-December, for December, 2,290,000.

**■ We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "Av'ge." The average for each month for the week is also given at bottom of table.**

 For exchanges see page 193.

**THE VISIBLE SUPPLY OF COTTON** to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 22), we add the item of exports from the United States, including in it the exports of Friday only.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below are closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
	1896-97	1896-98	1894-95	1896-97	1896-98	1894-95	1896-97	1896-98	1894-95
Dec. 16 .....	327,176	272,743	359,698	575,781	585,332	568,829	334,171	251,748	426,921
" 24 .....	277,615	223,949	312,797	580,748	596,822	609,004	284,582	235,439	352,972
" 31 .....	319,122	176,324	251,451	578,175	583,063	600,936	216,819	163,165	243,806
Jan. 8 .....	196,347	136,322	207,746	552,205	565,410	568,651	170,297	117,069	178,441
" 15 .....	151,841	119,437	200,806	532,119	552,808	530,021	131,755	107,035	171,170
" 22 .....	130,160	112,896	213,026	502,917	533,638	507,440	100,958	93,475	160,482

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 5,784,111 bales; in 1895-96 were 4,413,208 bales; in 1894-95 were 6,463,675 bales.

2.—That although the receipts at the outports the past week were 130,160 bales, the actual movement from plantations was 100,958 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 93,475 bales and for 1895 they were 160,482 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for this week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 15 and since Sept. 1 in the last two years are as follows.

January 22	1896-97.		1895-96.

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 15,403 bales, against 6,299 bales for the week in 1896, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 15,171 bales.

\* Decrease during week.

It will be seen by the above that there has come into sight during the week 138,361 bales, against 116,774 bales for the same week of 1896, and that the increase in amount in sight to-night as compared with last year is 1,389,977 bales.

WEATHER REPORTS BY TELEGRAPH.—Our telegraphic advices this evening denote that rain has been general at the South during the week, retarding to some extent the movement of the crop. The moisture has been beneficial generally, although interfering in a measure with preparations for spring crops. Our Mobile correspondent reports large sales of fertilizers in Alabama.

Galveston, Texas.—General rain the past week has retarded farm work in some localities, but has put ground in fine condition. Plowing will be rushed. Rain has fallen on three days of the week, to the extent of one inch and twenty-two hundredths. The thermometer has averaged 53, the highest being 67 and the lowest 39.

Huntsville, Texas.—There has been heavy rain on three days during the week, the precipitation being one inch and sixty-six hundredths. The thermometer has ranged from 32 to 74, averaging 53.

Dallas, Texas.—We have had rain on three days of the week, the rainfall reaching one inch and thirty-two hundredths. Average thermometer 51, highest 73, lowest 30.

San Antonio, Texas.—Farm work is progressing rapidly. Rain was very beneficial. It has rained on two days of the week to the extent of fifty hundredths of an inch. The thermometer has averaged 53, the highest being 72 and the lowest 34.

Luling, Texas.—The rain has been beneficial to farming interests. There has been rain on two days of the week, the precipitation being sixty-seven hundredths of an inch. The thermometer has averaged 54, ranging from 33 to 74.

Columbia, Texas.—Rain has fallen on two days of the week, to the extent of one inch and forty-six hundredths. The thermometer has ranged from 35 to 77, averaging 56.

Guero, Texas.—We have had beneficial rain on two days of the past week, to the extent of one inch and six hundredths. Average thermometer 58, highest 75, lowest 32.

Brenham, Texas.—There has been rain on three days of the week, the precipitation reaching one inch and two hundredths; very heavy white frost on Wednesday morning. The thermometer has averaged 53, the highest being 73 and the lowest 31.

Fort Worth, Texas.—There has been rain on three days during the week, the rainfall being one inch and thirty-five hundredths. The thermometer has ranged from 30 to 70, averaging 50.

Weatherford, Texas.—We have had beneficial rain on three days during the week, to the extent of one inch and forty hundredths. Average thermometer 50, highest 72, lowest 29.

New Orleans, Louisiana.—We have had rain on four days during the week, the precipitation reaching seventy hundredths of an inch. The thermometer has averaged 56.

Shreveport, Louisiana.—We have had rain on five days of the week, the precipitation reaching one inch and eighty-one hundredths. The thermometer has averaged 49, ranging from 36 to 66.

Columbus, Mississippi.—Telegram not received.

Leland, Mississippi.—There has been rain on five days during the week, the precipitation reaching two inches and twenty-four hundredths. Average thermometer 48.7, highest 73 and lowest 27.

Vicksburg, Mississippi.—There has been rain on three days of the week, to the extent of two inches and eight hundredths. The thermometer has averaged 49, the highest being 69 and the lowest 32.

Little Rock, Arkansas.—The week's rainfall has been two inches and twelve hundredths, on three days. The thermometer has averaged 43, ranging from 39 to 56.

Helena, Arkansas.—Rain has fallen heavily on two days of the week, the precipitation being two inches and eighty hundredths, but the weather is now clear and favorable. The thermometer has ranged from 23 to 60, averaging 41.5.

Memphis, Tennessee.—There has been rain on three days during the week, the precipitation reaching one inch and ninety-nine hundredths. Average thermometer 41.2, highest 61.3 and lowest 30.3.

Nashville, Tennessee.—It has rained on two days during the week, with rainfall to the extent of eighty hundredths of an inch. The thermometer has averaged 45, the highest being 66 and the lowest 25.

Mobile, Alabama.—Large sales of fertilizers are reported for Alabama. The week's rainfall reached one inch and fifty-one hundredths on five days. The thermometer has averaged 53, ranging from 37 to 76.

Montgomery, Alabama.—Rain has fallen on three days of the week to the extent of one inch and fifty-five hundredths. Latter part of week cold and dry. The thermometer has ranged from 41 to 57, averaging 49.

Madison, Florida.—Telegram not received.

Savannah, Georgia.—We have had rain on four days of the week, to the extent of one inch and one hundredth. The thermometer has ranged from 35 to 69, averaging 52.

Augusta, Georgia.—The week's rainfall has been ninety-four hundredths of an inch, on five days. Average thermometer 48, highest 65 and lowest 30.

Charleston, South Carolina.—There has been rain on five days of the week to the extent of thirty-one hundredths of an inch. The thermometer has averaged 51, the highest being 67 and the lowest 39.

Stateburg, South Carolina.—We have had rain on three days during the week, the precipitation reaching eighty-nine

hundredths of an inch. The thermometer has averaged 45.9, ranging from 31 to 64.

**Wilson, North Carolina.**—It has rained on two days of the week, the rainfall reaching thirty-nine hundredths of an inch. Average thermometer 44, highest 58, lowest 30.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock January 21, 1897, and January 23, 1896.

20 pd. to exch. 500 Sept. for July.	21 pd. to exch. 500 Feb. for May.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 21.

**BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.**

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.	
	Great Brit'n	Continent.	Total.	Great Britain	Continent.	Total.	This Week.	Since Sept. 1.
'96-7	2,000	3,000	5,000	14,000	121,000	135,000	47,000	425,000
'95-6	2,000	2,000	4,000	14,000	184,000	198,000	64,000	711,000
'94-5	1,000	1,000	2,000	1,000	40,000	41,000	41,000	255,000
'93-4	3,000	27,000	30,000	13,000	179,000	192,000	67,000	412,000

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 17,000 bales and an increase in shipments of 1,000 bales, and the shipments since Sept. 1 show a decrease of 63,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipments for the week.			Shipments since Sept. 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Calcutta—						
1896-97...	.....	3,000	3,000	4,000	17,000	21,000
1895-96...	.....	2,000	2,000	5,000	9,000	14,000
Madras—						
1896-97...	.....	.....	.....	9,000	17,000	26,000
1895-96...	1,000	.....	1,000	17,000	14,000	31,000
All others—						
1896-97...	.....	2,000	2,000	12,000	36,000	48,000
1895-96...	1,000	.....	1,000	19,000	27,000	46,000
Total all—						
1896-97...	.....	5,000	5,000	25,000	70,000	95,000
1895-96...	2,000	2,000	4,000	41,000	50,000	91,000

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales more than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1896, and for the corresponding periods of the two previous years, are as follows.

**EXPORTS TO EUROPE FROM ALL INDIA.**

Shipments to all Europe from—	1896-97.		1895-96.		1894-95.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Bombay.....	3,000	130,000	2,000	193,000	1,000	41,000
All other ports	5,000	95,000	4,000	91,000	1,000	71,000
Total	8,000	225,000	6,000	284,000	2,000	112,000

**ALEXANDRIA RECEIPTS AND SHIPMENTS.**—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, January 20.	1896-97.	1895-96.	1894-95.
Receipts (cantars).....			
This week.....	155,000	115,000	193,000
Since Sept. 1.....	4,299,000	4,183,000	3,461,000
Exports (bales)—			
To Liverpool.....	4,000	212,000	7,000
To Continent.....	7,000	173,000	10,000
Total Europe	11,000	385,000	17,000

cantars is 95 pounds, which is a meritorious in 1896-97, 17,019 bales; in 1895-96, 35,630 bales; in 1894-95, 22,929 bales.

This statement shows that the receipts for the week ending Jan. 20 were 155,000 cantars and the shipments to all Europe 11,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is quiet for both yarns and shirtings. The demand for both yarn and cloth is poor. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

1896-97.													1895-96.															
32s Cop. Twist.					8 1/4 lbs. Shirtings, common to finest.					Oolfin Mid. Uplds			32s Cop. Twist.					8 1/4 lbs. Shirtings, common to finest.					Oolfin Mid. Uplds

**MEMPHIS COTTON EXCHANGE ELECTION.**—At the regular annual election for officers of the Memphis Cotton Exchange, held on the 13th inst., the following were elected to serve during the ensuing year: F. M. Norfleet, President; Dennis Smith, S. B. Chism, R. F. Tate, Vice Presidents; B. B. Beecher, B. W. Haley, C. H. Crisman, S. J. York, H. E. Wild, Godfrey Frank, W. S. Arbuckle, Board of Directors, and John Armistead, Treasurer. Mr. Henry Hotter was unanimously elected Secretary to serve during the ensuing year. This is his seventh consecutive annual appointment.

**JUTE BUTTS, BAGGING, &C.**—The market for bagging has presented no features of importance the past week. There have been practically no transactions, but prices are nominally unchanged at 4 1/2 c. for 1 1/4 lbs., 5 c. for 2 lbs. and 5 1/2 c. for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4 1/2 c. for 1 1/4 lbs., 5 c. for 2 lbs. and 5 1/2 c. for 2 1/4 lbs. f. o. b. at New York. Jute butts continue dull at 1 1-16 c. for paper quality, 1 7-16 @ 1 11-16 c. for mixing and bigging and 1 1/4 c. for spinning butts, all to arrive.

**DOMESTIC EXPORTS OF COTTON MANUFACTURES.**—Through the courtesy of Mr. W. C. Ford, Chief of the Bureau of Statistics, we have received this week a statement showing the exports of domestic cotton manufactures for November and for the eleven months ended Nov. 30, 1896, with like figures for the corresponding periods of the previous year, and give them below:

Quantities of Manufactures of Cotton (colored and uncolored) exported to—	Month ending Nov. 30.		11 mos. ending Nov. 30.	
	1896.	1895.	1896.	1895.

**EAST INDIA CROP.**—The following report from Messrs. Gaddum, Bythell & Co. is dated Bombay, January 7:

The receipts are again disappointingly small, even below last week's figures, but the opinion is held that there will be a considerable increase before long, as cotton is being kept back owing to the unusual condition of affairs prevailing up-country. There has been a curious and sudden change in the position of our market during the last few days, entirely due to the continued ravages of the devastating epidemic. The plague has now attacked that quarter of the town where the bulk of the mill operatives reside, and caused a general flight on their part, and consequent shutting-down of the mills. The cotton market naturally feels the change, and European houses are now, for the first time this season, able to buy without seeing prices immediately forced up, as the result of even moderate purchases. The receipts hitherto have been only sufficient to meet comfortably the local demand, but now that this is withdrawn our dealers find their stocks accumulating and are consequently more tractable than hitherto.

**EXPORTS OF COTTON GOODS FROM GREAT BRITAIN.**—Below we give the exports of cotton yarn, goods, &c., from Great Britain for the month of December and since January 1 in 1896 and 1895, as compiled by us from the British Board of Trade returns. It will be noticed that we have reduced the movement all to pounds.

**Stocks and socks.**..... 1,190 1,210  
**Sundry articles**..... 25,263 23,716

**Total exports of cotton manufactures**..... 1,502,570 1,270,007  
 \* 1,008,784.

The foregoing shows that there has been exported from the United Kingdom during the twelve months 1,302,570,000 lbs. of manufactured cotton, against 1,270,007,000 lbs. last year, or an increase of 32,478,000 lbs.

A further matter of interest is the destination of these exports, and we have therefore prepared the following statements, showing the amounts taken by the principal countries during December and since January 1 in each of the last three years:

**EXPORTS OF PIECE GOODS AND YARNS TO PRINCIPAL COUNTRIES IN DECEMBER AND FROM JANUARY 1 TO DECEMBER 31.**

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (Jan. 22) and since Sept. 1, 1896, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

Receipts to Jan. 22.	1896-97.		1895-96.		Week.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1897.	1896.
Savannah.....	1,565	75,057	1,564	67,124	27,935	17,903
Charleston, &c.....	121	8,907	160	9,425	3,808	2,503
Florida, &c.....	355	5,412	85	4,573	3,572	922
<b>Total.....</b>	<b>2,041</b>	<b>90,376</b>	<b>1,819</b>	<b>81,124</b>	<b>37,313</b>	<b>21,330</b>

The exports for the week ending this evening reach a total of 880 bales, of which 270 bales were to Great Britain, 500 to France and 100 to Reval, and the amount forwarded to Northern mills has been 863 bales. Below are the exports for the week and since September 1 in 1896-97 and 1895-96.

Exports from—	Week Ending Jan. 22.			Since Sept. 1, 1896.			North'n Mills.	
	Great Brit'n.	France &c.	Total.	Great Brit'n.	France &c.	Total.	Week.	Since Sept. 1.

<b>Total.....</b>	<b>270</b>	<b>610</b>	<b>880</b>	<b>25,526</b>	<b>7,270</b>	<b>32,796</b>	<b>863</b>	<b>23,205</b>
<b>Total 1895-6</b>	<b>640</b>	<b>87</b>	<b>727</b>	<b>26,688</b>	<b>5,447</b>	<b>32,133</b>	<b>508</b>	<b>28,046</b>

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotations Jan. 22 at Savannah, for Floridas, common, 9c.; medium fine, 12c.; choice, 15c.

Charleston, Carolinas, medium fine, nominal; fine, 17½c.; fully fine, 20@23c.

**AVERAGES OF TEMPERATURE AND RAINFALL.**—As of interest in connection with our monthly weather record, we have prepared the subjoined tables, which show the State averages of thermometer and rainfall in September, October, November and December for six years, 1891 to 1896, inclusive.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since September 1, 1896, and in previous years, have been as follows:

Monthly Receipts	Year Beginning September 1.					
	1896.	1895.	1894.	1893.	1892.	1891.
Septemb'r	912,496	393,986	513,762	377,408	405,355	676,823
October	1,408,516	1,202,480	1,622,864	1,311,279	1,135,473	1,532,420
Novemb'r	1,288,251	912,759	1,607,662	1,272,776	1,125,855	1,376,904
December	1,256,000	987,899	1,497,560	1,239,738	930,029	1,215,144
Total...	4,923,253	3,497,004	5,248,648	4,200,191	3,596,712	4,801,302
Percentage of tot. port receipts Dec. 31...	61.64	66.56	70.21	70.19	67.03	...

This statement shows that up to December 31 the receipts at the ports this year were 1,436,219 bales more than in 1895 and 323,375 bales less than in 1891.

WEATHER RECORD FOR DECEMBER.—Below we give the thermometer and rainfall record for the month of December and previous months of this year and the two preceding years. The figures are from the records of the Weather Bureau, except at points where they have no station, and at those points they are from records kept by our own agents.

## BREADSTUFFS.

FRIDAY, January 23, 1897.

Early in the week there was a very slow market for wheat flour. Buyers and sellers were apart—the former reduced their bids, while the latter held for old prices. Subsequently, however, sellers weakened on some grades, and yesterday a fairly good business was transacted at the concessions. The demand for rye flour has been slow and prices have declined. Buckwheat flour has continued to sell slowly and values have dropped to a slightly lower basis. Corn meal has had a slow sale, and for the coarser grades prices have declined in sympathy with a weaker market for the grain. To-day the market for wheat flour was quiet and unchanged.

Speculation on the market for wheat futures has been only moderately active and prices for the week showed a slight decline. Immediately following our last report the market advanced, as unfavorable crop prospects reported from Russia stimulated a demand from shorts to cover contracts. Monday and Tuesday, however, prices weakened and declined 1c. per bushel. Foreign advices were quiet and easier and the export demand showed a material falling off, which prompted liquidating sales by longs. Wednesday the market again turned stronger, on advices from the Southwest reporting a large cash business transacted, which were accompanied by buying orders. Thursday the improvement was lost as weaker foreign advices and a denial of the reported large cash business in the Southwest prompted renewed liquidation on the part of tired longs. To-day the market was quiet but at the close prices advanced slightly on buying by a few shorts to cover contracts. In the spot market shippers have been less active buyers; still a moderate amount of business has been transacted and values have been fairly well maintained. To-day the sales included No. 2 Northern at 89 1/2c. f. o. b. afloat and No. 1 hard Manitoba delivery at the opening of navigation on private terms. No. 2 red winter was quoted at 97 1/2c. f. o. b. afloat; No. 1 hard Duluth at 96 1/2c. f. o. b. afloat and No. 1 Northern at 92 1/2c. f. o. b. afloat.

### DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat	Mon	Tues	Wed	Thurs	Fri.

July delivery.....	83	83 1/4	82 3/4	83 3/4	82 3/4	82 3/4

There has continued a quiet speculation in the market for Indian corn futures, and prices have steadily declined under free offerings from the West, prompted by an increasing movement of the crop. Early in the week increases in the American visible supply and the quantity on passage to Europe were depressing features. To-day the market was quiet but steady. In the spot market shippers have continued active

buyers, their purchases for the week here and at outports amounting to 1,750,000 bushels. To-day the market was fairly active and steady. The sales included No. 2 mixed at 28½¢, in elevator, 29½¢, delivered and 29½¢, f.o.b. afloat; also steamer yellow, steamer white and steamer mixed at 27½¢, in elevator.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	29½	29½	29½	29½	29½	29½
May delivery.....c.	30½	30½	30½	30½	30½	30½
July delivery.....c.	31½	31½	31½	31½	31½	31½
September delivery.....c.	32½	32½	32½	32½	32½	32½

The trading in the market for oats future has been quiet, and prices have gradually weakened in sympathy with the weakness of corn and under fairly free offerings from the West. To-day the market was dull and slightly easier. In the spot market a fair amount of business has been transacted, as both shippers and the home trade have been buyers. The export sales for the week amounted to 250,000 bushels. To-day the market was moderately active and steady. The sales included white clipped for export on private term; No. 2 mixed at 22¢, in elevator and No. 2 white at 24¢, in elevator.

#### DAILY CLOSING PRICES OF NO. 2 MIXED OATS

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	22½	22½	22½	22½	22½	22½

For other tables usually given here see page 161.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Jan. 22, 1897.

The Fall River manufacturers are taking active steps to curtail production, and at a meeting held yesterday resolved to work but 43 hours per week for 3 months from February 1, provided mills representing not less than 3,500,000 spindles in Fall River and elsewhere signed the agreement. This is an important feature of the general situation, and another this week has been the general reduction of ½¢. per yard in leading makes of bleached cottons, bringing some of them down to the lowest price ever recorded. The demand for bleached goods has been stimulated thereby, and there has been some development of buying in brown cotton goods and in spring lines of cotton dress fabrics. The week closes with a somewhat more assured tone. The bleached goods reductions have removed an element of uncertainty. Short time at Fall River will steady the tone of the market in several directions, and the growing demand for small to moderate quantities of general lines is evidence that stocks in second hands are being distributed with a fair amount of freedom. All weak spots have not been eliminated, but there is a more general impression that the market has passed its worst stage. In the woolen goods market more business has been done than for some time past, but the new heavy-weight season is still very backward. There are few complaints regarding collections.

**DOMESTIC COTTON GOODS**—The exports of cotton goods from this port for the week ending Jan. 18 were 11,976 packages, valued at \$495,054, their destination being to the points specified in the tables below:

NEW YORK TO JANUARY 18.	1897.		1896.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	14	102	37	142
Other European.....	367	484	122	142
China.....	9,775	9,779	1,185	6,553

China, via Vancouver.....	.....	3,050	.....	1,000
Total.....	11,976	22,150	3,467	13,633

From New England mill points direct.

The value of the New York exports for the year to date has been \$522,410 in 1897 against \$612,003 in 1896.

The reductions in prices of leading makes of bleached cottons, which buyers have been expecting for some time

past, were made this week. Fruit of the Loom 4-1s were reduced to 6½¢, net, the lowest price they have ever touched. Lonsdale 4-1s to 6½¢, with a slight increase in discount, making the price the lowest on record for them also. New York Mills 4-1s was reduced to 9½¢. Hope, Blackstone and Farwell to 6¢, and a number of other tickets also moved into line. Sales have increased since the new prices were made. There has been more doing in brown sheetings and drills also in the way of quick business, but little if any expansion in the demand for future deliveries. Brown goods are decidedly irregular in price. Wide sheetings are irregular also without open change in quotations. All coarse colored cottons are dull and generally easy to buy. Cotton flannels and blankets inactive and unchanged in price. Kid-finished cambrics slow of sale but steady. Fancy printed and fine printed specialties are reordered more freely, but regular lines in indigo blues, shirtings, etc., are dull and featureless. Staple ginghams inactive, and in dress styles only the finer qualities in demand to any extent. Print cloths less active than last week, but close firm, with no sellers of extras under 29-16c. There was a reduction of 192,000 pieces in Fall River stock last week.

	1897.	1896.	1895.	1894.
Stock of Print Cloths—	Jan. 18	Jan. 18.	Jan. 19.	Jan. 20.
At Providence, 64 squares.....	453,000	160,000	61,000	167,000
At Fall River, 64 squares.....	756,000	288,000	23,000	200,000
At Fall River, odd sizes.....	807,000	259,000	95,000	55,000

Total stock (pieces).....1,938,000 707,000 184,000 422,000

**WOOLEN GOODS**—There have been a few additional lines of heavy-weight fabrics for men's wear opened during the week, but agents are still slow in making a full display, and the fall season's business makes but indifferent progress, leaving the price situation still more or less unsettled. There has been a clear increase, however, in the number of reorders for light-weight goods, and late as it is this supplementary business promises further development. All-wool fancies in light weights are generally firm, but staples show considerable irregularity. The demand for such low-grade goods as satinet and doeskin jeans is slow and cotton-warp cassimeres sell indifferently. Kersey and beavers still hold the best of the business in overcoatings, but are not in more than moderate request, with buyers readily met. Cloakings have again been featureless. Flannels sell in small quantities only and blankets are quiet at previous prices. Fancy dress goods in low and medium grades are in fair demand with a quiet business in staples without material change in prices.

**FOREIGN DRY GOODS**—A fair amount of business has been done in ribbons, laces and in other specialty lines, with a slight increase in store trade in dress goods and silks in new spring lines. Buyers find a much smaller supply of foreign goods offered than usual, particularly in dress goods, silks for spring, and in men's-wear fabrics for fall.

**Imports and Warehouse Withdrawals of Dry Goods**

The importations and warehouse withdrawals of dry goods at this port for the week ending January 21, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK AND SINCE JANUARY 1, 1897 AND 1896.

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the **COMMERCIAL AND FINANCIAL CHRONICLE**.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

TERMS for the **CHRONICLE** with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—(Per inch space.)

One time.....	\$3 50	Three Months (13 times)...	\$25 00
One Month (4 times)...	11 00	Six months (28 times)...	43 00
Two Months (8 times)...	18 00	Twelve Months (52 times)...	58 00

(The above terms for one month and upward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT**. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopaedia of information respecting **Municipal Debts**.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Atlantic City, N. J.—Bond Offering.**—Proposals will be received until 12 o'clock, noon, January 30, 1897, by this city, for the purchase of \$10,000 of city improvement bonds, dated January 15, 1897, and maturing May 15, 1911. The denomination of the securities will be \$1,000, and they will bear interest at the rate of 4½ per cent, payable semi-annually on May 15 and November 15 at the Union National Bank, Atlantic City. The above are coupon bonds and are secured by a sinking fund.

The bonded indebtedness of Atlantic City is \$205,210. This does not include the water debt of \$875,000. The sinking fund amounts to \$45,500; assessed valuation, \$13,090,954; real valuation, \$40,000,000. The population is estimated at 22,000.

**Baltimore, Md.—Bond Offering.**—Proposals will be received until noon February 1, 1897, at the office of the Mayor of this city for the purchase of \$1,453,300 of stock of the city of Baltimore. The securities will be dated January 1, 1897, maturing July 1, 1936. Interest at the rate of 3½ per cent will be payable semi-annually on January 1 and July 1. This issue of stock was authorized July 2, 1896, for the purpose of funding the floating debt of the city existing December 31, 1895. The city does not tax its stock but pays the State tax on this issue.

The official advertisement of this bond sale will be found elsewhere in this Department.

**Bluffton, Ohio.—Bonds Authorized.**—H. V. Eaton, Mayor and Justice of the Peace, reports to the **CHRONICLE** that the citizens of Bluffton have voted 260 to 81 in favor of issuing \$8,000 of electric light bonds. The securities will bear interest at the rate of 6 per cent and mature in sixteen years from date of issue.

**Centerville, Mich.—Bond Election.**—An election will be held in Centerville to determine the question of issuing bonds for the purchase of water works.

**Charlotte, Mich.—Bond Election.**—An election will probably be held in this city to decide the question of issuing electric light bonds.

**Chicago Sanitary District, Ill.—Bond Sale.**—At the sale of \$800,000 of bonds of this district on January 18, 1897, nine bids in all were received, one of which, from S. A. Kean & Co., was too late for consideration. The bonds have since

been awarded to the Merchants' Loan & Trust Co., of Chicago. Below we give a list of the bids.

	Amount.	Premium.
Merchants' Loan & Trust Co.....	\$800,000	\$17,168 00
E. H. Gay & Co., Boston.....	800,000	10,687 50
New York Security & Trust Co.....	800,000	9,100 00
Blair & Co., New York.....	800,000	6,915 00
Estabrook & Co., Boston.....	401,000	6,600 00
Illinois Trust & Savings Bank.....	25,000	367 50
First National Bank.....	8 0,000	6,614 00
B. A. Seitz, Chicago.....	200,000	1,741 40
Lamprecht Bros. Co., Cleveland.....	200,000	2,100 00

\* This bid was supposed to be due to a clerical error.

The premium at which the bonds were sold is equal to a rate of 102¼, and will net the purchaser about 4¼ per cent.

The securities will be dated Jan. 1, 1897. Interest at the rate of 4½ per cent will be payable semi-annually on Jan. 1 and July 1, and the principal will mature at the rate of \$40,000 yearly from Jan. 1, 1898, to Jan., 1917, inclusive. Both principal and interest will be payable at the office of the Treasurer of the Sanitary District, Chicago, Ill. The denomination of the bonds will be \$1,000.

The present net bonded indebtedness of the above district is \$11,210,000 and the assessed valuation over \$241,000,000.

**Clarksville, Tenn.—Bonds Proposed.**—It is reported that this city has petitioned the Legislature for authority to issue water-works bonds to the amount of \$20,000.

**Cleveland, Ohio.—Bond Sale.**—The \$250,000 of 4 per cent city of Cleveland river and harbor bonds offered on Jan. 20, 1897, have been awarded to Messrs. Estabrook & Co. at 100 83.

These bonds are dated Oct. 1, 1896, and will mature Oct. 1, 1926; both principal and interest will be payable at the American Exchange National Bank in New York City, interest payable semi-annually. All bonds are of \$1,000 denomination.

**Colorado Springs, Col.—Bond Election.**—An election will be held in this city to vote on the proposition to issue school-building bonds to the amount of \$50,000.

**Bonds Proposed.**—Sewer bonds of this city to the amount of \$25,000 have been proposed and the proposition to issue the same will be put to a vote of the people in April next.

**Duquesne, Pa.—Bond Election.**—The question of issuing \$40,000 of street improvement and \$25,000 of sewer bonds will soon be put to a vote of the citizens of Duquesne.

**Gallia County, Ohio.—Bond Sale.**—On January 15, 1897, County Auditor J. W. Jones awarded \$75,000 of turnpike serial bonds to S. Kuhn & Sons, of Cincinnati, at a premium of \$6,732 50. Other bids received were as follows:

	Premium.
E. H. Gay & Co., Boston, Mass.....	\$6,543 75
Fourth National Bank, Columbus, O.....	6,113 00
Farnon, Leach & Co., Chicago, Ill.....	6,103 50
Diez, Denison & Prior, Cleveland, O.....	6,076 80
R. Kleibolte & Co., Cincinnati, O.....	5,544 75
N. W. Harris & Co., Chicago, Ill.....	5,514 00
Leland, Towle & Co., Boston, Mass.....	5,445 00
W. J. Hayes & Sons, Cleveland, O.....	5,115 00
Ohio Savings Bank, Columbus, O.....	5,110 00
Centerville National Bank, Thurman, O.....	4,810 00
C. W. Henking, Gallipolis, O. (for \$14,000).....	680 00

The securities will bear interest at the rate of 5 per cent, payable semi-annually at the office of the County Treasurer.

The bonds will be of the denomination of \$500, will be dated January 15, 1897, and mature as follows: January 15, 1905, \$10,000; January 15, 1909, \$10,000; January 15, 1911, \$10,000; January 15, 1913, \$5,000; January 15, 1914, \$15,000; January 15, 1915, \$10,000, and on January 15, 1916, \$15,000.

The total bonded debt of Gallia County is \$150,000. The assessed valuation is \$6,421,145, the real valuation about \$15,000,000 and the average tax rate (per \$1,000) \$20 26. The population in 1890 was 27,005 and it is now estimated at 33,000.

**Gillett School District, Col.**—It is reported that this district has authorized the issuance of bonds to the amount of \$50,000 for the purpose of erecting new school buildings.

**Gloversville, N. Y.—Bond Offering.**—On February 17, 1897, at 2 o'clock P. M., \$14,000 of local improvement bonds of the city of Gloversville, N. Y., will be offered for sale at the office of City Chamberlain H. A. Phillips. The securities will be dated February 1, 1897; they will bear interest at the rate of 4½ per cent, payable annually on February 1 at the Fourth National Bank of New York, and the principal will mature at the rate of \$2,800 yearly on February 1, from 1898 to 1902 inclusive. The denomination of the bonds will be \$100, \$500 and \$1,000.

**Greenwood, Miss.—Bonds Proposed.**—It is reported that bridge bonds of this city to the amount of \$20,000 have been proposed. The securities, if authorized, will bear interest at the rate of 6 per cent, and the principal will mature in twenty-five years from date of issue.

**Harrietstown Union Free School District No. 1, N. Y.—Bond Offering.**—Proposals will be received until 7:30 o'clock P. M., February 2, 1897, by R. H. McIntyre, Clerk of Board of Education, Saranac Lake, N. Y., for the purchase of \$3,000 of school bonds of the above district.

The securities will be of the denomination of \$1,000 each, and will be dated January 1, 1897, the principal maturing at the rate of \$1,000 yearly from 1898 to 1903, inclusive.

Interest at the rate of  $4\frac{1}{2}$  per cent will be payable annually on January 1st at the People's National Bank, Malone, N. Y.

The bonds are to be used for the erection of a new school building at Axton, N. Y., and for an addition to the school building in the village of Saranac Lake.

The official advertisement of this bond sale will be found elsewhere in this Department.

**Hoboken, N. J.—Bond Sale.**—This city has awarded \$232,000 of 4 per cent bonds to Benwell & Eberitt at 100-57. The securities are described as follows: free library construction bonds maturing 20 years from date of issue, \$50,000; school house bonds also due 20 years from date, \$90,000; and main outlet sewer bonds, \$92,000, becoming due at the rate of \$10,000 yearly, beginning 20 years after date. The bonds will be of the denomination of \$1,000, and will be either coupon or registered. They will be dated Jan. 1, 1897, and interest will be payable semi-annually.

**Huntsville, Ala.—Bonds Authorized.**—It is reported that bonds of this place have been authorized. The proceeds will be used for the construction of a sewerage system.

**Illinois—Bond News.**—It is reported that Governor Tanner, of this State, intends sending a special message to the Legislature early next week, urging the necessity of and authorizing the borrowing of \$250,000 to pay current expenses on account of the depleted condition of the treasury.

**Iowa.—Auditor's Report.**—In a report to the Governor of Iowa the Auditor of the State shows a present deficit in the Treasury of \$307,075, and he thinks the amount will be further increased during the current year. Speaking of the deficit, he says: "It is the result of various extraordinary expenses—the soldiers' monument, the expenditure of \$190,000 at the Clarinda Asylum and of \$400,000 at Cherokee for another asylum, the census, the World's Fair, the Glenwood fire loss, have all been extraordinary expenses. We can live down the deficit by ceasing to appropriate. We must stop building till we are out of debt. The last General Assembly appropriated \$25,000 more than our revenue will provide. The same thing has been going on several years. We will have to stop this or issue bonds."

**Johnstown, N. Y.—Bond Sale.**—The \$5,000 of 4 per cent refunding coupon bonds offered by Johnstown on Jan. 20, 1897, have been awarded to Walter Stanton & Co. of New York at their bid of 100-52 and interest. The following is a list of the bids received.

Walter Stanton & Co., New York.....	100-52 and interest.
Whann & Schlesinger, New York.....	100-51 and interest.
Rudolph Kierbolte & Co., New York.....	100-125 and interest.
S. A. Keen, Chicago, Ill.....	100-60 and interest.
The Home Savings Bank, Albany, N. Y.....	100-00

The securities will be dated February 1, 1897. Interest will be payable semi-annually on the first days of February and August, and \$2,000 of the principal will mature at the rate of \$200 yearly, beginning February 1, 1898; the remaining \$30,000 will mature in six years from February 1, 1908, at the rate of \$500 each year. Principal and interest will be payable at The People's Bank of Johnstown. This loan is for the purpose of refunding bonds to the same amount heretofore issued by the former town of Johnstown and loaned to the Fonda Johnstown & Groversville Railroad Company. The bonds will be exempt from all taxation. The total bonded debt of the said town is estimated at \$13,500, made up as follows: The present issue of \$5,000; the estimated proportional share of \$10,000 refunding bonds, 4 per cent, due 1901; \$14,000 refunding bonds, 4 per cent, due \$2,000 each year, and \$10,000 4 per cent refunding bonds, due \$1,000 each year, making a total of \$34,000 payable by the city of Johnstown and town of Johnstown, of which the town's proportional share is less than 25 per cent. The assessed valuation of real and personal property for the year 1896 is \$866,260 and the estimated real valuation is \$1,732,520.

**Lima, Ohio.—Bond Sale.**—On January 18, 1897, bonds of this city to the amount of \$37,000 were awarded to the Fourth National Bank of Columbus, Ohio, at their bid of 110. Fifteen bids in all were received. The securities are assessment bonds, bearing 6 per cent interest and maturing in from one to eleven years from date of issue.

**Littlestown, Pa.—Bonds Proposed.**—Water-works bonds of this place to the amount of \$15,000 will probably be offered for sale in a short time. As the town at present has not sufficient authority to issue the whole amount, a special act has been applied for. The securities will bear interest at the rate of 4 per cent and mature in from 7 to 20 years from date of issue.

**Mitchell, S. D.—Bonds Unsold.**—As no bids were received on January 4, 1897, the date set for the sale of \$75,000 of refunding bonds of this city, J. K. Smith, City Auditor, has been authorized to dispose of the bonds at private sale in any amount above \$10,000, such sales being subject to the approval of the City Council. The securities bear interest at the rate of 6 per cent, maturing in 20 years, subject to call.

**Montgomery, Ala.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 15, 1897, by R. H. Sommerville, Treasurer, for the purchase of paving bonds of this city to the amount of \$150,000. The securities will be of

the denomination of \$1,000 each. They will bear interest at the rate of 6 per cent, payable semi-annually in May and November, at the American Exchange Nat. Bank, New York, and the principal will mature in 30 years from date of issue. The coupons of these bonds will be received for taxes and licenses.

The official advertisement of this bond sale will be found elsewhere in this Department.

**Mount Pleasant, N. Y.—Bond Sale.**—It is reported that Mount Pleasant has sold \$6,500 of school bonds at 100-50.

**Northampton, Mass.—Temporary Loan.**—It is reported that this city has awarded a loan of \$50,000 to Bond & Goodwin at a premium of  $\frac{1}{2}$  per cent. The loan will bear  $3\frac{1}{2}$  per cent interest and mature November, 1897.

**Oakland, Cal.—Bond Sale.**—At a meeting of the Auditing and Finance Committee on January 14, 1897, the \$140,000 of 4 per cent refunding bonds offered by this city on January 4, 1897, were awarded to C. H. White & Co., of New York, at a premium of \$85. Two other bids received were: The Lamprecht Bros. Co., Cleveland, Ohio, who offered par, and E. D. Shepard & Co., New York, 95-10 and interest. The loan will be payable at the rate of \$3,500 annually at the office of the City Treasurer.

**Omaha, Neb.—Bond News.**—On Jan. 15, 1897, the following bids for \$316,000 of renewal bonds of this city were opened by A. G. Edwards, Treasurer:

W. J. Hayea & Sons, Cleveland, Ohio, 100 and interest; R. Kleybolte & Co., Cincinnati, Ohio, 100 and interest; Dietz, Denison & Prior, Cleveland Ohio, 100 flat.

Representatives of other bond houses were present but did not bid, and as none of the bidders complied with the advertisement the bonds were not awarded.

The securities will bear interest at the rate of  $4\frac{1}{2}$  per cent and the principal will mature in ten years from date of issue.

**Paxton Irrigation District, Neb.—Bond Offering.**—Proposals will be received until January 30, 1897, by this district for the purchase of irrigation bonds to the amount of \$27,000.

**Phelps, N. Y.—Bond Sale.**—On January 20, 1897, \$32,000 of refunding bonds of this town were awarded to Samuel K. Nestor, of Geneva, N. Y., at 102. Thirteen bids were received. The securities are coupon bonds, bearing 4 per cent interest and maturing at the rate of \$1,500 annually. The town has no other bonded indebtedness. The assessed valuation is reported as over \$3,500,000.

**Plainfield, N. J.—Bond Offering.**—Proposals will be received until 8 o'clock, P. M., February 1, 1897, by the Common Council of the city of Plainfield for the purchase of sewer bonds, the amount of which is not to exceed the sum of \$24,000. The securities will bear interest at the rate of 4 per cent, payable annually, and the principal is to mature, part yearly, for a period of not more than forty years from date of issue. Principal and interest will be payable in gold.

**St. Albans, Vt.—Bond Offering.**—Proposals will be received until 12 o'clock noon January 27, 1897, by this village for the purchase of \$86,000 of refunding coupon bonds. The securities will be dated February 1, 1897; interest at the rate of 4 per cent will be payable semi-annually, and the principal will mature at the rate of \$5,000 annually. The denomination of the bonds will be \$1,000.

**St. Albans, W. Va.—Bond News.**—It is reported that the Board of Education of this place will issue bonds for the erection of school buildings.

**St. Croix County, Wis.—Bond Offering.**—Proposals will be received until 2 o'clock P. M. March 15, 1897, by County Treasurer T. Jewell, for the purchase of \$10,000 of 5 per cent insane asylum bonds. The securities will be dated April 1, 1897, interest will be payable annually on April 1, and the principal will mature April 1, 1914. The securities will be issued in denominations of \$500 and \$100 each.

**Saunders County, Neb.—Bond Sale.**—It is reported that Saunders County has disposed of bonds to the amount of \$100,000.

**Schenectady, N. Y.—Bond Sale.**—It is reported that Schenectady has sold bonds to the amount of \$24,868 at 100-52. The securities will bear interest at the rate of 4 per cent and mature in from one to five years from date of issue.

**Sidney, Ia.—Bonds Authorized.**—Water-works bonds of this municipality to the amount of \$10,000 have been voted.

**Sioux City, Iowa—Bond Call.**—City Treasurer John Hittie announces that improvement bonds of this city, dated from June 16, 1890, to September 3, 1891, and numbered, A, 105 to 261, inclusive, will be redeemed upon presentation at the Northwestern National Bank, Sioux City, Iowa. These bonds were issued for grading purposes and are optional after five years from date of issue.

The official notification of this call will be found among the advertisements elsewhere in this Department.

**Springfield, Mass.—Bond Sale.**—The city of Springfield has awarded the \$350,000 of high-school loan bonds to Blodget, Merritt & Co., of Boston, Mass., at 110-75-14. The bids received for the loan were as follows:

Blodget, Merritt & Co., Boston.....	110-7514
R. L. Day & Co., Boston.....	110-619
Blake Bros. & Co., Boston.....	110-431
Estabrook & Co., Boston.....	110-2705
Faxon, Leach & Co., New York (conditional).....	110-27
Faxon, Leach & Co., New York.....	110-11
Lee, Higginson & Co., Boston.....	110-039
W. C. Simons, Springfield.....	109-80
E. H. Rollins & Sons, Boston.....	109-837
E. C. Stanwood & Co., Boston.....	109-79
Cushman, Fisher & Phelps, Boston.....	109-457
H. H. Skluner, Springfield.....	109-28
Geo. A. Fernald & Co., Boston.....	109-168
N. W. Harris & Co., Boston.....	108-81
Fred'k Taylor & Co., New York (for \$100,000).....	108-77
Street, Wykes & Co., New York.....	108-23
New Bedford Institution for Savings.....	107-25
Bertron & Storrs, New York.....	105-55
C. H. White & Co., New York.....	
Providence Institution for Savings (for \$100,000).....	
E. C. Jones & Co., New York.....	

The bonds for this loan will be issued in registered certificates of \$1,000 each or any multiple of this sum. Four per cent interest will be payable semi-annually on the first days of January and July, and the principal will mature in 20 years from Jan. 1, 1897. Principal and interest will be payable in gold or its equivalent at the office of the City Treasurer. The loan will be secured by a sinking fund.

**Stamford, Conn.—Bond Offering.**—Proposals will be received until 12 o'clock, noon, Monday, February 15, 1897, by the Selectmen and Treasurer of the town of Stamford, Conn., for the purchase of \$75,000 of funding bonds.

The securities will be dated February 1, 1897. Interest at the rate of 4 per cent will be payable semi-annually on February 1 and August 1, at the office of the Town Treasurer and the principal will mature February 1, 1927.

The denomination of the bonds will be \$1,000 and both principal and interest will be payable in gold. A certified check for 2 per cent of the amount must accompany each proposal. Sinking funds provide for payment at maturity.

The total indebtedness of the above town on January 14, 1897, was \$403,380 and the sinking funds amounted to \$32,665. The latest assessed valuation was \$10,067,290, which is about

50 per cent of the actual value of property taxed; the town owns real property to the value of \$400,000. The present population is estimated at 20,000.

The official advertisement of this bond sale will be found elsewhere in this Department.

**Ulster County, N. Y.—Bond Offering.**—Proposals will be received until 2 o'clock P. M. February 16, 1897, by the county of Ulster for the purchase of \$75,000 of 4 per cent refunding bonds. The securities will be dated March 1, 1897; interest will be payable by coupon semi-annually on the first days of March and September, and the principal will mature at the rate of \$3,000 yearly from March 1, 1898, to March 1, 1922, inclusive. The denomination of the securities will be \$1,000 and they will be exempt from all taxation. A deposit of ten per cent of the amount of the loan bid for must accompany each proposal.

**Webb, N. Y.—Bond Sale.**—On January 15, 1897, the Supervisors of the town of Webb sold \$8,000 of highway bonds to Isaac Sherrill of Poughkeepsie for a premium of \$481. These bonds are part of the issue of \$31,000 recently authorized. The securities bear interest at the rate of 6 per cent and will mature at the rate of \$1,000 yearly from 1898 to 1905, inclusive. The town has no other indebtedness.

**Washington, Pa.—Bonds Proposed.**—It is reported that the Board of Education of this city proposes to issue \$50,000 of school building bonds. It is probable that the proposition will be put to a vote of the citizens.

**Wilkesburg, Pa.—Bond Offering.**—Proposals will be received until February 2, 1897, by this municipality for the purchase of street improvement bonds to the amount of \$60,000. The securities will bear interest at the rate of 4½ per cent.

**Wilmington, Del.—Bond Offering.**—Proposals will be received until 12 o'clock noon, January 26, 1897, by City Treasurer Joseph K. Adams, for the purchase of \$176,000 of 4 per cent refunding bonds. The securities will be of the denomination of \$50 or any multiple of this sum; interest will be payable semi-annually on the first days of April and October, and the principal will mature as follows: On April 1, 1910, \$3 700;

## NEW LOANS.

\$75,000

**Town of Stamford, Conn.,**  
Funding 4% Gold Bonds,

DUE 1927.

Proposals will be received by the Selectmen and Treasurer of the town of Stamford, Conn., until noon, Monday, February 15th, 1897, for the purchase in whole or in part of \$75,000 of the bonds of the town of Stamford, Conn.

These bonds will be issued to retire an equal amount of the floating debt of the town, contracted by expenditures for school houses, bridges and other permanent improvements, and are payable in gold upon February 1st, 1927, interest payable in gold August 1st and February 1st at office of Treasurer.

Bonds will be delivered on February 20th, 1897, when the price bid must be paid to the Treasurer by the successful bidders.

Proposals should be sealed and addressed to "The Town Treasurer, Stamford, Conn., and marked "Proposals for Bonds," and must be accompanied by a certified check for two (2) per cent of the amount. The right to reject any or all bids is reserved.

Sinking fund provides for payment at maturity.

It is proposed to issue coupon bonds of the denomination of \$1,000. Bonds may be registered.

The bonds are issued under Sec. 140, Revised Statutes of the State of Connecticut, 1884, and by authority of a town meeting held January 13th, 1897. For further particulars address

W. D. DASKAM,  
Treasurer, Town of Stamford.

## BOND CALL.

**City of Sioux City, Iowa.**

Holders of Sioux City Improvement Bonds are hereby requested to present for payment at the Northwestern National Bank, Sioux City, Iowa, where payment will be made to holders (if sent to said Bank) in New York or Chicago exchange, free of charge, the following described bonds:

"A" 195 to 291, both inclusive.

These bonds are dated at various dates from June 16th, 1890, to September 3d, 1891, and are optional five years from date of issue. They have been issued by the City of Sioux City, Iowa, for grading and other sections.

Interest will cease February 15th, 1897.

JOHN HITTLE,  
City Treasurer.

## DEANS INTEREST TABLES

\$5 00. D. B. ELY, Laclede Building, St. Louis.

## NEW LOANS.

\$8,000

**Town of Harrietstown, N. Y.,**  
SCHOOL BONDS.

Notice is hereby given that sealed proposals will be received from the date hereof until the 24 day of February, 1897, at 7:30 P. M. (at which time all bids will be opened), by the Board of Education of Union Free School District No. 1, Town of Harrietstown, for the purchase of \$8,000 School District Bonds. Said bonds bear four and one-half per cent interest, to be eight in number, and of \$1,000 each, dated Jan. 1st, 1897, and running from one to eight years from the date thereof. Interest payable annually. One bond of \$1,000 and interest thereon payable yearly from the first day of January, 1897; said bonds and interest payable at the People's National Bank of Malone, N. Y.

These bonds are issued pursuant to the result of a special meeting held in and for said district, for the purpose of raising \$8,000 to pay for the erection of an addition to the school building, situate in said district in the Village of Saranac Lake, town of Harrietstown, County of Franklin, and State of New York, and also to pay for the erection of a new school building at Axton, N. Y., in said district.

Bids (not less than par) will be received for all of said bonds.

The right is reserved to reject any or all of said bids not deemed for the interest of said district.

Dated at the village of Saranac Lake, Town of Harrietstown, Franklin County, N. Y., this 19th day of January, 1897.

Address all bids to R. H. McIntyre, Clerk of the Board of Education, Saranac Lake, N. Y., and mark envelope "Bid for Bonds."

By order of the Board of Education.  
R. H. MCINTYRE, Clerk.

\$150,000

**City of Montgomery, Ala.,**  
30-Year 6% Paving Bonds.

Sealed bids will be received until February 15th, 1897, 12 M., for the purchase of One Hundred and Fifty Thousand Dollars, City of Montgomery, Ala., 30-year 6% Bonds, denomination: One Thousand Dollars each. The interest is payable semi-annually, May and November, at The American Exchange National Bank of New York. Coupons receivable for taxes and licenses. The city reserves the right to reject any and all bids.

H. H. SOMMERVILLE, Treasurer.

#### SALE OF BALTIMORE CITY 3½ Per Cent Funding 1936 Loan

Proposals will be received until noon, Monday, February 1, 1907, at the Mayor's office, for the purchase, in whole or parts, of \$1,453,300 of the stock of the City of Baltimore, bearing interest at the rate of 3½ per centum per annum, payable semi-annually on the first days of January and July in each and every year, interest commencing January 1, 1907.

This stock is issued by virtue of ordinance No. 112, approved July 2, 1896, authorizing the issue of an amount of stock not exceeding \$1,600,000 for the purpose of funding the floating debt of the City of Baltimore existing December 31, 1895, and is redeemable on the first day of July, 1936. The city does not tax its stock, but pays the State tax on this issue.

Proposals must be sealed and addressed to the Mayor as Chairman of the Department of Finance and marked "Proposals for Funding 3½ 1936 Loan." The right is reserved to reject any and all bids.

ALCAEUS HOOPER, Mayor,  
Chairman Finance Commissioners.

**Kansas City, Mo.**—James M. Jones, Mayor. The following statement has been corrected to Jan. 1, 1897, by means of an official report to the CHRONICLE from Hans Lund, Comptroller.

**Kansas City is situated in Jackson County.**

LOANS—	When Due.	RENEWAL—(Cont.)—
CITY HALL AND SEWER—		6s, J&J, \$50,000....Jan. 1, 1901
4s, A&O, \$150,000....	Apr. 1, 1910	SEWER BONDS—
4s, J&D, 150,000....	June 1, 1910	4s, ...., \$100,000....Apr. 1, 1910
RENEWAL—		4s, ...., 100,000....July 1, 1910
8s, F&A, \$70,000....	Aug. 15, 1897	WATER WORKS—
7s, M&N, 40,000....	Nov. 1, 1898	4 1/2s, g., J&J, \$3,100,000g., July 1, '15

INTEREST on the water-works bonds is payable at the National Bank of the Republic, New York City; on all other bonds at the Ninth National Bank, New York.

**TOTAL DEBT, SINKING FUNDS, Etc.**—The subjoined statement shows the city's total municipal debt and the sinking fund held by the city against the same at the dates indicated.

	Jan. 1, '97.	Aug. 1, '98.	Apr. 15, '95.	Apr. 16, '94.
Total bonded debt....	\$3,760,000	\$4,081,000	\$1,193,500	\$1,193,500
Sinking funds.....	90,000	307,428	343,451	276,852

Net debt.....\$3,670,000 \$3,773,512 \$850,049 \$916,647

The figures of total debt for 1896 include the water debt of \$3,100,000

The city has no floating debt and the water-works are self-sustaining.

**ASSESSED VALUATION.**—The city's assessed valuation and tax rate have been as follows in the years named:

Year.	Real Estate.	Personal Property.	Merchants, Banks, etc.	Total	* City Tax per \$1,000.
1896....	\$44,150,790	\$10,924,120	\$3,954,950	\$59,029,860	\$13.00
1895....	44,312,230	11,069,280	.....	55,381,510	12.50
1894....	44,083,430	14,883,600	.....	58,967,030	11.50
1893....	42,072,620	10,118,320	9,309,830	61,500,770	12.00
1892....	43,013,730	21,779,243	.....	64,792,975	14.00
1890....	61,010,327	13,155,900	8,319,330	82,485,557	12.50
1889....	46,886,320	20,155,460	.....	67,041,780	11.00
1888....	44,961,120	9,056,470	7,832,180	61,849,770	11.00
1885....	24,027,440	5,010,560	2,610,520	31,678,520	15.00
1880....	9,389,560	2,354,580	1,634,810	13,378,950	22.00

\* This is the city tax proper. Property is assessed at 40 per cent of its actual value.

**POPULATION.**—In 1890 the population was 119,668; in 1880 it was 55,785; in 1870 it was 32,200. Population in 1896 (estimated) 150,000.

**Kaw Township, Mo.**—The following statement has been corrected to Jan. 1, 1897, by means of a special report to the CHRONICLE from Hans Lund, Comptroller of Kansas City.

Kaw is in the County of Jackson, and is nearly co-extensive with Kansas City.

LOANS.—	When Due.	Tax valuation, person's \$15,000,000.
RAILROAD AID BONDS:		Total valuation 1896. 60,000,000
7s, J&J, \$150,000....	May 20, 1903	Assessment 30% to 40% actual val.

### CRIPPLE CREEK, COLO.,

the leading gold-mining region in the U. S., with nearly 300 paying mines, producing \$1,000,000 per month; population of town, 20,000; of district, 40,000,—is yet in its infancy. The big profits come from developing mining claims and advance in values. 1 offer undeveloped claim, near shipping mines, \$10,000; can let and bond at \$50,000. Five-sixths of stock in company owning 19 acres choice location, \$20,000; can bond at \$70,000. \$1,500 buys lease, now working, heart of district, with bond for claim at \$40,000. Half interest in claim \$1,500; \$600 procures patent and gets one-third interest in another; both fair locations.

Partly developed mine, shipping and paying, has produced \$50,000; price \$150,000.

S. M. SMITH, P. O. Box 1592.

Seven cities, 5 days.....	\$645,334,057	\$622,490,852	+3.7
Other cities, 5 days.....	128,097,984	126,413,297	+1.3
Total all cities, 5 days.....	\$773,431,341	\$748,904,159	+3.3
All cities, 1 day.....	165,492,376	170,429,192	-2.9
Total all cities for week.....	\$938,923,717	\$919,333,351	+2.0

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, January 23, and the results for the corresponding week in 1896, 1895 and 1894 are also given. Contrasted with the preceding week, there is an increase in the aggregate exchanges of about twenty-three and one-half million dollars, and at New York alone the gain is twenty-seven and a-half millions. In comparison with the week of 1896 the total for the whole country shows an increase of 12 per cent. Compared with the week of 1895 the current returns record a gain of 15.2 per cent and the excess over 1894 is 24.9 per cent. Outside of New York the gain over 1896 is 3.4 per cent. The increase over 1895 reaches 6.2 per cent, and making comparison with 1894 the gain is seen to be 19.8 per cent.

Week ending January 23

### THE FINANCIAL SITUATION.

The selection of Mr. Lyman J. Gage, President of the First National Bank of Chicago, to fill the position of Secretary of the Treasury in the Cabinet of President-elect McKinley is the most important and gratifying occurrence since the election. Mr. Gage has been from thirty to thirty-five years a banker, he is consequently a practical business man, of clear and pronounced views on currency questions, in close touch with affairs, and knows from experience, as well as theoretically, what our industries are suffering from. In selecting such a man for the position designated, Mr. McKinley states as positively as any act could state that he intends to carry out to the letter the currency feature of the platform under which he was elected, and to secure a gold standard for the country as soon as possible. Actions always speak louder than words, and in this case the rule is pre-eminently true. The President-elect could not have uttered any words which of themselves would carry with them such an assurance of security and stability to future business ventures as this appointment obviously does.

There is likewise another unique and gratifying attitude the prospective Secretary of the Treasury will hold with relation to currency reform, and that arises from the fact that Mr. Gage never has formulated a currency plan. He knows full well what principles any sound currency system must conform to to be made effective and not disturbing—but he has no fad. This is also highly satisfactory. Many a sound money man has hurt himself and his influence by drawing up, working out and getting himself attached to his own currency scheme. Such an exercise, somehow or other, seems to make a man more or less of a trimmer, and finally he gets to look upon his own device as a hobby. A leader does not want a definite plan. He wants full knowledge of the difficulty to be met and a clear idea of the principles which in every case must be carried out. The points were thoroughly well laid down at the recent Indianapolis Convention. It was wise of the Convention to have stopped with that statement.

There are evidences that affairs are gradually working out of their derangement and on to a solid basis. The appointment of Mr. Gage will tend to hasten that result; it helps to fortify the point of greatest weakness. No doubt hindrances still exist. Almost every industry has been disorganized or bears the scars of the conflict through which all have been forced to pass. As a result the liquidation has been so prolonged and severe that unexpected weakness in companies and individuals has on the one hand been disclosed and on the other extreme sensitiveness among investors has been occasioned, which make them quick to believe every unfavorable rumor. The coal trade and the coal roads have recently become the cause of special anxiety. Because of this fact and of the position the Delaware & Hudson has long held among investors and because of the criticisms which this week have been made respecting the property, we have been led to study its real situation and write quite at length with reference to it on subsequent pages. But, as stated above, affairs apparently are slowly but steadily working towards a more assured basis. This is clearly indicated by the course of the best securities. Especially is it true of the movement in Government bonds. The prices of those securities have ruled abnormally low because of the Populistic attacks on the Government credit and because the

silver crusade made it doubtful whether all values were not to be silver values. As that danger disappears the market for Government bonds grows active and higher. This week the new 4s of 1925 have touched 124, and that compares with 111½ August 7.

There have been quite a number of favorable developments in connection with our railroads this week. Considerable progress has been made in reaching an agreement for the settlement of the troubles among the Ohio bituminous coal roads; the Atlantic & Pacific bondholders have confirmed the arrangement for the purchase of the A. & P. by the Atchison; the plan for the foreclosure and sale of the Union Pacific has received the assent of both the U. P. Reorganization Committee and the United States Government; and the Chicago St. Paul Minneapolis & Omaha has declared its first dividend on the common stock. The agreement among the Ohio coal roads has not yet been definitely concluded, another meeting having been called for next week, but there is good reason for thinking that the necessary concessions will be made, and the whole matter speedily adjusted and settled up.

As concerns the Union Pacific arrangement, it must be regarded as a happy solution of a vexed problem. It makes certain the foreclosure and reorganization of the road, and at the same time protects the interests of the United States. This latter is very important. Owing to the unreasoning course pursued by Congress, there was very grave danger that the interests of the Government might be sacrificed. Under the arrangement now made the Government is assured of a minimum bid for a very large amount in any event, and if any party or interest thinks that this bid is too low, and feels inclined to give more, it is afforded the opportunity to do so. Hence the Government ought to realize for its claim all that can be got for it. It is also desirable that the property should be speedily sold and further meddling on the part of Congress avoided, and the plan seems to assure that too. So long as the road remains in receivers' hands it will be impossible to develop the property so as to serve to the best advantage the communities dependent on the road; and so long also as the road's affairs remain unadjusted the large investments in the property will continue to rest under a cloud and be injured in value.

The declaration of a dividend of two per cent on the common stock of the Chicago St. Paul Minneapolis & Omaha indicates that in spite of the bad times there are some railroad properties that are steadily improving in prospects and condition. The St. Paul & Omaha has during the last two years had the advantage of good crops in its territory, albeit the spring-wheat yield in 1896 fell much below the exceptional yield of 1895; but apart from the crops there has been satisfactory development in other directions. The comparative income statement submitted shows that there was an increase in gross earnings of \$647,428 over the year preceding and an increase of \$347,047 in net earnings. After paying interest and rental charges and the 7 per cent dividends on the preferred shares, there remained a surplus of \$711,883 in 1896 against a surplus of \$348,257 in 1895. In other words, 3.84 per cent was earned for the stock in 1896. The two per cent dividend now declared calls for only \$371,185, leaving a balance of \$340,698.

The Delaware Lackawanna & Western income statement for 1896 was submitted yesterday, and like the statements of the other anthracite carriers it reflects

the unfavorable conditions which prevailed both in the anthracite trade and in our industries generally during that year. As in 1895, the company earned only a little over 5 per cent on the stock. Dividends, as the reader knows, are 7 per cent, and hence there was a deficiency of \$509,261 in 1896 and of \$479,340 in 1895. In 1894 also there had been a small deficiency (\$196,651), the company having earned only 6.24 per cent in that year. There is nothing remarkable about these results in view of the conditions prevailing, but it is interesting to note that the Lackawanna, unlike the Delaware & Hudson, does not hesitate to draw on accumulated surplus to maintain the old rate of distribution. We observe in the balance sheet the same feature noticeable in the case of the other anthracite companies, namely largely increased amounts of coal on hand. For December 31 1896 the value of the unsold coal is reported at \$2,409,922 against only \$1,852,238 on December 31 1895.

Quite a number of returns of gross and net earnings have been received this week for the month of December. The feature in these returns is the economies effected in operating expenses, under which in a number of cases a loss in gross has been converted into a gain in net. For some of the roads the comparison as to the gross also is better than in the months immediately preceding. Below we furnish a four-year statement for several of the roads.

One feature of the bank statement of last week was that while the cash was augmented by \$6,418,600, loans decreased \$1,060,500. Since the beginning of the year the deposits show a gain of \$32,694,600 and loans a decrease of \$1,037,200. This disparity is largely due to the agreement by the banks not to loan money on call below 2 per cent, and this compact has been maintained. The trust companies have liberally loaned at 1½ and at 1¼ per cent, supplying pretty much all the demand outside bankers' balances. There have been comparatively few new loans made by the banks on time and the purchases of commercial paper have just about replaced maturities. The reason assigned for the decrease last week is that some loans on sterling collateral were paid off. The Park, the Importers' & Traders' and the Hanover banks this week have given notice to their interior correspondents that after the first of February they will pay only 1½ per cent on interior balances. This action led to a movement through the Clearing House officials to secure a general agreement to reduce interest on interior deposits to 1½ per cent, and some banks have signed it, but others

hold out. All the banks adhere to the agreement not to loan below 2 per cent. It has been suggested that a plan be devised by which the rate of interest paid by banks on balances of interior institutions can be regulated. The proposal is that there shall be a standing committee of the Clearing House to whom shall be delegated the power to, from time to time, fix the rate on such balances according to the conditions of the money market. Some Eastern mill paper having from ninety days to four months to run has been bought at 2½ per cent this week, but the ordinary run of commercial paper is just about equal to the demand, and therefore names do not accumulate and rates are steady, with 3 per cent as the lowest for endorsements or single names, and some of the uptown banks stand out for 4 per cent for the best paper.

The amount of gold, chiefly in the form of Assay Office checks, turned over to the Sub-Treasury this week in exchange for legal tenders was \$100,000. The net gold in the Treasury reported from Washington on Friday of last week was \$143,182,755 and the amount so reported on Friday of this week was \$144,522,612.

Money on call, representing bankers' balances, up to yesterday loaned generally at 1½ and at 1¼ per cent with the bulk of the business nearer the first-named rate; yesterday the range was 1½@2 per cent. The average for the week has been about 1½ per cent. Trust companies loan at 1½ per cent as the minimum. The demand for call money is good, many of the commission houses relying upon this branch of the market instead of making engagements for fixed periods. Lenders on time find difficulty in placing loans which will mature before June, there being a light demand for short time, and there is not much inquiry for money for longer periods, borrowers regarding the rate as too high. Quotations are 2 per cent for sixty days, 2½ per cent for ninety days to four months and 3 per cent for five to seven months on good mixed Stock Exchange collateral. There is a good demand for commercial paper and a fair supply, but no accumulation of names. Quotations are 3 per cent for sixty to ninety day endorsed bills receivable, 3@3½ for first class and 4@5 for good four to six months single names. The general trade situation is reported as encouraging. The annual statements of mercantile houses now being received show that while not much money has been made and some has been lost, merchants generally are in good financial condition and hopeful.

The European financial situation has been without especially new feature this week. The Bank of England minimum rate of discount remains unchanged at 3½ per cent. The cable reports discounts of sixty to ninety day bank bills in London 2½ per cent. The open market rate at Paris is 2 per cent and at Berlin and Frankfurt it is 2¼@3 per cent. According to our special cable from London, the Bank of England gained £694,614 bullion during the week and held £37,106,112 at the close of the week. Our correspondent further advises us that the gain was due to the receipt of £694,614 net from the interior of Great Britain, there being no imports or exports.

The foreign exchange market, though irregular, has been generally firm this week. One feature was a sharp fall on Monday in short sterling, due to the offering of maturing sixty-day bills in such volume that with the prevailing light demand they could not be fully absorbed. Then followed some manipulation of the market, which resulted in a sharp reaction on

the following day, and thereafter the tone was firm. It is claimed that about \$5,000,000 of maturing sixty-day bills have been sent to London for collection instead of being sold here, but bankers who are in a position to be well informed assert that this statement is probably exaggerated. Some loans on sterling have been paid off, but how much of this sterling has been sent forward and what amount has been borrowed upon at a lower rate is, if known, not made public. The range in nominal rates for sterling exchange on Monday was from 4 85 to 4 85½ for sixty day and from 4 87½ to 4 88½ for sight, against 4 85½ to 4 86 for the former and 4 88 to 4 88½ for the latter on Friday of last week, and the market was unsettled by the offerings of maturing sterling, as noted above. Rates for actual business were one-quarter of a cent lower for long, compared with those at the close of Friday of last week, at 4 84½@4 84½, and three-quarters of a cent lower for short sterling and cable transfers, at 4 86½@4 86½ for the former and 4 86½@4 87 for the latter. On the following day the range for nominal rates was unchanged, but the absence of offerings of more maturing bills and some manipulation of long sterling brought about a reaction, and the market was firmer in tone, with rates for actual business one-quarter of a cent higher for long, at 4 84½@4 84½, and one-half of a cent higher for short and for cable transfers, at 4 86½@4 87 for the former and 4 87½@4 87½ for the latter. On Wednesday the tone was still firmer for long though steady for short and cable transfers, and there was no change in the range for nominal rates. Those for actual business in sixty-day sterling were one-quarter of a cent higher at 4 84½@4 85, but short and cables were unaltered. On Thursday the tone was quite firm, and nominal rates ranged from 4 85½ to 4 86 for sixty-day and 4 88 to 4 88½ for sight. Rates for actual business in long sterling were unchanged, but those for short and for cable transfers were one-quarter of a cent higher at 4 87@4 87½ for the former and 4 87½@4 87½ for the latter. Yesterday the market was weaker in the absence of demand, and the rates for actual business in short sterling and cable transfers were reduced one-quarter of a cent. The following shows the daily posted rates for exchange by some of the leading drawers.

The market closed weaker on Friday at 4 85½@4 86 for sixty day and 4 88@4 88½ for sight. Rates for actual business were 4 84½@4 85 for long, 4 86½@4 87 for short and 4 87½@4 87½ for cable transfers. Prime commercial bills were 4 84½@4 84½ and documentary 4 83½@4 84½, and these bills were reported scarce.

The following statement gives the week's movements of money to and from the interior by the N. Y. banks.

Week Ending Jan. 29, 1897.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency .....	\$7,339,000	\$3,263,000	Gain \$4,076,000

### WHY COTTON HAS NOT RULED HIGHER.

Our attention has been called to an editorial in the "Atlanta Constitution" of January 11, criticising a brief item which appeared in the CHRONICLE of January 9 in "The Financial Situation." We referred in that item to the condition of the market for cotton goods, especially for print cloths, and stated the well-known fact that the free silver "campaign," with its dangers and uncertainties, that began to be disturbing the latter part of 1895 and continued to check industrial operations until after the election, was responsible for the suspended consumption of cotton manufactures and for the stocks of those goods which, even in the face of suspended manufacture, accumulated during the whole of that period. As this reluctance in the consumption of cotton and the accumulation of goods in first hands were a chief cause for the low price of raw cotton, we stated very properly that the low price of raw cotton was due to the free-silver agitation. Our conclusion has been criticised by our Georgia contemporary in the manner following. We omit in part the references to the ignorance, stupidity, etc., of the CHRONICLE, but give in substance the rest of the argument advanced.

#### THE DECLINE OF COTTON.

The New York FINANCIAL CHRONICLE is supposed to be a publication issued in the interest of business men. This is its intention, at any rate. Its subscribers are supposed to be men of affairs, men of experience and men of understanding. We are therefore surprised to find in the issue of the CHRONICLE for January 9th a lot of rubbish that would be discredit to the intelligence of the blindest and most ignorant partisan.

In an article under the heading of "The Financial Situation," the editor is reduced to the extremity of ascribing the recent decline in the price of cotton and the accumulation of cotton goods to "silver agitation." Having fatuously gone this length, the editor goes farther and declares that the attitude of the cotton planters in advocating free coinage has been responsible for the depressed price of that staple.

This declaration is given the lie in nearly every issue of the CHRONICLE during the past three years. The assumption is nothing whatever to go upon, no basis in fact or experience, for the decline in the price of raw cotton has gone on more rapidly since the "advance agent of prosperity" was endorsed by the people than it did when the result of the election was in doubt.

If the assumption of the CHRONICLE had any basis of truth whatever, cotton would have been at its lowest price the day before the election, as the result of "silver agitation," and then when the issue was settled in favor of the gold standard the price of cotton would have gone up.

But the result is precisely the reverse. Cotton went up to 8 31c. in spite of the silver agitation and the possibility of the election of the Democratic candidate, but since the cessation of silver agitation it has gone steadily downward, until seventy days after Mr. McKinley's election twenty bales of cotton will sell for \$120 less than they would before the election.

There are some facts which the CHRONICLE overlooks, or takes no account of. If the demand of the New England mills for the raw material had been in proportion to the demand in Europe, cotton would now fetch in the market from 10 to 12 cents a pound. The reason why there is no demand for cotton on the part of the New England mills is because they already have on hand a large supply of goods which they cannot sell, or refuse to sell at prices which consumers can afford to pay.

The CHRONICLE should call the attention of its readers to the fact that this large accumulation of print cloth stocks is due to the mysterious belief existing among business men and manufacturers that the mere election of Mr. McKinley would restore prosperity, open the mills to labor, and set the wheels of industry in motion. This belief (as grossly ridiculous as the most ignorant superstition) led the manufacturers to start up their mills as soon as they heard the news of Mr. McKinley's election, and the result is an accumulation of stocks, and serious disappointment. It is wonderful that business men can lend themselves to such a political superstition; but it is more wonderful still that a reputable periodical should continue to feed it by inventing and indorsing the declaration that "silver agitation" is the cause of the low price of cotton.

The personal allusions of the editor do not require notice. It is a surprise that such a representative of opinion can get a constituency among a people which have been so long distinguished as the model in good manners and as the perfection in polite address. The presumption is that when there are facts to support a contention, they are emphatic enough to reach the mind of an opponent without giving the "lie" and other like adornments to enforce them. There is consequently a charitable way of looking at this ebullition of ill-temper. It was not an exhibition of the editor's natural self, but an absence of facts to support the writer's assumption, that provoked the bad manners.

A decrease in the production of cotton, a decrease in its consumption and a large stock of cotton goods threatening a further check to the consumption of the raw material, have been the chief influences, each in its turn, which have controlled cotton values during the past year and a-half. The first occurrence was the poor crop of 1895. In that year the yield in the United States was very late and small. Had there not been on September 1 1895, when the cotton year of 1895-96 began, a very large visible stock of old cotton to supplement the supply, and had consumption kept up as in 1894-95, the world's spinners would have had to pay famine prices for their raw material during the twelve months. Even with that stock, the supply was so insufficient to meet the prospective demand that nothing apparently was needed on September 1 1895 except to keep up the consumption of spinners, to more than make good to the South by a rise in price of the raw material the loss it had suffered by reason of the quantity of the crop raised.

Every condition, too, favored such an outcome. The season for the goods trade opened that day under conditions of great promise both in Europe and America. Europe's production of goods had never been so large and it continued to be large all through the season. Our mills were likewise turning out goods faster than ever before when September 1895 opened, and what is more, the army of consumers were taking them just as rapidly as they could get them. The small and even decreasing stocks of print cloths being carried at that time are in large measure indicative of the situation of the entire goods trade. Thus on the 7th day of September 1895, these stocks at Fall River and Providence had been reduced to only 200,000 pieces. But even that was not the minimum. The public not only continued to absorb the large current manufacture, but it seems that up to the 21 of November the small stocks held were further trenched upon, the total reported on that day being 134,000 pieces. At that point a back set developed, and a movement began in the opposite direction. The additions were small in November, the aggregate stocks reaching 224,000 pieces on November 30, but from the 1st of December the accumulation was much more rapid. On the 7th of December the total stocks were 262,000 pieces; on the 4th of January the total was 480,000 pieces; on the 8th of

February they were 961,000 pieces; on the 7th of March they were 1,221,000 pieces, and on the 4th of July they reached the phenomenal figures of 2,037,000 pieces, near which point they have kept ever since, although for a good part of the time from June, and even before that and until November, the mills were turning out goods on a greatly reduced scale without having any influence in decreasing the stock held.

We have set out these data with reference to print cloths because they represent in large measure the course of the cotton goods trade in 1895-96, the exceedingly prosperous surroundings at the start, and the severe restriction in the consumption of goods which developed and prevailed thereafter for almost every sort of cotton manufacture. We are within the facts when we say that the contraction in the consumption all through the summer and well into the fall was simply unprecedented. Bear in mind that these stocks of print cloths accumulated until the aggregate stock became within a trifle of twice the size of any previous record. Then, again, while in September and October 1895 the public was absorbing more than the mills could make, in June 1896 and in subsequent months, notwithstanding the very large falling off in production—almost an absolute shut-down of the mills a part of the time, and for months an out-turn of not much over half the previous product—the old stocks did not decrease at all. But we need not enlarge upon these matters; the situation is of such recent date that every one is familiar with its peculiarities and intensity.

We are not permitted to doubt that so serious an interruption to industrial movements as these facts show can occur without decided harm to cotton values in many ways. Stopping cotton machinery means stopping the purchases of the raw material. Putting five or six millions of Northern spindles on short time and shutting up other mills altogether, obviously weaken the market for the staple used until prices drop to a lower level by reason of the diminished demand. Then, too, the existence of a large stock of unsalable goods in spinners' hands is always, so long as it remains, a depressing influence not only upon the goods market but upon the market for the raw material. It acts as a constant menace, threatening a fresh stoppage of spindles, and hence keeps the market all the time in danger of a further loss in the requirements for cotton. While such a doubt has possession of purchasers' minds a hand-to-mouth policy will be adopted by them and the market be depressed, with the tendency of prices downward.

But as our cotton crop was short in 1895-96 there is a more definite way of testing the effect of a shortened demand, which is satisfying and conclusive. Many are not aware how near the point of exhaustion the supply of American cotton came this year, even with the decreased consumption, and what a marvelous difference a little greater activity among spinners in this country would have made in the price of the staple all through the year and would be causing now. The fact is, a very little added to the amount spinners absorbed would have left no stocks of the American staple in either Liverpool or the United States. Not only was the season's crop all used, but the amount held in Great Britain, which was large when the year opened, was reduced when the year closed to very narrow limits. On September 1 1895, the Liverpool stock of American cotton was 1,094,000 bales, while

on September 1 1896 it was only 387,000 bales. Again on August 1 1896 the amount of the staple visible at our outports and interior towns was only 243,668 bales. If it be assumed then that our Northern spinners, not only in the print cloth department, but in all the other departments of the trade, instead of experiencing a loss of demand and a constant accumulation of goods from December 1 1895 when Congress met, to September 1 1896, when the season closed—if it be assumed that spinners had found all the time a ready market for their goods as they did the previous year, they would have been eager buyers of cotton and have taken out of the market at least 300,000 or 400,000 bales more than they did. This is a minimum estimate. The fact is, had Northern spinners purchased as much as in the previous season, they would have withdrawn from the visible supply 483,426 bales more than they did withdraw.

Moreover, as we have already stated, spinners had just been experiencing a year of growing activity, and when 1895-96 opened, the clear indication was during the first two or three months that expansion was to be the rule for that year also. This is the authorized assumption, for the further reason that the productive capacity of the mills had been added to during the previous twelve months and was at the moment being added to, while every indication except our currency conflict favored industrial development and the full and profitable occupation of all the spindles set up. We need not, though, enlarge upon this idea or give any figures to include these undeveloped probabilities. It is sufficient for this investigation if we use as a basis the 300,000 to 400,000 bales which, as already shown, it is absolutely certain would have been added to the amount taken out of last year's cotton crop by American spinners if the wave of prosperity still on the rise September 1 1895 had not been arrested by the free-silver movement.

In that case the shape in which our markets would have been can be clearly seen by reference to the small stocks of American cotton, as already noted, that were still on hand towards the end of the year. The aggregate of the staple at our outports and interior towns August 1 1896 was, as remarked above, only 243,668 bales. Hence, if American spinners had supplied their increased needs Europe must have received considerably less than it did. And yet it seems, according to Mr. Ellison's figures, that spinners' stocks of all kinds of cotton at the end of the season, both in Great Britain and on the Continent, were altogether only 301,000 bales, while Liverpool reported only 387,000 bales on hand Sept. 1 1896, and all the Continent only 393,000 bales additional. Under these conditions of the supply one will readily understand what an eager demand and what a material rise in values our cotton markets would have experienced growing out of the sharp competition between the foreign and American buyer made necessary to secure the needed supply of the raw material to keep spindles in motion at this more active rate.

If it were needful, we might further develop this feature of our subject by showing how an active trade in America would, as it always does, have helped to improve trade in Europe and thereby have increased cotton consumption there also. But that seems hardly necessary inasmuch as we have written fully of the matter on previous occasions. Besides, the editor of the "Constitution" admits in the plainest terms what effect on price the additional requirement assumed would

have produced. He says "if the demand of the New England mills for the raw material had been in proportion to the demand in Europe, cotton would now fetch in the market from 10 to 12 cents a pound." We have likewise cited facts enough to-day to make it evident that the editor of the "Constitution" is mistaken when he adds to the above that the reason why this demand has not existed is because of the large supply of print cloths spinners hold; and that he is likewise mistaken when he says our position cannot be correct "because" the decline in cotton has gone on more rapidly since the election than before; also when he states that if our position "had any basis of truth, cotton would have been at its lowest price the day before the election as a result of the silver agitation, and then when the issue was settled in favor of the gold standard the price of cotton would have gone up." The writer has failed to carry his investigation back far enough in studying the existing dislocation. The evil the cotton market is suffering from at this moment was wrought last spring and last summer, when the consumption of goods was so restricted that they were left in stock instead of being absorbed by the public and cotton was left in stock instead of being bought and turned into goods by spinners. Had trade been allowed to go on instead of being interrupted there would probably have been to-day at least 500,000 bales less of American cotton in sight pressing for sale than there is, and 1,800,000 pieces of print cloths less in stock seeking a buyer both sides of the ocean but absolutely unsalable, and large stocks of other kinds of cotton goods held in first hands in a similar condition.

The editor of the "Constitution" will also find on examination several other material inaccuracies in his article. We would especially call attention to his closing paragraph, where he asserts "that this large accumulation of print cloth stocks is due to the mysterious belief existing among business men and manufacturers that the mere election of Mr. McKinley would restore prosperity, open the mills to labor and set the wheels of industry in motion. This belief (as grossly ridiculous as the most ignorant superstition) led the manufacturers to start up their mills as soon as they heard of Mr. McKinley's election, and the result is an accumulation of stocks and serious disappointments" etc. The truth of the matter is, (1) no part of the existing stocks of print cloths has been accumulated since Mr. McKinley's election—the facts with relation to that period we have given above; and (2) stocks now are quite a little smaller than they were when the election took place—on the 7th day of November 1896 the stocks at Fall River and Providence were reported at 2,185,000 pieces, whereas last Saturday, January 23, the similar total was 1,880,000 pieces. It consequently appears that a decided change for the better followed Mr. McKinley's election. The most of the period since that event the mills have been running full time; previous to October they were running on very short time. The correct comparison therefore would seem to be that the public is now consuming full production and a little of the old stock, whereas during the ante-election period they did not even absorb the very restricted production then turned out. We consequently have manifest, through current events, the psychological phenomenon of a "belief (as grossly ridiculous as the most ignorant superstition)" well advanced in the process of being realized.

*THE NICARAGUA EPISODE.*

Public attention has been sharply directed this week to the Nicaragua Ship Canal Bill; first by a very unusual diplomatic incident and second by an equally singular debate in open Senate. The diplomatic incident was a formal protest by a foreign envoy at Washington against all the canal construction bills now pending in Congress. The Senatorial part of the episode has consisted in the public accusation, on the floor of the Senate, that the Central American Government and its Envoy are playing a blackmailing game and acting under the hostile influence of Great Britain. This is a situation so extraordinary, so far removed from the usual routine of legislation and diplomacy, that the question at issue is worth thorough examination.

Five bills affecting the Nicaragua enterprise are now on the Congressional calendar. One of these measures appeared in formal Senatorial debate last week. The purpose of all these bills is to revive the moribund Maritime Canal Company of Nicaragua, and to resume, through direct or indirect use of our Government's resources, the suspended work on the canal. To this end provisions have been inserted in the bill now under debate before the Senate whereby the United States is to indorse the bonds of the company which holds the existing charter for the work. The security for the Government, in case it should be compelled to make good its guaranty, is ownership of the Maritime Canal.

On January 15, Minister Rodriguez, of the Central American Republic, addressed a note to Secretary Olney, objecting in his Government's behalf to the Morgan bill and all the kindred measures now pending in Congress. The Envoy's objections, which have since been communicated to Congress, are briefly as follows: First, that the original act and the treaty with Nicaragua on which the act was based, expressly stipulated against control of the canal by any foreign government; whereas the proposed new legislation effectually transfers the ownership to the United States. Second, the treaty contract stipulated that Nicaraguan engineers should have a part in the survey; whereas the new legislation leaves the whole matter to United States Army engineers. Third, the contract provided that half of the Maritime Company's directors should be selected by the company from the original promoters of the enterprise; in opposition to which the pending measures give the company only one director, Nicaragua and Costa Rica one apiece, leaving eight to be named by the President of the United States.

Finally, the existing company has in two respects failed to fulfill its contract. It has not issued to Nicaragua six per cent of its securities as originally pledged, and it has not completed such of the canal as was required by contract to be finished within a stipulated time. This time has now long since expired; the contract is therefore forfeited. Yet the new bills not only assume the contract and charter to be still alive, but make no provision whatever for the future fulfillment of the pledges. On these grounds the Minister diplomatically objects to the bills, refuses to recognize the further existence of the Maritime Canal Company, and asks for a direct understanding between the two governments in the matter.

Told very plain presentation of the case for Nicaragua is in some sense a humiliating incident. It

is not agreeable to be placed in such a light before the other Powers with whom we have relations. In our judgment, however, the treatment of the protest by some of the speakers in the Senate is decidedly more humiliating. Not one of the Nicaraguan Envoy's allegations has been denied in the debate; on the contrary, they were thoroughly confirmed, in advance of the publication of the Rodriguez note, by a Senator who has from the start had a large share in the negotiations. They were publicly and with equal positiveness confirmed last Wednesday by Senator Sherman, Chairman of the Foreign Affairs Committee. Under such circumstances, we fail to understand what excuse there is for charges of "blackmail," "importunate intrusion," "sullenness and hostility." Each of these accusations has been flung at the Central American Republic from the floor of open Senate. It seems to us that Nicaragua is protecting its own rights exactly as the United States would do in a parallel emergency. Supposing that our Government were to force on Nicaragua acquiescence in the measure as it stands, or were even to put that measure into force unobserved by Nicaragua, with what grace could our public men thereafter complain of what is called the "British land-grabbing policy"? More than this, we suspect that Minister Rodriguez, in protecting the interests of his own Government, has rendered a real and important service to the United States. The Senate Nicaragua Canal bill is open, in our judgment, to grave objection; it would be thus open even if it had been prepared with the cordial co-operation of the Nicaraguan Government. The bill is probably killed for this session by the diplomatic protest; in some form or other it will, however, probably be revived in a future session. We propose, therefore, briefly to review the course of events in the canal affair up to the present date.

The history of the company which during nearly eight years has had in its charge the pursuit of this important undertaking is pretty generally known. It was incorporated by act of Congress February 20 1889, having already in 1887 secured on certain specified conditions the consent of the Government of Nicaragua. It was empowered to issue \$100,000,000 stock, with the right to increase this capitalization to \$200,000,000. The act was explicit in freeing the hands of the United States Government from any financial entanglement with the enterprise. "Nothing in this act contained shall be so construed as to commit the United States to any pecuniary liability whatever;" "nor shall the United States be held \* \* \* as having assumed by virtue of this act any responsibility for the acts or proceedings of said company in any foreign country"—such are the very emphatic provisions of the grant. This restriction, as Senator Turpie pointed out in his comprehensive speech on the matter last week, Tuesday, "is a condition precedent to the granting of the charter, accompanying the granting of the charter, and running yet with the charter."

The organization thus chartered was known as the Maritime Canal Company of Nicaragua, and no other concern has ever been formally recognized by the United States. But so far as official evidence is witness, this company never made any step in the project undertaken except to shift the construction work upon the shoulders of another corporation not recognized or contemplated in the charter of 1889. This company was styled the Nicaragua Canal Construction Company; its purpose was to build the canal and

turn it over to the original concern. The Maritime Company, as was publicly stated last week in the Senate, has never sold a dollar's worth of stock; all the money raised for the canal—\$12,000,000 by a subsequent report—was invested by the public in shares of the construction company, whose outlay in work was paid for by securities of the original Maritime corporation. By 1891 the construction company had discovered that the resources already available would not suffice to complete the enterprise. A bill was introduced in Congress at the opening of that year for a Government guaranty of \$100,000,000 bonds of the Maritime Canal Company. This measure failed in the Senate; what its success would undoubtedly have involved to the United States may be judged from the fact that on August 30 1893 the construction company went into a receiver's hands, hopelessly bankrupt, with assets consisting only of its working property at New York and Nicaragua, and the securities of the Maritime Company, which were and always had been wholly unsalable.

This review of the company's history makes reasonably clear the nature of the present appeal to the Government. The United States is asked by the Senate bill to guarantee an issue of thirty-year 3 per cent bonds by the Maritime Canal company not to exceed \$100,000,000. The proceeds of such bonds are to pass into the treasury of the Maritime Company, and in return the Government is to hold a first lien on the Nicaragua Canal.

Leaving out of consideration for the moment the protest of the Nicaraguan Minister, it will appear that there are two ways in which this project may be considered—as a business proposition and as a public undertaking. As a business proposition there is little to say in its favor. The collapse of the construction company throws sufficient doubt on the financial possibilities of the plan. It is true the company went into insolvency because it was unable to raise further funds, which it could certainly have done with securities of the Maritime Company in its vaults indorsed by the United States. But the very fact of this unwillingness of private capital to accept the risk without an absolutely sure endorsement shows what the business estimate of the undertaking was. The Suez Canal is appealed to as a precedent in favor of the enterprise. But at Suez the engineering problem was of a wholly different character from that at Nicaragua. It was indeed doubted, at the time of Count de Lesseps's earliest labors in 1856, whether a ship canal across a desert could ever be maintained in navigable condition. The problem, however, was one of maintenance, not of original construction; at the worst, profits depended on the question whether, after the canal was built, it could be made to pay a revenue over the cost of keeping it in order. That the canal could be built, and at no overwhelming cost, all of the engineers agreed. The wholly different problems arising in the case of an American isthmian canal found their best illustration in the later attempt of the projector of the Suez Canal. Dishonest and stupid management played their part in the notorious Panama fiasco of 1889; but the obstacles of nature were the original and final cause of the failure.

In the case of the Nicaraguan enterprise, as in the case of the Panama Canal, engineering judgment is not at all agreed. Some engineers of reputation have declared the scheme of carrying heavy ships through a lock-canal over a range of mountains to be wholly

impracticable. This is of course only individual judgment. But in 1895 a commission of Army and Navy engineering experts was sent by President Cleveland to make a personal inspection of the canal and to report their findings to the Government. Their official statement in November 1895 was that the feasibility of the plan was doubtful; that no final judgment on its practicability would be possible without a survey which would occupy a year and a-half and cost \$350,000. They added a general estimate of the canal's probable cost, in which they raised the figure from the company's estimate of \$69,800,000 to \$133,000,000. It should be observed in passing that the pending Senate bill makes no provision for a preliminary survey of this kind. It does not even recognize, in naming its Government guaranty, the estimate of the Government's own experts in the question.

Such is the present aspect of the question from a business point of view alone. It is possible, of course, that the views of the 1895 commission were entirely wrong; that the Government might not be called upon at all to make good its guaranty; and that if it were to do so, it would profit in the end. This, we say, is possible; but it is not the kind of possibility which legislators have a right to recognize in binding the Government to a heavy expenditure, particularly at a time when that Government is involved already in a monthly deficit of several million dollars. Nor, it might be supposed, is this a time well chosen for entangling the United States in the affairs of a private corporation when the ingenuity of the Government's lawyers is being taxed to extricate it from the results of a similar connection with the Pacific railways. In the railway case the lien of the Government is now, and has been from the first, of tangible and undoubted value. But Senator Turpie, in his speech last week, disclosed the extraordinary fact that the lands in Nicaragua and Costa Rica, on which the Government's lien must rest under the pending act, have never been even conveyed to the company. Indeed, the treaties stipulated that the lands should not be thus conveyed until the canal should reach a stage of progress which it has never yet approached. As we have noticed already, the Nicaraguan Government officially declares the Maritime Company's charter to be forfeited; it repudiates the grant of land and privileges, a repudiation necessarily involved, under the circumstances, in the well-known terms of the 1887 contract. Yet in the face of such a situation, the Senate bill proposes to commit our Government, to the extent of a hundred million dollars, in an enterprise which the Government's own experts have pronounced extremely questionable, and in which the whole security offered to the United States rests on a doubtful title. There ought to be a small delay in the action of Congress on such a proposition.

We are aware that the project of a Government guaranty is not based by its authors primarily on the idea of financial profit. The plan for control of the canal by the United States arises primarily from a wish to possess and hold the naval highway between the Atlantic and the Pacific. The canal, it is first assumed, ought to be and can be successfully completed; this done, it must be kept in the possession of our Government as a protection in time of war. We have already shown how much of doubt exists regarding the first of these two propositions. But there is something to say also regarding the canal as a

war problem, even supposing it feasible as a commercial enterprise in time of peace.

If the completed Nicaragua Canal were to be held by the United States with such a purpose, the very first move of an opposing naval State, on the outbreak of hostilities, would be to seize the gateway to the canal. To provide against such an accident, it would be necessary to maintain at all times along the Central American coast a fleet at least as large as any which could be brought to bear by any other Power. Senator Turpie, who is himself in a measure favorable to the general notion of Government ownership, declares that the canal work "will be and must be armored. There will have to be a fleet or squadron at the Atlantic terminal and at the Pacific terminal; there will have to be batteries in defense on land at both of these terminals, and there are several places in the interior where the officers of the Government detailed to make inspection say that it will be necessary to keep a military force."

We do not know that the case could be more strongly put by the stoniest opponent of the theory of Government control. Great Britain paid down £3,976,582 in 1875 to buy from the Khedive of Egypt the controlling shares in the Suez Canal; it did this because the canal was built already with private capital, and because it had become the highway to British possessions in the Indies. The English Government was forced, in short, to control a situation which it had not created. It has been involved, as a necessary consequence, in frequent international complications and in enormous additional expenses. The present proposition is for the United States to create for itself precisely such a situation. We are unable to understand how existing circumstances can in the slightest degree warrant such a plan. Our country has for many years taken justifiable pride in its freedom from the burden of military expenditure in time of peace, which is crushing the European people. It is a singular theory which summons us, at this stage of our national career, to take voluntarily upon ourselves a heavy share of such burdens.

#### —THE DELAWARE & HUDSON REPORT.

Probably there has never been a time when an annual report of the Delaware & Hudson Canal Company has been awaited with greater interest, we might almost say with greater anxiety, than the present year. The action of the board of directors a few weeks ago in reducing the dividend from the basis of 7 per cent per annum to 5 per cent has not been the only cause for this. Since then there has been a train of unfavorable events. The management of the company, whose character, it would seem, ought to make it exempt from charges of intentional wrong-doing, has been accused of very reprehensible practices, and finally the announcement contained in our railroad columns last week that the New York & Canada, one of the company's leased lines, had in 1896 issued \$1,000,000 of debentures to repay advances made to it by the D. & H., has been given a wholly erroneous and unauthorized construction, and been used by operators for a decline on the Stock Exchange to further depress the price of the company's stock. The result is that shareholders to-day are left not only with part of their income cut off, but with a very great shrinkage in the market value of their investment, the price having dropped to 106½ this week against 121½ on

January 6. Not since 1893 has the stock sold so low as at present.

The call for information arising out of this situation makes desirable a more extended investigation and analysis of the company's affairs than is usual in reviewing an annual statement, and we have collected some special facts and data which will be helpful in throwing light on the status of the property.

The company's complete report for the year has not yet been issued. The statement now furnished is simply the preliminary abstract of the income account for the twelve months. This income statement is a pleasant surprise in showing results very much more encouraging than expected. The year 1896 was not only one of extreme and steadily growing depression in general trade, but it was an exceedingly unsatisfactory year also in the anthracite coal trade, upon whose condition the Delaware & Hudson, along with the other anthracite carriers, is so greatly dependent. The various hard-coal interests reached an agreement in January of that year by which the ruinous strife previously existing among them was discontinued. It was part of the plan that the companies should obtain better prices for their coal, and in pursuance of that policy circular quotations were advanced several times. But these advances were made only gradually, and they were not in all cases realized, as a considerable number of old contracts were outstanding and had to be filled at the previous low figures. Besides this, a rigid policy of restriction was necessary to hold prices up, so that even where the companies obtained more remunerative figures for the product the quantity disposed of was greatly reduced. Furthermore the expense of mining is proportionately heavier on a small product than on a large product. The benefits from the new plan ought to have come in the last half of the year with the mining of normal amounts of coal. But, as it happened, the great depression in all our industries which developed during these six months had the effect of curtailing very materially the demand for the staple, so that the companies suffered severely during this half-year too in their coal business. At the same time, as already stated, the bad times operated to reduce the volume of many classes of merchandise traffic carried over the lines of the D. & H. system. Altogether the year was a very poor one.

The income statement shows that in a year of such unfavorable conditions the property earned a little over 5 per cent on the 35 millions of stock outstanding. In exact figures the amount earned for the stock was \$1,765,013. This sum was derived entirely from the ordinary operations of the property. In 1895 the amount reported available for the stock was \$2,364,394, equal to a little over 6½ per cent. But this latter included an exceptional item of miscellaneous income, which added nearly \$600,000 to the year's total receipts. During 1895 \$800,000 of Rensselaer & Saratoga stock held in the treasury was disposed of, and through this sale the company realized a profit of between \$550,000 and \$600,000—that is, the stock when sold netted a sum which was that much in excess of what the stock originally cost. This profit (not the entire proceeds of the sale) was credited to the receipts from miscellaneous sources. The action of the company in making such credit has been adversely commented on, but in view of the fact that the profit actually accrued on the transaction, that it was not a mere marking up of

values on the books, the only thing, it seems to us, that can justly be said in criticism of the company's course with regard to it, is that the accounts were not given with sufficient detail to make the operation apparent at a glance. The aggregate of the miscellaneous income was reported at \$1,321,157 for 1895, against only \$755,074 for 1894, showing that the amount had been increased in some exceptional way. But as the sources of the miscellaneous income were not stated, the reason for the increase did not appear. We have always found the Delaware & Hudson officials ready to furnish information regarding the company's affairs, and it must also be said of them that they issue a much fuller report than some of the other leading anthracite companies; still we think it would be to the advantage of all these companies if they made their reports more comprehensive.

In 1896 there was no exceptional item of miscellaneous income and the aggregate of such income was only \$566,584, against the \$1,321,157 for 1895. It is the loss on this item that accounts for the fact that the surplus for the stock in 1896 was only 5 per cent, against nearly 7 per cent in 1895. In other words, on the ordinary operations of the road the result was about the same in the two years, 5 per cent roughly being earned in each. In 1895 the profit on the sale of the Rensselaer & Saratoga stock added enough to make the amount available for dividends nearly equal to the 7 per cent paid. In 1896 there was no such extraneous profit to swell the income, and as the ordinary results showed only 5 per cent earned, the management have decided to reduce the dividends to that figure. Thus the action in making the reduction rests on the deficiency (below the amount needed at the old rate of 7 per cent) in this one year. The company has in several years earned from 10 per cent to 13 per cent, and paid only 7 per cent, carrying the balance forward as accumulated surplus. This accumulated surplus, too, at the end of 1895 (we have not the figures for 1896) amounted to over 7 million dollars. By drawing on such surplus the 7 per cent dividends could of course have been continued, but the management have chosen not to adopt that policy, and whether their action shall prove to have been wise, or to have been ultra conservative, only the future, as we said in discussing the reduction in our issue of January 9th, can determine. Perhaps in view of the fact that the company has a small floating debt, as we shall presently show, it was best to err on the side of being too conservative.

Owing to the criticisms that have been made upon the property it will be useful to extend the analysis of the income accounts somewhat further. A comparison for a series of years reveals some striking features, and to bring these out we have prepared several interesting tabulations going back as far as 1879. First, we present a statement showing the sources of the gross receipts for each year since 1879, as follows. The table is arranged so as to indicate the revenue from coal, meaning the gross receipts from sales of coal; the revenue from the railroads, meaning the earnings derived from the transportation of both passengers and freight, including coal, over the lines in the D. & H. system; and the miscellaneous income, meaning the revenue from other sources.

Years.	From Coal.	From Railroads.	Miscellaneous.	Total.
1879.....	\$7,041,477	\$1,744,503	\$150,000	\$8,935,980
1880.....	8,052,318	2,402,067	448,609	10,899,994
1881.....	8,052,318	2,402,067	448,609	10,899,994
1882.....	8,052,318	2,402,067	448,609	10,899,994
1883.....	8,052,318	2,402,067	448,609	10,899,994
1884.....	8,052,318	2,402,067	448,609	10,899,994
1885.....	8,052,318	2,402,067	448,609	10,899,994
1886.....	8,052,318	2,402,067	448,609	10,899,994
